The University

Northeastern Illinois University is a fully accredited public university serving the Chicago metropolitan area. Total graduate and undergraduate enrollment is approximately 8,000. In addition to offering traditional programs in the arts, sciences, business, and education, Northeastern has a strong commitment to innovative, non-traditional education and has been a leader in the development of special programs for adult learners.

Faculty

Northeastern employs approximately 385 full-time and 110 part-time faculty who are committed to excellence in teaching. Their varied academic backgrounds and professional accomplishments provide students with many learning opportunities.

Accreditation

Northeastern Illinois University is accredited by the Higher Learning Commission of the North Central Association, 230 South LaSalle Street, Suite 7-500, Chicago, Illinois 60604, telephone number (800) 621-7440.

In addition, Northeastern is accredited through these disciplinary bodies:

- National Association of Schools of Music (<http://www.nasm.arts-accredit.org/>)
- National Association of Schools of Art and Design (<http://www.nasad.arts-accredit.org/>)
- Council on Social Work Education (<https://www.cswe.org/>)
- National Council for Accreditation of Teacher Education (<https://www.chea.org/national-council-accreditation-teacher-education/>)
- Council for Accreditation of Counseling and Related Educational Programs (<http://www.cacrep.org/>)
- Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

If you have questions regarding accreditation at Northeastern Illinois University, please contact the Office of Institutional Research and Assessment at (773) 442-4890.

Baccalaureate Goals

NEIU Baccalaureate Goals

Northeastern Illinois University prepares a diverse community of students for leadership and service in our region and in a dynamic multicultural world. This is achieved through pursuit of the following goals:

1. Intellectual and Practical Skills

- Inquiry, evaluation and analysis
- Critical and creative thinking
- Written and oral communication proficiency
- Original design and artistic performance
- Quantitative literacy
- Information literacy and research skills
- Technological fluency
- Teamwork and problem solving

2. Immersion in Disciplines and Fields of Study

- Knowledge of human cultures and the physical and natural world
- Mastery of different modes of knowing and integrative learning in a student's major, with a broad awareness of other areas of study
- Ability to synthesize general and specialized studies both within and across disciplines
- Use of classroom knowledge to identify and engage big questions, as well as the practical issues of everyday life

3. Learning within the Framework and Resources of NEIU

- Integration of knowledge through internships, volunteerism, service learning, student teaching, applied research and writing, creative work and performance, etc.
- Engagement at the personal and community level
- Application of local and global civic knowledge
- Understanding and appreciation of the complexities of individual identities
- Intercultural knowledge and competence

These goals promote intellectual development and mastery of knowledge across the curriculum. The experiences of applied learning and engaging diversity foster life-long learning, social responsibility and ethical professionalism in the NEIU graduate.

Campus Locations

Northeastern Illinois University believes in access to opportunity. We offer a variety of classes and degree-granting programs at our campus locations. Enrollment, financial aid and academic support services are offered at most of the locations.

Northeastern Illinois University (Main Campus)

El Centro

3390 N. Avondale Ave
Chicago, IL 60618

University Center of Lake County

1200 University Center Dr
Grayslake, IL 60030

History

History of the University

Northeastern Illinois University traces its origin to the beginnings of teacher training in Illinois. Founded in September, 1867 in Blue Island as the Normal School, Cook County's first teacher training school, the institution has evolved into the comprehensive university that it is today. Its main campus, located at 5500 North St. Louis Avenue, opened in 1961 and was then called, Chicago Teachers College North.

In 1961, total enrollment was 1,348 students, who pursued Bachelor of Arts or Bachelor of Science degrees although the major concentration was primarily in education. Throughout the 1960s, enrollment increased, programs were expanded, and the institution's mission broadened. In 1971, with a total enrollment of approximately 7,000, the college became Northeastern Illinois University.

Today, the 67-acre main campus is an attractively landscaped urban oasis near the north branch of the Chicago River. Its location eight miles northwest of downtown Chicago, only 20 minutes from O'Hare Airport, and convenient to expressways and public transportation, makes it an ideal campus for commuter students.

The main campus consists of 18 modern buildings of more than 1,000,000 square feet. Instruction is supported by technology-enhanced as well as conventional classrooms, a modern four-story library with access to local, regional and Internet resources and a wide assortment of traditional and computer laboratories. A redesigned Student Union, a modern Physical Education Complex and a state-of-the-art Fine Arts Center, containing both academic and performance space, complete the opportunities for students to attain an excellent, well-rounded education. Satellite campuses El Centro, the Jacob Carruthers Center for Inner City Studies, and the Multi-University Center in Lake County enhance the University's ability to serve the entire metropolitan area.

Northeastern is a 21st-century learning community that is richly diverse in ethnicity, culture, age, and language with a strong commitment to raising global awareness and understanding. Northeastern provides a high quality, affordable education through low tuition as well as scholarships and financial aid opportunities for both full- and part-time students.

Mission, Vision, and Values

Mission

Northeastern Illinois University, as a public comprehensive university with locations throughout Chicago, provides an exceptional environment for learning, teaching, and scholarship. We prepare a diverse community of students for leadership and service in our region and in a dynamic multicultural world.

Vision

Northeastern Illinois University will be a leader among metropolitan universities, known for its dedication to its urban mission, for the quality of its programs, for the success of its graduates, and for the diversity of its learning environment.

Values

Northeastern Illinois University is committed to a set of shared values that, taken collectively, guides our actions and interactions as we work together to prepare graduates for the responsible exercise of citizenship. We, the NEIU community, believe it is critical for our democracy to create a space in which the commitment to these values results in a thriving educational community that transforms the lives of all. As we take stock of the present and look to the future, these values serve as the touchstone for planning how we will best achieve the educational mission entrusted to us.

Integrity

NEIU is accountable to those we serve and to those from whom we receive support. We are committed to honesty, respect, and transparency in our words and our actions. In that regard, we work to be good stewards of the resources we are entrusted to use. This includes human, physical, fiscal, and environmental resources.

Excellence

In our pursuit of and commitment to excellence, we value the highest quality of learning and teaching, scholarship, and service. We value opportunities and experiences that support personal and professional development for all members of our community. In all that we say and do, we are committed to the process and products of excellence.

Access to Opportunity

NEIU values access to opportunity; we value a welcoming environment that provides appropriate support as well as encourages mutual responsibility for and commitment to learning.

Diversity

NEIU values the inclusion of a broad spectrum of students, staff, and faculty in the life of the University. We celebrate and foster global perspectives. We encourage the open and respectful expression of ideas and differences in thoughts, experiences, and opinions.

Community

As a commuter institution, NEIU has a special obligation to provide an environment that is supportive, nurturing, and participatory. Such an environment is characterized by civility, fostering humanity and engagement, and creates a sense of community through inclusion, mutual respect, and empowerment. NEIU values our metropolitan setting as a laboratory for learning, and we foster partnerships for learning, research, and service throughout this dynamic region to promote the public good.

Empowerment Through Learning

NEIU is dedicated to creating a culture that provides life-long learning opportunities for all members of the University community. We are especially committed to transforming students' lives by engaging them in an educational experience that empowers them to graduate with the skills and knowledge to effectively participate and lead in personal, professional and civic realms.

Organization of the University

ORGANIZATION OF THE UNIVERSITY

The State of Illinois established the Board of Trustees for Northeastern Illinois University in January of 1996. The Board shall have all of the powers and duties specified in 110 ILCS §680/25-1, 1001 et seq.; 110 ILCS §615/14; and 110 ILCS §681/26-1, et seq. of the Illinois Revised Statutes. The Board consists of 9 Illinois residents appointed by the Governor and 1 student elected by the student body.

The President of the University is accountable to the Northeastern Illinois University Board of Trustees for the administration of the institution and has full power and responsibilities within the framework of board policies for the organization, management, direction, and supervision of the University.

Please visit www.neiu.edu/about/board-trustees (<http://www.neiu.edu/about/board-trustees/>) for more information.

BOARD OF TRUSTEES

Jim Palos, Chair

Sherry Eagle, Vice Chair

Jonathan Stein, Secretary

Carlos M. Azcoitia

Barbara Fumo

Marvin Garcia

Ana Kalayil

Charlie Serrano

George Vukotich

Student Trustee

President's Office

Gloria J. Gibson, Ph.D., President

The President is assisted by the Provost, who also serves as one of five vice presidents (Academic Affairs, Finance and Administration, Institutional Advancement, Student Affairs, and Legal Affairs and General Counsel).

Under separate constitutions, faculty and students participate in the governance of the University through the Faculty Senate, Student Government, and by membership on various standing and ad-hoc committees that consider and recommend policies and procedures to the president.

THE FOLLOWING OFFICES REPORT TO THE PRESIDENT

Division of Marketing and Communications

Through its relationships with the news media, businesses and organizations, and the community at large, this office helps raise awareness about the University locally, nationally and internationally. By promoting the accomplishments of the faculty, staff and students--as well as the University as a whole--the office builds the University's reputation in alignment with its core values.

Government Relations

The Executive Director of Government Relations is the University's designee for communicating with elected officials regarding the University's present and future institutional plans, activities, concerns, and positions pertaining to pending legislation, and also serves as the main point of contact for legislative interest in the University.

Enrollment Services

Enrollment Services

Daniel Weber, M.S.Ed., Interim Associate Vice President for Enrollment Services, and University Registrar
Maureen Amos, M.A., Executive Director of Financial Aid, Scholarships, and Student Employment
Steven Pajak, B.A., Associate Director for Admissions Review and Processing
Rene Quinonez, B.S., Associate Director of Student Information Systems
Cris Toffolo, Ph.D., Interim Director of International Programs
LaMont Vaughn, B.S., Executive Director of Undergraduate Admissions
Robert Wiedmann, M.Ed., Coordinator of Graduate Recruitment

Enrollment Services provides assistance to new, returning, and current students regarding admissions, new student orientation, financial aid and scholarships, student employment, records and registration, international programs, and veterans benefits. The area strives to provide exceptional customer service to students, faculty, and staff. We provide services to support all phases of the student's life cycle and contribute to the student's success.

Academic Affairs

Dennis M. Rome, Ph.D., Provost and Vice President

Reporting to the President, the Provost is responsible for instruction, academic programs and academic support services. Academic programs are offered through the Colleges of Arts and Sciences (<http://catalog.neiu.edu/arts-sciences/>), Daniel L. Goodwin College of Education (<http://catalog.neiu.edu/education/>), College of Business and Technology (<http://catalog.neiu.edu/business-management/>), College of Graduate Studies & Research, and Ronald Williams Library. In addition, Academic Affairs is administratively responsible for the following programs:

- Advising Center
- Center for Academic Writing
- Center for College Access and Success
- Center for Teaching and Learning
- Child Care Center
- Community and Professional Education (CAPE)
- El Centro
- First Year Experience
- International Programs
- Institutional Research and Assessment
- Jacob H. Carruthers Center for Inner City Studies
- Learning Success Center
- Math & Science Concepts Minor (MSTQE)
- New Student and Family Programs
- Nontraditional Degree Programs
- Orientation
- Placement Testing
- Project Success
- Proyecto Pa'Lante
- Student Success and Retention
- Summer Transition Program
- TRIO Student Support Services
- University Center of Lake County
- University Honors Program
- Wentworth Scholars Program

Academic Advising Center

Academic Advising Center

Jamie N. Riess, Ph.D., Director
Lech Walesa Hall, LWH-0027
(773) 442-5470

The Advising Center provides academic advising to all degree-seeking undergraduate students who have not declared a major. This encompasses Wentworth Scholars, General Admit, Transfer, and Re-Admit students. Students continue to work with an advisor from the Center until they declare a major, at which point the major department will assign a major advisor.

The Advising Center promotes student success by providing students with the information, guidance, and support they need to develop and achieve their academic goals. Advisors assist students with interpretation of placement test scores, course selection, registration, academic planning, general education requirements, major selection, graduation requirements, and interpretation of University policies and procedures.

Jacob H. Carruthers Center for Inner City Studies

Andrea E. Evans, Ph. D., Director

Northeastern Illinois University's Jacob H. Carruthers Center for Inner City Studies demonstrates the University's urban tradition of education, research and service.

The Carruthers Center for Inner City Studies (CCICS) is located at 700 East Oakwood Boulevard in the heart of Chicago. CCICS was established by Northeastern Illinois University in 1966 as an outgrowth of its concern for and commitment to Chicago's inner city communities. Since its inception, CCICS has focused on the analysis of institutions, systems and people with a direct impact on the quality of life in the inner cities of the U.S. and elsewhere in the world by creating programmatic and research initiatives.

The curricular thrust of the undergraduate and graduate programs of CCICS is to prepare those who work and live in the inner city to understand and act upon the expressed interests of residents of the inner city and to participate fully in the richness of the African and African-American cultures. Since the beginning, the approach has been interdisciplinary with effective curricula and a philosophy which re-examines every research issue, problem, assumption and question from an African-centered perspective, rather than from the traditional, European-centered viewpoint. This discipline encompasses a research methodology and world-view which achieve different results when applied to present day inner city populations, and leads to new relationships between human and natural resources in the Chicago metropolitan area and world-wide.

CCICS offers courses from the College of Arts and Sciences that fulfill the General Education Program Requirements. In addition, students can pursue a BACHELOR'S OR MASTER'S DEGREE IN URBAN COMMUNITY STUDIES. For course listings and descriptions, please refer to the GOODWIN COLLEGE OF EDUCATION under Urban Community Studies.

The CCICS branch of the Ronald Williams Library houses an extensive resource center on African American issues. In addition, it contains master theses of CCICS graduates documenting a multitude of African-Centered research and studies compiled on politics, education, and history of the culture of African-Americans since the late 1960s through 1990.

CCICS has a computer lab that provides online access to the main campus, the Internet, and libraries around the world. A live, interactive Distance Education classroom connects CCICS with the main campus of Northeastern. The use of distance education provides students on both campuses with many educational opportunities.

Academic counseling, financial aid counseling, and registration assistance are available to CCICS students. The Summer Bridge Program is designed to enhance the skills of entering freshmen and returning adults. The program focuses intently on students' study habits, writing skills and preparedness for successful completion of their selected degree program.

Seminars are offered to schools, community organizations, businesses and social services agencies to facilitate and improve communications and understanding of the African-American culture. Seminars are scheduled by request. CCICS makes available its facilities to not-for-profit organizations that promote the growth and development of the individual, community and services. CCICS also provides other educational services in cooperation with community institutions and organizations.

Center for Academic Writing (CAW)

Kate Hahn, Ph.D., Executive Director

The Center for Academic Writing, located in the Ronald Williams Library, is the home of the Writing Intensive Program (WIP). CAW offers workshops and consultations to departments, faculty, and instructors who are developing and teaching WIP courses or who are interested in integrating writing into any course. CAW also supports students enrolled in WIP courses through the WIP peer tutor program. More information is available by visiting the CAW webpage (<https://www.neiu.edu/caw/>) or by contacting CAW by phone at (773) 442-4492 or by email at caw@neiu.edu (mk-hahn@neiu.edu).

Writing Intensive Program (WIP)

The Writing Intensive Program is comprised of undergraduate courses across the curriculum that fulfill NEIU's writing intensive graduation requirement. Undergraduate students must successfully complete a writing intensive (WIP) course of at least 3 credit hours within their discipline in order to graduate. Please see the text of this requirement under Bachelor's Degree Graduation Requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>) in this catalog.

Students should speak with their advisor to confirm which course(s) will fulfill the WIP graduation requirement for their major. WIP courses are content courses that are designed to help students master the course content, learn about writing in their chosen discipline, and improve their writing skills.

CAW supports students enrolled in all WIP courses at all NEIU locations. WIP peer tutors are hired and trained by CAW to provide support to WIP students. Students should speak with the instructor of their WIP course and/or contact CAW for information about WIP student support. Information is available on the CAW webpage (<http://www.neiu.edu/academics/center-academic-writing/>) or by contacting CAW by phone at (773) 442-4492 or by email at caw@neiu.edu.

The list below is a *sample* of WIP courses offered across the curriculum. Students should review the program requirements for their major and speak with their advisor to determine which WIP courses will fulfill the graduation requirement.

Center for College Access and Success

Founded in 1978, the *Center for College Access and Success* (CCAS) is the largest school improvement organization in Chicago. We serve diverse communities in metropolitan Chicago and nearby urban centers. Our goal is to create a college-going culture where students develop the skills they need to apply, transition, and eventually graduate from college.

If you are an alumnus of any of our College Bound programs (GEAR UP, Talent Search, Upward Bound and Upward Bound Math and Science), be sure to check in with your advisor regarding TRIO Student Support Services and other activities, scholarships, and incentives offered on the main campus to help with your successful transition to Northeastern Illinois University.

A Unique Role

The *Center for College Access and Success* is in the unique position of connecting research, innovative programming, and educational funding priorities. We collaborate across the University to create programs for students that increases access to postsecondary education, and improves retention and success. The Center implements these programs in pre-K-12 schools supported by grants from local, state, and federal agencies, private foundations, and corporations.

Preparing for Success

All *Center for College Access and Success* programs are focused on aspects of *Preparation, Readiness, Access, and Success* as a formula for success in education, career and life. We use innovative and research-based strategies that motivate students to become academically prepared, increasing their potential for successful futures.

A Leader in Programs and Resources

For the last 42 years, the Center has demonstrated an exemplary record in student outcome improvement. We are helping to expand the university's participation in the national dialogue about first generation, low-income college goers.

Approaches That Work

The *Center for College Access and Success* brings together teachers, parents, administrators, and staff from community agencies, universities, arts and cultural organizations, and businesses to share knowledge and resources. The Center is successful because we are able to work with all of the stakeholders that create a college-going culture in homes, schools, and communities.

Programs areas include: College Readiness and Access, College Success Support, Out-of-School Time, Parent and Family Engagement, STEM Initiatives, and Professional Development for teachers, administrators and other school and community staff.

For more information, visit our website Center for College Access and Success (<http://www.centerforcollegeaccessandsuccess.org/>)

Center for Teaching and Learning (CTL)

Sandra Beyda-Lorie, Ph.D., Executive Director

The Center for Teaching and Learning (CTL) promotes a community of shared excellence and innovation focused on the enhancement of student learning. The CTL offers guidance and support for faculty on instructional design and teaching methods appropriate for face-to-face, hybrid, remote and online learning environments. CTL professionals are dedicated to working with instructors, departments and programs to generate new ideas, engage in critical reflection, share best practices, and implement equity-minded and inclusive teaching approaches.

The CTL provides workshops, educational software training, instructional design templates, guidance documents and other resources, as well as individual consultations for faculty members requesting our services. Non-credit, professional development courses for faculty teaching in the virtual environment, and support for the use of the learning management system, Desire2Learn, is also offered.

Additional information is available by visiting the CTL webpage (<https://www.neiu.edu/academics/academic-affairs/center-teaching-and-learning/>) or by contacting the CTL via email at ctl@neiu.edu.

Child Care Center

<http://www.neiu.edu/university-life/child-care-center> (<http://www.neiu.edu/university-life/child-care-center/>)

CHILD CARE CENTER

The Northeastern Illinois University Child Care Center, located on the south end of campus, provides for the care of children ages 15 months to 5 years. The center operates Monday through Friday, from 7:00 a.m. to 6:00 p.m. Half and full day sessions are available. Licensed by the State of Illinois, Department of Children and Family Services, the program offers quality early childhood education by utilizing the best accepted methods and principles of child care.

El Centro

María E. Luna-Duarte, Ph.D., Director

María Rebeca Lamadrid-Quevedo, M.A., Assistant Director

For more than 50 years, El Centro, Northeastern's Avondale location, has provided students from diverse communities with the academic support they need to achieve their goals. El Centro's urban, student-friendly setting offers general education courses in addition to four majors: **Special Education, Computer Science, Justice Studies and Social Work**. Students from all backgrounds and lived experiences are welcome at El Centro.

El Centro staff assist prospective students and their families to understand the admission and financial aid processes to help them get started on their academic journey at Northeastern. El Centro provides comprehensive academic support and co-curricular programs for first year and transfer students.

The **El Centro Scholars Cohort Program** is unique in that it provides first-year students with a comprehensive college experience in a cohort setting, ensuring their success. With the support of El Centro's caring staff, students spend their first year of college at El Centro as they complete their general education courses.

To ensure our students achieve their academic goals, El Centro advisors offer services with a holistic approach to support students in their educational endeavors. Students receive one-on-one assistance from the moment they choose to become a part of El Centro.

For more information contact Northeastern Illinois University El Centro at 3390 North Avondale, Chicago, Illinois 60618. Telephone: 773-442-4080; Fax: 773-442-4085.

Web: <https://www.neiu.edu/academics/el-centro>

First-Year Experience (FYE)

Vicky Byard, Ph.D., Coordinator of the First Year Experience
 LWH 2017
 (773) 442-5815
 V-Byard@neiu.edu

The First-Year Experience (FYE) is a program for new students in their first year of study. The five facets of the overall program are as follows:

- **Transitions** – to assist first-year students in adjusting to the university environment academically, behaviorally, and socially;
- **Inquiry** – to facilitate students' general academic preparation by adding a practical component to classroom work through research, civic engagement, service learning, or some other field component.
- **Readiness** – to prepare students for academic achievement that spans across the curriculum in terms of the development of critical thinking skills, as well as improved written and oral expression.
- **Self-Discovery** – to enable first-year students to discover their own path toward understanding their place in the university and the wider community; and
- **Future Planning** – to help first-year students understand how all their coursework can prepare them for their future and what kinds of careers can result from their chosen majors and/or minors.

These five facets are addressed through both the curriculum and the co-curriculum under the general theme, "Diversity in Chicago."

The curriculum is comprised of the FYE Colloquium, which is a series of courses designed specifically for first-year students (see listings below). All courses in the FYE Colloquium series:

1. Bear the number "109";
2. Carry credit toward one General Education Program requirement in the specified disciplinary area (i.e., fine arts, humanities, natural sciences, or social sciences);
3. Contain a field component (i.e., a graded part of the course that connects the city of Chicago with the content, thus making the city a laboratory for students); and
4. Count for 3 credits toward graduation.

A Freshman Colloquium course must be taken during students' first year of study at Northeastern Illinois University. Students are encouraged to select the course that interests them most, since they will not be eligible to take more than one FYE Colloquium.

The co-curriculum is a series of events, activities, and services available to students outside of their classes. Students may be required to participate in some co-curricular events and activities for credit at various times throughout the academic year in partial fulfillment of their assignments for the FYE Colloquium. Check with the course instructor for details.

For other information relevant to the first-year experience, students are referred to the FYE website at <http://www.neiu.edu/academics/first-year-experience> (<http://www.neiu.edu/academics/first-year-experience/>).

Course Offerings

AFAM-109. First Year Experience: Exploring Africa In Chicago. 3 Hours.

The Exploring Africa in Chicago course is designed to provide first year students with a brief overview of the African continent, and an opportunity to understand the rich and varied diversity of Africa and its peoples. Using Chicago as a lab, students will use standard research methods, library databases, websites, readings, speakers, films, and field experiences to discuss the rich heritage of African culture, music and arts, the continent's geography, pre-colonial and colonial history, oral and written history, its languages and ethnicity, the family systems, and political, economic, and democratic systems. Students will be encouraged to get out of the classroom and into various communities and institutions in the Chicagoland area, seek out individuals of African descent in academia, healthcare, business, industry and other professions, and use standard interview techniques to critically examine their contributions to the city of Chicago, to the United States, and to the world.

ANTH-109B. First Year Experience: Skeletons In Chicago's Closet. 3 Hours.

Bones hold an enormous amount of information about individuals and populations. This active class investigates what can be learned from bones and teeth in the context of forensic anthropology, bioarchaeology, and paleobiology. We will start by learning the bones of the skeleton and move on to identifying age, sex, trauma, etc., in forensic and archaeological contexts. Finally, we will look at fossil bone and what it can reveal about past life. Students will work with bones and models in lab, complete group and individual projects, and will learn and apply useful techniques for college success. First year students only.

ANTH-109C. First Year Experience: Skin Of Chicago. 3 Hours.

We wear about 9 lbs. of it every day, but we take most of its functions, adaptations, uses, and subtle cultural signals for granted. Skin is something everyone should know inside and out. For anthropologists, skin is a place where issues of biology, comparative anatomy, culture, evolution, archaeology, tradition, taboo, ritual, art, diversity, and race all come together. An understanding of human skin helps to turn over the judgments people make about others based on skin color. Using Chicago as a field laboratory, we will discover the wonders of skin, ever mindful of how we fit inside our own.

ART-109. First Year Experience: Art, Architecture And Urban Design In Chicago. 3 Hours.

This field-based course explores art in an urban environment, examines the relationships between art and urban culture, and considers the role of art in an urban setting. Students will gain a familiarity with Chicago as a cultural home; they will evaluate the role of public art in Chicago, examine the design and purpose of open spaces, and gain a familiarity with the Chicago school of architecture.

BLAW-109. First Year Experience: Professionalism, Ethics, Law & Chicago Scandals. 3 Hours.

This course examines the intersection between professionalism, ethics and law from a business perspective. We will look at these issues through the lens of major business-related Chicago scandals, predominantly non-political, and we will take multiple trips to visit some of the actors involved in these scandals, such as judges, lawyers and businessmen, who will further inform students about the importance of professionalism, ethics and compliance with laws. The topics covered in this course include defining professionalism, comparing professionalism to ethics, critically evaluating the differences and the importance of both, and discussing the legal process as it applies to white collar crimes.

CMTM-109A. First Year Experience: Chicago On Video: One Pixel At A Time. 3 Hours.

In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the field-specific concepts and terminology of video production. Students in this dynamic, hands-on class will turn the lens on other students engaged in hands-on learning....producing children's theatre, testing water samples, conducting fieldwork, examining issues of social justice... and get a taste of both documentary production and advanced undergraduate coursework at NEIU. Students will also get to explore uses of video at the community level - from high school students covering sports events, to local immigrants keeping their cultural ties alive.

CS-109. First Year Experience: The Information Age: Its Impact On Chicago's Culture. 3 Hours.

The 21st century has seen the genesis of the Information Age. Advances in computer technology have made immediate access to information and sophisticated processing of information commonplace in business, science, medicine, education, various professional areas and many aspects of personal life. This course focuses on how this has impacted Chicago's culture and its diverse communities. This course fulfills the First Year Experience (FYE) requirement. FYE-109 courses are intended for Freshmen only. Students may not take more than one FYE-109 course.

DANC-109. First Year Experience: Steppin' Out: Dance In Chicago. 3 Hours.

A course designed to increase the student's awareness, understanding and enjoyment of a variety of styles of aesthetic/theatrical dance. The course incorporates both movement and non-movement based approaches to learning about dance as an art form, and will focus on learning about ballet, modern, jazz and ethnic dance through lectures, discussions, films, the attendance of outside performances, and written assignments. In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the field specific concepts in dance.

ECON-109. First Year Experience: Money Matters: The Chicago Economy. 3 Hours.

This course is designed to provide students with an introduction to surviving in the Chicago economy. The five foundations of the First Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the introductory field-specific concepts and terminology of economics. Students will be introduced to economic and financial literacy while learning what makes Chicago one of the greatest economic engines in the world. Students will examine the Chicago economy and collect data on major economic sectors in Chicago today with an eye on what it will take for workers, households and businesses to succeed in Chicago's future.

EDFN-109. First Year Experience: Schooling Chicago: Communities, Public Education And Change. 3 Hours.

This course analyzes education in and outside Chicago Public Schools as a key social institution that both influences and is influenced by the larger society. You will be introduced to a wide array of topics and case studies that elaborate on the embeddedness of classrooms and schools in social environments across Chicago. This course will span a variety of school processes such as curricular differentiation, social and economic reproduction, voluntary associations (extra-curricular clubs, parent organizations), social groupings and peer influence. Particular attention is paid to questions about the relationship between social stratification and education. For example, how is the structure, content and funding of schools across Illinois affected by wider social and political conflicts? Does educational attainment affect an individual's economic status? Does education promote social equality? This course will introduce students to use of new information technologies in k-12 education.

ELAD-109. First Year Experience: School's Out: Chicago's Bouquet Of Nontraditional Educational Programs. 3 Hours.

Chicago is renowned for its world class museums, music, theaters, gardens, zoos, and other attractions. From the Museum of Broadcasting to the Art Institute- all of these institutions have educational programs open to the citizens of Chicago. Explore then via internet, interviews, guest presenters and field trips. Open your mind to the diversity of learning and teaching opportunities available outside of school in our city. This course will enable you to: Gain an appreciation of many of these programs, Raise your awareness of the various fields of knowledge involved, Use findings to create written, oral and electronic presentations about these programs, Sharpen your research, writing and thinking skills, Probe your career opportunities, and Expand your horizons and creativity.

ELED-109. First Year Experience: Building Chicago One Teacher At A Time. 3 Hours.

In this course the five foundations (Future Planning, Integral Preparation, Research, Self-discovery, and Transitions) of Northeastern's First-Year Experience program are taught alongside an introduction to content specific to the discipline of Teaching of Elementary Education. Introduction to Chicago schools, communities, and diverse student population as well as curricular models, school structures and best practices in teaching.

ENGL-109A. First Year Experience: Chicago's Literary Diversity: Reading The Neighborhoods. 3 Hours.

This course explores how literary Chicago enters into discourses on race and ethnicity in twentieth century literature. Beginning with Great Migration, students sample literary history produced by people who settled or passed through Chicago. Writers have used Chicago as a setting for major works and sociological studies have attempted to focus on Chicago's neighborhoods and how they were formed as a result of immigration from other countries and migration from the American South. The course examines several works from popular perspectives, fiction, autobiography, journalism, humor, folktales, cultural criticism and regional studies to reach a better understanding of the city.

ENGL-109B. First Year Experience: Reading And Writing The Literary And Political Landscapes Of Chicago. 3 Hours.

From the Haymarket "riot" of 1886 to the Pullman Strike of 1894 to the Black Sox scandal of 1919 to the trial of Abbie Hoffman and the Chicago Seven in the aftermath of the Democratic Convention of 1968, Chicago has, to say the least, a colorful and quite literally, explosive political history. As with any major urban center in the United States, Chicago bears the historical scars and contemporary fruits of vibrant and violent class conflict, labor insurgencies, racial strife, immigrant struggles, and activism for social justice. Part and parcel of this historical legacy is a rich spate of cultural production that attempts to comprehend this past in those historical moments and in our contemporary era.

ENGL-109C. First Year Experience: Drama And Diversity In Chicago. 3 Hours.

In this class, we will analyze and experience Chicago theater. By emphasizing theater that challenges social cultural norms, we will consider how drama works to create and define diverse urban communities and how it offers alternative visions to the status quo. This class will emphasize writing and reading about drama, interviewing theater personnel and taking notes on actual theater performances, and relating art to social and political diversity. We will attend 3-4 performances during the course of the semester.

ENGL-109D. First Year Experience: Windy City Words: Ethnolinguistic Chicago. 3 Hours.

This course integrates the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-Discovery, and Transitions) with concepts from the study of literacy and language. Using the city as a field site, students actively explore the linguistic and cultural diversity of Chicago through independent research, readings, online resources, speakers, and other experiences.

ENGL-109E. First Year Experience: Your Chicago: Write On!. 3 Hours.

This course interweaves foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery, Transitions) with specific concepts of creative writing. Explore and experience Chicago's vibrant cultural scene while cultivating literary culture in class. Students study their local literary heritage reading, analyzing, and discussing works of classic and contemporary Chicago authors and attending and annotating literary readings at local bookstores and cafes; experimenting with a range of writing exercises, prompts, and assignments, students will craft their own stories, recognize their unique writing process, and learn techniques to revise and polish their prose, culminating in a student reading.

ESCI-109. First Year Experience: Chicago Rocks! Geology In The City. 3 Hours.

Chicago has been at the bottom of the sea, buried under a mile of ice, and set in a warm, tropical paradise. Such diverse changes have shaped Chicago and the surrounding region, including the lake, the rivers, the ground we walk on (and build on), and the decisions we make about land use, resources, and waste management. Explore Chicago Rocks - as well as water, weather, and land forms - in the context of current issues related to resource use and the environment. Field trips and hands-on experiences highlight the extent to which geology influences the character of the Chicago area.

ESCI-109W. First Year Experience: Chicago's Muddy Waters- Environmental Geology. 3 Hours.

Chicago's vital bodies of water - Lake Michigan, Chicago River, and others - interact with the urban landscape and the soils and rocks of the ground beneath. Such interactions influence environmental issues in everyday life, including "What happens when water goes down the drain?" and "Why do certain areas flood after it rains?" These questions are explored in the context of Chicago's geology, to evaluate the critical factors affecting soil and water contamination, flooding, and our drinking water. Laboratory analysis of water and soil, collected on local field trips, will clear the 'muddy water' about environmental geology impacts in local neighborhoods. (Lecture 2 hr., lab 2 hr.).

GES-109A. First Year Experience: Global Chicago. 3 Hours.

This First Year course provides a broad overview of the Chicago metropolitan area in the global context and within the framework of urban geography. Students will explore Chicago as a hub in the global economy and the many ways in which global forces have impacted the region.

GES-109B. First Year Experience: Humans And The Chicago Environment. 3 Hours.

Students will explore the relationships between human settlement and the natural environment in the Chicago metropolitan area including local environmental problems, their causes, and their possible solutions. Issues such as waste disposal, recycling, brownfields, suburban sprawl, air and water pollution, water supply, flooding and drainage, invasive species, and urban parks are investigated with classroom discussion. Some field trips are possible.

HIST-109. First Year Experience: History Of Chicago. 3 Hours.

Chicago is the most "American" of the major cities and has been at the forefront of change. In 50 years Chicago transformed from a fur-trading crossroads to a major industrial center, and that speed made it a city of stark contrasts. Enormous tensions emerged between the entrepreneurial forces that built the city and the countervailing social forces that strived to humanize it. A stream of immigrants played an integral role in shaping the city, contributing to economic and cultural development. Chicagoans faced huge challenges and as a result became pioneers of the economic, social, and political trends that shaped modern America.

JUST-109. First Year Experience: Justice In Chicago. 3 Hours.

Using Chicago as a lab, students will experience justice in many forms, from courthouse visits and artistic expressions, to discussions with attorneys, judges, and formerly incarcerated persons. In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the introductory concepts and terminology of the criminal and social justice systems to provide first-year students with an opportunity to critically examine social injustices in institutions and social structures through a critical lens.

LING-109. First Year Experience: Language And Diversity In Chicago. 3 Hours.

Hands-on research, using Chicago's rich diversity of languages in contact as a laboratory, will enable you to understand the mechanisms, dynamics and manipulations of language and language use. Students will explore the following questions: What is language? What makes it universal? What makes it unique? How can it be used as a tool? How does it unite or divide? What is language contact and how does it affect you? What is the relationship between language and identity? What is language diversity and what brings it about? How does an awareness of language make you a stronger, more confident communicator?.

LLAS-109. FYE: Art, Thought, And Revolution In Chicago. 3 Hours.

An introduction to the cultural life of Chicago Latino youth with its regional differences with key themes/symbols and cultural norms created by the historical interaction between Latinos and American society as expressed in literature, art, music, and folklore. Attention will also be given to change and continuity in Latino cultural norms on the basis of historical events. This class explores the history of art and its role in the civilizations from Modernism, the Mural Renaissance and the Civil Rights Movement. Using the rich artistic legacy of this area, the class examines the way art functions across borders and how borders have been constructed, debated and lived through in the art of the past.

MUS-109. First Year Experience: Chi-Tunes: Music In Chicago. 3 Hours.

In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the field specific concepts and terminology of music. This course is designed to increase the first year student's awareness, understanding and enjoyment of a variety of musical styles through attending live performances. Students will learn the basics of reading and writing music, music history, and music's place in society and culture through pre and post concert discussions.

PEMT-109. First Year Experience: Chicago Body Works. 3 Hours.

This course will give students a comprehensive and practical view of the importance of fitness and nutrition in their daily lives. Students will be engaged in activities that they can participate in for life. They will learn the underlying fundamentals of a fit for life attitude. Each student will be provided with the knowledge and understanding of how to assess their current level of fitness and how to make improvements in the five health-related fitness component areas (cardiovascular fitness, body composition, flexibility, muscular strength and muscular endurance) through various physical and skill related activities. Also emphasized will be the importance and application of proper nutrition. A strong focus will be the multifaceted and diverse challenges faced by individuals committed to pursuing wellness in Chicago.

PEMT-109B. First Year Experience: Adventure In Chicago. 3 Hours.

This course is a hands-on experiential based approach to learning about and using cooperative learning, teams, challenge and adventure education, simulations and debriefing processes to create positive learning environments that promote engaged active learning. The course will focus on themes of self-knowledge, diversity, dealing with conflict, classroom dynamics, establishing effective learning environments, building peer and teacher-student trust and relationships that promote a "caring classroom".

PSCI-109. First Year Experience: Civic Engagement, Community And Social Change In Chicago. 3 Hours.

This colloquium is a three-credit course that combines the traditional classroom setting and community service to explore the meaning and interconnection of community, citizenship, politics, diversity, civic engagement and social change. Students enrolled in this course spend time developing their interpersonal and intrapersonal skill (such as, self-awareness, critical thinking and problem-solving skills, leadership skills); become skilled at civic engagement (action strategies and plan, project management, communication, negotiation and teamwork); as well as reading academic literature that examines concepts of democracy, power and justice.

SOC-109A. First Year Experience: Investigating Chicago: Immigration & Migration. 3 Hours.

In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the field-specific concepts and terminology of sociology. Using the city as a lab, freshmen explore Chicago's immigrants and immigration patterns, actively discovering the complexity and diversity of Chicago as an immigrant destination through readings, films, speakers, and out-of-class experiences.

SPAN-109. First Year Experience: Chicago's Latina/o Cultures. 3 Hours.

Freshmen explore Chicago's vibrant Latina/o culture as an integral part of the city's cultural landscape through short stories, poetry, films, speakers, and field trips to cultural venues or activities. In the course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery, and Transitions) are interwoven with concepts and terminology specific to cultural and literary studies. Taught in Spanish and English. Prerequisite: Score of 384 or above in the Spanish placement exam (available online at www.neiu.edu/~flddept/placement.htm).

TESL-109A. First Year Experience: Chicago Speaks: Helping Immigrants Communicate. 3 Hours.

In this course, the four foundations (Future Planning, Academics, Self-Discovery and Transitions) of the First-Year Experience are interwoven with the field specific concepts and terminology of teaching English as a second language (TESL). This course introduces the structure of the English language and methods of teaching it to speakers of other languages. This involves investigating the pronunciation and grammar of English as well as looking at ways to teach these subjects along with listening, speaking, reading and writing skills to English Language Learners (ELLs). The course will involve a service learning component in which students will tutor ELLs in various sites throughout Chicagoland. As students study the basics of teaching English as a second language, they will develop academic skills that will contribute to their success in college and beyond.

International Programs

Cris Toffolo, Ph.D., Interim Director of International Programs

Office of International Programs

The Office of International Programs (<http://neiu.edu/academics/international-programs/>) (OIP) was established in 1996 as a reflection of Northeastern Illinois University's (NEIU) commitment to the comprehensive internationalization of its campus and curriculum. OIP initiates and maintains NEIU's partnerships with universities around the world and serves various groups: (1) international students coming to NEIU to earn a degree and/or study English; (2) exchange students from NEIU's international partner universities (IPUs) who come to NEIU for one or two semesters; (3) NEIU students who wish to study abroad, thereby preparing themselves to function effectively in the interconnected 21st Century world; (4) NEIU faculty seeking to internationalize their teaching and/or research; and (5) visiting scholars. OIP has received numerous grants and other recognition. In 2004, it was awarded the prestigious Institute of International Education (IIE) Andrew Heiskell Award for Internationalizing the campus. In 2018 OIP was awarded a 100,000 Strong in the Americas grant by the Partners of the Americas Foundation, in collaboration with the U.S. Department of State (DOS) and the Association of International Educators, NAFSA to expand two-way international student mobility with Colombia. In 2019 OIP was awarded both an IDEAS Capacity Building Program Grant by the U.S. DOS's Bureau of Educational and Cultural Affairs and World Learning, and a Harnessing Innovation through Virtual Exchange (HIVE) grant from the Stevens Initiative of the Aspen Institute and IIE, to expand collaborative online learning (COIL) initiatives. In 2021 IIE and Fulbright selected NEIU to run the pre-departure orientation for all Fulbright scholars going to Sub Saharan Africa. OIP is a member of the American International Recruitment Council (AIRC), the Hispanic Association of Colleges and Universities (HACU), International Educators of Illinois (IEI), IIE, NAFSA, and Study Illinois. For more information view the OIP website (<https://www.neiu.edu/academics/our-centers-and-programs/international-programs/#:~:text=General%20questions%20should%20be%20directed,%2Dprograms%40neiu.edu>), and/or contact OIP by email at International-Programs@neiu.edu, or by phone at +1-773-442-4796.

International & Exchange Students

Northeastern welcomes students from other countries as degree-seeking bachelor's and master's students; as exchange students who come for a semester or year-long experience; and those who come to study English as a second Language. All International students are eligible to live on campus in NEIU's new residence hall, The Nest (<https://www.neiu.edu/university-life/student-housing/nest-student-housing-faq/>).

All students coming from outside the U.S. may arrive up to thirty (30) days before the start of their academic program. They are encouraged to do so, to secure housing and get properly settled. All students with an initial attendance I-20 Form must report to OIP before classes start to submit copies of their passport, F-1 visa, local address, and course registration, as well as their original Financial Form(s) and bank statement(s), etc.

All new students coming from outside the U.S. are required to attend the new international student orientation day conducted by OIP staff. The orientation occurs a few days before classes begin. Participation in orientation helps to ensure new international students understand both the university and the laws that could have an impact on their international student status. To maintain international student status, all international students must meet USCIS enrollment requirements and may not work off campus without authorization. The orientation dates and times are provided in a letter included in the admission packet.

Degree-Seeking International Students with a F-1 Visa

NEIU welcomes international students from around the world who wish to earn a degree from NEIU. To be admitted to a degree program, international students apply online (<https://admissions.neiu.edu/international-applicants/>).

Degree-Seeking International Transfer Students with a F-1 Visa

International students transferring to Northeastern from another U.S. school must report to OIP before classes start to submit copies of their passport, F-1 visa, local address, and course registration, as well as their original Financial Form(s) and bank statement(s), etc. They may choose to attend either NEIU's general orientation session, or OIP's orientation for new international students. The latter occurs during the week before the first day of classes in any academic semester. Students changing their visa status to an F-1 are required to attend the new international student orientation prior to their term of admission, even if their change of status has not yet been granted.

Students Coming to Learn English

NEIU welcomes non-native English speakers who wish to just improve their English language proficiency or to do so before entering a degree program. Students wishing to do intensive English language study should apply to NEIU's School for the Advancement of English Language and Learning (SAELL) (<http://neiu.edu/academics/international-programs/intensive-english-program/saell-program/>). Students interested in SAELL can direct their questions to the Director of SAELL by emailing esl@neiu.edu.

International students attending SAELL must follow the rules that apply to all students coming from outside the U.S., or transferring from another U.S. school, or changing their visa status. The new international student orientation dates and times will be included in a letter from the SAELL director.

Exchange Students Coming from Partner Universities

Each year NEIU welcomes dozens of exchange students from our international partner universities (IPUs) (<https://www.neiu.edu/academics/our-centers-and-programs/international-programs/exchange-j-1-students/international-partner-universities-ipus/>). Exchange students come on a J-1 visa and enroll in NEIU classes for one or two semesters. All international exchange students must meet program requirements based on the agreement between Northeastern and their home university. Students interested in coming on an exchange program should begin by contacting the international office at their home university. They can also contact NEIU's Coordinator of International Partnerships in the Office of International Programs (OIP), to learn about how to get nominated and apply, about visas and other questions. For more information view the OIP website (<https://www.neiu.edu/academics/our-centers-and-programs/international-programs/exchange-j-1-students/>), and/or contact OIP by email at International-Programs@neiu.edu, or by phone at +1-773-442-4796.

NEIU Students Wanting to Study Abroad

Semester- and Year-Long Exchange Opportunities

Northeastern has established formal partnerships with over forty universities in twenty-one countries around the world. Through these partnerships, both undergraduate and graduate students have opportunities to study for one or two semesters at an international partner university (IPU) (<https://www.neiu.edu/academics/our-centers-and-programs/international-programs/exchange-j-1-students/international-partner-universities-ipus/>) to enhance their understanding of other cultures and ecosystems, to deepen their grasp of global and international affairs, and to engage in intensive language study, etc. International students enrolled at NEIU on a F-1 visa can also participate in these exchange opportunities. During their time abroad at an IPU as exchange students, NEIU students remain registered, and pay their tuition and fees to NEIU. For this reason, federal financial aid may still be used to cover these costs. In addition, NEIU students may also qualify for special study abroad scholarships: e.g., HACU Scholarship; IIE Midwest, Gilman, Borman, Freeman Asia, Organization of American States, etc. For more information about studying abroad and about NEIU's IPUs, visit the OIP website, or contact OIP at International-Programs@neiu.edu, or by phone at +1-773-442-4796.

Summer and Winter Session Programs

Students can also participate in the shorter programs offered during summer and winter terms by our IPUs. These programs, which last from one to six weeks, offer 3-6 credit hours and typically include an intensive language component plus historical and cultural activities. Some Programs are tailored to specific majors (i.e., in business and STEM fields). For more information visit the OIP website, or contact OIP directly at International-Programs@neiu.edu, by phone at +1-773-442-4796.

Short, NEIU Faculty-Led Study Tours

Northeastern faculty offer another type of study abroad experience through short study tours that they lead each year. On these trips, which last 7-21 days, students are able to enhance their understanding of other cultures and habitats, deepen their cultural sensitivity, learn history on location, and increase their intercultural competencies while earning credit. Recent tours have taken students to Belize, China, Colombia, Ghana, India, Italy, Japan and Switzerland. For more information consult OIP's website (<https://www.neiu.edu/academics/our-centers-and-programs/international-programs/study-abroad/faculty-led-tours/>), or contact OIP at International-Programs@neiu.edu, or +1-773-442-4796.

NEIU Faculty

The Office of International Programs (OIP) assists NEIU faculty to internationalize their teaching and research in a variety of ways. In addition to working with faculty to design and implement short-term study tours (see above), OIP helps faculty get engaged in Collaborative Online International Learning (COIL) by offering COIL training workshops, helping faculty find international teaching partners with whom to collaborate, and by writing grants to help support COIL collaborations as well as other internationalization efforts. OIP seeks out opportunities for faculty to travel and teach abroad (e.g., Erasmus+ opportunities), and works closely with NEIU's Fulbright program coordinator, Dr. Richard Hallett (r-hallett@neiu.edu). OIP also helps faculty to invite visiting scholars. To learn more about such opportunities, or to find out how to become an OIP Faculty Ambassador, visit the OIP website (<https://www.neiu.edu/academics/our-centers-and-programs/international-programs/faculty-resources/>), or contact OIP's director, Dr. Cris Toffolo at c-toffolo@neiu.edu or +1-773-442-5493.

Visiting Scholars

Visiting scholars who wish to be in residence at Northeastern should send a copy of their curriculum vitae and an official letter outlining both what they want to do while in residence at NEIU, and how they will engage cross-culturally. The Office of International Programs (OIP) will work with the relevant academic department and other offices to review the request. Illinois state law requires visiting scholars, like all university staff and faculty, to submit to a background check. Learn more here (<https://www.neiu.edu/academics/our-centers-and-programs/international-programs/visiting-scholars/>) or contact OIP's director, Dr. Cris Toffolo at c-toffolo@neiu.edu or by phone at +1-773-442-5493.

Learning Success Center

Kate Hahn, Ph.D., Executive Director

The Learning Success Center (LSC) provides peer-directed academic tutoring for individuals and groups in the following areas:

- General Education courses
- Writing
- Math Development and college level math
- Writing Intensive Program (WIP) courses (through the Center for Academic Writing (<http://catalog.neiu.edu/university/organization-university/academic-affairs/center-academic-writing/>))

Academic support is provided to students who are seeking assistance with understanding course concepts and preparing assignments, along with developing an improved learning system for college which includes motivation, academic engagement, brain-based habits for college learning, and learning strategies for note taking, textbook reading, and test taking. The primary emphases are promoting active learning strategies, encouraging student engagement, and providing content support.

Tutors are graduate and undergraduate students who are recommended by faculty and carefully selected on the basis of their own academic achievement and interpersonal communication skills. Tutors are trained, supervised, and supported in their role as tutors.

The LSC provides all NEIU students an area for learning groups and an opportunity to learn with other students. Appointments are strongly encouraged, and students are welcome to drop in to discuss their individual academic support needs. The LSC is located on the fourth floor of the Ronald Williams Library and provides support to students at all NEIU locations. More information is available by visiting the LSC webpage (<http://www.neiu.edu/lsc/>) or by contacting LSC by phone at (773) 442-4568 or by email at lsc@neiu.edu.

Math and Science Concepts Minor

Math and Science Concepts Program (MSTQE)

MSTQE = MATH, SCIENCE, AND TECHNOLOGY FOR QUALITY EDUCATION

The Math and Science Concepts Minor also known as MSTQE (Math, Science, and Technology for Quality Education), is designed to develop a community of undergraduate students who share interests in interdisciplinary STEAM fields. The program will help students develop deep and broad literacy in math, physical and life sciences, and technology. Most students in the program major in elementary or middle level education and go on to become teachers. Others go on to work in educational settings such as museums, libraries, zoos, or environmental agencies. The Math and Science Concepts Minor incorporates current Illinois State Board of Education content standards in math and science for educators.

The program emphasizes: observation, mathematical reasoning, scientific inquiry, technology, collaborative group work, connections to real-world problems, and service learning. The courses in the Math and Science Concepts Minor focus on content knowledge and pedagogy. Several of the math and science courses are block scheduled which allows faculty members to integrate their content and develop joint interdisciplinary assignments and projects. In partnership with Wilbur Wright College, any City Colleges of Chicago student may participate in science and math courses at Northeastern Illinois University while earning their Associate's Degree.

The MSTQE program fully embraces diversity as a valuable resource, strength, and asset. Students are encouraged to voice their opinions, suggestions, and perspectives for strengthening and improving the program. The program is inclusive and respectful, which allows us to create equity in our learning experiences and teaching practices by developing leadership skills at all levels. Students finish the program highly qualified to advocate for diversity, equity, and inclusion as future teachers of math, science, and technology. The MSTQE Program utilizes culturally relevant pedagogy and incorporates issues of equity and social justice into coursework.

- Students may demonstrate that they are eligible for MSTQE by completing MATH-149 (<http://catalog.neiu.edu/search/?P=MATH-149>) and MATH-150 (<http://catalog.neiu.edu/search/?P=MATH-150>) with a grade of C or better. Recommendations and referrals from math instructors will also be considered.
- Students must be eligible to take (or have completed) ENGL 101 or have a recommendation from an English instructor.
- Students complete an advising appointment with the MSTQE Program director and commit to participate in all program requirements.

Program Requirements

- Register for and participate concurrently in course pairs.
- Participate in MSTQE workshops, community meet-ups, and advisory sessions.
- Complete assignments and projects that involve inquiry-based learning and connections to pedagogy, research opportunities, and "real world" experiences.
- Meet with an MSTQE Program Advisor each semester prior to registration. Email mstqe@neiu.edu to set up an appointment.

Course Requirements

- Courses require problem solving, teamwork, reflecting on their own and their classmates' learning, and in-person and virtual learning. Learning opportunities may occur at partner community agencies, field sites, or schools.
- Paired courses have integrated learning activities that enhance knowledge and understanding of both subjects.
- Courses require problem solving, teamwork, reflecting on their own and their classmates' learning, and in-person and virtual learning. Learning opportunities may occur at partner community agencies, field sites, or schools.
- Students will gain the ability to understand and apply the following standards to their learning and teaching:
 - Next Generation Science Standards (NGSS)
 - Common Core Standards in Mathematical Practices and Content
 - National Council of Mathematics Standards for Teachers
 - Illinois State Board of Education (ISBE) Mathematics Teacher Standards
 - National Science Teachers Association (NSTA) Standards for Science Teacher Preparation

Course Pairs

It is beneficial to take course pairs in the following order when possible:

Code	Title	Hours
Course Pair I		
MATH-280	Geometry Concepts For Educators And Art	4
PHYS-108	Physics Concepts For Educators	4
Total Hours		8

Code	Title	Hours
Course Pair II		
CHEM-108	Chemistry Concepts For Educators	4
CS-108	Computer Science For All	3
Total Hours		7

Code	Title	Hours
Course Pair III		
MATH-145	Algebra Concepts For Educators	4
BIOS-110	Introduction To Biology For Educators	4
Total Hours		8

Code	Title	Hours
Course Pair IV		
MATH-380	Calculus Concepts For Educators	3
BIOS-310	Ecology Concepts For Educators	3
Total Hours		6

Code	Title	Hours
Capstone Course		
MATH-381	Concepts In Discrete Mathematics For Educators	3
Total Hours		3

recommended electives

Code	Title	Hours
HSCI-364	Theories And Concepts Of School Health Education	3
SOC-104	Schools And Society	3
PEMT-300	Adventure Education Programming	3

Please contact mstqe@neiu.edu or (773) 442-5576 for further information.

ADVISING SUPPORT

To speak with an advisor about creating a course plan to fulfill requirements of the MSTQE minor, contact mstqe@neiu.edu. Students pursuing a B.A. in Elementary, Middle Level, or other education major: Please contact the Goodwin College of Education Undergraduate Advisor (<https://www.neiu.edu/academics/daniel-i-goodwin-college-of-education/college-of-education-advisors/undergraduate-advisors/>) that corresponds with your major for further support with General Education and GCOE requirements.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	

Humanities (HU)* 9

3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)

Behavioral/Social Sciences (SB)* 9

3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work

Natural Sciences (NS and NSL)** 9

3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

COURSE REQUIREMENTS

Code	Title	Hours
MATH-149	Math For Elementary Teachers I	4
MATH-150	Math For Elementary Teachers II With Problem Solving	5
MATH-145	Algebra Concepts For Educators	4
MATH-280	Geometry Concepts For Educators And Art	4
MATH-380	Calculus Concepts For Educators	3
MATH-381	Concepts In Discrete Mathematics For Educators	3
PHYS-108	Physics Concepts For Educators	4
CHEM-108	Chemistry Concepts For Educators	4
BIOS-110	Introduction To Biology For Educators	4

BIOS-310	Ecology Concepts For Educators	3
CS-108	Computer Science For All	3

- Courses require problem solving, teamwork, reflecting on their own and their classmates' learning, and in-person and virtual learning. Learning opportunities may occur at partner community agencies, field sites, or schools.
- Paired courses have integrated learning activities that enhance knowledge and understanding of both subjects.
- Courses require problem solving, teamwork, reflecting on their own and their classmates' learning, and in-person and virtual learning. Learning opportunities may occur at partner community agencies, field sites, or schools.
- Students will gain the ability to understand and apply the following standards to their learning and teaching.
 - Next Generation Science Standards (NGSS)
 - Common Core Standards in Mathematical Practices and Content
 - National Council of Mathematics Standards for Teachers
 - Illinois State Board of Education (ISBE) Mathematics Teacher Standards
 - National Science Teachers Association (NSTA) Standards for Science Teacher Preparation
- Course Pairs
 - MATH 280 / PHYS 108
 - MATH 145 / BIOS 110
 - MATH 380 / BIOS 310

Please contact us at mstqe@neiu.edu or (773) 442-5576 for further information.

MSTQE leadership team

Sarah Cordell, Ph.D., *Associate Professor of Mathematics, Coordinator of the Math Community Center*

MATH-380 Calculus Concepts For Educators

MATH-381 Concepts In Discrete Mathematics For Educators

Matthew Graham, Ph.D., *Associate Professor of Mathematics, College of Arts & Sciences MSTQE Liaison*

MATH-145 Algebra Concepts For Educators

MATH-380 Calculus Concepts For Educators

MATH-381 Concepts In Discrete Mathematics For Educators

Maureen "mO" Kelty, M.S., *MSTQE Advisory Leader, Instructor Emerita of Health Sciences and Physical Education*

Scott Mayle, M.S., *Instructor of Physics, Instructor of Chemistry*

PHYS-108 Physics Concepts For Educators

CHEM-108 Chemistry Concepts For Educators

Matthew McLeod, M.Ed. (m-mcleod1@neiu.edu), *Instructor of Mathematics*

MATH-145 Algebra Concepts For Educators

Hector Morales, Ph.D., *Associate Professor of Teacher Education, Goodwin College of Education MSTQE Liaison*

Angela Nugent, M.S., *Instructor of Biology*

BIOS-110 Introduction To Biology For Educators

Corey Palmer, M.S., *Instructor of Biology*

BIOS-310 Ecology Concepts For Educators

Panagos Papageorgiu, M.S., *Instructor of Mathematics*

MATH-280 Geometry Concepts For Educators And Art

Jennifer Slate, Ph.D., *Professor of Biology, Chair of Biology*

BIOS-110 Introduction To Biology For Educators

MSTQE Program Advisor

Billie Díaz, M.A., *Coordinator of Teacher Quality Enhancement Programs*

ADVISING SUPPORT

Students pursuing a B.A. in Elementary, Middle Level, or other education major: Please contact the Goodwin College of Education Undergraduate Advisor (<https://www.neiu.edu/academics/daniel-l-goodwin-college-of-education/college-of-education-advisors/undergraduate-advisors/>) that corresponds with your major for further support with General Education and GCOE requirements.

Prerequisite courses for MSTQE

MATH-149. Math For Elementary Teachers I. 4 Hours.

This is a foundational class in mathematics for those interested in becoming elementary or middle grades teachers. Topics include place value, models for and the development of arithmetic, mental math, estimation, word problems, algorithms, factors, primes, proofs, prealgebra, fractions, ratios, rates, and percentages. Emphasis on the development of elementary mathematics from an advanced standpoint.

Prerequisite: MATH-092 with a minimum grade of C.

MATH-150. Math For Elementary Teachers II With Problem Solving. 5 Hours.

This is a foundational class in mathematics for those interested in becoming elementary or middle grades teachers. Topics include measurement, geometric reasoning, similarity and congruence, applications of geometry, geometric proofs, area, volume, surface area, and probability and statistics. Problem solving and mathematical thinking activities covering both number and operations and geometry content will be integrated. Emphasis is on the development of elementary mathematics from an advanced standpoint.

Prerequisite: MATH-149 with a minimum grade of C.

mstqe program Requirements

PHYS-108. Physics Concepts For Educators. 4 Hours.

A laboratory-oriented course designed to support future educators in the implementation of interdisciplinary math and science curricula by integrating concepts from geometry, algebra, and trigonometry. Central concepts of physics (the laws of mechanics and electricity, the properties of light, atoms and nuclei) and how they are applied in the modern world (rockets, electric motors, automobiles, fuel cells, alternative fuels, stationary i.e. power plant and non-stationary i.e. aircraft, green technology etc.) are investigated. Issues of smart materials, nanotechnology, quantum computing and other contemporary technologies may be investigated. Discussions include topics and concepts related to robotics, kinematics and dynamics of particles and rigid bodies and electrostatics, electric fields, electric potentials, currents, magnetic fields, and wave motion. Basic concepts of geology, meteorology, oceanography, the solar system, or any other related discipline are threaded throughout. Course content is aligned to the National Science Teachers Association and the Next Generation of Science Standards. This course is paired and integrated with MATH-280 and it is strongly suggested that they are taken together.

Prerequisite: MATH-149 with a minimum grade of C.

MATH-280. Geometry Concepts For Educators And Art. 4 Hours.

This course focuses on the concepts of plane and solid geometry and trigonometry. Course design incorporates the Illinois Learning Standards for Mathematics K-12, the National Council of Teachers of Mathematics Teaching Principles, Standards, and Expectations, and a focus on preparing future educators in the implementation of interdisciplinary math and science curricula. The topics include basic definitions and properties of plane and solid figures, congruence, similarity, constructions, measurements, transformations, Pythagorean theorem, right angle trigonometry, and the unit circle trigonometry. Problem solving using a calculator and computer programs is emphasized throughout. Writing assignments, coding in geometric constructions, and art are also part of the course. This course is paired and integrated with PHYS-108, and it is strongly suggested that they are taken together.

Prerequisite: MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C.

BIOS-110. Introduction To Biology For Educators. 4 Hours.

Designed specifically for prospective elementary and middle grades teachers, this inquiry-based biology course incorporates current content standards in biology for educators and meets NEIU College of Education science course requirements. Content includes cell/molecular biology, evolution, genetics, organismal biology and biotechnology. During laboratory activities, students will develop hypotheses, collect and analyze data, communicate experimental results, and apply mathematics concepts to biological problems. Can be taken concurrently with MATH-149. If students are pursuing a math and/or science teaching endorsement, it is strongly suggested to concurrently take MATH-145.

Prerequisite: MATH-149 with a minimum grade of C.

MATH-145. Algebra Concepts For Educators. 4 Hours.

This course focuses on algebra concepts. Course design incorporates the Illinois Learning Standards for Mathematics K-12, the National Council of Teachers of Mathematics Teaching Principles, Standards, and Expectations, and a focus on preparing future educators in the implementation of interdisciplinary math and science curricula. Students will engage in learning algebraic processes (creating and solving equations and inequalities, graphing, and transformations) as well as developing algebraic habits of mind (seeing structure in expressions and equations, generalizing from repeated reasoning, and modeling with mathematics). Concepts covered include linear, quadratic, and exponential functions, systems of equations, absolute value and inequalities, and basic probability. Problem solving and generalizing patterns with and without technology will be emphasized. Written assignments and reflections on the learning process will be introduced as appropriate. This course is paired and integrated with Bios 110, and it is strongly suggested that they are taken together.

Prerequisite: MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C.

CHEM-108. Chemistry Concepts For Educators. 4 Hours.

This lab-oriented course covers the basic principles of chemistry while supporting future educators in the implementation of interdisciplinary mathematics and science curricula. Topics include atomic theory, solution chemistry, inorganic and organic chemistry, states of matter, physical and chemical properties, appropriate use of nomenclature, chemical bonding, and use of quantitative calculations using appropriate number techniques in science. The historical context of how chemistry contributes to our civilization will also be considered. Elementary chemical principles will be used to explain the behavior of everyday chemicals (including food and cleaning supplies) in addition to more scientific and industrial applications. Issues of contemporary critical technologies, such as biomaterials, natural products, alternative fuels, bioremediation, fuel cells, green technology, biodefense, and smart materials may be examined. This course is aligned to the Next Generation of Science Standards and the National Science Teachers Association Standards. Course outcomes include developing students' ability to apply knowledge of chemistry to a variety of real-world problems and settings with particular emphasis on scientific inquiry, the nature of science, civic engagement, and applications to teaching.

Prerequisite: MATH-150 with a minimum grade of C.

CS-108. Computer Science For All. 3 Hours.

Computer science has revolutionized many disciplines and it is no longer only for computer scientists. By studying computer science students will use computational thinking and apply programming to real world scenarios and interdisciplinary examples from science, math and teacher education. Robots and web and mobile-based coding platforms will be used to expose students to coding through different technologies. Students will learn computer science concepts such as algorithms, loops, and conditionals. Each week students will engage in hands-on computational thinking or coding exercises. Finally, students will complete a project using coding to demonstrate scientific, mathematical, or concepts from other disciplines.

Prerequisites: ENGL-101 and Accuplacer College Level Math 020 - 120 (or Accuplacer Adv. Algebra & Func 237 - 300 or NEIU Math Placement Result 30 - 45).

MATH-380. Calculus Concepts For Educators. 3 Hours.

This course provides a foundational experience in calculus through an emphasis on topics related to middle school teaching. Course design incorporates the Illinois Learning Standards for Mathematics K-12, the National Council of Teachers of Mathematics Teaching Principles, Standards, and Expectations, and a focus on preparing future educators in the implementation of interdisciplinary math and science curricula. Topics include: functions, deriving formulas for patterns, direct and recursive sequence formulas, arithmetic and geometric sequence formulas, limits of sequences, convergence/divergence of sequences, series, derivatives, integration, the fundamental theorem of calculus, and differential equations. Course integrates conceptual, content specific, and pedagogical knowledge. Course includes applications to ecology, finance, middle school teaching, and technology. This course is paired and integrated with BIOS-310, and it is strongly suggested that they are taken together.

Prerequisite: MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C.

BIOS-310. Ecology Concepts For Educators. 3 Hours.

This interdisciplinary course focuses on ecology concepts and their mathematical underpinnings, and is designed for future elementary and middle school teachers. Lectures and inquiry-based field and laboratory activities will focus on population growth, species interactions, flows of matter and energy through ecosystems, and environmental justice issues including pollution and climate change. Students will design and present an original ecology teaching project for elementary or middle school students, which may then be incorporated into a teaching portfolio to use with job applications. If students are pursuing a math and/or science teaching endorsement, it is strongly suggested to concurrently take MATH-380.

Prerequisite: BIOS-110 with a minimum grade of C and (MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C).

MATH-381. Concepts In Discrete Mathematics For Educators. 3 Hours.

This course provides a foundational experience in discrete mathematics through an emphasis on topics in graph theory. Course design incorporates the Illinois Learning Standards for Mathematics K-12, the National Council of Teachers of Mathematics Teaching Principles, Standards, and Expectations, and a focus on preparing future educators in the implementation of interdisciplinary math and science curricula. Students will learn about mathematics as an active process of making conjectures, testing ideas, and proving conclusions. Special emphasis is given to mathematical communication, problem-solving, and applications to the sciences. Possible topics include: the Four Color Theorem, trees, digraphs, bipartite graphs, planar graphs, Platonic solids, Euler and Hamilton circuits, the P+NP Problem, algorithms and combinatorial explosion. Course integrates conceptual, content specific, and pedagogical knowledge.

Prerequisite: MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C.

NEIU Libraries

The NEIU Libraries are the perfect place to study, read, collaborate, and relax. Whether you need scholarly articles for an assignment, or you're just looking for a fun new book to check out, our friendly and knowledgeable librarians can assist you in person through both scheduled and walk-in consultations. Can't visit campus today? We're happy to support you by phone, in chat, and through email. The Libraries give you access to nearly 1.2 million electronic, print, and media items, many of which you can view from off-campus with your NetID and password. We also house a growing collection of textbooks and other course resources on reserve for your use.

Highlights:

- 32 public computer stations on the 1st and 2nd floors
- Moveable tables and whiteboards for group collaboration
- Individual study carrels with reading lights and electrical outlets
- Access to shared resources from over 90 other Illinois academic libraries
- Additional resources and study spaces at El Centro (<https://www.neiu.edu/el-centro-library-and-learning-resource-center/>) and the Carruthers Center for Inner City Studies (<https://www.neiu.edu/ccics-library/>)

IRAD and University Archives

The Ronald Williams Library is the Illinois Regional Archives Depository (<https://www.neiu.edu/library/illinois-regional-archives-depository-irad/>) (IRAD) for Chicago and Cook County. It holds and provides access to part of the city and county's archival materials. The Ronald Williams Library also maintains the historical documents of Northeastern Illinois University in the University Archives (<https://neiulibrary.libguides.com/archives/>). Both collections are located on the lower level of the Library. Assistance is managed by library staff and several IRAD interns.

Additional Units Located Within the Library

- Learning Success Center (<http://catalog.neiu.edu/university/organization-university/academic-affairs/learning-support-center/>)
- Center for Academic Writing (<http://catalog.neiu.edu/university/organization-university/academic-affairs/center-academic-writing/>)
- Center for Teaching and Learning (<http://catalog.neiu.edu/university/organization-university/academic-affairs/center-teaching-learning/>)
- Language Learning Lab (<http://catalog.neiu.edu/arts-sciences/world-languages-cultures/>)
- Employee Ombuds Office

New Student and Family Programs

Main Office - C-520
(773) 442-5373

The New Student and Family Programs Office focuses on the successful transition of entering first-year and transfer students. This office coordinates new student orientation, testing services for the English (Writing and Reading) and Mathematics placement exams, training of orientation leaders, and family and parent programming.

New Student Orientation

Orientation assists new students with a successful transition to Northeastern Illinois University by preparing students for the academic, social, and cultural opportunities and climate of the University, while also supporting parents, partners, guardians, and children of new students.

Testing

The Testing area administers and coordinates placement testing in English (Writing and Reading) and Mathematics. Counseling Services provides psychological testing for students when deemed appropriate. The Career Development Center assists students by providing information for graduate entrance exams and career testing. The Department of World Languages and Cultures offers placement tests in non-English languages (i.e., German, French, Spanish, Russian) and the Test of English as a Foreign Language (TOEFL). In addition, the Daniel L. Goodwin College of Education and the College of Business and Management administer a variety of tests/examinations required for admission to their respective colleges.

Family and Parent Programming

Family and Parent Programming involves and supports family members by providing helpful information to aid in the success of their student. Programs such as Family Orientation, Family Brunch, and our Family Newsletter provide parents and family members an opportunity to become connected to Northeastern, its community and campuses.

Project Success

Lech Walesa Hall, LWH-4029
(773) 442-4980

Established at Northeastern Illinois University in 1968, Project Success is an academic support services program that has historically and continues to serve African-American or first generation college students who demonstrate academic potential, but do not meet the general university admissions requirements.

Project Success is also a University admitting body, responsible for recruiting and admitting students. Students in this program are given a two-year adjustment period to meet University academic requirements. They must actively participate in the assistance programs provided and show evidence of academic progress.

Students receive guidance and support from academic advisors until the requirements to declare a major are met and/or four semesters have transpired since the student enrolled at NEIU. In addition, the program offers integral information about transitioning and excelling in college, via 3-credit academic transition courses taught by Project Success advisors. These courses complement the program's objectives to provide personal and academic support services designed to increase scholastic achievement and persistence towards graduation.

ACAD-101B. Success Program Seminar I: Project Success. 3 Hours.

This course covers college success strategies by: 1) developing students' self-awareness and self assessment; 2) promoting a better understanding and appreciation of educational, cultural and professional environments and specifically, the NEIU environment and 3) cultivating and enhancing students' learning, organizational and critical thinking skills as well as helping students define career options while integrating computer technology. Students will also understand and apply appropriate general education concepts.

ACAD-102B. Success Program Seminar II: Project Success. 3 Hours.

This course expands upon college success strategies as described in Acad Dev 101B- Success Program Seminar I: Project Success. The course is designed for students who successfully completed Acad Dev 101B- Success Program Seminar I: Project Success, but did not successfully complete the first Fall term at Northeastern, with a term grade point average of 2.0 or higher, based on the Project Success Achievement Agreement.

Proyecto Pa'lante

Angelica Rivera, Ph.D., Director
 Lech Walesa Hall, LWH-4029
 (773) 442-5460

Proyecto Pa'Lante is an academic support services program that has historically and continues to serve Latino students who demonstrate academic potential, and may not meet the general University admissions requirements. Proyecto Pa'Lante is also a University admitting body, responsible for recruiting and admitting students. Students entering the university through general admissions may opt into Proyecto Pa'Lante on a first come first serve basis, as space is limited.

Students in this program are given a two-year adjustment period to meet University academic requirements. They must actively participate in the assistance programs provided and show evidence of academic progress. Students receive guidance and support from a bilingual and bicultural academic advisor until the requirements to declare a major are met.

In addition, the program offers integral information about transitioning and excelling in college, via 3-credit academic transition courses taught by Proyecto Pa'Lante advisors. These courses complement the program's objectives to provide personal and academic support services designed to increase scholastic achievement, persistence toward graduation, and community building at Northeastern Illinois University.

Proyecto Pa'Lante es un programa de apoyo académico que históricamente fue establecido y continúa con el enfoque de proveer servicios a estudiantes Latinos que demuestran potencial académico y tal vez no cumplen con los requisitos generales para ser admitidos a la universidad. Proyecto Pa'Lante mantiene funciones de admisión a la universidad y son responsables de reclutar y admitir estudiantes. Estudiantes que entran a la universidad bajo los requisitos generales también pueden elegir participación en Pa'Lante dependiendo en el cupo, espacio es limitado.

Estudiantes en este programa reciben un periodo de ajuste académico de dos años para cumplir los requisitos académicos de la universidad. Se requiere que los estudiantes participen activamente y demuestren evidencia de su progreso académico. Los estudiantes reciben la orientación y apoyo de un consejero académico bilingüe y bicultural hasta que cumplan los requisitos para declarar su especialidad académica.

Además, el programa ofrece información integral acerca de la transición y el éxito en el colegio a través de cursos de 3 créditos enseñados por los consejeros académicos de Pa'Lante. Estos cursos complementan los objetivos del programa de proveer servicios de apoyo personal y académico diseñados para mejorar académico, persistencia hacia graduación, y la formación de comunidad entre Northeastern Illinois University.

Proyecto Pa'Lante Seminars

ACAD-101C. Special Programs Seminar I: Proyecto Pa'Lante. 3 Hours.

This course covers college success strategies by (1) developing students' self-awareness and self assessment; (2) promoting a better understanding and appreciation of education, cultural and professional environments and specifically, the NEIU environment, and (3) cultivating and enhancing students' learning, organization and critical thinking skills and define career options while integrating computer technology. Students will also understand and apply appropriate general education concepts.

ACAD-102C. Special Programs Seminar II: Proyecto Pa'Lante. 3 Hours.

This course covers college success strategies as described in ACAD-101C Special Program Seminar I: Proyecto Pa'Lante and is designed for students who have not successfully completed the first Fall term or have not earned a C or better grade in ACAD-101C at NEIU based on the Proyecto Pa'Lante Participation Agreement.

TRIO Student Support Services

Amie Jatta, Director
 Ronald Williams Library, LIB-412
 triosss@neiu.edu
 (773) 442-4981

TRIO Student Support Services Programs

Purpose

Three TRIO Student Support Services (SSS) Programs help undergraduates at NEIU navigate college successfully by providing a wide range of support that improves academic performance and increases graduation rates.

TRIO SSS Programs advisors help students develop Student Success Plans and identify valuable resources that enable them to reach their goal of graduation. This model makes it possible for TRIO SSS Programs staff to create customized success plans for each individual student.

Three TRIO Student Support Services Programs

TRIO SSS Programs at NEIU include three federally funded grants designed to serve income-eligible, first-generation, and students with disabilities. These programs help students overcome academic, social, and cultural barriers, enabling them to participate fully in university life and ultimately to obtain a college degree:

- **SSS Achieve** program serves first-generation or income-eligible undergraduate students from all majors.
- **SSS Teacher Preparation** program serves undergraduate students majoring in education, supporting them on their path toward university graduation and teacher certification through services such as test preparation, and personal, academic, and professional development workshops.
- **SSS Access** program serves undergraduate students experiencing challenges with educational access or performance due to a documented disability, including learning and cognitive disabilities, psychiatric and neurological symptoms, physical and sensory impairment, and chronic health conditions.

TRIO SSS Programs members have access to:

- One-to-one advising that supports academic, social, and personal development
- 24/7 online tutoring in 300 subjects
- Advocacy for financial assistance, housing, and proper nutrition
- Student Success Plan preparation
- Content Exam support for Teacher Preparation students
- Participation, engagement, and study abroad scholarships
- Tutoring, peer mentoring, and peer coaching
- Priority registration and help with course selection

For more information, please visit <http://www.neiu.edu/triosss> (<http://www.neiu.edu/triosss/>).

Eligibility

Any student enrolled or accepted for enrollment at NEIU who is a citizen or legal resident of the U.S. or meets residency requirements for federal student financial aid AND meets at least ONE of the following requirements:

- **Income-eligible:** a student whose family meets federal income eligibility requirements
- **First-generation:** a student whose parents have not earned a baccalaureate degree
- **Documented disability:** as defined in the Americans with Disabilities Act and verified by NEIU

Join TRIO SSS Programs

Apply at http://bit.ly/TRIOSSS_Programs_OnlineApplication (http://bit.ly/TRIOSSS_Programs_OnlineApplication/)

University Honors Program

R. Shayne Cofer, Director
 Jon B. Hageman, Coordinator
 Melissa Ramos, Administrative Assistant

Curriculum and Standards Board:

Amina Chaudhri, Teacher Education, Chair
 John Casey, Philosophy
 Denise Cloonan Cortez de Andersen, World Languages and Cultures
 Jenny (Ru) Dawley-Carr, Educational Inquiry and Curriculum Studies
 Amanda Dykema-Engblade, Psychology
 Nadja Insel, Earth Science
 Brooke Johnson, Sociology
 Blase Masini, Institutional Research
 Ana Nieves, Art
 Deepa Pillai, Management and Marketing
 Aaron Schirmer, Biology
 Emina A. Stojkovi#, Biology

Uniquely flexible for students in all fields of study and at almost every stage of degree progress, the University Honors Program (UHP) is open to eligible undergraduates who have a minimum of three academic terms left before graduating from NEIU. UHP students enjoy priority registration, small class sizes, extended library privileges, and a stimulating curriculum that emphasizes critical and independent thinking, research and creativity. A limited number of Merit Tuition Scholarships are awarded to students on the basis of academic merit and Honors course completion, and several Foundation scholarships are available exclusively for UHP students. The UHP Student Advisory Board is made up of UHP students elected by their peers. This board meets regularly with the coordinator and organizes honors events and activities.

The University Honors Program consists of two independent tiers: The Honors Student University Core Curriculum (UCC) Program for freshmen and sophomores and the Honors Scholar 300-level Program for juniors and seniors. Four unique Area Courses in the UCC program introduce Honors Students to the array of studies available at NEIU and demonstrate the interconnections between academic disciplines. At the 300 level, UHP Scholars tailor the curriculum to their academic major and research interests. Requirements at the 300 level emphasize research and creative activities, and culminate in the completion of a two-semester Senior Project that builds professional and academic confidence, preparedness, and competitiveness. Adapted study abroad and international field experiences can also partially fulfill 300-level UHP coursework requirements. Successful completion of the University Honors Program curriculum results in Honors Student and/or Honors Scholar designations on the student's transcript and/or diploma.

All UHP course numbers are prefixed by an initial "Z", followed by a three-letter code designating the Honors Program (e.g., "ZHON") or an academic department (e.g., "ZART" for an Honors Art course).

More detailed information on the NEIU Honors Program is available in the Honors Office, B-141, by phone at (773) 442-6044, or at [neiu.edu/honors](https://www.neiu.edu/honors) (<https://www.neiu.edu/academics/our-centers-and-programs/honors-program/>).

Honors Student Program for Freshmen and Sophomores

Requirements for Admission

Entering Freshmen: Completed UHP application (<https://www.neiu.edu/sites/neiu.edu/files/documents/2020/09/16/UHP%20Application%20v2020FILLABLE.pdf>), "High Pass" on application essay and documentation of one of the following:

- ranked in top 10% of graduating high school class, or
- minimum standardized test score (SAT of 1200 or ACT of 25), or
- significant works demonstrating excellence in creative activities (such as a portfolio)

Exceptional cases will be considered. Students with a GED are strongly encouraged to contact the UHP office at honors@neiu.edu. Submit UHP application (<https://www.neiu.edu/sites/neiu.edu/files/documents/2020/09/16/UHP%20Application%20v2020FILLABLE.pdf>), application essay, and other supporting materials to honors@neiu.edu.

Current NEIU/Transfer Students: Completed UHP application (<https://www.neiu.edu/sites/neiu.edu/files/documents/2020/09/16/UHP%20Application%20v2020FILLABLE.pdf>), "High Pass" on application essay, and minimum cumulative GPA of 3.5 (on a 4.0 scale) in NEIU courses numbered 100 and above or in transferable courses. If you completed an Honors Program at a 2-year institution, please contact the UHP at honors@neiu.edu prior to applying. Up to six credits earned in a similar Honors Program may be considered for transfer into the NEIU Honors Program. Petition for transfer courses will be evaluated by the UHP Coordinator. Submit UHP application (<https://www.neiu.edu/sites/neiu.edu/files/documents/2020/09/16/UHP%20Application%20v2020FILLABLE.pdf>), application essay, and other supporting materials to honors@neiu.edu.

Retention Requirements for the Honors student Program

Only Honors courses passed with grades of "A" or "B" will fulfill UHP requirements; no Honors course may be taken more than twice.

A minimum cumulative GPA of 3.5 and UHP GPA of 3.0 must be maintained to stay in good UHP academic standing and be eligible to receive UHP scholarships and awards.

Students who do not meet these requirements will be asked to meet with the coordinator to create and implement a success plan and placed on UHP academic probation for two consecutively enrolled terms. The UHP coordinator will work with the student to identify and take advantage of support available at NEIU. Failure to reach the criteria after the probationary term may result in dismissal from the Honors Student Program.

Requirements for the Honors student Program

The Honors Student Program requires completion of 15 credit hours of 100- and 200-level UCC Honors courses: each of four Honors Area Courses listed below and one Honors elective. All Honors courses will be designated by an initial Z, followed by a three-letter code designating the Honors Program (ZHON) or an academic department (in the case of electives).

Code	Title	Hours
ZHON-191	Honors Introduction To The Arts	3
ZHON-192	Introduction To The Humanities	3
ZHON-193	Honors Introduction To The Social Sciences	3
ZHON-194	Honors Introduction To The Sciences	3
Z- Honors elective		3
Total Hours		15

Students who successfully complete the Honors Student Program will have the designation "Honors Student" imprinted on their transcript.

Honors Scholars Program for Juniors and Seniors

Students may enter the Honors Scholar program in one of two ways:

1. successful completion of Honors Student Program and declaration of an academic major; or
2. declaration of an academic major, Junior standing, cumulative GPA of 3.5, and a "High Pass" on the Scholar-level application essay.

Students applying via the second option above will be asked to respond to an essay question that will allow them to demonstrate their critical thinking and writing skills.

Requirements for the Honors scholar Program

The Honors Scholar Program requires completion of 15 credit hours at the 300 level: 9 credit hours of electives (such as courses adapted from the major or minor for UHP credit, Study Abroad or international field experience, or ZHON-375: Honors Colloquium: World Perspectives), and 6 credit hours of work toward a two-semester UHP Senior Project (ZHON-360-Honors Seminar in Research and Creative Processes and ZHON-395-Honors Thesis Hours/Creative Project, or approved discipline-specific equivalents). See below for additional information on adapting courses for UHP credit and on the Senior Project requirement.

Code	Title	Hours
3 UHP electives at the 300 level (adapted major/minor courses, Study Abroad or international field experience, or ZHON-375)		9
ZHON-360	Honors Seminar In Research & Creative Processes	3
ZHON-395	Honors Thesis/ Creative Project	3
Total Hours		15

Retention Requirements for the Honors scholar Program

Only Honors courses passed with grades of "A" or "B" will fulfill UHP requirements; no Honors course may be taken more than twice.

The student must maintain a minimum cumulative GPA of 3.5 and UHP GPA of 3.0 to stay in good UHP academic standing and be eligible to receive UHP scholarships and awards.

Students who do not meet these requirements will be placed on Honors Program academic probation for two consecutively enrolled terms; failure to reach the criteria after the probationary term may result in dismissal from the Honors Scholar Program.

Students who successfully complete the Honors Scholar Program will have the designation "Honors Scholar" imprinted on their transcript and diploma upon graduation.

Adapted Courses

Students at the Honors Scholar level apply to adapt non-Honors courses at the 300 level for Honors credit. In this way, courses in the student's major, minor, or related area can be adapted to fulfill UHP requirements. Scholars typically select courses that are related to their creative/research or professional interest. Student and faculty member normally discuss this option prior to the start of the semester in which the course will be taken and complete the UHP Adapted Course Application (<http://www.neiu.edu/sites/neiu.edu/files/documents/2020/04/22/AdaptedCourseForm%20v2020fillable.pdf>), which is then submitted to honors@neiu.edu for approval by the UHP Coordinator.

UHP SENIOR PROJECT

This is a research-based thesis or creative work (depending on the scholar's major) that represents outstanding undergraduate achievement and the culmination of the Honors Scholar curriculum. To be eligible for enrollment in ZHON-395-Honors Thesis Hours/Creative Project, scholars must first successfully complete ZHON-360 (or equivalent--please see the UHP Coordinator for advising to ensure you enroll in the appropriate course) with an approved project proposal that includes abstract, literature review, and initial write-up of the inquiry/project. Scholars must also have the support of a faculty member (normally in the same field as the major) whose expertise is related to the project proposal and willing to serve as thesis/creative project chair. The project/thesis is reviewed by a faculty committee and submitted to the NEIU Digital Commons (<https://neiudc.neiu.edu/>) upon completion and final UHP approval. Additional details for scholars, committee chairs, and committee members are in the UHP Senior Project Manual (<https://www.neiu.edu/sites/neiu.edu/files/documents/mnramo15/Honors%20Thesis%20Manual%20Fall%202019%20FINAL.pdf>) and other related documents from the UHP Office, B-141.

For questions regarding the NEIU Honors Program, please contact the Honors Office: (773) 442-6044.

ZHON-191. Honors Introduction To The Arts. 3 Hours.

This course provides a stimulating introduction to the performing and fine arts. The course is structured around four modules covering the performing and fine arts offered at NEIU: visual arts, music, dance, and theater. The modules, while complete in themselves, will draw connections between the fine arts and explore the differences that make each of the fine arts unique. This course counts for General Education credit in the Fine Arts area.

ZHON-192. Introduction To The Humanities. 3 Hours.

This lively introduction to the humanities at NEIU and to humanistic discourse in general is a discussion-oriented core course in the Honors Program. It is structured around a series of thought-provoking questions that will allow for the investigation of multiple methods of inquiry employed in the humanities. Various topics will be explored from the perspectives of English, Foreign Languages and Literatures, Linguistics, Philosophy, Communication and Women's Studies. Students will learn essential academic skills while exploring how these disciplines are both distinctive and in conversation with one another, sharing concerns common to the humanities in general. This course count for General Education credit in the Humanities area.

ZHON-193. Honors Introduction To The Social Sciences. 3 Hours.

This spirited introduction to the social sciences at NEIU, and to the behavioral and social sciences in general, is a discussion-oriented core course in the Honors Program. It is structured around a series of thought-provoking readings and inter-related topics that will investigate multiple methods of inquiry employed in the social sciences. These themes and approaches will be explored from the perspectives of Anthropology, Economics, Geography, History, Justice Studies, Political Science, Psychology, and Sociology. Students will learn essential academic skills while gaining insight into how various disciplines connect with one another and inform various dimensions of interpersonal life. This course counts for General Education credit in the Social/Behavioral Sciences area.

ZHON-194. Honors Introduction To The Sciences. 3 Hours.

This course provides a stimulating introduction to a set of topics that are at the forefront of research in the natural sciences. The course is structured around a series of modules each covering a topic that is among the most significant in the fields of Biology, Chemistry, Earth Science, and Physics. The modules, while complete in themselves, will draw connections between scientific disciplines, and will explore how advance in one field have facilitated breakthroughs in other fields of science. The integration of computation into the course provides a strong link to the disciplines of Mathematics and Computer Science as well. This course counts for General Education credit in the Natural Sciences.

ZHON-360. Honors Seminar In Research & Creative Processes. 3 Hours.

How do scientists test a hypothesis? What approach directs a jazz pianist's creative process? What form does analysis take in English or Educational Leadership or Archaeology? This practice-oriented seminar explores how research is conducted in a variety of academic areas. Students will examine methodologies and gain experience synthesizing literature and analyzing findings as they build the components of an Honors Thesis/Creative Activities Proposal. Faculty guests will offer perspectives on their own research/creative processes. Discussions and class assignments will lead students progressively toward developing a polished proposal in their own major field of study. Course themes will vary.

ZHON-375. Honors Colloquium: World Perspectives. 3 Hours.

Specialized and intensive investigation of topics in broadly defined areas of current interest: reading, discussions, guest lectures.

ZHON-395. Honors Thesis/ Creative Project. 3 Hours.

The Honors Thesis or Creative Project represents the culmination of your participation in the Honors Program. After completing an approved proposal, Honors Scholars register for ZHON-395 with their thesis/creative project faculty advisor and work one-on-one with him/her to conduct and complete the thesis/ creative project. Honors Scholar and faculty advisor continue to participate in regular meetings with others going through same process. ZHON-395 students strongly encouraged to present their work at the NEIU Student Research and Creative Activities Symposium or similar venue.

Prerequisite: ZHON-360 with a minimum grade of C.

ZHON-3951. Honors Thesis/ Creative Project Hours. 1 Hour.

The NEIU Honors Program supports department-specific thesis options. Honors Scholars may conduct their Honors thesis/ creative project through departmental credit hours or by enrolling in ZHON-395. If the departmental thesis/creative project credits add up to less than 3, the student may use ZHON-3951-3 credits to bring the total number of Honors thesis/ creative project credits up to 3. See thesis advisor to determine if department has its own credit hours for senior thesis or creative project.

ZHON-3952. Honors Thesis/ Creative Project Hours. 2 Hours.

The NEIU Honors Program supports department-specific thesis options. Honors Scholars may conduct their Honors thesis/ creative project through departmental credit hours or by enrolling in ZHON-395. If the departmental thesis/creative project credits add up to less than 3, the student may use ZHON-3951-3 credits to bring the total number of Honors thesis/ creative project credits up to 3. See thesis advisor to determine if department has its own credit hours for senior thesis or creative project.

ZHON-3953. Honors Thesis/ Creative Project Hours. 3 Hours.

The NEIU Honors Program supports department-specific thesis options. Honors Scholars may conduct their Honors thesis/ creative project through departmental credit hours or by enrolling in ZHON-395. If the departmental thesis/creative project credits add up to less than 3, the student may use ZHON-3951-3 credits to bring the total number of Honors thesis/ creative project credits up to 3. See thesis advisor to determine if department has its own credit hours for senior thesis or creative project.

Finance and Administration

Manish Kumar, Vice President for Finance and Administration

The Division provides strategic direction and leadership for campus financial and administrative services that support the daily operations of the University. The Division is responsible for supporting the executive team and other stakeholders with key financial and operational information and driving a culture of innovation in managing NEIU's business operations. Finance and Administration provides service to the campus community in all aspects of the University's financial affairs, including financial planning, policy and analysis, financial records and reporting, budget development, cash management, risk management, management of the external audit process, and the development and implementation of a comprehensive technology plan. Areas within the Division of Finance and Administration include University Budgets, Controller's Office, Facilities Management, Procurement, Risk Management, Auxiliary Services, Human Resources, Student Payment Services, and University Technology Services.

Instructional Support Services

Student Computing Services

<http://www.neiu.edu/scs> (<http://www.neiu.edu/scs/>)

Student Computing Services (SCS) provides computing resource support for students through open computing labs, Technology Enhanced Classrooms (TEC) lab and online training materials.

STUDENT COMPUTER LABORATORIES

At Northeastern Illinois University, SCS maintains over 425 computer workstations for general student use in 15 locations across the main campus, El Centro and the Carruther's Center for Inner City Studies (CCICS). These computers, both Windows and Mac, have a number of applications that include Word Processing, Spreadsheet, Database, Presentation and Communications.

All computers are networked and have high-speed Internet access. Nine locations are TEC labs where general curriculum and classroom instruction is provided throughout the semester. For a complete listing of all available student computer labs, visit the SCS website (<http://www.neiu.edu/scs/>) and click on the Computer Labs link.

STUDENT AND FACULTY SERVICE SUPPORT

SCS provides access to online training materials in Word Processing, Spreadsheet, Presentation, E-Mail and the Internet for students and interested faculty. SCS also provides student support in the open computer labs and TEC labs during open lab hours. SCS employs students on a part-time basis for this purpose. All student employees are given special training in technical and service support procedures.

ASSISTIVE TECHNOLOGY

SCS supports students who have disabilities by coordinating with the Accessibility Center. Access to equipment in the computer labs is provided for the disabled in addition to special software (Jaws) for the visually impaired.

University Police

University Police Department

The University Police Department is responsible for fostering and maintaining a safe and secure campus environment for the University community. The Department is a full service law enforcement agency whose additional responsibilities include security of University property, emergency preparedness, and key control to all Northeastern campuses. The Department is open 24 hours a day, 7 days a week and is located in the northwest corner of the Parking Facility.

To contact the police, call 773-442-4100 or dial extension 4100 on campus. Please visit [neiu.edu/police](https://www.neiu.edu/police) (<https://www.neiu.edu/university-life/university-police/>) for additional information regarding the services provided by the University Police Department.

Institutional Advancement

Liesl Downey, B.A., Vice President

Institutional Advancement is responsible for strengthening the University through strategic initiatives that foster awareness, understanding and support for the University through fundraising and alumni outreach programs, events, and campaigns executed by the Division's Offices of Alumni Relations, Development and Advancement Services, in partnership with University Leadership and the Office of Marketing and Communication. It also directs the operations of the Northeastern Illinois University Foundation in collaboration with the Foundation's Board of Directors to raise private support for scholarships, other student aid, University strategic funding priorities, and growing the University's endowment.

Alumni Relations / Alumni Association (NEIUAA) (<http://neiu.edu/alumni-and-giving/alumni/>)

Alumni Relations hosts a variety of events and programs throughout the year to engage alumni with the University, including but not limited to social gatherings at University locations and throughout Chicago, academic lectures, community service activities, volunteer opportunities, and mentoring and professional development programs. The NEIUAA is more than 87,000 strong with members throughout the United States and around the world. The NEIUAA offers a five-level membership program to alumni and friends of the University, with the fully tax-deductible annual membership fee supporting programs throughout the year as well as student scholarships for internship experiences. Current NEIU students may engage with the NEIUAA through a variety of programs, including student memberships, internship scholarships, and an alumni/student mentorship program.

Development / NEIU Foundation (NEIUF) (<http://neiu.edu/alumni-and-giving/giving/give-neiu/>)

The NEIU Foundation, through the Office of Development, coordinates the University's efforts to raise philanthropic support for strategic priorities through private sources. This encompasses annual and principal giving, corporate and foundation relations, planned giving, development communications, and stewardship programs. Development also provides counsel for special fundraising efforts across university units and student groups. The help of faculty, staff, students and volunteers is crucial as Development and the Foundation communicate the impact of philanthropic support and inspire alumni and friends with opportunities to enrich and grow Northeastern's capacity for excellence.

Legal Affairs and General Counsel

The Office of the Vice President for Legal Affairs and General Counsel (VPLA or General Counsel) represents Northeastern Illinois University (Northeastern or the University) and its employees acting in their official capacities. The General Counsel provides legal advice and manages all legal services for Northeastern.

Guided by the operating principles of high ethical standards, sound decision-making, consensus building, courtesy, and respect, the VPLA is committed to act with integrity, knowledge of the law, and reason in support of the University's mission, vision, and values.

The General Counsel:

- assists in the development of University policy and procedures
- advises Northeastern administrators regarding sensitive employment matters
- reviews contracts and other legal documents
- selects and coordinates outside legal counsel when necessary
- helps resolve disputes and claims
- serves as the University's Freedom of Information Act (<https://neiu.edu/about/university-leadership/executive-team/legal-affairs-and-general-counsel/freedom-information-act/>) (FOIA) Officer

The VPLA cannot:

- provide legal advice or representation to employees or students about personal legal issues such as divorces, wills, and landlord/tenant issues
- counsel University administrators in matters unrelated to Northeastern business
- advise University administrators or departments whose interests are or may be adverse to the University

All University matters requiring legal advice or legal action should be referred to the VPLA.

Equal Opportunity and Ethics

Equal Opportunity and Ethics

The Office of Equal Opportunity and Ethics monitors compliance with policies and laws in a variety of important areas campus-wide.

The Director of this office serves as the Equal Opportunity Officer, Ethics Officer, and the Title IX Coordinator. Students may contact the Director of Equal Opportunity, Title IX, and Ethics on the main campus, room C-216, at eeo@neu.edu or (773) 442-5412.

Student Affairs

Terry C. Mena, Ph.D., Vice President and Dean of Students for Student Affairs

The office of Student Affairs serves as a primary source of information and advice about co-curricular opportunities and university resources. We educate students and the university community about university-wide policies and administer the Student Code of Conduct. We provide violence prevention training, mediate disputes and help students put classroom learning into practice. You may contact our office for assistance if you are experiencing difficulties adjusting to college life or if you just need someone to talk to. Staff members will work with you to help evaluate your situation and refer you to the people who can properly assist you.

Our Staff

Paola Vargas, M.A., Assistant to the Vice President and Dean of Students

Christopher Maxwell, M.A., Assistant Dean of Students

Luvia Moreno, M.A., Assistant Dean of Students and Director for Undocumented Student Resources

Diane DiMaso, M.A., Administrative Assistant

Contact us

Sachs Administration Building, C-336

Email: saffairs@neiu.edu

Residential Life – The Nest

NEIU Student Housing provides a supportive learning and living environment conducive to healthy living, personal growth, academic achievement and professional success in the heart of the university and the city of Chicago.

Northeastern continues to work with American Campus Communities (<https://www.neiustudenthousing.com/student-apartments/il/chicago/neiu-student-housing/>)s (ACC) on the design, development and management of NEIU student housing. ACC has established itself as a leader in quality student housing communities nationwide.

(773) 442-4663 (on-campus extension 4663)

neiu@americancampus.com

The Angelina Pedroso Center For Diversity and Intercultural Affairs

Durene I. Wheeler, Ph.D., Director
Building B, B-159
(773) 442-5449
CDIA@neiu.edu

The **Angelina Pedroso Center for Diversity and Intercultural Affairs** develops and provides programming and initiatives designed to educate, empower and retain students from socially and culturally diverse backgrounds.

The Pedroso Center works to create an environment that honors all differences, supports the holistic needs of students and empowers them to be agents of social change. The Center fosters the success of historically underserved student populations through advocacy, mentorship, intercultural education, awareness-building workshops and initiatives that celebrate our unique differences. In addition to our co-curricular programs, we offer a variety of resources which include lounge spaces, two (2) all-gender restrooms, a lactation room, and a kitchenette, as well as referral services.

We invite you to stop by and check us out!

Campus Recreation

Campus Recreation

Physical Education Complex, PE-1111
(773) 442-4135
email:campussrec@neiu.edu

Campus Recreation assists the Northeastern Illinois University community in establishing and maintaining a healthy lifestyle through a variety of recreation, fitness, and sport activities designed to foster individual development and enrich university life. Programming initiatives such as group fitness classes, personal training, fitness assessments, intramural and club sports, adventure programming, swimming lessons, student employment and development, health and safety courses and special events take place in a welcoming and inclusive environment throughout the main campus and satellite locations. Campus Recreation also partners with city-wide agencies and programs for high school sports, youth and adult recreational sports, camps and special events.

Career Development

Career Development

Building B, B-119
(773) 442-4680

Career Development integrates career development services and experiential learning with the goal of ensuring that Northeastern Illinois University students graduate ready and well-prepared to articulate the professional abilities and skills they have acquired through their curricular and co-curricular experiences. We also strengthen existing and develop new collaborative community and business partnerships that advance the University's mission in preparing a diverse community of students for leadership and service in their professions and in a dynamic multicultural world.

Career Development offers many resources and services to Northeastern students and alumni, including:

- A Career Planning Guide that focuses on early career engagement and coaching to enable students to make intentional efforts to explore career and major options and develop skills that prepare them for the workforce
- Opportunities for students to gain real world knowledge and experience leading to career and graduate school through internships and experiential learning opportunities in partnership with non-profits and businesses in the communities surrounding Northeastern's locations
- Resume and cover letter writing assistance
- Appointments regarding interviews, job search strategies, and networking
- Workshops, career fairs, and other events

Appointments can be scheduled by calling (773) 442-4680. Drop-in resume critique hours (no appointment needed) are posted on the Career Development (<https://www.neiu.edu/university-life/career-services/>) web page at the beginning of each semester. The **NEIUHire** online job board is a source of information for job openings and opportunities.

Student Counseling Services

Nancy Easton, Psy.D., Director
Building B, B-119
(773) 442-4650
counsect@neiu.edu

Student Counseling Services supports student success by providing counseling and mental health services to currently enrolled Northeastern students and offers consultation and outreach to the campus community at large.

We offer counseling and psychotherapy to help students understand and deal with emotional distress, relationship difficulties, and personal concerns, freeing them up to make clearer and healthier decisions. Through counseling, students can explore a range of personal life problems that may cause distress and disrupt their lives, including issues such as anxiety, suicidal thoughts, anger, depression, relationship problems, traumatic experiences or addictions. Individual, couples and group psychotherapy are available to current students. We are also available to faculty and staff for consultation about students and to request outreach services. When services are needed that are beyond the scope of what Student Counseling Services can offer, referrals are made to outside providers.

Appointments can be scheduled by calling (773) 442-4650 or in person in B-119.

After hours, you can reach a crisis counselor by calling (773) 442-4650 and pressing "2" during our outgoing message for urgent concerns.

Student Disability Services

Doug Lawson, M.Ed., Director
Building D, D-104
(773) 442-4595
SDS@neiu.edu

Student Disability Services (SDS) provides academic and technical assistance to students and works closely with faculty to facilitate student access. SDS provides students with physical and learning disabilities reasonable accommodations and services in compliance with the Americans with Disabilities Act (ADA).

Student Health Services

Sharon Heimbaugh, M.S.N., A.P.R.N., F.N.P., Director
Building E, E-051
(773) 442-5800
health-services@neiu.edu

Student Health Services offers routine physical exams, assessment and treatment of minor illnesses and injuries, health screening tests, health counseling and well-woman care services, including birth control. Health promotion and wellness events on all campuses are sponsored and supported by Student Health Services.

In the case of life-threatening medical emergencies, Campus Police should be immediately contacted at extension 5511.

Student Immunization Policy

The University requires all students enrolled in 6 or more credit hours to submit personal immunization records to Student Health Services to be in compliance with the Student Immunization Policy (https://www.neiu.edu/sites/neiu.edu/files/documents/ktvoigt/Pol_S1.4_Student_Immunization_and_Screening_FINAL_0.pdf). More information is available at www.neiu.edu/healthservices (<http://www.neiu.edu/healthservices/>).

Student Health Insurance

Student health insurance is not required and there is no University health insurance fee for students. The University no longer offers any student health insurance plans. Students interested in purchasing health insurance may qualify for health insurance through the State of Illinois official ACA health marketplace. Visit <https://getcovered.illinois.gov> for more information. Individual health insurance plans are also available for purchase through most private health insurance companies.

Student Leadership Development

Veronica Rodriguez, M.Ed., Director
Building B, B-159
(773) 442-4660
sld@neiu.edu

Student Leadership Development (SLD) engages our diverse students through programming, service opportunities, civic engagement initiatives, experiential learning and leadership opportunities designed to enhance their connection to the University. SLD hosts small and large scale programming designed to promote school spirit. Connect with our office (<https://www.neiu.edu/university-life/student-leadership-development/>) to learn about NEIU traditions and how you can make the most of your college experience.

Leadership Philosophy

Student Leadership Development strives to enhance our students' college experience through student engagement. We nurture students as they emerge on campus. We guide them as they advance through their collegiate career. We support them as they develop transferable skills. We advise them as they evolve into engaged global community members. We celebrate them as they recognize their potential.

We cultivate leaders.

What Can You Gain by Participating In Our Programs?

- Build your knowledge, skills and confidence as a leader and gain valuable experience to apply in post-college careers.
- Explore current, relevant and global issues that will spark civic engagement.
- Practice strategies for leading positive change, such as forming organizations, planning events, volunteering, fundraising and creating awareness campaigns.
- Receive recognition for your accomplishments in leadership and civic engagement.

Leadership Development

Northeastern Illinois University is committed to graduating students who will be leaders in their professional careers and their communities. Student Leadership Development offers a wide range of training opportunities and out-of-classroom experiences that encourage NEIU students to assess and develop the skills needed for effective leadership and multicultural understanding.

Civic Engagement

Do you want to make a difference in your community? We can help you find the right opportunity! No matter your interests, major, experience-level or time constraints, there is something for you. Get involved with the outside community through service days, Alternative Spring Break trips or volunteer through one of our student-run service projects. Partner with faculty, staff and students to apply what you are learning in your courses to real world problems. Gain valuable experience that will enhance your education as you become an aware and socially responsible individual through service and social action.

Another means of civic engagement is through voting in local and national elections. We recognize the privilege that comes with voting and that not all of our students have the right. We encourage everyone who is able to participate to vote and affect positive change in society. To assist and encourage our students' participation, Student Leadership Development holds voter registration drives prior to elections and maintains TurboVote, an online voter registration site.

Student Involvement

Student organizations represent the most visible and accessible avenue to student involvement. At Northeastern Illinois University there are more than 85 student organizations to suit a variety of interests. You will find academic, social, cultural, media, religious and community service organizations, just to name a few. To get the most from your college experience, it's important that you make time to create a plan that integrates your academic pursuits and career interests to help determine the choices you make about the time you spend outside of class. Active involvement both in and out of class contributes to your learning experience. Additionally, involvement in out-of-classroom experiences can help you develop valuable leadership and organizational skills and contribute to your marketability. Student organizations are an integral part of the student life at NEIU as well as the reflection of the diverse interests and activities of our student community.

Stop by Student Leadership Development or call us at (773) 442-4660.

Student Union, Event and Conference Services

Student Union, SU-207
(773) 442-4630
suecs@neiu.edu

The Student Union (<https://www.neiu.edu/university-life/student-union/>) at Northeastern Illinois University serves as a destination for our diverse community of students, faculty, staff and visitors to relax, connect, learn and grow through engaging programming, quality dining experiences and exceptional conference and event services. Student Union staff operates the Welcome Desk and Box Office (ticket sales to university events), administers University ID cards, the CTA U-Pass, locker rentals, and lost and found, and sells stamps and discounted AMC movie tickets.

This office oversees all Event and Conference Services (<https://www.neiu.edu/university-life/event-and-conference-services/>), and Bookstore (<https://www.neiu.edu/university-life/bookstore/>) and Campus Dining services.

Welcome Desk and Box Office

Northeastern's Welcome Desk and Box (<https://www.neiu.edu/university-life/student-union/welcome-desk-and-box-office/>) Office (<https://www.neiu.edu/university-life/student-union/welcome-desk-and-box-office/>) is conveniently located in Village Square and can help you find answers to all of your questions related to campus information and resources.

Welcome Desk services include:

- Student, Faculty and Staff Identification Cards (<https://www.neiu.edu/university-life/student-union/welcome-desk-and-box-office/identification-cards/>) (IDs)
- CTA U-Pass (<https://www.neiu.edu/university-life/student-union/welcome-desk-and-box-office/u-pass-information/>) Distribution
- Box Office (<https://www.neiu.edu/university-life/box-office/>) - purchase tickets to Northeastern Performing Arts concerts & other special events
- Lost and Found (<https://neiu.v2.crowdfind.com/public/#/studentunion/items>)
- Locker Rental
- Discounted AMC Movie Tickets
- Stamps

Fall 2021 & Spring 2022 Hours of Operation:

- Monday - Thursday 9:00 a.m. - 9:00 p.m.
- Friday - 9:00 a.m. - 6:00p.m.

To reach the Welcome Desk, call (773) 442-4290 or email us at Welcome-Center@neiu.edu

Chicago Transit Authority (CTA) U-Pass

The CTA U-Pass is an unlimited ride pass for the CTA, available to all full-time students.

Important CTA U-Pass Information:

- For the Spring, Summer and Fall terms, full-time is defined as 12 credit hours minimum for undergraduate students and 9 credit hours minimum for graduate students
- The cost is \$155 each semester
- You cannot waive the fee unless you fall into one of these categories:
 - Students who are para-transit dependent
 - Students who are currently studying abroad
 - Students who are taking all classes at UCLC (University Center–Lake County)
 - Students who are Military Service Pass participants, as issued by CTA
 - Students who are CTA employees or CTA retirees
 - Students who hold an RTA Free Ride or Reduced Fare Card

Replacement Cards are obtained through the Welcome Desk - the fee is \$50.00

7-day passes can be provided, if available, to students who are waiting on their first Ventra Card only. Students who have lost, damaged or had their card stolen are not able to receive a 7-day pass.

ID Card as a Copy Card

Your Northeastern ID card can be used as a copy card at photocopiers, or to pay for printing in the computer labs and library microfilm printers. Students, faculty, and staff must have a NEIUport NetID and NEIU ID card (with self-assigned 4-digit PIN) in order to print, scan and photocopy on campus. Users are required to set up a four digit PIN to use their ID cards and access their print allowance. Users can set and reset their 4-digit PIN at <http://print.neiu.edu> (<http://print.neiu.edu/>). Students at NEIU who have registered for classes prior to the beginning of the semester and have no Financial or Academic holds are allocated a 7,500 point print quota which will be given at the beginning of the first day of classes in the semester for which the student is registered. A student who does not meet these requirements or registers after the first day of classes will not receive a print quota and will need to login into NEIUport, click the "Help Desk" icon and submit a support ticket through NEIU's support application TeamDynamix or by contacting Technology Services at extension 4357 (HELP) from any house phone. The print quota can be used for printing, scanning and copying on campus MFDs and printers, and be in compliance with the university Acceptable Use of Information Technology Resources policy. Color printing is available at the Library Copy Center and the Student Lounge. Any unused print quota is removed after the last day of classes. Unused print quota does not roll over to the next semester. The print quota is not part of or related to the Computer Resource Fee and has no cash value. Users who exceed their print quota can purchase additional print points via "Add Value" stations located on campus or via credit card by logging into <https://print.neiu.edu/user> (<https://print.neiu.edu/user/>) and choosing the "Add Credit" menu option. Additionally, users can submit Web Print jobs, request refunds (only due to hardware or toner failure), manage their printing account and change their PIN at <https://print.neiu.edu/user> (<https://print.neiu.edu/user/>). For security purposes, print quota, PINs, NetIDs and passwords should never be shared among users. The print quota quantity is subject to change without notice.

ID Card Policy

All students enrolled in Northeastern Illinois University are required to obtain a Northeastern identification (ID) card and maintain this card in their possession while attending functions of Northeastern Illinois University. This card must be presented on demand for the purposes of official university identification. The card is available at the Welcome Desk. There is no charge for the first ID issued; however, there is a charge to replace a lost ID. To obtain your ID card, you must present proof of registration for the current semester and a photo ID (such as a valid driver's license).

The ID card is automatically validated upon payment of required fees each term. The ID card must be presented to check books out of the library, gain access to the Physical Education facility, pick up loan checks, vote in student elections and enter university events. The ID card also may be used for photocopies or to pay for printing in the computer labs and the library microfilm printers.

Admissions

Admissions and Transfer Center

The Admissions Office and Transfer Center are part of Enrollment Services (D-130) and assist prospective undergraduate students with the process of applying for admission and learning more about opportunities at Northeastern Illinois University. Admissions counselors review admission requirements and procedures, discuss academic programs, and explain how transfer credits apply toward university degree requirements. For more information, contact the Admissions Office at (773) 442-4050 or visit our website at Admissions (<http://www.neiu.edu/future-students/how-apply/>).

General Information

Factors considered in evaluating an undergraduate applicant for admission to Northeastern include: an applicant's GPA and standardized test scores. A non-refundable application fee of \$30 must be submitted with all applications. Applications received without the required fee will not be processed.

Admission Requirements and Application Procedures

Applicants for undergraduate admission at Northeastern Illinois University must:

1. Apply online or submit a completed paper application.
2. Submit a non-refundable application fee or approved application fee waiver accompanying the application. The application fee can be in the form of a check or money order payable to Northeastern Illinois University. If paid in cash at the Student Payment Services Office, the receipt should be attached with the application package.
3. Provide official transcripts and/or test scores. Transcripts and examination scores must be official and received in an envelope sealed by the sending institution. Hand-carried transcripts will be considered official as long as they are delivered in the sealed envelope. Transcripts become the property of the University and cannot be released.
4. Meet the admission requirements of your admission type (Click on Admission Type on left menu).

Refer to individual applications for specific instructions.

Application Processing

Applications are processed continuously throughout the year in accordance with published deadlines for each term. Applicants who send all required credentials well in advance of the term for which admission is being sought benefit by receiving earlier notification of admission decisions, and may be eligible to participate in Advance Registration.

International students who carry B1/B2, F, or J visas must complete their files by the published International student deadline for the term in which the student is applying in order to ensure proper processing of the I-20 form or DS-2019.

All transcripts and other documents submitted in support of a student's application for admission become the property of the University. The Admissions Operations Office will retain these credentials for a period of one year from the time of initial application. At the close of this period, all such documents submitted by applicants who do not enroll at Northeastern will be destroyed.

The discovery of omitted previous post-secondary attendance may be cause for the student's admission to be rescinded and, if a current student, for the student to be considered for dismissal from the University. An administrative hold will be put on the student's record blocking further registration. Petitions to reenter will be reviewed by the Admissions Appeal Committee.

Applicants must be in good disciplinary standing at schools previously attended. Applicants who are not in good disciplinary standing will be reviewed on a case-by-case basis.

Admission by Appeal

Undergraduate applicants who are not granted admission will have the opportunity to appeal their admissions decision by submitting an admissions portfolio. The portfolio requires a letter from a teacher or counselor, personal statement and the answer to two questions provided by the admissions committee. Complete instructions are sent to the applicant at the time of their admissions decision. Admission portfolios will be reviewed by an Admissions Appeal Committee. All appeal portfolios must be received by May 1. Contact the Admissions Office for additional information.

Admission to Major Programs

Undergraduate applicants are first approved for admission to the university. It is then the student's responsibility to apply to the academic department in which he/she wishes to major, to the Daniel L. Goodwin College of Education if pursuing a teacher education program, and to the College of Business and Technology if pursuing a business degree.

Students who are readmitted to the University must re-declare their major(s) and minor(s).

The University requires all undergraduate students to declare a major by the time they have earned a total of 45 credit hours. Students intending to major in business, education, or graphic design can declare a "Pre-major" until the program admission requirements to the College of Business and Technology, Daniel L. Goodwin College of Education, or the BFA program are met.

Freshmen

Admission Requirements and Application Procedures

Classification and Definition

A student currently attending high school or a high school graduate who has never attended a college or university **OR** a student who has satisfactorily passed the G.E.D. and has never attended a college or university.

Requirements For Admission

Northeastern Illinois University has adopted a Test Optional admissions policy for undergraduate admissions to the university. Applicants who have a cumulative high school grade point average of 2.5 or above will automatically be admitted to the university and not required to submit standardized test scores for admissions. Applicants who score below a 2.5 grade point average are encouraged to submit standardized test scores.

Students with GEDs: If you are 18 years of age, or older, you can be considered for admission upon successful completion of the GED.

Subject Requirements for Freshmen

In addition to meeting the Test Optional minimum requirement for admission, freshmen must also have completed the following high school subjects in accordance with the Illinois Board of Higher Education requirements*:

- 4 years of Language Arts
- 3 years of Mathematics (1 year must be algebra and 1 year must be a course that includes geometry content)
- 2 years of Writing (1 year must be an English course and 1 year may be provided as part of any course offered)
- 2 years of Social Science (must include 1 year of U.S. history or combination of U.S. history and American government and 1 semester of civics)
- 2 years of Science
- 1 year of Electives (Includes art, music, foreign language, or vocational education)

*First time freshmen and transfer applicants with fewer than 24 hours of transferable credit, who meet all criteria for admission except high school subject requirements, may be admitted on a provisional basis.

How to Apply for Admission and required documents

1. Submit application for admission with a \$30 application fee to the Admissions Office. We encourage students to apply online (<https://neu.elluciancrmrecruit.com/Apply/Account/Login/?ReturnUrl=/Apply>) for faster processing. Freshmen who are eligible for application fee waiver may also apply online and may upload their fee waiver form.
2. Arrange to have an official high school transcript from each high school attended or GED transcript sent to the Admissions Office. You may send electronic transcripts (please check with your high school to determine if this is an option). Courses taken at high schools outside of the United States must be evaluated by a member of NACES (<https://www.naces.org/members>) for equivalence of our undergraduate degree. A course-by-course evaluation is required.
3. Arrange for your ACT/SAT scores to be sent directly to the Admissions Office.
Standardized test scores are not required for admission to the University. Applicants, however, are encouraged to submit test scores in order to meet some scholarship and class prerequisite requirements.
4. If you are currently attending high school, request a copy of your "courses in progress" be sent along with your transcript to ensure your high school subject requirements do not appear deficient.
5. If you are a veteran, you must submit a photocopy of your DD214.
6. If you are a Permanent Resident of the United States, attach a clear photocopy of the front of your Permanent Resident card. If you have been granted temporary residence, conditional entrance, are a parolee, refugee, asylee, or in the process of becoming a Permanent Resident, you must submit appropriate U.S. Citizenship and Immigration Services documentation and/or copy of a valid visa.

Transfer

Admission Requirements and Application Procedures

Classification and Definition

A student who has at some time registered at an institution of higher learning following high school graduation whether or not any college-level work was completed.

Requirements For Admission

The applicant must have an overall "C" average in all coursework attempted and be in good academic standing at the last school attended full time. An applicant with less than 24 semester hours of college credit must also meet freshman requirements.

Applicants must be in good disciplinary standing at schools previously attended. Applicants who are not in good disciplinary standing will be reviewed on a case-by-case basis.

How to Apply for Admission

1. Submit application for admission with a \$30 application fee to the Admissions Office. We encourage students to apply online (<https://neu.elluciancrmrecruit.com/Apply/Account/Login/?ReturnUrl=/Apply>) for faster processing.
2. The applicant must have an overall "C" average in all coursework attempted and be in good academic standing at the last school attended full time. Students with less than 24 semester hours of college credit must also meet freshman requirements.
3. Arrange to have an official college transcript from each college or university attended sent to the Admissions Office. You may have your transcript sent electronically from your college/university directly to the Admissions Office.
4. If you have earned less than 24 semester hours of college credit, you must also have an official high school transcript sent from your high school and meet freshmen admissions requirements.
5. If you are a veteran, you must submit a photocopy of your DD214.
6. If you are a Permanent Resident of the United States, attach a clear photocopy of the front of your Permanent Resident card. If you have been granted temporary residence, conditional entrance, are a parolee, refugee, asylee, or in the process of becoming a Permanent Resident, you must submit appropriate U.S. Citizenship and Immigration Services documentation and/or copy of a valid visa.

Undergraduate Transfer Credit Policy

Community College work: A maximum of 64 semester hours will be accepted in transfer from a community college and used toward graduation. Students who have completed more than 64 hours at a community college will only have 64 hours reflected on the NEIU transcript. Students who need to have a transfer course not listed on their NEIU transcript added may complete a Request for Re-evaluation form available in Enrollment Services. Adjustments will only be made for courses that are required for a student's major or minor and the request must be accompanied by a memo from the advisor.

4-year College/University work: A maximum of 90 semester hours is counted toward graduation. Students who have completed more than 90 hours will only have 90 hours reflected on the NEIU transcript. Students who need to have a transfer course not listed on their NEIU transcript added may complete a Request for Re-evaluation form available in Enrollment Services. Adjustments will only be made for courses that are required for a student's major or minor and the request must be accompanied by a memo from the advisor.

Combination of Community College and College/University work:

In cases where both a community college and a four-year college/university were attended, a maximum of 90 semester hours will be accepted in transfer; however, the maximum of 64 semester hours earned from a community college or through credit by examination or the military still applies.

Bachelor of Arts in Interdisciplinary Studies

Students majoring in the Bachelor of Arts in Interdisciplinary Studies program are permitted to transfer up to 96 semester hours.

Acceptance of Associate Degrees

Students graduating with an approved Illinois Community College Board (ICCB) Model Associate of Arts (AA), Associate of Science (AS)*, or Associate of Arts in Teaching (AAT) degree will be granted junior standing and will have fulfilled Northeastern Illinois University's General Education-Distributive Learning requirements.

*Students who complete the AS degree after Fall 2016 may have to take one additional humanities and one additional social/behavioral science course to complete the General Education Distributive Learning requirements, depending on how many hours were completed in each of these areas when the AS degree was conferred.

Preliminary Degree Evaluation

Transfer students will be able to run their online degree evaluation to see how Northeastern has accepted their transfer courses. Information on how to run the online degree evaluation will be sent with the student's admissions letter. Transferred courses accepted by the University do not necessarily meet specific program requirements.

Transfer Advisors

Students attending community colleges should check with their community college counselors or the NEIU Transfer Center to select appropriate courses for transfer to Northeastern.

Transfer Credit Policies

- Courses from institutions without regional or national accreditation are nontransferable. For admission purposes only, all college level course work at post-secondary institutions previously attended will be considered in the calculation of grade point average. Repeated courses are accepted only once in transfer. In the case where a repeated course is one which the student failed initially, the "F" grade will not be counted in the grade point average. This will apply to one "F" grade per course repeated.
- Transfer credit in technical and vocational areas will be accepted if the course work is academic in nature and is designed to transfer into a baccalaureate program at Northeastern. In general, technical and vocational courses are acceptable if comparable programs or areas of study are offered at Northeastern. There is a limit of 30 semester hours of technical and vocational courses accepted in transfer.
- Courses from other colleges or universities must have been completed at the appropriate level to be eligible for transfer credit consideration. Developmental and remedial courses are examples of courses not transferable.
- "Credit by examination" equated to an actual course and listed on an official transcript must be stated in terms of Credits Awarded and must include a semester hour assignment to be accepted by Northeastern in transfer.
- Credit for prior learning through portfolio submission is only considered for students in the Bachelor of Arts in Interdisciplinary Studies (BAIS) program. Credit for prior learning will not be accepted for transfer credit into Northeastern's traditional programs nor will prior learning credit be counted when students change from non-traditional to traditional programs of study while at Northeastern.
- Credit earned at institutions without regional or national accreditation but approved for candidacy status by the recognized regional or national accrediting agency may be accepted by Northeastern upon request once the institution has been officially accredited. Proof of accreditation and candidacy period are required.
- Science and education courses which are 15 years old or more are not transferable to NEIU without special departmental and/or college approval. This restriction does not apply to a student majoring in the Bachelor of Arts in Interdisciplinary Studies (BAIS) program.
- Business courses which are 6 years old or more are generally not applicable toward a Business and Management major for reasons of datedness.
- A maximum of 30 credit hours of ROTC/Military Science coursework is acceptable as elective transfer credit subject to the credit being properly recorded on the student's transcript. Students in the BAIS program may transfer more than 30 credit hours of ROTC/Military Science coursework.
- All transfer students must earn a minimum 30 credit hours (24 hours for BAIS students) of coursework in residence at Northeastern to be eligible to graduate.
- Grades of "D" are accepted in transfer in limited cases but no more than 6 credits may be counted toward meeting General Education requirements. Grades of "D" will not be accepted in a student's major, minor or professional sequence. This restriction does not apply to a student majoring in the Bachelor of Arts in Interdisciplinary Studies (BAIS) program.
- Course work transferred for credit in the student's major is subject to departmental and/or college approval.

Credit by Examination

Credit for Advanced Placement (AP)

Students who have successfully completed Advanced Placement exams may receive college credit for this work. Please refer to the Advanced Placement Transfer Guide for information about the subjects and minimum passing scores. The guide is available online at the Credit by Examination page (<http://admissions.neiu.edu/transfer-center/credit-examination/>) or in Enrollment Services.

Please send official Advanced Placement score reports to the Admissions Processing Office for review. A maximum of 30 credit hours may be awarded for Advanced Placement exams. This credit is included in the maximum of 64 semester hours transferable from community colleges.

Credit for College Level Examination Program (CLEP)

Students who have successfully completed College Level Examination Program (CLEP) general or subject exams may receive college credit for this work. Please refer to the CLEP Transfer Guide for information regarding transferable subjects and minimum passing scores. The guide is available online on our Credit by Examination page (<http://admissions.neiu.edu/transfer-center/credit-examination/>) or in Enrollment Services.

Please send official CLEP score reports to the Admissions Processing Office for review. A maximum of 30 credit hours may be awarded for CLEP exams. This credit is included in the maximum of 64 semester hours transferable from community colleges.

Credit for International Baccalaureate (IB)

Students who successfully complete the International Baccalaureate (IB) Diploma Programme may receive college credit for this work. Please refer to the International Baccalaureate Transfer Guide for information regarding transferable subjects and minimum passing scores. The guide is available online at the Credit by Examination page (<http://admissions.neiu.edu/transfer-center/credit-examination/>) or in Enrollment Services.

Please send official IB score reports to the Admissions Processing Office for review. A maximum of 30 credit hours may be awarded for International Baccalaureate exams. This credit is included in the maximum of 64 semester hours transferable from community colleges.

Credit for Military Service

Four credit hours are awarded to veterans who have been honorably discharged and have served a minimum of one year on active duty or in the guard/reserve. Veterans must submit Member 4 of their DD214 to the Admissions Processing Office at the time of application for admission.

Credit is also allowed for those United States Armed Forces Institute (USAFI) courses for which the American Council on Education recommends credit at the baccalaureate level, provided the student has passed the appropriate USAFI end-of-course test or examination.

Credit for service schools successfully completed may be evaluated upon request. In order to grant credit to veterans for service/school training, veterans must provide transcripts. These transcripts are free to all eligible soldiers, sailors, marines, and airmen. More details are available at the following websites:

- USAF—CCAF Transcripts <https://www.airuniversity.af.edu/Academic-Affairs/Registrar/>
- Joint Services Transcripts for Army, Coast Guard, Marine Corps, and Navy are requested at <https://jst.doded.mil>

The student must file the Request for Evaluation form available in Enrollment Services.

DSST

Northeastern accepts DSST credit for students who major in the Bachelor of Arts in Interdisciplinary Studies (BAIS) program. For more information, contact the Nontraditional Degree Programs Office at (773) 442-6030.

Guaranteed and Dual Admission Program

Northeastern has agreements with many area community colleges that allow for concurrent admission to the community college and Northeastern, simplifying the transfer process. Under the agreement, students who wish to participate must meet the admissions requirements of both institutions as well as the admissions requirements of the Northeastern program in which they desire to major. Both institutions will provide students with select services to guarantee a seamless transfer process.

Students who wish to be admitted to Northeastern will submit an application to both Northeastern and one of the community colleges with which there is an agreement in place. The applications and academic credentials will be reviewed by both institutions. Students who enroll in the program will have access to Northeastern's campus and select services while attending their community college. Students must maintain continuous full- or part-time enrollment with a 2.0 grade point average to remain eligible for the dual admission program. Agreements can be found under the Dual Admissions category at <http://admissions.neiu.edu/transfer-center> (<http://admissions.neiu.edu/transfer-center/>).

Students who are interested in this program should contact Northeastern Illinois University's Admissions Office.

Illinois Articulation Initiative

Illinois Articulation Initiative (IAI)

Northeastern is a participant in the Illinois Articulation Initiative (IAI), a statewide agreement that allows transfer of the completed Illinois General Education Core Curriculum (GECC) between participating institutions. Successful completion of the GECC at any participating college or university in Illinois assures transferring students that lower-division general education requirements for an associate or baccalaureate degree have been satisfied and allows students to transfer this portion of an associate or baccalaureate degree from one participating IAI institution to another without incurring a loss of credit. This agreement is in effect for students entering as a first time student in summer 1998 (and thereafter). For more information visit the IAI web site at <http://www.iTransfer.org> (<http://www.itransfer.org/>).

The Illinois Transferable GECC consists of 12 to 13 courses, or 37 to 41 hours of credit, within a five-category designation. The general requirements are as follows:

Communication	3 courses	(9 credits)
Humanities and Fine Arts	3 courses	(9 credits)
Mathematics	1 course	(3 credits)
Physical and Life Sciences	2 courses	(7 to 8 credits)
Social and Behavioral Sciences	3 courses	(9 credits)

Illinois Articulation Initiative Course Requirements:

Communication (3 courses, 9 semester hours)

IAI Course No.	NEIU Course No.	NEIU Course Title	Credit Hours
C1 900	ENGL-101	Writing I	3
C1 901R	ENGL-102	Writing II	3
C2 900	CMTC-101	Public Speaking	3

A grade of C or better is required in C1 900, ENGL 101 or C1 901, ENGL 102.

Humanities and Fine Arts (3 courses, 9 semester hours)

IAI Course No.	NEIU Course No.	NEIU Course Title	Credit Hours
F1 900	MUS-101	The Musical Experience	3
F1 906	DANC-101	The Dance Experience: Introduction To The Art Of Dance	3
F1 907	CMTT-130	Introduction to Theatre	3
F2 900	ART-101	Art In Society	3
F2 901	ART-106	Introduction To Art History I	3
H3 902	ENGL-202	The World Of Drama	3
H3 903	ENGL-201	The World Of Poetry	3
H3 905	ENGL-220	Introduction To Shakespeare	3
H3 912	ENGL-221	English Literature:The Beginnings To C. 1750	3
H3 913	ENGL-222	English Literature: C. 1750 To The Present	3
H3 914	ENGL-218	American Literature:Beginnings To 1865	3
H3 915	ENGL-219	American Literature:1865 To The Present	3
H4 900	PHIL-102	Introduction To Philosophy	3
H4 904	PHIL-213	Ethics	3
H4 905	PHIL-211	Philosophy Of Religion	3
H4 906	PHIL-101	Critical Thinking	3
HF 907D	WGS-101	Women's Perspectives And Values	3

One Humanities and one Fine Arts course is required.

Mathematics (1 course, 3 semester hours)

IAI Course No.	NEIU Course No.	NEIU Course Title	Credit Hours
MI 900-1	MATH-187	Calculus I	4
MI 900-2	MATH-202	Calculus II	4
MI 900-3	MATH-203	Calculus III	4
MI 905	MATH-251	Writing Intensive Program: Introduction To Advanced Mathematics	5

Physical and Life Sciences (2 courses, 7-8 semester hours)

IAI Course No.	NEIU Course No.	NEIU Course Title	Credit Hours
P1 900L	PHYS-110	Physics In Everyday Life	3
P1 902L	CHEM-110	Chemical Concepts	3
P1 903	CHEM-103	Chemistry And Society	3
P1 905L	ESCI-121	Introduction To Earth Science	3
P1 906	PHYS-103	The Universe:Past, Present And Future	3
P1 908	ESCI-123	Environmental Geology	3
L1 900L	BIO-100	Introduction To Biology	3
L1 905	BIO-104	The Changing Natural Environment	3

One Life Science and one Physical Science course is required, one of which must be a lab.

Social and Behavioral Science (3 courses, 9 semester hours)

IAI Course No.	NEIU Course No.	NEIU Course Title	Credit Hours
S1 901N	ANTH-212	Introduction To Cultural Anthropology 2	3
S1 902	ANTH-215	Human Origins: Introduction To Biological Anthropology	3
S2 900	HIST-214	United States History 1607-1877	3
S2 901	HIST-215	United States History 1877-Present	3
S2 902	HIST-111A	World History: The Origins Of The West, To 1500	3
S2 903	HIST-111B	World History: The West And The World, 1500-Present	3
S2 906N	HIST-111E	World History: Africa ²	3
S2 908N	HIST-111C	World History: East Asia ²	3
S2 910N	HIST-111D	World History: Latin America ²	3
S3 901	ECON-215	Principles Of Macroeconomics	3
S3 902	ECON-217	Principles Of Microeconomics	3
S4 900N	GES-104	World Geography ²	3
S5 900	PSCI-216	American National Government	3
S5 903	PSCI-210	Introduction To Political Science	3
S5 905	PSCI-251	Writing Intensive Program: Comparative Political Systems	3
S6 900	PSYC-100	Survey Of Psychology	3
S6 902	PSYC-110	Life Span Development	3
S6 903	PSYC-215	Child Psychology	3
S7 900	SOC-100	Introduction To Sociology	3
S7 902	SOC-214	Sociology Of Intimacy, Marriages And Families	3

Two disciplines must be represented from the following list: Anthropology (S1), History (S2), Economics (S3), Geography (S4), Political Science (S5), Psychology (S6), and Sociology (S7).

- ¹ Course examines aspects of human diversity within the United States.
- ² Course examines aspects of human diversity from a non-U.S./non-European perspective.

Those students who have not completed the entire General Education Core Curriculum prior to transferring to Northeastern will be required to complete Northeastern's General Education program. However approved IAI courses taken at participating schools will be used towards Northeastern's General Education program.

Students transferring to another institution, who have completed at least 37 semester hours, may request an audit, via the re-evaluation form request, of their records determine completion of the Illinois Transferable General Education Core Curriculum. If complete, the University will certify completion of the Illinois Transferable General Education Core requirements on the student's transcript.

Second Bachelor's Degree

Admission Requirements and Application Procedures

Students who wish to earn a second bachelor's degree must submit to the Admissions Operations Office a completed Northeastern undergraduate application form, a non-refundable \$30 application fee and an official college transcript from the regionally accredited institution which awarded the first baccalaureate degree.

Classification and Definition

A student who has earned a bachelor's degree and wishes to earn a second undergraduate degree. If the degree was earned outside of the United States, an evaluation from a NACES approved evaluation service must state that the degree is equivalent to a U.S. bachelor's degree. If it is not equivalent the student will be processed as a transfer student.

NOTE: Tuition and fees will be assessed at the graduate student rate.

Requirements For Admission

Evidence of graduation from a regionally accredited college or university.

How to Apply for Admission

1. Submit undergraduate application form with a \$30 application fee to the Admissions Office. We encourage students to apply online for faster processing.
2. Arrange to have an official college transcript from each college or university attended sent to the Admissions Office. You may have your transcript sent from the college/university attended directly to the Admissions Office. Courses taken at colleges or universities outside of the United States must be evaluated by a member of NACES (<https://www.naces.org/members>) for equivalence of our undergraduate degree. A course-by-course evaluation is required.
3. If you are a Permanent Resident of the United States, attach a clear photocopy of the front of your Permanent Resident card. If you have been granted temporary residence, conditional entrance, are a parolee, refugee, asylee, or in the process of becoming a Permanent Resident, you must submit appropriate U.S. Citizenship and Immigration Services documentation and/or copy of a valid visa.

International Students

Admission Requirements and Application Procedures

Classification and Definition

Students from other countries who carry a valid visa or are applying to the university as an international student.

International Students with an F1 Visa are eligible for admissions to degree programs only, with exception that they may apply as an undergraduate student at-large for the Summer session only, provided they submit a copy of their I-20, I-94, visa letter from the Designated School Official (DSO) of their home school giving permission to attend and affirming the home school will take responsibility in making sure the student stays in status. J Visa holders must submit a copy of their DS-2019, I-94 and visa and may attend one semester only during the summer.

Students with J visas must apply as a student-at-large unless they intend to become a full-time degree seeking student and must then apply as an international student. Students who are out-of-status will not be considered for admission.

NOTE: Students must complete their files by the published deadline for the term in which the student is applying to ensure proper processing of I-20 forms. An I-20 will not be issued until the student has received notification of admission from Northeastern's Admissions Office. At no time will any student on an F or J visa be eligible for resident tuition assessment.

Requirements For Admission

1. Submit application for admission with a \$30 application fee to the Admissions Office. We encourage students to apply online for faster processing.
2. Arrange to have an official college transcript from each college or university attended sent to the Admissions Office. You may have your transcript sent electronically from your college/university directly to the Admissions Office. Courses taken at colleges or universities outside of the United States must be evaluated by a member of NACES (<https://www.naces.org/members>) for equivalence of our undergraduate degree. A course-by-course evaluation is required.
3. Arrange to have official TOEFL or IELTS scores sent to the Admissions Office. You must pass the written version of the Test of English as a Foreign Language (TOEFL) with a minimum score of 500 (masters admission requires 550) or you must pass the computerized version of the TOEFL test with a minimum score of 173 (master admission requires 213) or the internet based test with minimum score of 61 (masters admission requires 79). The International English Language Testing System (IELTS) may be submitted in lieu of TOEFL. An IELTS minimum score of 6 (masters admissions 6.5) is required.
4. Masters applicants must also submit 2 letters of recommendation, statement of goals and objectives, and any additional documents required by the program. Please refer to Graduate Students section for more information.
5. Your file will be reviewed for admission decision when the application, fee and all academic documents, such as transcripts and test scores are received. However, an I-20 will not be issued until the Requirements for I-20 Processing have been met. Please see below.

Requirements for I-20 Processing

In order to attend Northeastern Illinois University, you must be issued an I-20 from the Office of International Programs. In addition to submitting the required admissions documents and receiving an admission letter, you must submit the following documents to the Office of International Programs for the I-20 to be processed. For more information, contact the Office of International Programs.

1. You must file a Northeastern Financial Statement that indicates your sponsor has sufficient finances to support you for the duration of your stay in the United States. Submit sponsor's bank and/or employment letter. All financial statements and supporting documents must be in exact U.S. dollar amounts. Bank certification letters must reflect savings or Certificates of Deposit.
2. If applicant is currently in the United States, a copy of the I-94 must also be submitted.
3. You must indicate your home country address on the application form. Additional information may be requested by the Office of International Programs such as transfer release forms, proof of Optional Practical Training (OPT) and additional financial statements.

Graduate Students

General Admission Requirements

Applicants for graduate admission at Northeastern Illinois University must:

1. Submit a completed application.
2. Submit a non-refundable application fee accompanying the application. The application fee can be in the form of a check, money order or bank draft payable to Northeastern Illinois University. If paid in cash at the Student Payment Services Office, the receipt should be attached with the application package.
3. Possess an undergraduate degree from a regionally-accredited college or university or recognized international college or university.
4. Provide current official transcripts. Transcripts and examination scores must be official and received in an envelope sealed by the sending institution or electronically via credential third-party transcript provider. Hand-carried transcripts will be considered official as long as they are delivered in the sealed envelope. Transcripts become the property of the University and cannot be released.
5. Meet the requirements of the specific program to which they are applying (see below).

Courses taken at colleges and universities outside of the United States must be evaluated by a member of NACES (<https://www.naces.org/members>) for equivalence of our undergraduate degree. A course-by-course evaluation is required. Three-year degrees from a college or university in a country that is a signed participant in the Bologna Process are eligible to be officially accepted as equivalent to a four-year U.S. degree. In addition to all required documented listed above, students who graduated with a three-year Bologna-compliant degree must submit the accompanying Diploma Supplement (DS).

Admission to a Degree Program

In addition to the general requirements listed above, application to a master's degree program requires the following additional materials:

1. Two letters of recommendation.
2. A two-page statement of goals and objectives.
3. Transcripts from all institutions of higher education attended for which the applicant enrolled in credit-earning courses. Transcripts from NEIU do NOT need to be submitted. It is also not necessary to re-submit any transcripts that have been submitted in a previous application to an NEIU graduate program, as long as no additional coursework was completed since the initial transcript was sent to NEIU.
4. Consult the application instructions for additional application requirements for specific degree programs. Some programs require applicants to take the Graduate Record Examination (GRE general as well as the subject test) or the Graduate Management Admission Test (GMAT). Students applying to these programs must arrange to send the test scores to the Graduate Admissions Office at Northeastern Illinois University to avoid delay or denial of admission. The code for Northeastern Illinois University is 1090.

Admission to a master's degree program requires the following level of academic achievement:

1. Demonstrate a high level of scholastic ability as reflected by an undergraduate grade point average of 2.75 or better (4-point scale), though some programs require 3.00 or higher. All undergraduate coursework completed prior to the conferral of the bachelor's degree is computed in this average. Any previous graduate credit is also taken into appropriate consideration.
2. An average of at least B (3.0) in the undergraduate coursework that is the foundation for the master's program.
3. Satisfactory mastery of the program prerequisites.

Applicants must be in good disciplinary standing at schools previously attended. Applicants who are not in good disciplinary standing will be reviewed on a case-by-case basis. The final admission decision rests with the program faculty.

An undergraduate senior who meets all of the requirements for admission to the College and the specific degree program, and is within 9 semester hours of completing an undergraduate degree may be granted **Contingent Admission**. Prior to the start of classes in the term of admission, an applicant granted contingent admission must submit an official transcript showing conferral of the degree in order to start graduate coursework. Courses used to fulfill the undergraduate degree requirements will not apply to the graduate degree program of study.

Conditional and Provisional Admission

An applicant who does not meet all of the academic requirements for admission to a degree program may be admitted into one of the following two graduate admission categories upon the recommendation of the graduate program and the approval of the College of Graduate Studies and Research.

Conditional Admission: Applicants lacking mastery of certain, specific program prerequisites may be allowed to obtain that mastery by completing prerequisite coursework by a specified time or point in the graduate program as deemed appropriate by the graduate program. Such applicants will be granted admission and assigned to “conditional status.” Students in conditional status will be required to complete their prerequisite work early in their graduate program, in accordance with the sequence of courses recommended by their graduate program advisor. Failure to complete the prerequisite work by the time the student earns 12 credit hours of graduate-level work will result in a hold being placed on their ability to register for courses in all future terms until the completion of the prerequisite work. Registration holds may only be released for the upcoming semester upon a plan of prerequisite course completion agreed upon by the student and the graduate program advisor.

Provisional Admission: Applicants who do not meet the standard academic background expected for full admission to a degree program, may, in some cases, be granted admission to “provisional status” upon the recommendation of the graduate program and the approval of the College of Graduate Studies and Research. Admission to provisional status may result from an applicant having:

1. a degree from an institution for which academic credit equivalency cannot be established, or one that issues transcripts with ungraded academic records.
2. an undergraduate cumulative grade point average that is below 2.75.
3. an erratic undergraduate academic record.

Students admitted to provisional status must achieve a grade of B or better in all courses taken until the term of completion of the first 9 graduate-level credits in the program. Failure to meet this performance standard will result in dismissal from the program.

Students admitted to provisional status who also lack mastery of certain, specific program prerequisites may also be allowed to obtain that mastery by completing prerequisite coursework as described above. Such students will be subject to both expectations described above for students in provisional and conditional status.

Applicants must be in good disciplinary standing at schools previously attended. Applicants who are not in good disciplinary standing will be reviewed on a case-by-case basis.

Notification of Admission

The Graduate Admissions Office will inform students in writing of the admissions decision. Students who are admitted should contact their program advisor within two weeks of receiving notification of admission, register for the courses they plan to take in their first term, and participate in orientation programs as specified by the college and/or program.

Since each graduate degree program has its own specific course requirements, it is imperative that the student assumes the responsibility for contacting the assigned advisor in the program. The letter of admission will identify the advisor. The student should contact the program advisor well in advance of any registration period, as detailed program advising cannot be done, and should not be expected, just prior to the start of classes.

International Students

International Students are required to follow all admissions processes and fulfill all of the admissions requirements noted above. Additionally, they must demonstrate that they meet eligibility requirements for F-1 visa status and English language proficiency.

Eligibility for F-1 visa status requires demonstrating the availability of sufficient funds for attending school and for living expenses. This is done by completing and submitting a notarized Northeastern Financial Statement along with notarized supporting documents, which include an official, notarized bank letter obtained from the financial institution(s) of the sponsor(s) identified in the Northeastern Financial Statement. Further details can be obtained on the website of the Office of International Programs (<http://www.neiu.edu/international/>).

English language proficiency: International students must demonstrate English language proficiency as evidenced by an approved standardized test. International applicants are exempt from this requirement if they have earned a degree from a regionally or nationally accredited U.S. college or university.

NEIU accepts scores from both the Test of English as a Foreign Language (TOEFL) as well as from the International English Language Testing System (IELTS). Minimum acceptable scores are 79 on the TOEFL iBT or a 6.5 composite score on the IELTS. Some programs require a TOEFL or IELTS score that is higher than the university minimum requirement; these can be found on the application along with other program-specific requirements.

Applicants who do not meet the English language proficiency minimum scores may be considered for conditional admission to a graduate degree program in conjunction with Northeastern's intensive English program (SAELL). SAELL provides training for international students to meet the English language proficiency requirement. International applicants with IELTS composite scores of 5.0 or better or TOEFL iBT scores of 35 or better may be considered for a special joint admission to SAELL with conditional admission to a graduate degree program. Joint conditional admission requires

international students to begin studies at NEIU in the SAELL intensive English program, with a guarantee of admission to the graduate degree program upon demonstration of English language proficiency within 12 months of beginning in the SAELL program. Further details can be obtained on the website of the Office of International Programs (<http://www.neiu.edu/international/>).

Admission Acceptance / Deferral

Students may request, in writing, a deferral of their matriculation for up to one year. Requests for deferment should be submitted to the Graduate Admissions Office at grdeferment@neiu.edu.

Graduate Transfer Credit Policy

Graduate transfer credits are any credits used to fulfill Northeastern Illinois University graduate degree requirements which are:

1. earned at Northeastern prior to the term of admission to a graduate program: OR
2. earned at a regionally or nationally accredited college or university or recognized international college or university. These transfer credits may be earned either prior to or after admission to a Northeastern graduate program.

All graduate transfer credits that are used to fulfill degree requirements need to be approved by the program.

Students should submit their transfer credit request form before the completion of 9 credit hours after admission to the program. Any delay in the completion of the transfer credit request may impact the student's graduation date. Credits transferred in the final semester before graduation will delay graduation until the credits are posted.

Credits earned for thesis hours are not transferable.

Coursework credits are eligible for transfer credit only if they meet the following criteria:

- a. Credits must be for graduate-level work;
- b. The course grade must be a B- or higher;
- c. Credits must have been completed within 6 years of expected graduation.

See the Graduate Certificate Programs policy (<http://catalog.neiu.edu/graduation-requirements/graduate-certificate-programs/>) for information explaining the relationship between related certificates and degree programs.

1. Coursework taken at Northeastern prior to admission to a graduate program: Credit for coursework taken at Northeastern prior to admission to a graduate program, which the student wishes to count towards that graduate program, is limited to no more than 50% of the program requirements, except in the case of credits from an earned graduate certificate. The entirety of credits from an earned graduate certificate can be counted towards a graduate degree program (see the Graduate Certificate Programs policy (<http://catalog.neiu.edu/graduation-requirements/graduate-certificate-programs/>)). No additional transfer credit is allowed if credits from an earned certificate represent 50% or more of the total program requirement credits.
2. Coursework taken outside of Northeastern: Graduate transfer credits can be earned either before admission to the student's program or after admission to the program, provided that the total number of transfer credits (regardless of when they were earned) does not exceed 9 hours, unless approved specially as part of a formal university agreement. Formal university agreements allowing external transfer credits that would exceed 50% of the course credit requirements for any graduate program must be reviewed and approved via normal governance process. All transfer credits earned after the student has been admitted to his/her program must be approved by the advisor, program advisor, and the Dean of the College of Graduate Studies and Research prior to enrollment at the other institution.

Student-At-Large

STUDENT-AT-LARGE WITH DEGREE

CLASSIFICATION AND DEFINITION

Students with bachelor's or graduate degrees who wish to enroll at Northeastern as non-degree candidates. Students who wish to enter a master's program must make formal application to the Graduate Admissions Office. A maximum of nine credit hours taken in this at-large classification may apply toward a master's degree.

Courses are not automatically accepted into a master's program. Such work would have to correspond to specific program requirements and satisfy all scholastic requirements of the master's program.

Students-at-Large with degree are not eligible to receive financial aid.

REQUIREMENTS FOR ADMISSION

Graduation from a regionally accredited college or university.

HOW TO APPLY FOR ADMISSION

1. Submit Student-at-Large application for admission with a \$30 application fee to the Admissions Office. We encourage students to apply online for faster processing.
2. Submit official transcript from which the highest degree was awarded.
3. If you are a Permanent Resident of the United States, attach a clear photocopy of the front of your Permanent Resident card. If you have been granted temporary residence, conditional entrance, are a parolee, refugee, asylee, or in the process of becoming a Permanent Resident, you must submit appropriate U.S. Citizenship and Immigration Services documentation and/or copy of a valid visa.

NOTE: If you have previously attended Northeastern Illinois University as an undergraduate student, you must submit proof of your degree to the Admissions Operations Office.

STUDENT-AT-LARGE WITHOUT DEGREE

CLASSIFICATION AND DEFINITION

Undergraduate students working toward a baccalaureate degree at another college or university. NOTE: Students-at-large interested in earning an undergraduate degree at Northeastern must submit an application for admission and meet undergraduate admission requirements.

Students-at-Large without degree are not eligible to receive financial aid.

Students-at-Large who later apply as degree-seeking students and are denied will not be allowed to continue to enroll in the Student-at-Large status. An appeal may be submitted to the Admissions Appeal Committee.

REQUIREMENTS FOR ADMISSION

Graduation from high school or Satisfactory completion of the G.E.D. **AND** must be in good academic standing at last college attended and have cumulative GPA of 2.0 or higher (4.0 scale).

HOW TO APPLY FOR ADMISSION

1. Submit Student-at-Large application for admission with a \$30 application fee to the Admissions Office. We encourage students to apply online for faster processing.
2. If you are a Permanent Resident of the United States, attach a clear photocopy of the front of your Permanent Resident card. If you have been granted temporary residence, conditional entrance, are a parolee, refugee, asylee, or in the process of becoming a Permanent Resident, you must submit appropriate U.S. Citizenship and Immigration Services documentation and/or copy of a valid visa.

NOTE: Transcripts are not required.

Readmission

Admission Requirements and Application Procedures

Inactivation/Re-admission Policy

An undergraduate or graduate student who does not enroll in at least one course over six consecutive semesters, including the summer semester, will have his/her student status changed from "Active" to "Inactive". An undergraduate student must be re-admitted to the University or as a student-at-large to register for additional classes.

A graduate student must be re-admitted to the same program, admitted to a different program, or admitted as a student-at-large to register for additional classes. Re-admission to a student's original program is not guaranteed.

All re-admitted students are subject to the catalog year requirements based on their semester of re-admission and enrollment.

Bachelor of Arts in Interdisciplinary Studies (BAIS) Inactivation/Re-admission Policy

An undergraduate Interdisciplinary Studies student who does not enroll in at least one course over six semesters, including the summer semester, will have his/her student status changed from "Active" to "Inactive". An inactive Interdisciplinary Studies student will need to be re-admitted to the University and the Interdisciplinary Studies program. Re-admitted students are subject to the catalog year requirements based on their semester of re-admission and enrollment.

Requirements For UNDERGRADUATE RE-Admission

Good standing at the time of last attendance at Northeastern. Students who have enrolled at other institutions since leaving Northeastern must have an overall "C" average and be in good standing at those institutions.

How to Apply for Admission

1. Submit an application for admission with a \$30 application fee to the Admissions Office. We encourage students to apply online for faster processing.
2. Arrange to have official transcripts sent from any colleges or universities attended since leaving Northeastern.
3. If you are a Permanent Resident of the United States, attach a clear photocopy of the front of your Permanent Resident card. If you have been granted temporary residence, conditional entrance, are a parolee, refugee, asylee, or in the process of becoming a Permanent Resident, you must submit appropriate U.S. Citizenship and Immigration Services documentation and/or copy of a valid visa.
4. International Students must submit a new/updated Northeastern Financial Statement and required supporting documents.

Veterans

Veterans Admission Requirements and Application Procedures

Classification and Definition

Persons returning from at least one year of active military service will be readmitted or reinstated regardless of previous scholastic record, provided Northeastern Illinois University is the first institution of higher education attended following release from service.

Veterans Services Office

The Veterans Services Office (D-130) provides veterans, active military members, reservists, and their families guidance on obtaining their federal and state veterans educational benefits. The Veterans Services Office strives to assist the military community with all aspects of their NEIU experience.

Note: Veterans benefits are approved by the Illinois State Approving Agency.

Prospective military-connected students are encouraged to contact the Coordinator of Veterans Services for assistance with navigating the admissions application process. Please visit the Veterans Services Office (D-130) to learn what veterans' resources NEIU offers. For more information, call (773) 442-4005, email veterans@neiu.edu or visit our webpage, <http://admissions.neiu.edu/veterans-services> (<http://admissions.neiu.edu/veterans-services/>).

Credit for Military Service

Four credit hours are awarded to veterans who have been honorably discharged and have served a minimum of one year on active duty or in the guard/reserve. Veterans must submit Member 4 of their DD214 to the Admissions Processing Office at the time of application for admission.

Credit is also allowed for those United States Armed Forces Institute (USAFI) courses for which the American Council on Education recommends credit at the baccalaureate level, provided the student has passed the appropriate USAFI end-of-course test or examination.

Credit for service schools successfully completed may be evaluated upon request. In order to grant credit to veterans for service/school training, veterans must provide transcripts. These transcripts are free to all eligible soldiers, sailors, marines, and airmen. More details are available at the following websites.

USAF-CCAF Transcripts: <http://www.airuniversity.af.mil/Barnes/CCAF> (<http://www.airuniversity.af.mil/Barnes/CCAF/>)

Joint Services Transcripts for Army, Coast Guard, Marine Corps, and Navy: <https://jst.doded.mil>

The student must file the Request for Evaluation form available in Enrollment Management Services (D-101).

ROTC Programs

Air Force ROTC

Students may enroll in the Air Force ROTC program at the Illinois Institute of Technology (IIT). The four-year and two-year programs allow qualified men and women the opportunity to earn commissions as Second Lieutenants in the U.S. Air Force upon graduation and completion of Air Force ROTC. Federal scholarships are available to qualified students of either program and pay full tuition and fees, \$600 a year towards textbooks, and \$250-400 monthly subsistence allowance. State of Illinois ROTC scholarships are also available to qualified students and pay full tuition. All members of the Professional Officer Course also receive the monthly subsistence allowance.

The Air Force ROTC courses are taught on the IIT campus. For more information on Air Force ROTC, call (312) 567-3535/(312) 567-3526 or stop by 10 W. 21st Street (IIT Stuart Building) in Chicago.

Military Science (Army ROTC)

Military Science (Army ROTC) is offered through Northeastern Illinois University in conjunction with Loyola University Chicago. Loyola is the host school for all of Army ROTC in the northern Chicago area. Basic courses (freshman and sophomore level) are open to all students and require no prerequisites. The advanced portion of the course for juniors and seniors is only open to those students who meet special ROTC criteria.

All lecture courses, physical training courses and Leadership Labs are offered off campus at Loyola University Chicago or alternate locations near Northeastern. Army ROTC is time-intensive and on average meets five times per week or more. For further information on scholarship opportunities call the Recruiting Operations Officer at Loyola University Chicago, Army ROTC at (773) 508-8980.

AP, IB, CLEP, Dual Admission

Credit for Advanced Placement (AP)

Students who have successfully completed Advanced Placement exams may receive college credit for this work. Please refer to the Advanced Placement Transfer Guide for information about the subjects and minimum passing scores. The guide is available online on our Credit by Examination page (<http://admissions.neiu.edu/transfer-center/credit-examination/>) or in Enrollment Services.

Please send official Advanced Placement score reports to the Admissions Operations Office for review. A maximum of 30 credit hours may be awarded for Advanced Placement exams. This credit is included in the maximum of 64 semester hours transferable from community colleges.

Credit for College Level Examination Program (CLEP)

Students who have successfully completed College Level Examination Program (CLEP) general or subject exams may receive college credit for this work. Please refer to the CLEP Transfer Guide for information regarding transferable subjects and minimum passing scores. The guide is available online at the Credit by Examination page (<http://admissions.neiu.edu/transfer-center/credit-examination/>) or in Enrollment Services.

Please send official CLEP score reports to the Admissions Operations Office for review. A maximum of 30 credit hours may be awarded for CLEP exams. This credit is included in the maximum of 64 semester hours transferable from community colleges.

Credit for International Baccalaureate (IB)

Students who successfully complete the International Baccalaureate (IB) Diploma Programme may receive college credit for this work. Please refer to the International Baccalaureate Transfer Guide for information regarding transferable subjects and minimum passing scores. The guide is available online at the Credit by Examination page (<http://admissions.neiu.edu/transfer-center/credit-examination/>) or in Enrollment Services.

Please send official IB score reports to the Admissions Operations Office for review. A maximum of 30 credit hours may be awarded for International Baccalaureate exams. This credit is included in the maximum of 64 semester hours transferable from community colleges.

State Seal of Biliteracy

As required by Illinois HB 4330, the State Seal of Biliteracy recognizes Illinois public high school graduates who have attained a high level of proficiency in one or more languages in addition to English.

Requests for translation of a State Seal of Biliteracy are to be made by contacting the Admissions Office for the request form. The course credit review will be completed by the Department of World Languages and Cultures.

Guaranteed and Dual Admission

Northeastern has agreements with many area community colleges that allow for concurrent admission to the community college and Northeastern, simplifying the transfer process. Under the agreement, students who wish to participate must meet the admissions requirements of both institutions as well as the admissions requirements of the Northeastern program in which they desire to major. Both institutions will provide students with select services to guarantee a seamless transfer process.

Students who wish to be admitted to Northeastern will submit an application to both Northeastern and one of the community colleges with which there is an agreement in place. The applications and academic credentials will be reviewed by both institutions. Students who enroll in the program will have access to Northeastern's campus and select services while attending their community college. Students must maintain continuous full- or part-time enrollment with a 2.0 grade point average to remain eligible for the dual admission program. Agreements can be found under the Dual Admissions category at <http://admissions.neiu.edu/transfer-center> (<http://admissions.neiu.edu/transfer-center/>).

Students who are interested in this program should contact the Northeastern Illinois University Admissions Office.

Tuition and Fees

Tuition Guarantee Plan - Undergraduate Students

Beginning with the Fall 2004 semester, tuition for newly enrolled undergraduate students seeking their first bachelor's degree is guaranteed for four consecutive years. The Tuition Guarantee Plan will help you and your family budget your educational expenses. The Tuition Guarantee Plan applies only to tuition. Fees may increase during the four years. See the current online Schedule of Classes for more information.

Extension to Tuition Guarantee Plan

Beginning in the Fall 2010 term, undergraduate students who previously qualified for the Tuition Guarantee Plan, as defined above, will now qualify for two additional years of guaranteed tuition. The tuition rate for the additional two years is equal to the amount charged to undergraduate students seeking their first Bachelor's degree who initially enrolled in the academic year following the students with the additional tuition guarantee. For example, students who first enrolled in Fall 2007 had their tuition guaranteed at the same rate through Summer 2011, and now will have their tuition rate guaranteed for two additional consecutive academic years at the rate charged to students who first enrolled in Fall 2008.

Please note: Tuition and fees are assessed per credit hour up to a total of 16 credit hours.

Tuition

Tuition Per Credit Hour

Undergraduate (Newly Enrolled Fall 2021 or Spring 2022)	\$420.44
Graduate	\$441.46
Non-Resident Undergraduate (Newly Enrolled Fall 2021 or Spring 2022)	\$840.88
Non-Resident Graduate	\$882.92
Fees Per Credit Hour	\$84.95

Tuition and Fees for Enrollment of 12 credit hours ^{1,2}

Undergraduate (Newly Enrolled Fall 2021 or Spring 2022)	\$6,186.68
Graduate	\$6,438.92
Non-Resident Undergraduate (Newly Enrolled Fall 2021 or Spring 2022)	\$11,231.96
Non-Resident Graduate	\$11,736.44

¹ These totals do not include the cost of health insurance.

² These totals do include the \$3 per semester Green Fee as well as the \$155 U-Pass fee.

Tuition and fees are subject to change without notice.

Refunds

Final dates for refunds when withdrawing from classes are stated in the online Schedule of Classes. A service charge will be deducted for processing refunds for complete withdrawal of all classes.

Parking fees are not refundable and may not be waived after the tenth day of classes.

Fees

Mandatory Student Fees

Students registered at Northeastern Illinois University pay a variety of fees intended to enhance and facilitate many aspects of campus life.

Parking Fee – University students have three options regarding on-campus parking.

1. Participate in the Blue level parking program
2. Participate in the Gold level parking program
3. Waive out of the parking program entirely

Students are automatically billed a Blue level parking fee of \$9.00 per credit hour, up to a maximum of 16 enrolled credit hours per semester. Vehicle registration for a virtual parking permit can be done on-line (<http://www.neiu.edu/university-life/parking/virtual-permit-parking/>).

Gold level parking is available at a rate of \$379.00 per semester. Students who wish to participate in Gold level parking must visit Student Payment Services to sign a waiver form to opt out of Blue level parking and purchase Gold level parking.

Students who do not want to participate in the parking program must opt out of the program by submitting a waiver form to Student Payment Services in person or via email. The waiver form and more parking information are available in Student Payment Services or on the University Parking (<http://www.neiu.edu/university-life/parking/>) web page.

The **Student Union Fee** helps support the Student Union, which is the heart of the activity program on campus. It is the setting for lectures, discussions, concerts, dances, meetings and other activities. The facilities include food services, lounges and meeting rooms.

The **Student Activity Fee** is used to support the Student Government, student organizations and clubs, and the many activities, programs, media and events sponsored by the above groups.

The **Computer Resource Fee** is dedicated to the enhancement of computer services available to students. Such purposes shall include the addition of computer workstations in a lab situation, additional “smart classrooms,” and increased access to all the networks and communications highway currently in place as well as those to be built in the future. There will be an increased availability of staff to assist students in learning to take advantage of the new and evolving information technologies.

The **Campus Improvement Fee** supports current and future long-term investments in capital facilities and technology infrastructure.

The **Green Fee** funds implementation of clean and renewable energy technologies and improvement of campus energy efficiency at Northeastern Illinois University.

The **Library Fee** supports library initiatives such as purchasing books and other learning materials.

The **Freshman Orientation Fee** is a mandatory one-time fee paid by freshmen who are not transferring previously earned college credit; this fee supports orientation programs for these students.

The **Performing Arts Fee** helps to support university theatre and dance productions and musical concerts.

The **Campus Recreation Fee** supports a comprehensive recreation program, including intramurals, wellness and fitness programs, aquatics, sport clubs and informal recreation.

The **Health Service Fee** enables the university to provide assessments and care for a wide range of student health concerns.

The **Chicago Transit Authority (CTA) U-Pass Fee** provides an unlimited ride pass for the CTA, available to all full-time students. For the Spring, Summer and Fall terms, full-time is defined as 12 credit hours minimum for undergraduate students and 9 credit hours minimum for graduate students.

The **Academic Enhancement Fee** is dedicated to University renovation, improvement and upgrade of classrooms, laboratories and other academic space.

Student Health Insurance

Student health insurance is no longer a mandatory University fee for full-time undergraduate students. Students looking for health insurance that meets ACA (Affordable Care Act) requirements may enroll in an optional student health insurance plan offered by Aetna Student Health.

The following students and dependents are eligible to enroll in the plan on a voluntary basis:

- Registered undergraduate students taking a minimum of 6 credit hours, including those registered in the University Without Walls program.
- Registered graduate students enrolled for a minimum of 3 credit hours.

- Registered international students holding an F1 or J1 visa and enrolled in (1) or more credit hours.
- Spouses, domestic partners and children of eligible students.

Enrollment will begin in July 2018 for the fall term. To enroll online, please refer to Aetna's Northeastern Illinois University student health insurance plan (<https://www.aetnastudenthealth.com/en/school/697402/>) and follow the instructions. Premium payment will be made directly to Aetna Student Health. The University will no longer directly enroll or charge students for health insurance.

Students may also qualify for health insurance through the State of Illinois official ACA health marketplace (<https://getcovered.illinois.gov/en/>).

Financial Aid, Scholarships and Student Employment

Northeastern Illinois University is committed to providing an affordable education to all enrolled students and takes pride in its graduates completing with the least amount of loan indebtedness in the region. The primary responsibility for covering the cost of attendance rests with the family and is reflected in the Expected Family Contribution or eligibility index for those applying for financial aid. There are two primary applications for student financial aid (1) the FREE Application for Federal Student Aid (FAFSA) and (2) the alternative application for those not eligible to complete the FAFSA. Federal and State assistance programs are meant to supplement educational costs and are intended to be combined with institutional and private scholarship assistance to avert over-borrowing. For purposes of financial aid eligibility, full-time enrollment is defined as twelve (12) credit hours for undergraduate students and nine (9) credit hours for graduate students. Half time enrollment is defined as six (6) credit hours. Financial Aid is located in D-200 (773-442-5016) and offers assistance in meeting educational expenses through grants, scholarships, student employment programs, and loans.

Federal Grants

Programs	Eligibility	Description of Programs	Repayment	Office to Contact
Federal Pell Grant	The Federal Pell Grant eligibility is determined by the completion of the FREE Application for Federal Student Aid or FAFSA. Students with an Expected Family Contribution or EFC of 5,576 or less are eligible for the Federal Pell Grant. The amount of Federal Pell Grant funds a student may receive over his or her lifetime is limited by federal law to be the equivalent of six years of Pell Grant funding. Since the maximum amount of Pell Grant funding a student can receive each year is equal to 100%, the six-year equivalent is 600% (or six years, full-time).	Applies to tuition and fees plus other educational expenses. Possible summer eligibility.	No repayment obligation. Expires after six (6) years, full-time awards. Spring, 2020 Pell Grant Usage not included as a result of COVID-19.	Northeastern Financial Aid
Federal Supplemental Educational Opportunity Grant	(Undergraduate) Limited availability. Must show exceptional need and be Pell Grant eligible. Must be enrolled at least half time, in a degree program. Must file FAFSA by NEIU priority file date – possible summer term eligibility.	Program is considered a source of grant funds to supplement other federal aid programs such as the Federal Pell grant (described immediately above) if the student continues to show need.	No repayment obligation.	Northeastern Financial Aid
Federal TEACH (Teacher Education Assistance for College and Higher Education)	U.S. citizen; FREE Application for Federal Student Aid or FAFSA required; Full acceptance into degree-seeking, College of Education program; Declared major in a 'high need' field; Signed Agreement to Serve with the U.S. Department of Education	Up to \$4,000	Reverts to Unsubsidized Direct Stafford Loan IF conditions of Agreement to Serve are not met	Northeastern Financial Aid

State Grants

Programs	Eligibility	Description of Programs	Repayment	Office to Contact
Illinois Monetary Award Program (ISAC)	(Undergraduate) Must be resident of Illinois and enroll for at least three credit hours. Based on need only. Must be enrolled in a degree program. Expires after ten (10) full-time terms of use.	Applies to tuition and fees only. Must apply annually by way of the FAFSA or Alternative State Application.	No repayment obligation. Expires after 135 paid credit hours.	Northeastern Financial Aid or ISAC, 1755 Lake Cook Rd., Deerfield, IL 60015-5209, (847) 948-8500.
Illinois AIM HIGH/NEIU Golden Opportunity Scholarship	(Undergraduate) Renewable scholarship for first-time, full-time freshmen and new transfers enrolled in at least twelve (12) credit hours. FAFSA required with Annual Available Income below \$61,000 and official high school or transfer college academic grade point average of 3.00 or greater year one and 2.50 for subsequent three years.	Applies to Cost of Attendance for an equivalent of four years of enrollment.	No repayment obligation. Expires after four (4) years, fulltime awards.	Northeastern Financial Aid
Illinois Veterans Grant (ISAC)	Undergraduate or Graduate) Veterans must: Have at least one full year of active duty in the U.S. Armed Forces (or served in a foreign country in a time of hostility), and received an honorable discharge; Have completed his or her initial activity duty commitment; Have resided in Illinois within six months before entering the service; Have returned to Illinois within six months after discharge from the service; Be enrolled at an Illinois public2 or 4 year college; Not be in default on any student loan, nor owe a refund on any state or federal grant; and maintain the minimum grade point average (GPA) required by the applicant's college	Payment of tuition and some fees for an equivalent of four years of enrollment at any state university or Illinois public community college.	No repayment obligation.	Northeastern's Veterans Services Office (773) 442-4005 or ISAC, 1755 Lake Cook Rd., Deerfield, IL 60015-5209, (847) 948-8500.

Illinois National Guard/ Naval Militia (ISAC)	(Undergraduate and Graduate) to be eligible for the Illinois National Guard grant a student must: be an Illinois National Guard member, defined as meeting one of these two criteria: Be active in the Illinois National guard or have been active in the Illinois National guard for at least five consecutive years and have been called to federal active duty for at least six months and be within 12 months after your discharge date from the Illinois National Guard. Have completed one full year of service in Illinois National Guard; be an enlisted member or an officer (Public Act 94-583); be enrolled at an Illinois public 2 or 4 year college; not be in default on any student loan, nor owe a refund on any state or federal grant; and maintain an acceptable grade point average according to the policy determined by their college.	No repayment obligation	Payment of tuition and some fees. at any state school. Students may enroll full or part-time.	Northeastern's Veterans Services Office (773) 442-4005 or ISAC, 1755 Lake Cook Rd., Deerfield, IL 60015, (847) 948-8500.
Illinois Special Education Teacher Tuition Waiver	(Undergraduate or Graduate) Be an Illinois Resident. Student must sign the application's Teaching Agreement/Master Promissory Note promising to fulfill the teaching commitment or repay funds received plus interest and Not receive funds from the Minority Teachers of Illinois (MTI) Scholarship Program or the Golden Apple Scholars of Illinois Program during the same term(s).	For teachers or an academically talented students pursuing a career in special education as a nonprofit public, private or parochial preschool, elementary or secondary school teacher in Illinois, you may be eligible for the Illinois Special Education Teacher Tuition Waiver Program.	Sign the application's Teaching Agreement/ Master Promissory Note promising to fulfill the teaching commitment or repay funds received plus interest	ISAC, 1755 Lake Cook Rd., Deerfield, IL 60015, (847) 948-8500

Illinois Minority Teachers Scholarship	Be an Illinois resident, be a minority student of either African American/ Black, Hispanic American, Asian American or Native American origin; sign the application's Teaching Agreement/Promissory Note promising to fulfill the teaching commitment or repay funds received plus interest; ; not receive funds from the Illinois Special Education Teacher Tuition Waiver (SETTW) Program or the Golden Apple Scholars of Illinois Program during the same term(s)	If: 1) you plan to teach at a nonprofit Illinois public, private, or parochial preschool, elementary school, or secondary school, for which the Illinois State Board of Education (ISBE) has determined that no less than 30 percent of the enrolled students are African American/Black, Hispanic American, Asian American, or Native American; and 2) you are of African American/ Black, Hispanic American, Asian American or Native American origin, then you may qualify for up to \$5,000 per year as part of the Minority Teachers of Illinois (MTI) Scholarship Program.	the teaching commitment for this program must be fulfilled at a nonprofit Illinois public, private, or parochial preschool, elementary school, or secondary school, for which the Illinois State Board of Education (ISBE) has determined that no less than 30 percent of the enrolled students are African American/ Black, Asian American, Hispanic American, or Native American	ISAC, 1755 Lake Cooke Rd., Deerfield, IL 60015, (847) 948-8500

INSTITUTIONAL SCHOLARSHIPS

Programs	Eligibility	Description of Programs	Repayment	Office to Contact
Eagle Performance Funds	(Undergraduate) Enrolled full-time. Must complete FAFSA. Must be enrolled in a degree program. Must show need. Must file FAFSA by NEIU priority file date, be in MAP Grant suspense and maintain academic grade point average of 3.0 or above	Supplement educational costs for those students eligible for the Monetary Award Program grant but who are in a suspense statuses due to limited State of Illinois funding	Not applicable	Northeastern Financial Aid
NEIU Star Scholarship	Complete an associate's degree from one of the City Colleges of Chicago, submission of FAFSA, enroll full time and maintain cumulative academic grade point average of 3.0	In recognition of the educational excellence of Chicago Star Scholarship students, CCC Star Scholars who graduate from CCC with an Associate Degree and a minimum GPA of 3.0 will be admitted to Northeastern Illinois University and will be eligible to receive an NEIU Star Scholar Award of \$2,500.	Not applicable; scholarship expires after 2 years	Northeastern Financial Aid

William D. Ford Federal Direct Loan Program

Programs	Eligibility	Description of Programs	Repayment	Office to Contact
Direct Loans (Subsidized & Unsubsidized)	(Undergraduate and Graduate) Enrolled full or half-time. Must complete FAFSA. Must be citizen or permanent resident of the United States.	Dependent undergraduate loan limits according to academic level: \$3,500 to \$7,500 per yr. Independent undergraduate loan limits according to academic level: \$3,500 to \$12,500 per yr. Subsidized Eligibility limited to equivalent of six years full time. Graduate (masters and TLP) loan limits according to \$20,500 per yr. Unsubsidized eligibility only.	Interest rates determined annually. Maximum fixed rate not to exceed 8.5% for undergraduates and 9.5% for graduate (master's). Repayment begins 6 months after you graduate, leave school, or drop below half-time status.	Northeastern Financial Aid
PLUS Loans (Parent Loan for Undergraduate Students)	Dependent undergraduate students. Credit worthiness required.	Amount not to exceed student's cost of attendance.	Interest rates determined annually. Maximum fixed interest rate not to exceed 10.5%. The full loan amount plus interest must be repaid. The first payment is due within 60 days after the final disbursement of the loan (unless a deferment is obtained).	Northeastern Financial Aid
Graduate PLUS Loans	Graduate master's degree students. Credit worthiness required.	Amount not to exceed student's cost of attendance	Interest rates determined annually. Maximum fixed interest rate not to exceed 10.5%. The full loan amount plus interest must be repaid. The first payment is due within 60 days after the final disbursement of the loan (unless a deferment is obtained).	Northeastern Financial Aid

Applying for Student Financial Assistance

How To Apply For Financial Aid

The two primary financial aid applications are the Free Application for Federal Student Aid (FAFSA (<https://fafsa.ed.gov/>)) and the Illinois Alternative Application (<https://studentportal.isac.org/en/alternativeapp/>). Both applications are available on-line beginning October 1 for the upcoming award year.

- Your admission application to the University must include your social security number and date of birth in order to match receipt of and eligibility for the FAFSA.
- If you have completed the FAFSA or the Alternative Application and need to add NEIU as a school to receive your information, enter the Title IV school code of 001693 in the online application.
- Using FAFSA (<https://fafsa.ed.gov/>) on the web to file, students can select to sign electronically using a Federal Student Aid Identification Number or FSA ID. Students can apply for a Federal Student Aid ID (FSA ID) (<https://fsaid.ed.gov/npas/>) on the FAFSA site. Dependent students will also need at least one FSA ID from one parent.
- For priority consideration for all institutional financial aid, your financial aid application should be received at NEIU by February 15.
- The Internal Revenue Service (IRS) Data Retrieval is available to streamline the FAFSA completion and verification process. If the federal tax return is 'Already Completed' for the appropriate tax year, the student and/or spouse/parent can retrieve data directly from the IRS into the FAFSA. Note that once IRS data is transferred, all amounts will be masked. Click Here (<https://www.youtube.com/watch?v=9ZNRdk3iXeM>) for the IRS Data Retrieval tutorial video.

You will receive a Student Aid Report or SAR through the email address provided on the FAFSA. If any of the information on the SAR is incorrect, make the necessary corrections through the FAFSA (<https://fafsa.ed.gov/>) site. If all the information is correct, save a copy for your records. To have Northeastern Illinois University receive the data from the FAFSA, add the University to the listing of schools by name search or by Title IV School Code (001693). Once received, the University will update the NEIUport student portal with the most current status.

Applicants and their parents should be prepared to furnish any information verifying data on the application. This may include documents from the Internal Revenue Service for the verification process.

Applications will be processed and awards will be made on a first come, first served basis for campus-based funds (Federal Work Study, Federal Supplemental Educational Opportunity Grants). Federal Pell Grant, Monetary Award Program Grant (ISAC), AIM HIGH/Golden Opportunity Scholarship (ISAC) and Direct Loan applications are also reviewed in date order. Although the amounts of these awards are not determined by the date priority, early applicants will receive their award offers first.

You will receive an award offer detailing the financial aid for which you qualify reflected in NEIUport, My Financial Aid tab. All financial aid funds will be credited to your NEIU billing account. If the total credited funds exceed your NEIU bill, you will be notified of the credit balance refund distribution process from Student Payment Services. Students can register for direct deposit using NEIUport, Registration Tools in the Student tab. Students choosing to pick up a paper check must provide two documents of identification, one of which must be the University ID.

Additional information concerning financial assistance and filing deadlines can be obtained by checking the student portal, the website, email at Financial-Aid@neu.edu or fax at (773) 442-5040.

Steps to Apply for Federal Student Assistance

1. Create a Federal Student Aid ID (<https://fsaid.ed.gov/npas/>). A FSA ID gives you access to Federal Student Aid's online systems and can serve as your legal signature.
2. Use your FSA ID log into the FAFSA (<https://fafsa.gov/>) site and complete the **FREE Application for Federal Student Aid** using the household income for two years prior to the year you plan to enroll. For example, if you plan to enroll in 2022-2023, the income required for the FAFSA is 2020.
 - a. Transfer income using the **IRS Data Retrieval**: Secured file transfer based on address information from the actual tax return. Check the appropriate box to transfer the data from IRS into the FAFSA. Due to security all income information transferred will be 'masked.'
 - b. Manually enter income without using the IRS Data Retrieval: First, the benefit for using the IRS Data Retrieval is that - if selected for the verification process - Financial Aid will waive the request for tax transcripts and W-2 forms.
3. Most information on the FAFSA - with exception of the income - is based on the day on which you are submitting the application. An example of this is marital status.
4. Submit the FAFSA using the Title IV School Code for Northeastern Illinois University (001693) and monitor your email for your Student Aid Report.

Federal Student Aid Programs

Federal Pell Grant
Federal Supplemental Educational Opportunity Grant
Federal TEACH Grant

Federal Direct Subsidized Loan
Federal Direct Unsubsidized Loan

Steps to apply for State of Illinois Assistance

1. Complete and submit the **FREE Application for Federal Student Aid** (FAFSA (<https://fafsa.gov/>)) or the Illinois Alternative Application (RISE Act (<https://studentportal.isac.org/en/alternativeapp/>)).
2. Based on the date in which you submit your FAFSA, eligibility for the **Illinois Monetary Award Program** Grant will be determined by Northeastern Illinois University. If you are in a suspense status based on the date the FAFSA is submitted and have a cumulative academic grade point average of 3.0 or above, eligibility will be determined for Eagle Performance Awards.
3. **Teacher-Based scholarship** applications are available through the Illinois Student Assistance Commission (ISAC (<http://www.isac.org/students/during-college/applying-for-financial-aid/applications/>)). These scholarships include:
 - a. Special Education Teacher Tuition Waiver
 - b. Minority Teacher Scholarship
 - c. Golden Apple
4. **Veteran-Based scholarship** applications are available through ISAC (<http://www.isac.org/students/during-college/applying-for-financial-aid/applications/>). These scholarships include:
 - a. Illinois Veteran's Grant
 - b. Illinois National Guard
 - c. MIA/POW Scholarships

Steps to Apply for Institutional Assistance: Don't Stop at the FAFSA!

Once your **FREE Application for Federal Student Aid** (FAFSA (<https://fafsa.gov/>)) is submitted each October 1st, do not stop there. Your next stop is to complete an online Northeastern Illinois University scholarship application using AcademicWorks! Students are able to search and apply for NEIU Foundation and Tuition Scholarships using the AcademicWorks online scholarship system.

Accessing AcademicWorks

- Go to AcademicWorks (<https://neiu.academicworks.com/>).
- Sign in using your NEIUport login information

Institutional Payment Plan Option

Students and families may pay online or in person at Student Payment Services. For a \$10 Deferment Fee, the following payment plan is available for balances remaining after grants, scholarships and/or loans are applied:

FALL SEMESTER

- August – ¼ balance
- September – ¼ balance
- October – ¼ balance
- November – remaining balance

SPRING SEMESTER

- January – ¼ balance
- February – ¼ balance
- March – ¼ balance
- April – remaining balance

Balances remaining after the end of a semester are subject to a \$50 outstanding balance fee and an Accounts Receivable hold on future registration.

Steps to Apply for Private Assistance

Seek FREE money options first

1. If you have not already, sign up for at least three scholarship searches by creating a profile and a personal statement that can be used as a template for all applications. It is recommended to use one of the following search engines:

- My Scholly (<https://myscholly.com/theplatform/>) (one-time charge for mobile app)
 - Scholarship360 (<https://scholarships360.org/>)
 - FastWeb (<https://www.fastweb.com/>)
 - Sallie Mae (<https://www.salliemae.com/college-planning/tools/scholarship-search/>)
 - Scholarship Owl (<https://scholarshipowl.com/>)
2. If you have not already completed the 'household inventory' of restaurants, entertainment venues, social media and retailers to inquire about scholarships, apply for at least 2 per week.

NEIU and Private Loan Borrowing

The University policy on alternative or private loans is that they be limited to those students who: 1) have student-at-large academic status, 2) are not eligible for financial assistance under Title IV Financial Aid Programs and 3) have exhausted all Direct Loan eligibility. The maximum certification for borrowers not studying abroad is \$12,500.

The process for approval, certification and disbursement of Alternative/Private Loans may be delayed with the new requirement to complete a Private Education Loan Self-Certification Form. Before a borrower can be approved, the student must complete an (<http://ifap.ed.gov/dpcletters/attachments/GEN1001A-AppSelfCert.pdf>) Alternative/Private Loan Self-Certification (<https://fill.io/Private-Education-Loan-Applicant-Self-Certification-Form-8c740fe2/>) and have the form mailed or faxed to the lender. The Self-Certification requires the Cost of Attendance for the loan period. A private loan borrower has a 90-day right of refusal to either reject or reduce the loan. For more information on private loans, view the Private Student Loan Comparison Chart. (<https://finaid.org/calculators/loancomparison/>) Students are also encouraged to earn badges using the GRADReady (<https://gradready.com/sponsor/neiu/>) financial literacy tool. Students earning the most badges at the end of the semester are eligible for \$500 in institutional scholarships.

Minimum Standards of Academic Progress

The U.S. Department of Education Student Financial Aid regulations require that NEIU establish and maintain a policy to measure whether students applying for financial aid are making satisfactory academic progress toward degree completion. NEIU has implemented the following Minimum Satisfactory Academic Progress standards necessary to evaluate a financial aid recipient's continued eligibility for funds.

Types of Aid Covered by the Policy

Grants	Loans	Other
Federal Pell Grant	Federal Subsidized Direct Loan	Federal College Work-Study
Federal Supplemental Education Opportunity Grant (SEOG)	Federal Unsubsidized Direct Loan	ISAC Monetary Award Program (MAP) Grant
Federal TEACH	Federal PLUS Direct Loan	ISAC Minority Teachers
ISAC National Guard Grant(ING)*	Federal GRAD PLUS Direct Loan	ISAC Special Education Teacher
ISAC Veteran's Grant (IVG)*		ISAC AIM HIGH/Golden Opportunity Scholarship

Policy Statement

At the completion of each academic term, students are expected to:

- Complete successfully sixty-seven percent (67%) of attempted credit hours in which they enroll. [The cumulative completion rate is reviewed each term.] -- **AND**
- Maintain a minimum cumulative grade point average of 2.0 or "C" as an undergraduate by the end of each term. [Graduate students are expected to maintain a minimum cumulative grade point average of 3.0 or "B" by the end of each term.] -- **AND**
- Complete the program of study within a maximum time frame of 180 semester credit hours (undergraduate) or 54 semester credit hours (graduate/ masters). The maximum time frame for graduate counseling and social work majors is 60 semester credit hours.

Academic progress requirements apply to all semesters of enrollment, including those semesters for which no financial aid was disbursed. Although credit hours attempted in developmental coursework do not count toward degree requirements, they do count for academic progress purposes – academic grade point average, completion rate and maximum time frame.

*Pursuant to 23 IL Adm Code 2730 and 2733 students receiving ONLY Illinois National Guard Grant Program OR Illinois Veteran Grant Program awards are exempt from pace and time frame criteria.

Academic Grade Point Average (GPA) Requirement

1. The student's cumulative academic grade point average will be evaluated at the end of each term based on grades received from all attempted coursework including those taken prior to a major change and repeats.
2. If the GPA falls below the requirement, the student's aid will be **suspended**.
3. GPA for developmental coursework is factored into enrollment status and total attempted coursework for financial aid purposes only. Developmental coursework is not factored into a student's official academic standing or degree requirements; however, they are factored in for academic progress purposes.
4. Financial aid eligibility will be reinstated once the student has achieved the minimum requirement or successfully reinstated through the appeal process.

Course Work Completion Rate (PACE) Requirement

A student must successfully complete at least 67% of the cumulative credit hours attempted. **Hours attempted** is defined as semester hours a student is registered after the add/drop period or census date. **Successfully completed** is defined as the total earned number of hours toward graduation in which a student receives a grade of A, B, C, D, NP, or P. This includes attempted courses prior to a change in major or academic program, repeat courses as well as developmental coursework and accepted transfer coursework.

1. **Official Withdrawals** are defined as courses dropped after the census date either in person or by way of NEIUport and will be included in hours attempted. A semester of complete withdrawals results in financial aid **suspension**.
2. **Unofficial Withdrawals** are defined as a term of unearned grade points. Examples of unearned grade points include: incomplete (I), failing (F), unofficial withdrawal failing (UWF), never attended failing (NAF), not passing (NP), and missing (X). A semester of unofficial withdrawals results in financial aid **suspension**.

3. The standard of 67% will be monitored cumulatively at the end of each term. If, at the end of the term, a student is below the cumulative 67% standard, the student's aid will be **suspended**. This includes terms in which the student is not receiving aid. Aid will be reinstated once the student has achieved the 67% cumulative completion rate or successfully reinstated through the appeal process.

Maximum Time frame Requirements

1. Full-time undergraduate students are expected to complete their program of study within a maximum time frame not to exceed six years. The time frame for part-time undergraduate students is prorated beyond six years. As 120 credit hours are required for undergraduate programs, students may take up to a maximum 150% or 180 attempted semester hours. **This also includes a limit of 30 semester hours of ESL and/or developmental course work.**
2. Students attempting to earn a second Undergraduate Degree may take up to a maximum 150% of the hours required (as determined by their department) to complete their second Bachelor's degree. This includes the Teacher Certification Program.
3. Full-time graduate (masters) students are expected to complete their program of study within two and one half years. The time frame for part-time graduate students is prorated to a maximum of 54 attempted semesters with the exception of those pursuing Counselor Education and Social Work where the maximum time frame is 60 attempted semester hours.
4. **Attempted semester hours** include successfully completed coursework, accepted transfer credit hours, incompletes, withdrawals – official and unofficial - as well as credit hours resulting from change in major declaration. An NEIU student may repeat coursework once in order to receive a higher grade. Each attempt counts within maximum time frame requirements. Withdrawals do not count as repeat coursework.

Financial Aid Warning, Probation & Suspension

Students will be notified at the end of each semester if they are in a warning, suspension status or approaching maximum time frame by Financial Aid. New students who fail to meet the minimum grade point average and/or pace requirements for their first term will be placed on warning status for the following term. Continuing students approaching maximum time frame will be placed on a warning status when they fall within 20 semester hours of the requirement. Students maintain eligibility while on warning status. Once a student's eligibility is suspended, all future financial aid disbursements stop. Students can request to be reinstated through the appeal process. In the instance students are reinstated on a term-by-term basis, the student will remain in a probationary status until the cumulative requirements are achieved. When conditions of reinstatement are not met, students will be suspended.

Satisfactory Academic Progress Appeal Guidelines

If a student is unable to meet the Satisfactory Academic Progress requirements due to extenuating circumstances, they may submit an appeal requesting the reinstatement of their financial aid eligibility. Grade changes (e.g. incomplete to an earned grade) submitted after the determination of suspension should be communicated to Financial Aid, as an appeal may no longer be required. Students who wish to appeal after being placed on suspension status must complete the following steps:

1. Submit a signed **typewritten statement** to NEIU Financial Aid explaining why the requirements were not met. The petition is available in downloadable form on the Financial Aid website (<http://www.neiu.edu/financial-aid/>).
2. **Include supporting documentation** verifying the situation (letter from physician, copy of memorial service, police or accident report, etc.) with the appeal petition.
3. Include an academic plan of action that will enable the student to meet the Minimum Standards of Academic Progress requirements in the future.
4. Students suspended for exceeding the maximum hours requirement should also **include a degree audit from their department academic advisor** listing the courses still needed to complete their degree AND the anticipated date of graduation.
5. **Deadlines for appeals:** Fall semester – October 15, Spring semester – March 15 and Summer semester – June 15.

Appeals will be considered by the Satisfactory Academic Progress Appeal Committee, which will render a decision. There is no defined limit on how many appeals a student can submit for review. This committee consists of members from various NEIU faculty and advisors, including Financial Aid. The Committee meets every six to eight weeks during the semester unless an emergency situation occurs and the meeting is rescheduled. Financial Aid will notify the student in writing of the committee's decision.

Students in suspension status may enroll in classes. However, if their appeal is denied the student is responsible for any charges incurred at NEIU. Financial aid cannot be retroactively reinstated if an appeal is approved AFTER a semester has ended.

Satisfactory Academic Progress Appeal Guidelines

If a student is unable to meet the Minimum Standards of Academic Progress due to extenuating circumstances, they may submit an appeal requesting the reinstatement of their financial aid eligibility. Students who wish to appeal being placed on suspension status must complete the following steps:

1. Submit a signed **typewritten appeal** to NEIU Financial Aid explaining why the requirements were not met. Students **MUST** attach typewritten appeals to the petition. The petition is available in downloadable form on the Financial Aid website (<http://www.neiu.edu/financial-aid/>).
2. **Include supporting documentation** verifying the situation (letter from physician, copy of memorial service, police or accident report, etc.) with the appeal petition.
3. In addition, the typewritten appeal should include a **plan of action** that will enable the student to meet the Academic Progress requirements in the future.
4. Students terminated for exceeding the maximum hours requirement should also **include a letter from their department academic advisor** listing the courses still needed to complete their degree AND the anticipated date of graduation. A degree audit from the academic advisor may be submitted in this circumstance.

Appeals will be considered by the Standards of Academic Progress Appeal Committee, which will render a decision in writing. This committee consists of members from various NEIU departments and offices, including Financial Aid. The Committee meets every six to eight weeks during the semester unless an emergency situation occurs. **Any appeals received after the eighth week of the term will not be considered until the following term.** Financial Aid will promptly notify the student in writing of the committee's decision.

Students in suspension status may enroll in classes. However, if their appeal is denied the student is responsible for any charges incurred at NEIU. Financial aid cannot be retroactively reinstated if an appeal is approved AFTER a semester has ended.

Return of Federal Title IV Assistance

NEIU Financial Aid Withdrawal & Return of Title IV Policy

Federal Title IV funds are awarded and disbursed with the expectation that a student will attend coursework for the entire semester for which the assistance is disbursed. Most Financial Aid Programs will not pay for courses dropped during the add/drop period (before census date). After this period has expired, student enrollment is captured for the remainder of the term. Financial Aid Programs will disburse against the student's University billing account based on the captured enrollment hours. The return of funds is based upon the concept that students earn their financial aid in proportion to the amount of time in which they are enrolled. If the student withdraws from all courses prior to completing more than 60% of a semester, he/she may be required to repay a portion of the federal financial aid disbursed. A pro rata schedule is used to determine the amount of federal funds a student will have earned at the time of the withdrawal. All returns are required within 45 days of the date the withdrawal occurred ('date of determination'). Weekends are included in the calculation except where a break coinciding with a weekend exceeds five days.

NEIU returns a calculated amount based on a percentage earned, thereby creating a bill against the student's accounts receivable. Federal Title IV funds include:

- Federal Pell Grant
- Federal Supplemental Education Opportunity Grant
- Federal Direct Subsidized Stafford Loan
- Federal Direct Unsubsidized Stafford Loan
- Federal Parent Loan for Undergraduate Students (PLUS)
- Federal TEACH Grant

Once determined, Federal Title IV funds are returned in the following order: Direct Unsubsidized Loan, Direct Subsidized Loan, Direct PLUS Loan, Federal TEACH, Federal Pell Grant and Federal Supplemental Educational Opportunity Grant (FSEOG).

Complete (OFFICIAL) Withdrawals

Financial Aid is required to perform a Return of Title IV calculation for students receiving Federal funds and who **completely withdraw** from all registered courses before 60% of the term has expired. The date of determination used in the calculation is the date in which the last course was withdrawn for that term. Once the calculation is performed, any Federal assistance is adjusted and the student is notified of the amount that must be returned to the U.S. Department of Education.

Unofficial Withdrawals

Financial Aid is required to perform a Return of Title IV calculation for students receiving Federal funds and who receive no grade point average for a given semester. This includes any combination of I, F, NAF, RNAF, UWF, RUWF, NP, W, or X grades. This is referred to as an unofficial withdrawal. Once the calculation is performed, the student is notified and has the opportunity to submit documentation from instructors to Financial Aid verifying the actual last date of attendance. In addition, Financial Aid will contact each instructor requesting the last date of attendance or 'active participation' in order to determine if the student is eligible for a prorated portion of their disbursed aid or a Post Withdrawal Disbursement (PWD) of aid. If the last date of attendance is after the mid-point of the term, it minimizes the amount that must be returned to the U.S. Department of Education.

For courses with 'NAF' or 'RNAF' grades, all Title IV funds are returned as this grade reflects the student never attended. For courses with 'UWF' or 'RUWF' grades, the last date of attendance is a required entry for the instructors during grading and that last date of attendance is used in the calculation. Once it is determined that funds must be returned, NEIU returns the calculated amount thereby creating a bill against the student's accounts receivable.

INVOLUNTARY WITHDRAWALS

Northeastern Illinois University (NEIU) reserves the right to involuntarily withdraw a student whose behavior suggests a significant risk of harm to self or others. Involuntary student withdrawal may or may not include plans or contingencies that condition the return of a student to the University.

POST WITHDRAWAL DISBURSEMENTS

If the student has accepted his/her federal aid and it has not disbursed, the reason for the non-disbursal will be identified by Financial Aid. If any of the following conditions have been met, the aid will be included in the "Post Withdrawal Disbursement" section of the calculation:

1. **Federal Pell Grant:** FREE Application for Federal Student Aid received date with a valid expected family contribution (EFC) is prior to the official withdrawal date
2. **FSEOG:** Federal student aid was awarded prior to official withdrawal date
3. **Federal Direct PLUS, Subsidized and Unsubsidized:** Loan 'accepted' (originated) by federal processor prior to official withdrawal date and electronic Master Promissory Note signed prior to calculation

The post-withdrawal disbursement calculation identifies whether a student is eligible for an additional disbursement despite no longer being enrolled. If the student has outstanding institutional charges, the funds are automatically applied to the student's billing account. If a credit balance results from a post-withdrawal disbursement, the student/parent is sent a letter notifying him/her of the amount available. The student/parent is asked to return the letter within 14 days indicating whether he/she wishes to receive the credit balance. Northeastern Illinois University cannot make a Post-Withdrawal Disbursement to the account or estate of a student who is deceased. Further, a student's estate is not required to return any Title IV funds.

REPORTS OF NON-ATTENDANCE

Students who are reported for non-attendance for coursework while enrolled at Northeastern Illinois University forfeit eligibility to any Federal, State, Institutional or Private financial assistance. The University will return all assistance to the appropriate source which will result in an outstanding balance due. Deferred and late fees apply.

Scholarships

Students are often faced with the dilemma of how they will pay for their education. For many, the financing of a university education becomes a barrier to learning. With this in mind, Scholarships' mission is to lead in the promotion and awarding of university scholarship funds to deserving students. Therefore, the goal is to assist in lessening the financial burden that many students seek to overcome. Many of the Merit and Talent Awards are open to students regardless of citizenship status.

Students seeking additional information about scholarships should call (773) 442-4606 or e-mail scholarships@neiu.edu (M-Morrow@neiu.edu). Students are also encouraged to visit the Scholarships (<https://www.neiu.edu/financial-aid/scholarship-opportunities/>) website.

Institutional Scholarships / Merit/Talent Scholarships

Programs	Eligibility	Description of Programs	Repayment	Office to Contact
NEIU Presidential Scholarship	(Only Open to Entering Freshmen) Must have a minimum ACT of 27 (or 1280 SAT), 3.50 GPA, graduate of an Illinois high school, and submit application.	Covers in-state tuition (120 credit hours), fees, and books for a maximum of four years. (Must maintain a GPA of 3.50 for eligibility for renewal.)	No repayment obligation.	Northeastern Scholarships - Michelle Morrow M-Morrow@neiu.edu 773-442-4606
NEIU Provost Merit Freshman Scholarship	Freshmen who have applied for early admission; selection based on a sliding scale using ACT/SAT and GPA	Up to \$2,000. Determined upon admission – no application necessary	No repayment obligation	Northeastern Scholarships - Michelle Morrow m-morrow@neiu.edu 773-442-4606
NEIU Provost Merit Transfer Scholarship	Transfer students who have applied for early admission; earned Associate of Arts or Associate of Science degree; cumulative GPA of 3.50	Up to \$2,000. Determined upon admission – no application necessary	No repayment obligation	Northeastern Scholarships - Michelle Morrow m-morrow@neiu.edu 773-442-4606
NEIU Deans Merit Freshman Scholarship	Freshmen who have applied for early admission; ACT composite score of 22 or higher (or 1100 SAT Score); cumulative GPA of 3.00	Up to \$1,000. Determined upon admission – no application necessary	No repayment obligation	Northeastern Scholarships - Michelle Morrow m-morrow@neiu.edu 773-442-4606
NEIU Deans Merit Transfer Scholarship	Transfer students who have applied for early admission; earned Associate of Arts or Associate of Science degree; cumulative GPA of 3.00	\$1,000. Determined upon admission – no application necessary	No repayment obligation	Northeastern Scholarships - Michelle Morrow m-morrow@neiu.edu 773-442-4606
Graduate Merit Tuition Scholarship	(Graduate) Must be in graduate program and have 3.50 G.P.A.	Covers tuition only	No repayment obligation	Northeastern's College of Graduate Studies & Research or academic department chairperson or advisor or send email to graduatestudies@neiu.edu
NEIU Phi Theta Kappa Scholarship	A minimum 3.50 GPA and an A.A. or A.S. degree are required. In addition, student must be enrolled full-time and a resident of Illinois; enroll in the Fall at NEIU immediately following the completion of an Associate's degree program; working towards their first baccalaureate degree; and provide recommendation from Phi Theta Kappa advisor. One new recipient is selected each year for the fall.	Covers tuition for the first 60 credit hours at NEIU. Must maintain 3.5 GPA. June 30th application deadline. Only awarded in the fall.	No repayment obligation.	Northeastern Scholarships - Michelle Morrow m-morrow@neiu.edu 773-442-4606

Scholarship for Children of Deceased Faculty/Staff	(Civil Service and Academic & Professional) The natural, adopted, foster, step-child of the deceased employee shall be entitled to a tuition scholarship of 50% for tuition and fees for the duration of time for the child to receive a baccalaureate degree from the University. Children of a divorced employee are also eligible if the deceased employee had been contributing to their support.	Undergraduate only. Covers tuition and fees.	No repayment obligation	NEIU Office of Human Resources 773-442-5200

NEIU Foundation Scholarships and Awards

The Northeastern Illinois University Foundation annually awards thousands of dollars in scholarships and awards supported by the generous contributions of University alumni, faculty, staff and friends. Some scholarships are based on financial need. Some are merit-based, awarded to students whose ability to contribute to campus life is significant because of their academic potential or talent in a particular field. To be considered for Foundation scholarships awarded by the Office of Financial Aid and Scholarships, students should contact the Director of Scholarships. For all others, contact the specific academic departments as indicated below. Most opportunities are open to students regardless of citizenship status. For specific criteria and eligibility requirements, students may contact the individual departments or visit Northeastern's AcademicWorks (<https://neiu.academicworks.com/>) website.

- Calixto C. Masó Spanish Scholarship
- Arturo Najera Mexican American Scholarship

Student Employment

Student Employment serves currently enrolled Northeastern students who are seeking part-time, seasonal, temporary, and on-campus employment. Job opportunities such as these assist students in meeting college expenses and/or gaining career-related experience. All job opportunities received by Student Employment are for currently enrolled students meeting Minimum Standards of Academic Progress.

Eligibility for certain on-campus jobs, such as those funded by the Federal Work-Study Program, are based on demonstrated financial need resulting from an approved financial aid application. Other on-campus jobs (Student Aide) are open to all students who are enrolled for a minimum of six credit hours (half time) per semester. To ensure no delay in pay students should not begin work until all hiring forms have been submitted and processed through the Student Employment Office.

All jobs received by Student Employment are posted online at NEIUhire (<https://neiu-csm.symphlicity.com/>). Other useful information can be found on the Student Employment (<https://www.neiu.edu/financial-aid/student-employment-opportunities/>) website. A limited number of job openings are posted on bulletin boards just north of the entrance to Enrollment Management Services (D-120).

Federal Work-Study Program

Programs	Eligibility	Description of Programs	Repayment	Office to Contact
Federal Work-Study Employment	(Undergraduate and Graduate) Enrolled full or half-time. Eligibility of students is determined by approved needs analysis methods. Must complete FAFSA. Must be enrolled in a degree program. Must file FAFSA by NEIU priority file date.	Federally funded on or off-campus employment. Off-campus employment is arranged through Student Employment with public and/or private not-for-profit agencies operating in the public interest. Includes America Reads/ Counts Tutoring Opportunities.	No repayment obligation.	Northeastern Student Employment (D-012) or Financial Aid (D-200)

Institutional Work Program

Programs	Eligibility	Description of Programs	Repayment	Office to Contact
Student Aide Employment	(Undergraduate and Graduate)	All enrolled students are eligible to apply for part-time on campus employment.	No repayment obligation.	Northeastern Student Employment (D-012) or Financial Aid (D-200)

Academics

Academics at Northeastern

Northeastern offers a rigorous academic experience tailored to your needs. We think pursuit of excellence happens best in a supportive, individualized environment. The diversity of our faculty and students means that you will benefit from both the understanding that comes from shared cultural backgrounds and the enrichment that comes from a variety of cultures.

- We have approximately 500 faculty. Many of the faculty bring with them experiences from different countries.
- Our student body is the most diverse in the Midwest.
- Northeastern is a federally designated Hispanic-Serving Institution.

Academic Calendar

2021-2022 Academic Calendar

Fall Semester 2021

Monday, August 23, 2021	Fall Semester Begins (Both 16-week and 1st 8-week Courses)
Monday, September 6, 2021	Labor Day Holiday - University Closed / No Classes
Saturday, October 16, 2021	1st 8-week Courses End
Monday, October 18, 2021	2nd 8-week Courses Begin
Tuesday, October 19, 2021	Grades Due by 11:59 p.m. for 1st 8-week Courses
Thursday, November 25, 2021 - Sunday, November 28, 2021	Thanksgiving Holiday - University Closed / No Classes
Monday, December 6, 2021	Last Day of Classes
Tuesday, December 7, 2021 - Thursday, December 9, 2021	Final Examinations
Friday, December 10, 2021	Final Examinations for Friday-only Classes
Saturday, December 11, 2021	Final Examinations for Saturday-only Classes / 2nd 8-week Classes End / Fall Semester Ends
Sunday, December 12, 2021	Commencement Ceremony (tentative)
Monday, December 13, 2021	Grades Due by 11:59 p.m. for 16-week and 2nd 8-week Courses
Tuesday, December 14, 2021 - Tuesday, January 18, 2022	Recess

Winter Session 2022

Friday, December 17, 2021	Winter Session Begins
Friday, December 24, 2021 - Monday, January 3, 2022	December Break - University Closed / No Classes
Tuesday, January 4, 2022	Winter Session Resumes
Saturday, January 15, 2022	Winter Session Ends
Monday, January 17, 2022	Martin Luther King, Jr. Day - University Closed / No Classes
Tuesday, January 18, 2022	Grades Due by 11:59 p.m. for Winter Session Courses

Spring Semester 2022

Monday, January 17, 2022	Martin Luther King, Jr. Day - University Closed / No Classes
Tuesday, January 18, 2022	Spring Semester Begins (Both 16-week and 1st 8-week Classes)
Friday, February 11, 2022	Lincoln's Birthday Observed - University Closed / No Classes
Saturday, February 12, 2022	Lincoln's Birthday - University Closed / No Classes
Saturday, March 12, 2022	1st 8-week Classes End
Monday, March 14, 2022 - Sunday, March 20, 2022	Spring Break - No Classes
Monday, March 21, 2022	Grades Due by 11:59 p.m. for 1st 8-week Classes / 2nd 8-week Classes Begin
Monday, May 9, 2022	Last Day of Classes
Tuesday, May 10, 2022 - Thursday, May 12, 2022	Final Examinations
Friday, May 13, 2022	Final Examinations for Friday-only Classes
Saturday, May 14, 2022	Final Examinations for Saturday-only Classes / 2nd 8-week Classes End / Spring Semester Ends
Sunday, May 15, 2022	Grades Due by 11:59 p.m. for 16-week and 2nd 8-week Courses
Monday, May 16, 2022	Commencement Ceremony (tentative)
Monday, May 16, 2022 - Sunday, May 22, 2022	Recess

First Half Summer Session 2022

Monday, May 23, 2022	First Half Summer Classes Begin
Monday, May 30, 2022	Memorial Day Holiday - University Closed / No Classes
Monday, June 20, 2022	Juneteenth Holiday / University Closed / No Classes
Tuesday, June 28, 2022	Last Day of Classes

Wednesday, June 29, 2022 - Thursday, June 30, 2022	Final Examinations
Thursday, June 30, 2022	First Half Summer Session Ends
Friday, July 1, 2022	Grades Due by 11:59 p.m.

Full Summer Session 2022

Monday, May 23, 2022	Full Summer Session Classes Begins
Monday, May 30, 2022	Memorial Day - University Closed / No Classes
Monday, June 20, 2022	Juneteenth Holiday / University Closed / No Classes
Monday, July 4, 2022	Independence Day Holiday - University Closed / No Classes
Monday, July 25, 2022	Last Day of Classes
Tuesday, July 26, 2022 - Thursday, July 28, 2022	Final Examinations
Friday, July 29, 2022	Final Examinations for Friday-only classes
Saturday, July 30, 2022	Final Examinations for Saturday-only Classes / Full Summer Session Ends
Monday, August 1, 2022	Grades Due by 11:59 p.m.
Tuesday, August 2, 2022 - Sunday, August 21, 2022	Recess

Second Half Summer Session 2022

Monday, July 4, 2022	Independence Day Holiday - University Closed / No Classes
Tuesday, July 5, 2022	Second Half Summer Classes Begin
Tuesday, August 9, 2022	Last Day of Classes
Wednesday, August 10, 2022 - Thursday, August 11, 2022	Final Examinations
Thursday, August 11, 2022	Second Half Summer Session Ends
Friday, August 12, 2022	Grades Due by 11:59 p.m.
Friday, August 12, 2022 - Sunday, August 21, 2022	Recess

All dates are subject to change.

Registration

Student Responsibility

Each student is ultimately responsible for knowledge of, and adherence to, all University requirements and regulations, including all degree and graduation requirements. All students are strongly encouraged to meet with an academic advisor each semester, and to seek information and assistance from appropriate staff should they have any questions regarding requirements or regulations.

The Academic Year

The academic year consists of a Fall Semester, a Winter Session, a Spring Semester, and three Summer terms of varying lengths. Specific dates for Fall 2021 through Summer 2022 can be found in the Academic Calendar section of the Academic Catalog.

Registration Procedures

Currently enrolled students and students admitted or readmitted prior to the beginning of Advance Registration are eligible to participate in the Advance Registration process. This allows students to register for upcoming semesters based upon their student classification (master's, senior, junior, etc.) and the number of credit hours completed. Students register online via NEIUport (<http://neiuport.neiu.edu>). Detailed information regarding online registration procedures and registration dates can be found in the online Schedule of Classes (<http://www.neiu.edu/academics/registrar-services/class-schedules-and-registration/>).

Northeastern provides priority registration to veterans, active duty military, reservists, and dependents using benefits by permitting these students to register for classes on the first day of the Advance Registration period in support of Section 303 of the Harry W. Colmery Veterans Educational Assistance Act of 2017.

Any eligible student who does not advance register may register online for classes during the Open Registration and Change of Registration periods. Students are responsible for viewing and/or printing their student schedule and registration fee assessment (bill) via NEIUport. Students must register for all classes before the last day of the Change of Registration period.

Students who fail to complete all admissions requirements, have outstanding tuition/fees or other financial obligations, receive academic dismissal or disciplinary notices, or have other holds that prevent registration must resolve the issue before being permitted to register.

Undergraduate Students Enrolling in Graduate Courses

An undergraduate student must meet the following minimum requirements to be considered for enrollment in a graduate course, in addition to meeting all prerequisites for the course (except for graduate standing): 1) completed one semester in residency at Northeastern, 2) be in the final year of undergraduate study and 3) currently has at least a 3.0 cumulative undergraduate GPA.

Some undergraduate students may elect to count the graduate course toward undergraduate degree requirements. If so, the course will carry an undergraduate course-level classification and cannot be used in the future to fulfill graduate requirements. All students enrolled in the course will do the same work, regardless of course-level classification.

Students must submit the **Undergraduate Students Enrolling in a Graduate Course form** to the Graduate Records Office no later than the end of the Change of Registration registration period, which is published in the online Schedule of Classes. After the end of the Change of Registration period, the student's decision about the course-level classification cannot be changed.

Course Numbers

A general guideline to Northeastern's course numbering system is:

- 000-099: Developmental courses. Credit does not apply towards graduation. Effective Fall 2010, grades earned in developmental courses will not be counted in the hours earned nor in the grade point average.
- 100-199: Lower-division courses usually taken during the freshman year.
- 200-299: Lower-division courses usually taken by sophomores.
- 300-399: Upper-division courses which are for advanced undergraduates and, under some conditions, graduate students.
- 400-499: Graduate-level courses only for graduate students.
- 500-599: Graduate-level courses only for graduate students.

Undergraduate students must complete a minimum of 40 semester hours at the upper-division level (i.e., courses number 300 to 499).

Student Classification

Total Hours Earned:

Freshman	0 - 29 hours
Sophomore	30 - 59 hours
Junior	60 - 89 hours
Senior	90+ hours
Graduate	Admitted to a graduate degree program
Student-at-Large	Not admitted to a degree program
Student-at-Large Seeking Licensure	Admitted to a licensure program
Second Bachelor's Degree	Admitted to an undergraduate degree program

Credit Hour Load

Credit Hours Load (Overloads)

During the Fall and Spring semesters, a student may register for a maximum of 18 credit hours per semester. Graduate students in the Computer Science or Counseling (Clinical Mental Health, Community, Couple and Family, Rehabilitation, or School Counseling) programs are restricted to 12 semester hours during the Fall and Spring semesters.

During the Summer semester, a student may register for a maximum of 12 credit hours.

No student may carry a course overload during their first semester at Northeastern.

To be considered for a course overload students must:

- Have a cumulative GPA of 3.0.
- Write a petition explaining the compelling reason the overload is necessary.
- Submit the letter of petition to the appropriate college Dean or Department.

Dean of the College of Arts and Sciences

- Undergraduates who have officially declared a major or pre-major in the College of Arts and Sciences
- Undergraduates who have not yet declared a major or pre-major
- Undergraduate and Graduate Students-at-Large

Dean of the College of Business and Management

- Undergraduates who have officially declared a major or pre-major in the College of Business and Management

Dean of the Daniel L. Goodwin College of Education

- Undergraduates who have officially declared a major or pre-major in the Goodwin College of Education
- Graduate Students-at-Large officially admitted to a certification program

Dean of the College of Graduate Studies and Research

- Graduates admitted to a master's degree program.

Director of Nontraditional Degree Programs

- Undergraduates officially admitted to the Bachelor of Arts in Interdisciplinary Studies program or the University Without Walls program

Prerequisite Policy

Prerequisite Policy

Some courses require that one or more prerequisites (i.e., other classes completed with certain grades, test scores, etc.) be successfully completed (or the classes in progress) before the student is allowed to register for the class. The faculty members regard these prerequisites or their equivalent as a necessary foundation for student learning. It is the student's responsibility to be aware of and meet any course prerequisite(s) prior to registration.

In situations where a course prerequisite(s) cannot be met, a student may request a prerequisite waiver (override) by contacting the program that offers the course. The program must enter the override in the student information system in order for the student to be able to register for the class. After the override has been entered into the student information system, the student must register for the course in NEUport by the registration deadline.

Students who were permitted to register for a future semester due to "in progress" coursework will be dropped from the classes for which they do not meet prerequisites if they do not successfully complete the course prerequisite(s) and if no prerequisite override exists in the student information system.

Policy on First Class Session Attendance

First Class Session Attendance Policy

A faculty member may reassign a registered student's seat in a class if the student does not attend the first class session and neglects to inform the faculty member in advance. The student is responsible for any financial consequence if the student does not officially drop his/her course before the end of the 100% refund period. A student who does not officially drop/withdraw from the course will receive a failing grade at the end of the semester.

Policy On Class Attendance

Policy on Class Attendance

Students are expected to attend all regularly scheduled classes and examinations. If a student has more than three unexcused absences (or one per class credit hour), the instructor may lower the student's grade, require additional work, and/or impose other sanctions as appropriate. Additional class attendance provisions may be adopted by the separate academic departments.

Concurrent Registration

Concurrent Registration

Concurrent registration for undergraduates working toward a degree at Northeastern Illinois University is permissible. Prior to enrolling at another college or university, the student must meet with their academic advisor to determine which courses are appropriate for the student's progress toward graduation.

Please refer to the Concurrent Registration Checklist for important information regarding the transferability of courses and the concurrent registration process. The checklist can be found on the Registrar's Office (<https://www.neiu.edu/academics/registrar-services/forms/>) web page.

The final decision regarding the transferability of courses will be determined by the Office of Admissions Review and Processing when the official transcript is received.

Questions regarding concurrent registration can be directed to the Registrar Office at (773) 442-4039.

Dual Credit Policy

Dual Credit Policy

A dual credit course is a university course taken by a high school student for credit at both the university and the high school. The course is taken at the high school and taught by a high school teacher. The high school course must have the same content, learning outcomes, and assessment methods as the Northeastern course, and the high school teacher must meet the same academic credential requirements as an adjunct faculty member teaching at Northeastern Illinois University.

The student must meet the same academic criteria prior to enrolling in the credit-bearing course as a student enrolled in the respective course at Northeastern, and he/she must complete the appropriate application materials. The student pays all appropriate university tuition and fees as designated by Northeastern's Board of Trustees.

Northeastern Illinois University adheres to all policies and procedures outlined in the Higher Education Dual Credit Quality Act (110 ILCS 72).

Repeat Courses

Repeating Undergraduate Courses

Effective Summer 2008, when a student repeats an undergraduate course only the last grade earned will be used to calculate the grade point average. Courses which are repeated will only count once toward fulfilling the minimum 120 hours required for graduation. Any course that is not designated as "repeatable for credit" may be retaken by the student, typically in order to improve the grade. See "Repeated Courses" for more information.

Repeating Graduate Courses

A student can take a specific course a maximum of two times (excluding course withdrawals), unless the course is formally approved as "repeatable".

Repeatable Courses

The University offers a number of courses that use the same course prefix and number but have variable content from semester to semester. In these courses, new material is taught each semester. Students receive credit for learning new content, and the grade and semester hours earned each time count toward the student's grade point average (GPA), and total credits. These courses are referred to as "repeatable courses" or "courses that are repeatable for credit." Examples of repeatable courses can include applied music, physical education, independent study, internship, thesis research, and topics vary courses.

Permanent Pass/Fail Option

Pass/Fail Grade Option

1. The Pass/Fail option is available only to students in good standing (cannot be on academic probation) at the undergraduate level.
2. The Pass/Fail option is not allowed for General Education-Distributive Learning, developmental, Honors, tutored study, independent study, ENGL-101, and College of Business and Management courses, or a course used to fulfill a major or minor requirement.
3. Students are eligible to exercise the Pass/Fail option only after accumulating 15 hours in residency (courses taken at Northeastern).
4. Eligible students will be permitted only one pass/fail course per term. A maximum of 18 pass/fail hours, including transfer courses from other institutions, may be applied toward graduation but may not be counted toward a student's major area of concentration, minor, or General Education-Distributive Learning.
5. Declaration of the intention to select the Pass/Fail option must be made no later than the 10th day of the term by submitting a completed Pass/Fail Grade Option form to the Registrar's Office in Enrollment Services. The decision to select the Pass/Fail option may not be changed after that date.
6. A grade of "P" will be used to indicate that the student has passed the course and a grade of "F" that the student has failed the course. This "F" will be included in the grade point average.
7. Instructors may offer courses restricted to pass/fail registration with approval from the appropriate college curricular governance committee, and by the Faculty Council on Academic Affairs either at the time of initial course approval or subsequently. Hours of credit carried by such a course(s) will be part of the maximum of 18 hours which have been approved for the general Pass/Fail option.

Dropping a Class/Official Withdrawal from the University

Dropping Classes: Official/Unofficial Withdrawals

Official Withdrawals

A student who wishes to drop or withdraw from a class or the university must do so in NEU*port* by the dates published in the Schedule of Classes.

Northeastern does not administratively drop or withdraw students from their classes for non-payment of tuition and fees or for other reasons. Consult the online Schedule of Classes (<http://www.neiu.edu/academics/registrar-services/class-schedules-and-registration/>) for the refund policy and deadline dates.

Students who completely withdraw from Northeastern must return all borrowed books to the Library, pay any fines due, and clear all outstanding accounts or holds.

Unofficial Withdrawals

A student who does not take the appropriate steps to officially drop or withdraw from his/her classes will receive grades of either "NAF"/"RNAF" or "UWF"/"RUWF" at the end of the semester/term.

English (Writing and Reading) and Mathematics Course Placement Policy

Testing Services - Placement Testing Policy

The purpose of the placement test is to determine course placements in the areas of Math and English to determine readiness for completing the university requirements in these areas.

Math Placement Test

Math/Quantitative Reasoning requirement is fulfilled by any one of the following:

- Completing one college level math course ('C' or better, accepted transfer credit); or
- Completing one course on the General Education Program-Distributive Learning List of Approved Courses ('C' or better); or
- Placing at College Level II Math on the NEIU Math Placement Test; or
- Scoring 580+ on the SAT or 25+ on the ACT within the past 2 years.
- Advanced Placement (AP) Calculus Test score of 3 or higher

WRITING PLACEMENT TEST

The English Composition Requirement is met by completing ENGL-101 or its equivalent, with a grade of 'C' or better. This requirement should be completed within the first 30 credit hours at Northeastern in order to ensure that students have the necessary writing skills to complete their studies.

Reading Placement Test

Reading requirement is fulfilled by any of the following: completing Reading 097 with a 'C' or better, earning 250 or higher on the Accuplacer Reading placement test, having an ACT Reading score of 20 or higher, or having an SAT Evidence-Based Reading and Writing (EBRW) score of 480 or higher. This requirement should be completed within the first 30 hours at Northeastern in order to ensure that students have the necessary reading skills to complete their studies.

Transfer students who transfer credits from another university that meet these requirements do not have to take that portion of the placement test.

Visitor/Auditor

Auditor (Visitor) Registration Option

A student who wishes to audit a course must obtain the written permission of the instructor (permission of the Department Chair for College of Business and Management courses), register in the regular manner, and pay the same tuition and fees charged to students earning credit in the same course. The approved written request to audit the course must be submitted to the Registrar's Office by the date published in the online Schedule of Classes (<http://www.neiu.edu/academics/registrar-services/class-schedules-and-registration/>) for that semester/term. After the Change of Registration period ends for the term in which a student is registering, a student cannot change or select the auditor option. The grade issued for an audited course is "V" (Visitor).

Student Departure for Military Service

Student Military Leave Policy

The call to active duty presents an extreme hardship upon students. In an effort to assist those students who are called to active duty, Northeastern Illinois University has established the following policy.

Northeastern Illinois University students who are members of the National Guard, Reserves, ROTC, or active United States military and who are called to active or inactive duty (i.e., drill, annual training, flight training periods, active duty for special work, readiness management assembly, Title 32, etc.) or who require medical treatment for service-related conditions will not receive any academic penalty for that service or treatment.

Within ten days after a student is notified that he/she has been called to duty, or needs to return for medical treatment (including travel time to/from the duty or treatment), he/she needs to inform his/her instructors that he/she will be absent. The Veterans Services Office must also be notified.

Veterans Services Office staff will work with the instructors to help the student in one of the following ways:

1. A student who will be absent for one to three weeks will be allowed to make up any missed work within a reasonable time frame without penalty to his/her grade. The student is required to present proof of training schedule, official orders or letter from the member's unit to the Veterans Services Office. In cases of a medical treatment, the student must present a signed document from the VA physician, social worker, or other qualified individual indicating that an absence should be excused. The Veterans Services Office will contact each instructor and obtain the requirements for course completion. The requirements will be sent to the student and kept on file.
2. A student who is activated for more than three weeks will have three options from which to choose.
 - a. If, according to the faculty member's judgment, the student's performance allows for the course instructor to award a letter grade consistent with the student's performance in the class, then the faculty member may do so as long as the instructor and the student both agree.
 - b. If the faculty member deems a letter grade is not appropriate, an incomplete ("I") can be assigned. A student choosing to receive an incomplete grade will receive instructions on what work needs to be completed for a letter grade to be entered at a later date in accordance with the University's Incomplete Grade policy. The student is required to present proof of training schedule, official orders or letter from the member's unit to the Veterans Services Office. In cases of a medical treatment, the student must present a signed document from the VA physician, social worker, or other qualified individual indicating that an absence should be excused. The Veterans Services Office will then contact each instructor and obtain the requirements for course completion. The requirements will be sent to the student and kept on file.
 - c. A student choosing to withdraw will be administratively withdrawn from his/her classes and will receive "W" grades for those classes. The student will receive a full credit to his/her account for tuition and fees for that semester. Students who are called to active duty will not be subject to financial aid and/or satisfactory academic progress standards for the withdrawal term.

Re-entry into the University and Re-enrollment in Dropped Course(s)

When a student is ready to re-enroll, the student should contact the Veterans Services Office for assistance with re-entering the University. A new application for admissions will not be necessary; however, the student will complete a re-entry form so that the University has the most up-to-date information on the student. Upon re-entry, the student will be granted a priority registration status over other students seeking to enroll in the course(s) the student dropped due to the military leave.

Enrollment Verification

Enrollment or Degree Verification

Northeastern utilizes the National Student Clearinghouse for the majority of student enrollment or degree verification requests. For enrollment or degree verification requests that cannot be handled by the National Student Clearinghouse, please contact the Registrar's Office. The Registrar's Office is the only office authorized to release externally a student's enrollment or degree status information.

When verifying enrollment for purposes of loan deferment, Social Security eligibility, etc., Northeastern reports enrollment status in the following manner:

Enrolled Hours: Fall and Spring Semesters

Undergraduate

Full-time: 12+

3-quarter-time: 9 to 11.99

Half-time: 6 to 8.99

Less-than-half-time: .5 to 5.99

Graduate

Full-time: 9+

3-quarter-time: 7 to 8.99

Half-time: 6 to 6.99

Less-than-half-time: .5 to 5.99

Enrolled Hours: Summer Semester

Undergraduate

Full-time: 12+

3-quarter-time: 9 to 11.99

Half-time: 6 to 8.99

Less-than-half-time: .5 to 5.99

Graduate

Full-time: 9+

3-quarter-time: 7 to 8.99

Half-time: 5 to 6.99

Less-than-half-time: .5 to 4.99

1. The student's status is determined by the total number of enrolled summer hours.
2. Dates of enrollment will be reported using the beginning and ending dates of the specific summer session(s) in which the student is taking classes.

Note: Enrollment verification for students enrolled as Second Bachelor's Degree students will be based on undergraduate criteria as stated above.

Major/Minor Declaration

Declaring a Major, Pre-major, Minor, or Concentration

Northeastern requires all undergraduate students to declare a major by the time they have earned a total of 45 credit hours.

Students intending to major in business, education, or graphic design can declare a “pre-major” until the program admission requirements to the College of Business and Technology, the Daniel L. Goodwin College of Education, or the BFA in Graphic Design are met.

Declaring a Major, Pre-Major, Minor or Concentration

The Undergraduate Major/Minor Declaration form must be completed to declare a major or pre-major, to declare a minor, to declare a concentration, or to make any changes to previously declared majors or pre-majors, minors, or concentrations. The procedure is as follows.

1. Obtain the Undergraduate Major/Minor Declaration form online, from the Registrar's Office in Enrollment Services, or from your academic program.
2. Obtain the necessary signatures, and submit the form to the Registrar's Office in Enrollment Services.

In most cases, students may follow this procedure at any time throughout the school year. Please check with the major or minor department for specific requirements and deadlines.

Students who double major in both the Bachelor of Arts in Interdisciplinary Studies (BAIS) program and another major will have the BAIS program listed as their primary major, and this major will display on the student's diploma. Both majors will appear on the student's transcript.

Area of Study in Addition to the Major

Undergraduate students are not required to have a minor, with the following exceptions:

- A student in the College of Arts and Sciences who majors in Biology, Chemistry, Earth Science, or Physics must complete a required set of cognate courses in other sciences and mathematics.
- A student in the College of Business and Technology must complete a required set of cognate courses in the Business and Management core in addition to courses for the major.
- Some majors in the Goodwin College of Education require a minor. Students should refer to the section of the Academic Catalog which details the requirements for each major to determine if a minor or a set of cognate courses is required.

Reverse Transfer Credit

Reverse Transfer of Credit

Pursuant to 110 ILCS 150/23, Reverse Transfer is a program designed for students who transferred from any Illinois community college to Northeastern without earning their associate's degree. Credits successfully completed at NEIU may be transferred back to the Illinois community college and used to fulfill the remaining requirements for the student's associate's degree. The community college will evaluate the Northeastern work and determine if credits taken at Northeastern will fulfill any remaining requirements. A student who has attended any Illinois community college is eligible to take advantage of this policy. Please consult with the Registrar's Office for further information.

Residency Status

Residency Status

For the purpose of this regulation an “adult” is considered to be a student 18 years of age or over; a “minor” student is a student under 18 years of age. The term “the State” means the State of Illinois. Except for those exceptions clearly indicated in this regulation, in all cases where records establish that the person does not meet the requirements for resident status as defined in this regulation, the nonresident status shall be assigned.

Residency Determination

Evidence for determination of residence status of each applicant for admission to the University shall be submitted to the Admissions Office at the time of application for admission. A student may submit additional or changed information to the University to request a reclassification of the student's residency status. However, if the student's residency status is classified in error as a resident student, the change in tuition shall be applicable beginning with the semester following the reclassification; if the student is classified in error as a nonresident, the change in tuition shall be applicable to the semester in which the reclassification occurs, provided the student has filed a written request for a review in accordance with this regulation.

Adult Student

An adult, to be considered a resident, must have been a bona fide resident of the state for a period of at least 6 consecutive months immediately preceding the beginning of any term for which he/she registers at the university, and must continue to maintain a bona fide residency in the state, except that an adult student whose parents (or one of them if only one parent is living or the parents are separated or divorced) have established and are maintaining a bona fide residence in the state and who resides with them (or the one residing in the state) or elsewhere in the state will be regarded as a resident student.

Minor Student

The residence of a minor shall be considered to be, and to change with and follow:

1. That of the person's parents, if they are living together, or living parent, if one is dead; or
2. if the parents are separated or divorced, that of the parent to whom the custody of the person has been awarded by court decree or order, or, in the absence of a court decree or order, that of the father unless the person has continuously resided with the mother for a period of at least six consecutive months immediately preceding his/her registration at the university, in which latter event the person's residence shall be considered to be that of his/her mother; or
3. that of the adoptive parents, if the person has been legally adopted and, in the event the adoptive parents become divorced or separated, that of the adoptive parent whose residence would govern under the foregoing rules if that parent had been a natural parent; or
4. that of the legally appointed guardian of the person if the minor resides with such guardian; or
5. that of a “natural” guardian, such as a grandparent, adult brother or adult sister, adult uncle or aunt, or other adult with whom the person has resided and has been supported by for a period of at least six consecutive months immediately preceding his/her registration at the university for any term if the person's parents are dead or have abandoned him/her and if no legal guardian of the person has been appointed and qualified.

Parent or Guardian

Except as provided in paragraph 10 of this regulation, no parent or legal or natural guardian will be considered a resident of the state unless the parent or guardian (a) maintains a bona fide and permanent place of abode within the state, and (b) lives within the state, except when temporarily absent from the state, with no intention of changing his/her legal residence to some other state or country.

Emancipated Minor

If a minor has been emancipated, is completely self-supporting, and actually resides in the state, the minor shall be considered to be a resident even though his/her parent or guardian may reside outside the state. An emancipated minor who is completely self-supporting shall be considered to “actually reside in the state of Illinois” if he/she maintained a dwelling place within the state uninterrupted for a period of at least 12 consecutive months immediately preceding the beginning of any term for which he/she registers at the university. Marriage or active military service shall be regarded as effecting the emancipation of minors, whether male or female, for the purposes of this regulation. An emancipated minor whose parents (or one of them if only one parent is living or the parents are separated or divorced) have established and are maintaining a bona fide residence in the state and who resides with them (or the one residing in the state) or elsewhere in the state will be regarded as a resident student.

In-State Tuition for Individuals from Bordering States

Beginning Fall 2015, incoming freshmen, transfer and graduate students from neighboring states will be assessed in-state tuition rates. Students will qualify if they reside in Indiana, Wisconsin, Michigan, Iowa, Kentucky or Missouri.

Armed Forces Personnel

Beginning Fall 2015, an incoming freshman, transfer, or graduate student who is an active member of the United States Armed Forces or who is an honorably discharged veteran, regardless of state residency, will qualify for in-state tuition. This policy also applies to the spouse and dependent children of active duty military and veterans.

Persons without United States Citizenship

A person who is not a citizen of the United States of America, to be considered a resident must have approved permanent resident status with the United States Citizenship and Immigration Services or a visa that allows the applicant to stay in the United States indefinitely. They must also meet and comply with all of the other applicable requirements to establish resident status.

Effective Fall 2003 and thereafter, in accordance with 110 ILCS 680/25-88 of the Illinois General Assembly, students with an undocumented status may be eligible for in-state tuition if all conditions of HB0060 are met. For more information, please contact the Admissions Office at (773) 442-4000.

Marriage of Students

1. If a resident student marries a nonresident, then the resident student shall continue to be classified as a resident unless the student requests reclassification to a nonresident status.
2. If a nonresident student marries a resident, then the nonresident student shall continue to be classified as a nonresident unless the student executes a declaration of residency, in such form as may be prescribed by the Admissions Office and requests reclassification to resident status.

Minor Children of Parents Transferred Outside the United States

The minor children of persons who have resided in the state for at least 12 consecutive months immediately prior to a transfer by their employers to some location outside the United States shall be considered residents. However, this shall apply only when the minor children of such parents enroll in the University within five years from the time their parents are transferred by their employer to some location outside the United States.

Staff Members of the University, Allied Agencies, and Faculties of State-Supported Institutions in Illinois

Staff members of the University and of allied agencies, and faculties of state-supported institutions of higher education in Illinois, holding an appointment of at least one-quarter time, and their spouses and dependent children, shall be treated as residents.

Teachers in Public and Private Illinois Schools

Teachers in the private and public elementary and secondary schools in Illinois shall, if subject to the payment of tuition, be assessed at the resident rate during the term in which the staff member or teacher holds such an appointment at least one-quarter time. This privilege also extends to the summer session or off-term vacation immediately following the term for which such appointment was effective.

Definition of Terminology

To the extent that the terms "bona fide residence," "independent," "dependent," and "emancipation," are not defined in this regulation, definitions shall be determined by according due consideration to all of the facts pertinent and material to the question and to the applicable laws and court decisions of the state of Illinois.

Voter registration, the filing of tax returns, proper license and registration for the driving or ownership of a vehicle, and other such transactions may verify intent of residence in a state. Neither length of university attendance nor continued presence in the university community during vacation period shall be constructed to be proof of Illinois residence.

The term "staff member" as used in this regulation shall mean a person appointed to an established position for a specific amount of time at a salary commensurate with the percentage of time required, under an appointment requiring service for not less than three-fourths of the term. The term "staff member" as defined herein shall not apply to persons employed on an hourly basis in either an academic or non-academic capacity, nor to persons on leave without pay. Persons appointed to established civil service positions, whose rate of pay is determined by negotiation or prevailing rates, shall not be considered as being paid on an hourly basis.

Procedure for Review of Residency Status

A student who takes exception to the residency status assigned and/or tuition assessed shall pay the tuition assessed but may file a written petition to the Residency Review Committee for a reconsideration of residency status and/or an adjustment of the tuition assessed. The written claim for reconsideration of residency status must include three documents which indicate the student's address within Illinois and dated at least 6 months prior to the beginning of the term for which an adjustment is requested. Acceptable documents include voter registration card, tax return, state ID or driver's license, bank statement, credit card bill, utility bill, lease/rental agreement, and insurance document. The written claim must be filed within 30 calendar days from the date of assessment of tuition or the date designated in the official University calendar as that upon which instruction begins for the academic period for which the tuition is payable, whichever is later, or the student loses all rights to a change of status and/or adjustment of the tuition assessed for the term in question. An official decision is typically communicated within 2 to 3 weeks, and the decision of the Residency Review Committee is final.

Residency Review Committee
c/o Enrollment Services (D-101)
5500 N. St. Louis Ave
Chicago, IL 60625

Grading and Transcripts

Grading and Transcripts

Northeastern Illinois University is on a 4.0 grading scale, i.e., each credit hour of "A" equals 4 grade points. An "A" earned in a 3 credit hour course generates 12 grade points.

The student's grade point average (GPA) is calculated by total number of grade points earned divided by total number of credit hours earned. Credit hours for courses in which a failing grade is earned (i.e., F, NAF, RNAF, UWF, and RUWF) are used to calculate the grade point average. Transfer hours and courses in which a "P" grade is earned are not used to calculate the grade point average.

Grading System

Definition and Explanation of Grading System

Grade	GPA
A	Completion of course requirements in an outstanding manner, reflecting a degree of accomplishment that is exceptional. 4
RA	Remedial A. Used for developmental courses only. Grade is not counted in hours earned nor in grade point average.
B	Completion of course requirements in an entirely acceptable manner, demonstrating an excellent grasp of the subject matter, and the likelihood of successful completion of further courses in the same area. 3
RB	Remedial B. Used for developmental courses only. Grade is not counted in hours earned nor in grade point average.
C	Completion of the course requirements in an acceptable manner, reflecting a basic understanding of the subject matter of the course and the possibility of successful completion of further courses in the same subject area. 2
RC	Remedial C. Used for developmental courses only. Grade is not counted in hours earned nor in grade point average.
D	Fulfillment of the minimum performance requirements prescribed by the instructor, but not in such a manner that higher level courses in the same area can be recommended. 1
RD	Remedial D. Used for developmental courses only. Grade is not counted in hours earned nor in grade point average.
F	Failure to demonstrate acceptable competence in the subject matter of the course, and/or failure to fulfill the requirements of the course. 0
RF	Remedial F. Used for developmental courses only. Grade is not counted in hours earned nor in grade point average.
I	Incomplete. Allows for an additional amount of time to complete a course, given at the discretion of the instructor per the Incomplete Grade Policy.
HP	High Pass. Outstanding academic progress on the thesis, an outstanding defense of the thesis, or an outstanding thesis. Credit is awarded, but the credit hours are not used to calculate the grade point average. (Used for graduate-level thesis courses only.)
P or Pass	Pass. Credit is awarded, but the credit hours are not used to calculate the grade point average. Also listed as Pass. At the graduate level, represents satisfactory academic progress on the thesis, a satisfactory defense of the thesis, or a satisfactory thesis.
RP	Remedial Pass. Used for developmental courses only. Grade is not counted in hours earned nor in grade point average.

NP	No Pass. Student has not made satisfactory academic progress on their thesis or their thesis does not meet the academic standards of the program. (Used for graduate-level thesis courses only.)	
V	Visitor/Auditor. Enrollment for no credit, no grade; not convertible to letter grade, nor applicable toward graduation credits.	
W	Withdrawal. Student withdraws after the Add/Drop registration period through the last day to officially withdraw.	
NAF	Never Attended Failure. Failure due to never attending, and not officially withdrawing from a course.	0
RNAF	Never Attended Failure. Used for developmental courses only. Failure due to never attending, and not officially withdrawing from a course.	0
UWF	Unofficial Withdrawal Failure. Failure due to not completing and not officially withdrawing from a course.	0
RUWF	Unofficial Withdrawal Failure. Used for developmental courses only. Failure due to not completing and not officially withdrawing from a course.	0
X	Grade not submitted by instructor.	

Grade Change Limitation

There is a time limit of one calendar year for any changes in letter grades. Grades assigned prior to the recording of a degree cannot be changed after the degree has been awarded.

Incomplete Grade Policy

Incomplete Grade Policy

An Incomplete ("I") grade is temporary and exceptional, and can be given only to students whose completed coursework has been qualitatively satisfactory but who have been unable to complete all course requirements because of illness or other circumstances beyond their control. An "I" grade is not to be awarded in place of a failing grade or when the student is expected to attend additional class meetings or to re-register to complete the course requirements. Additionally, an "I" grade is not a means for the student to raise his/her grade by doing additional work.

A request for an "I" grade must be made by the student to the faculty member before the last official day of the semester or term. The faculty member retains the right to make the final decision on granting a student's request for an "I" providing the student meets the provisions above, even though the student may meet the eligibility requirements for this grade. Students have up to one semester, excluding summer, to complete the work.

It is the responsibility of the student to complete and submit the remaining coursework before the assigned deadline. The faculty member will submit a Change of Grade form changing the "I" to a letter grade by or before the last day of classes of the semester in which the outstanding coursework is to be completed. If the student does not meet the deadline, the "I" will be changed to a final grade of "F". Since the "I" grade is temporary, faculty may not issue a terminal "I" grade.

Upon receipt of the grade change, the Registrar's Office will post the grade to the student's record and recalculate the GPA. Although students have up to one semester, excluding summer, to complete the work to change the grade of Incomplete, the student's academic standing will be reassessed only if the grade change is received by the Friday of the first full week of the semester immediately following the one in which the "I" grade was assigned.

Students will not be allowed to graduate with "I" grades on their records.

Extension of an Incomplete Grade

A request to extend the assigned deadline must be put in writing to the appropriate academic dean before the assigned "I" grade becomes a failing grade. The request must provide the reason as to why a deadline extension is requested, along with including appropriate documentation (e.g. medical documentation, etc.). A letter of support from the faculty member that includes a new deadline date is also required. The Dean or his/her designate will make the appropriate decision at his/her discretion and reply in writing to the student, faculty member, and the University Registrar within 14 working days. Requests that extend beyond one calendar year from the time the incomplete grade was assigned will not be honored.

These policies apply to "I" grades given in the Fall 2016 semester or later.

Academic Standings

Academic Standards: Warning, Probation, Dismissal, and Reinstatement

Academic Standing

Northeastern Illinois University is committed to helping students achieve their educational goals. At Northeastern, there are five distinct classifications of academic standing, and a student's academic standing is determined each semester. All of the academic standing classifications are reflected on a student's permanent academic record or transcript except Academic Warning.

- Good Standing
- Academic Warning
- Academic Probation
- Continued on Academic Probation
- Dismissed

Many factors (academic, personal, social, financial, etc.) can impact students' academic performance. These classifications are designed to identify whether students are succeeding academically and whether they would benefit from support services to maintain or regain Good Standing.

In addition to this Academic Standing Policy, students who receive financial aid are required to maintain Satisfactory Academic Progress (See Minimum Standards of Academic Progress for Financial Aid Purpose section).

Undergraduate Students

Good Standing

A student must maintain a minimum cumulative grade point average (GPA) of 2.0 on a 4.0 scale to be classified in Good Standing. The cumulative GPA is computed on the basis of credits earned at Northeastern Illinois University only. Courses at the 100-level and higher count towards a student's cumulative GPA. Courses that begin with "0" are developmental courses and do not count towards the cumulative GPA. The classification of Good Standing will appear on a student's transcript.

Students must maintain at least a 2.0 cumulative GPA to graduate, although some academic programs require a cumulative GPA higher than a 2.0 to graduate.

Academic Warning

Academic Warning is designed to alert a student when the student's current term GPA is below 2.00, and the student's cumulative GPA is 2.00 or above. Students on Academic Warning are expected to see their academic advisor frequently and to seek support from other University resources. The classification of Academic Warning will not appear on a student's transcript.

Academic Probation

Academic Probation occurs when a student's cumulative GPA falls below 2.0. The student will return to Good Standing when the cumulative GPA is 2.0 or higher. The classification of Academic Probation will appear on a student's transcript.

Each student placed on academic probation will be expected to take the following actions:

- Meet with his/her academic advisor by the end of the Change of Registration period the next semester in which the student enrolls.
- Meet at least three times per semester with the academic advisor.
- Utilize appropriate University and community support services.

Continued on Academic Probation

The classification of Continued on Academic Probation occurs when a student has been placed on Academic Probation during a semester, and during the next semester the student 1) does not have a cumulative GPA of at least 2.00, and 2) earns at least a 2.0 average for the semester. The classification of Continued on Academic Probation will appear on a student's transcript.

In this situation, the student will be permitted to continue on academic probation. The student is expected to continue to take the following actions:

- Meet at least three times per semester with his/her academic advisor.
- Utilize appropriate University and community support services.

Dismissed

A student is dismissed from the University when she/he is on Academic Probation (or Continued on Academic Probation from the previous semester) and has a cumulative GPA below 2.00, and fails to earn at least a 2.00 semester GPA in the current semester. The classification of Dismissed will appear on a student's transcript.

Student Success Programs

Exceptions to the Academic Standards policy will be made for students who have been admitted into a Student Success Program. Student Success programs include Project Success, Proyecto Pa'Lante, El Centro Scholars, CCICS All Stars, and Wentworth Scholars.

A student in one of the Student Success Programs who is successfully complying with the requirements of the Achievement Agreement will be subject to the above academic standards after three consecutive semesters for which the student is enrolled in his/her program (including summer). Academic standing status is reviewed at the end of the third consecutive semester after enrollment in the program.

A student in one of the Student Success Programs who is not successfully complying with the requirements of the Achievement Agreement will be removed from his/her Student Success Program and be subject to the same academic standards as a student who is not in a Student Success Program.

University Without Walls (UWW) Program

Students enrolled in the University Without Walls program shall be exempt from being placed on academic probation or being dismissed during the first 12 credit hours of formal coursework taken at Northeastern. If a UWW student takes more than 12 hours of formal credit, the normal University academic regulations will apply. The above policy has no bearing on transfer credits, or on any formal course work not completed at Northeastern.

Undergraduate Students-at-Large

Undergraduate students-at-large will be dismissed if, upon completion of four courses, they have less than a 2.0 (on a 4.0 scale) cumulative GPA, and have not maintained a term GPA of 2.0 or better.

Reinstatement

An undergraduate student who has been dismissed must sit out for one semester and must petition to the Academic Standards Committee by the established deadlines to be considered for reinstatement. Reinstatement is not automatic. An undergraduate student's chances of reinstatement will be enhanced by the student enrolling in and successfully completing courses at a regionally accredited community college or four-year school. If the petition is granted, the undergraduate student will be reinstated on academic probation and will be subject to the standards for a student on Continued on Academic Probation (see above).

A petition (written letter, university admissions application, and nonrefundable application fee) addressed to the Academic Standards Committee must be submitted to the Registrar's Office no later than July 15 for the Fall semester, November 15 for the Spring semester, or March 15 for the Summer semester in order to be considered for reinstatement.

The Academic Standards Committee is responsible for all policies governing the academic probation, dismissal and reinstatement of undergraduate students, and will recommend action to the Provost. Decisions of the Provost shall be final in all cases.

Graduate Students

To remain in good academic standing, a student in a graduate program (degree-seeking, licensure, endorsement, or certificate) must maintain a minimum cumulative GPA of 3.0. In addition, a graduate student in a degree or certificate program must make satisfactory progress toward his/her degree or certificate. A student must be in good academic standing to graduate.

Academic Probation

A student in a graduate program (degree-seeking, licensure, endorsement, or certificate) whose cumulative GPA falls below 3.0 will be placed on academic probation. If in subsequent terms, the student earns grades that restore his/her cumulative GPA to 3.0 or above, he/she will be returned to good academic standing. If a student needs to be placed on academic probation for a third time after he/she returned to good academic standing in two previous probation instances, he/she will be dismissed. A student whose cumulative GPA falls below 2.0 will be dismissed without academic probation.

A student who is on academic probation and who does not restore his/her cumulative GPA to 3.0 in subsequent terms will be permitted to remain on academic probation as long as he/she earns at least a 3.0 GPA for the term. If in any subsequent term, the student on academic probation fails to earn a 3.0 GPA for the term, he/she will be dismissed.

Dismissal for Academic Reasons

A student in a graduate program (degree-seeking, licensure, endorsement, or certificate) may be dismissed from his/her program for the following academic reasons: sub-standard GPA (see Academic Probation policy); failure to make satisfactory progress toward completion of his/her program; or receiving more than six credit hours of unsatisfactory grades (e.g., C, D, or F). A student may also be dismissed as a consequence of acts of academic misconduct (see the University Code of Conduct).

To avoid dismissal, a student who has experienced extenuating circumstances may meet with his/her program advisor to request development of a plan outlining the course of action the student must follow to return to good academic standing. This plan must be approved by both the program and the Dean of the College of Graduate Studies and Research or the Dean's designee. Failure to meet the terms of this plan may not be appealed and will result in dismissal.

Graduate Student-at-Large: Dismissal and Reinstatement/Readmission

A graduate student-at-large will be dismissed if, upon the completion of four courses, they have earned a cumulative grade point average that is less than 2.0 (on a 4.0 scale; equivalent to a "C" average). A graduate student-at-large who has been dismissed may apply to be reinstated/readmitted no earlier than the second semester following the dismissal. The reinstatement/readmission application must include an appeal letter addressed to the Academic Standards Committee explaining the new circumstances that will allow the applicant to improve their academic performance. Deadlines for reinstatement/readmission following dismissal are July 15 for the Fall semester, November 15 for the Spring semester, and March 15 for the Summer semester. If reinstatement/readmission is granted, the student will be reinstated/readmitted on academic probation (see Graduate Academic Probation section).

Viewing Semester Grades

Viewing Semester Grades

Semester grades are available for students to view via NEIUport (<http://neiuport.neiu.edu>) within one day after the deadline for faculty to submit grades. Grades are not mailed.

Consult the Academic Calendar section of the Academic Catalog for when grades are due each term.

Grade Appeals

All students have a legitimate right to seek redress when they consider their final grade in a course to be unreasonable, unjust, or capricious. This grade appeal procedure shall be initiated during the term immediately following issuance of the grade in question; in cases involving special and unusual circumstances, this time period may be reasonably extended.

For the complete policy, please click here (http://catalog.neiu.edu/policies/grade_appeal/).

Transcripts

Official Transcripts

Students may request an official copy of their transcript. Transcripts can either be mailed or sent electronically. Please review the Registrar's Office (<http://www.neiu.edu/academics/registrar-services/>) web page for fee information and ordering instructions.

Students who have a financial obligation to the University may not receive official or unofficial transcripts until the debt has been cleared.

Graduation Requirements

Graduation Requirements

Each student is ultimately responsible for knowledge of, and adherence to, all University requirements and regulations, including all degree and graduation requirements.

All students are strongly encouraged to meet with an academic advisor each semester, and to seek information and assistance from appropriate staff should they have any questions.

In addition to meeting with their academic advisor, undergraduate students should also run their Degree Evaluation (degree audit) each semester. The Degree Evaluation tool is available in the Registration Tools channel in NEIUport.

Catalog Year

Catalog Year

Undergraduate Students

An undergraduate student's catalog year is the academic year when the student is first enrolled in an undergraduate degree program. Catalog year is not affected by a student declaring his/her major or minor. A re-admitted student is subject to the catalog year requirements based on the semester of his/her re-admission (see Inactivation/Re-admission Policy).

Graduate Students

A graduate student's catalog year is the academic year when the student is first enrolled after being admitted to a graduate program. A student's catalog year is not affected while the student is on an approved leave of absence. A re-admitted student is subject to the catalog year requirements based on the semester of his/her re-admission (see Inactivation/Re-admission Policy).

Change of Catalog Year

An active student may change his/her catalog year to a succeeding catalog if it is to the student's benefit. A completed Change of Catalog Year form should be submitted to Enrollment Services to update the student's record.

Bachelor's Degree

Bachelor's Degree Graduation Requirements

Refer to your Academic Catalog (<http://www.neiu.edu/academics/academic-catalog/>) for specific graduation and degree requirements.

Total Credits

Undergraduate students must earn a minimum of 120 semester hours, of which 40 semester hours must be at the upper-division level (300-level) to be eligible to graduate from Northeastern.

Residency

Undergraduate students must earn at least 30 semester hours at Northeastern Illinois University. Bachelor of Arts in Interdisciplinary Studies (BAIS) and University Without Walls (UWW) students must earn at least 24 semester hours at Northeastern.

Grade Point Average

To be eligible to graduate, undergraduate students and second bachelor's degree students must have a minimum cumulative 2.0 GPA (overall "C" average). Some academic programs and departments have other specific grade requirements. Check with your academic advisor.

Academic College or Nontraditional Degree Programs

All undergraduates must also satisfy the requirements of their individual college (College of Arts and Sciences, College of Business and Technology, College of Education) or the Nontraditional Degree Programs.

Academic Major and Minor

Undergraduate students must complete a major. Some majors require a minor or set of cognate courses. Students should refer to the section of the Academic Catalog which details the requirements for each major to determine if a minor or a set of cognate courses is required. Students must earn a grade of "C" or higher in all courses counted toward the major, the minor, cognate, and professional sequences. No "P" grades will count toward a major, a minor, or cognate courses. All grade point average requirements must be met for the successful completion of a program of study.

General Education-Distributive Learning Program

All undergraduate students must complete the General Education-Distributive Learning Program requirements which include coursework in Fine Arts, Humanities, Natural Sciences, and Social/Behavioral Sciences. Refer to the General Education-Distributive Learning section of the Academic Catalog for more information.

Engaged Learning Experiences Requirement

In addition to the General Education-Distributive Learning requirements, all undergraduate students must complete three Engaged Learning Experiences (ELE) courses, designated as Boundary Crossing (ELE-X) and Discipline Specific (ELE-DS), to satisfy the Engaged Learning Experiences requirement. The ELE requirement must be completed at Northeastern Illinois University. Three ELE courses (minimum of 7 hours) must be completed to graduate. At least one of the three ELE courses must be a Boundary-Crossing (ELE-X) course. (Students can take more than one ELE-X course to fulfill the requirement.) At least one of the three ELE courses must be at the 300-level. A course can only be counted only once toward meeting the ELE requirement, even if it is repeatable within the major or program.

To count toward the ELE requirement, a course must be graded with a letter grade (i.e., A, B, C, D). No courses graded as pass/fail can count toward meeting the ELE requirement. Only one "D" grade is permitted to count toward the ELE requirement. Furthermore, the "D" can only be accepted if the course is not counting for completion of the student's major. If a course is counted as a major requirement, it must follow the requirements of the major, which is often receiving a "C" or better.

Students can search the online Schedule of Classes by "Attribute Type" to find approved ELE Discipline Specific and ELE Boundary Crossing courses.

A listing of the approved ELE courses is also available on the University Core Curriculum web page (<https://www.neiu.edu/academics/university-core-curriculumgeneral-education/>).

English Composition Requirement

All students must successfully complete ENGL-101 or its equivalent, with a grade of "C" or better. This requirement should be completed within the first 30 credit hours at Northeastern in order to ensure that students have the necessary writing skills to complete their studies.

Writing Intensive Requirement

All students must successfully complete a writing intensive (WIP) course of at least 3 credit hours within their discipline. This requirement cannot be fulfilled with transfer credit. Students should check with an academic advisor or the Center for Academic Writing to determine which WIP course(s) may fulfill this requirement for their major.

Math/Quantitative Reasoning Requirement (MA)

One course, 3 credit hours math/quantitative reasoning course that has Intermediate Algebra as a prerequisite. Any 3 semester hour college-level math course, beyond Intermediate Algebra, meets this requirement. No grade of "D" is allowed to satisfy the Mathematics/Quantitative Reasoning

requirement. This requirement should be completed within the first 30 credit hours at Northeastern in order to ensure that students have the necessary mathematics skills to complete their studies.

See the University Core Curriculum (<https://www.neiu.edu/academics/university-core-curriculumgeneral-education/>) web page for the list of General Education-Distributive Education Program List of Approved Courses which shows which courses satisfy this requirement. Students can also fulfill the Math/Quantitative requirement in one of the following ways:

1. Transfer credit with a grade of "C" or better in any math course College Algebra level or higher.
2. An Associate of Arts (A.A.) or Associate of Science (A.S.) degree from a community college meeting the standards of the 1991 Illinois Community College Board model General Education curriculum in Mathematics or completion of the Illinois Articulation Initiative's General Education Core curriculum after transferring to Northeastern Illinois University.
3. Placing at College Level II Math on the NEIU Math Placement Test (October 2018 and later).
4. A Math ACT score of 25 or higher, or a 580 or higher SAT score.
5. A score of three or higher on the Advanced Placement (AP) Calculus examination.
6. A minimum score of 31 on the Northeastern Accuplacer **College Level Math** placement test (Fall 2014 through October 2018).
7. A minimum score of 35 on the Northeastern Mathematics placement test (pre-Fall 2014).
8. Completion of one of the majors or minors listed below will automatically fulfill the Math/Quantitative Reasoning requirement.

College of Arts and Sciences

Biology major
Chemistry major
Earth Science major
Environmental Science (major)
Physics (major or minor)
Economics (major or minor)
Mathematics (major or minor)
Psychology major

College of Business and Technology

Accounting (major or minor)
Computer Science (major or minor)
Finance (major or minor)
General Business Administration major
International Business minor
Marketing major
Management (major or minor)

Improving Human Relations Requirement

Illinois Bill 110 ILCS 205/9.21 requires that "each public institution of higher education to include, in the general education requirements for obtaining a degree, coursework on improving human relations to include race, ethnicity, gender and other issues related to improving human relations to address racism and sexual harassment on their campuses, through existing courses." The General Education Program includes coursework on improving race and ethnic relations. The current Schedule of Classes will identify the list from which the students will choose a course that satisfies the Improving Human Relations requirement. Students who complete one of the following programs of study have met the requirement:

Anthropology (major or minor)
Bilingual/Bicultural Education (major)
Justice Studies (major or minor)
Geography (major)
History (major)
Inner City Studies (major)
Latino and Latin American Studies (major or minor)
Political Science (major or minor)
Psychology (major or minor)
Social Work (major or minor)
Sociology (major or minor)
Women's and Gender Studies (major or minor)

Second Bachelor's Degree Graduation Requirements

Second Bachelor's Degree Graduation Requirements

A student completing a second bachelor's degree must complete a minimum of 30 credit hours at Northeastern Illinois University. Students may not be enrolled in two programs simultaneously.

Coursework counted toward a previous undergraduate or graduate degree may not be used to fulfill the 30-credit hour requirement for the second bachelor's degree. Speak with your major department regarding courses which satisfy the requirement.

Applicants for a second bachelor's degree who were awarded a degree from an accredited college or university in the United States have met the following Northeastern graduation requirements: the University Core Curriculum including all General Education-Distributive Learning and Engaged Learning Experiences requirements, ENGL-101, the Writing Intensive requirement, the Math/Quantitative Reasoning requirement, and the 40 hours at the upper-division (300-level) requirement.

Second bachelor's degree candidates are required to fulfill the Improving Human Relations requirement.

University Core Curriculum

University Core Curriculum

Effective for students admitted or readmitted in Fall 2016, or later, the University Core Curriculum, encompassing both the General Education-Distributive Learning ("Gen Ed) program and Engaged Learning Experiences (ELE) courses will develop and enhance students' intellectual and practical skills through immersion in disciplines and fields of study and by learning within the resources of community and diversity at Northeastern. Critical inquiry, learning how to recognize and respond to important questions, is the essence of the liberal arts and sciences. Through public engagement, including research experiences, creative performance, and civic involvement, students can connect and adapt disciplinary practices and thinking beyond the classroom. Students completing the requirements of the University Core Curriculum will gain tools to become life-long learners, reflective individuals, ethical professionals, and active members of their communities. Through the University Core Curriculum, students will develop a broad foundation of knowledge and skills that will support advanced study and civic responsibility; and integrate and apply multiple intellectual perspectives of increasing complexity to new situations.

The University Core Curriculum includes both the General Education-Distributive Learning Program consisting of twelve courses, and Engaged Learning Experiences consisting of three courses.

General Education-Distributive Learning Program

For specific information on how to complete the requirements of the General Education-Distributive Learning Program, refer to the General Education-Distributive Learning (<http://catalog.neiu.edu/graduation-requirements/general-education-program/>) section of this catalog.

Engaged Learning Experiences

Engaged Learning Experiences courses provide opportunities for deep reflection and integration of knowledge across boundaries through experiences such as interdisciplinary seminar classes, capstone projects, fieldwork, internships, study abroad, and student research. Courses that satisfy these requirements will be designated as such in the Schedule of Classes by searching using "Attributes Type" field.

- **Discipline Specific (ELE-DS)**

These courses have prerequisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

- **Boundary Crossing (ELE-X)**

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Please note the following requirements regarding the Engaged Learning Experiences requirement:

- The ELE requirement must be completed at Northeastern Illinois University.
- Three ELE courses (minimum of 7 hours) must be completed to graduate.
- At least one of the three ELE courses must be a Boundary-Crossing (ELE-X) course. Students can take more than one ELE-X course to fulfill the requirement.
- At least one of the three ELE courses must be at the 300-level.
- A course can only be counted only once toward meeting the ELE requirement, even if it is repeatable within the major or program.
- To count toward the ELE requirement, a course must be graded with a letter grade (i.e., A, B, C, D). No courses graded as pass/fail can count toward meeting the ELE requirement.
- Only one "D" grade is permitted to count toward the ELE requirement. Furthermore, the "D" can only be accepted if the course is not counting for completion of the student's major. If a course is counted as a major requirement, it must follow the requirements of the major, which is often receiving a "C" or better.
- Students majoring in the B.A. in Interdisciplinary Studies program are only required to complete two ELE courses, one of which must be a Boundary Crossing course (ELE-X) and the credit hours will need to amount to at least 4 credit hours.

General Education Program

General Education - Distributive Learning Program

The General Education-Distributive Learning Program, part of the University Core Curriculum, consists of four areas in which undergraduate students gain knowledge to enrich their lives and enhance their academic experience. These four areas are Fine Arts, Humanities, Natural Sciences, and Social/Behavioral Sciences. Every degree-seeking undergraduate student must take courses from the General Education-Distributive Learning List of Approved Courses to meet these requirements. Courses that satisfy these requirements will be designated as such in the Schedule of Classes by searching using the "Attributes Type" field.

It is expected that the knowledge gained in these courses will provide an academic foundation that will help prepare students for the major and minor course areas and will encourage students to become life-long learners in many different and divergent fields of study.

The goal of the General Education-Distributive Learning Program (often called 'Gen Ed') is to assist students in developing the following:

- the ability to communicate both in writing and orally;
- the skills required to gather, analyze, document, and integrate information;
- an understanding of historical processes and cultural differences; aesthetic and literary sensitivity;
- an understanding of the modes of thought, concerns, and methodologies of the fine arts, the humanities, the social and behavioral sciences, and the natural sciences;
- and the ability to use quantitative methods in the natural, social, and behavioral sciences.

Students are required to take a minimum of 33 credit hours of General Education-Distributive Learning courses. Transfer students may fulfill General Education-Distributive Learning requirements with courses taken at other colleges or universities. Students who transfer with an approved Illinois Community College Board (ICCB) Model Associate of Arts (A.A.), Associate of Science (A.S.)*, or Associate of Arts in Teaching (A.A.T.) degree or have completed the Illinois General Education Core Curriculum after transferring to Northeastern Illinois University will have met their General Education-Distributive Learning requirements. For information regarding the Illinois General Education Core Curriculum, visit the web site at <http://www.iTransfer.org> (<http://www.itransfer.org/>).

* Students who complete the A.S. degree after Fall 2016 may have to take one additional humanities and one additional social/behavioral sciences course to complete the General Education Distributive Learning requirements, depending on how many hours were completed in each of these areas when the A.S. degree was conferred.

Students are encouraged to complete their General Education-Distributive Learning courses during their first 75 hours of course work. These courses are distributed as described in detail below, and require students to take two courses in the Fine Arts, three courses in the Humanities, three courses in the Social/ Behavioral Sciences, and three Natural Science courses (including one laboratory course). Students seeking a teaching license may be required to take additional coursework.

Fine Arts (FA)

2 courses, 6 credit hours from two of the following areas of study: Art, CMT (Mass Media or Theatre only), Music (includes Dance).

Humanities (HU)

3 courses, 9 credit hours from at least two of the following areas of study: CMT (Communication only), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)

Social/Behavioral Sciences (SB)

3 courses, 9 credit hours from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work. (Note: Students admitted or readmitted before Fall 2016, must complete 4 courses (12 credit hours) of Social/Behavioral Sciences courses in at least two of the above areas of study.)

Natural Sciences (NS and NSL)

3 courses, 9 credit hours from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE Anthropology course that counts as Natural Science is taken, then only one Biology course may be used for Natural Science).

Please note the following requirements regarding the General Education-Distributive Learning Program:

- Only courses included on the General Education-Distributive Learning Program List of Approved Courses during the term of enrollment are applicable towards the General Education-Distributive Learning requirements. Courses that satisfy these requirements will be designated as such in the Schedule of Classes by searching using the "Attributes Type" field.
- The Pass/Fail option may not be used to meet any General Education-Distributive Learning requirements.
- A student may use no more than six (6) hours of "D" to meet the distribution area requirements.

- By the tenth week of the Fall and Spring semesters, faculty teaching General Education-Distributive Learning courses should notify any student with less than a "C" average of his/her grade in the course.
- Majors in the Fine Arts, Humanities, and Social/Behavioral Sciences may waive up to six credit hours of General Education-Distributive Learning requirements in the corresponding distribution area.
- Majors in the Natural Sciences may waive up to nine credit hours of General Education-Distributive Learning in the Natural Science distribution area.
- A student may use no more than two courses from any one area of study (including courses transferred to Northeastern) to meet the distribution requirements in Humanities, Natural Sciences, and Social/Behavioral Sciences. No more than one course from any area of study (including transferred courses) may be used to meet the Fine Arts distribution requirements.
- Courses completed elsewhere by students transferring to Northeastern may be applied to General Education-Distributive Learning requirements. Transfer courses will be evaluated by the Admissions Office to determine appropriate General Education-Distributive Learning credit.
- Students who have specific questions about General Education-Distributive Learning should contact either their academic advisor or the College of Arts and Sciences Dean's Office. Departments that have questions regarding the Engaged Learning Experiences should contact the Chair of the University Core Curriculum Committee.

Bachelor of Arts in Interdisciplinary Studies (BAIS) General Education-Distributive Learning Program

The Bachelor of Arts in Interdisciplinary Studies General Education-Distributive Learning program was designed to help returning adult students complete their foundational work, thereby allowing them to move into more advanced coursework as soon as they meet criteria. Below are the General Education-Distributive Learning requirements for students who are majoring in the Bachelor of Arts in Interdisciplinary Studies (BAIS) program.

Humanities and Arts (12 credit hours)

- Art
- Communication, Media, and Theatre
- English
- Linguistics
- Music and Dance
- Philosophy
- World Languages and Cultures

Social Sciences (12 credit hours)

- Anthropology
- Economics
- Geography and Environmental Studies
- History
- Justice Studies
- Political Science
- Psychology
- Sociology

Natural Sciences (12 credit hours)

- Biology
- Chemistry
- Computer Science
- Earth Science
- Mathematics
- Physics

Applying for Graduation

Filing for Undergraduate Graduation

Undergraduate students and second bachelor's degree students must apply for graduation by submitting an Application for Graduation and Academic Course Record forms for each major or minor. The required documents are to be submitted to the Graduation Evaluations area in the Registrar's Office in Enrollment Services.

Students should apply for graduation once they have earned a minimum of 85 hours of credit and after being formally accepted by their major department and minor department (if applicable).

NEIU makes available, via NEIUport, a degree evaluation tool, that allows undergraduate students to check on their degree progress by running the degree evaluation tool. It is strongly recommended that students review their degree evaluation at least once each semester in addition to meeting with their academic advisor.

Undergraduate Graduation Application Filing Deadlines

Month of Anticipated Completion of Degree Requirements	Filing Deadline
May 2022	September 15
August 2022	January 15
December 2022	May 15

Each student anticipating graduation is fully responsible for submitting the graduation application and supporting documents by the above deadlines.

A student who files the required application and supporting documents but fails to complete all graduation requirements by the appropriate date will be dropped from the graduation list and must reapply for a later graduation date by completing a Change of Graduation Date form available in the Registrar's Office in Enrollment Services. NEIU will not backdate a student's graduation date to a previous semester should the student fail to submit the Change of Graduation Date form.

Diplomas and transcripts are not released to graduates until they have paid the graduation fee and all holds and/or indebtedness to the University have been resolved.

Commencement Ceremony Participation

Students who apply for December graduation are eligible to participate in the December commencement ceremony. Students who apply for May graduation are eligible to participate in the May commencement ceremony. Students who apply for August graduation are eligible to participate in the following December commencement ceremony.

Honors Recognition

Latin Honors Recognition

Latin Honors Recognition

Baccalaureate degree-seeking students who graduate with at least a 3.5 cumulative grade point average (on a 4.0 scale), and who complete, at Northeastern, a minimum of 30 semester hours (excluding developmental and pass/fail hours) will have Latin Honors appear on his/her transcript and diploma. Those students in the Honors Program and who are Honors Scholars will have their transcripts and diplomas indicate that they are graduating as Honors Scholars.

Latin Honors Recognition - Nontraditional Degree Programs

Students majoring in the Bachelor of Arts in Interdisciplinary Studies (BAIS) program or the University Without Walls (UWW) program who complete, at Northeastern, 24 semester hours that count toward graduation (excluding developmental and pass/fail hours), and graduate with at least a 3.5 cumulative grade point average (on a 4.0 scale) will have Latin Honors appear on his/her transcript and diploma.

Latin Honors	Definition	GPA
Summa Cum Laude	With Highest Honor	3.9 - 4.0
Magna Cum Laude	With Great Honor	3.75 - 3.89
Cum Laude	With Honor	3.5 - 3.74

Latin Honors Recognition - University Honors Program

A baccalaureate degree-seeking student who completes the Honors Program's Honors Scholar curriculum with at least a 3.5 cumulative grade point average (on a 4.0 scale), and who completes, at Northeastern, a minimum of 30 semester hours (excluding developmental and pass/fail hours) will have Latin Honors appear on his/her transcript and diploma.

Latin Honors for Honors Scholars	Definition	GPA
Honors Scholar - Summa Cum Laude	With Highest Honor	3.9 - 4.0
Honors Scholar - Magna Cum Laude	With Great Honor	3.75 - 3.89
Honors Scholar - Cum Laude	With Honor	3.5 - 3.74

Master's Degree

Master's Degree Graduation Requirements

Master's degree students must have a cumulative graduate GPA of 3.0 or higher to graduate. Refer to the Academic Catalog (<http://www.neiu.edu/academics/academic-catalog/>) for the semester/academic year for which you were admitted for specific graduation and degree requirements.

Applying for Graduation

An application for graduation should be filed according to the instructions provided with the application. Dates are also listed on the Registrar's Office web page (<http://www.neiu.edu/academics/registrar-services/applying-graduation/>). A non-refundable graduation fee must accompany the application. Upon evaluation of the graduation application, the student will receive a response from the Graduate Records Office indicating outstanding requirements and whether or not there is a possibility for completion of all requirements to graduate in that semester.

Students must submit both an Application for Graduation and a completed Academic Course Record form to the Graduate Records Office (D-101).

Students completing a master's thesis must submit it electronically through ProQuest's Submission Process.

- **Preliminary Thesis Deadline:** Students planning to defend and submit their thesis should create their ProQuest ETD account and enter their background information into the system at least four weeks before the last day of finals of the semester in which the student plans to graduate. To create an account, go to <http://www.etdadmin.com/neiu> (<http://www.etdadmin.com/neiu/>) and follow the instructions. Contact the College of Graduate Studies and Research Dean's Office at graduatestudies@neiu.edu with any questions you may have.
- **Thesis Deadline:** The thesis must be submitted via ETD for review by the College of Graduate Studies and Research Dean's Office at least three weeks before the last day of finals of the semester in which the student plans to graduate. This will allow sufficient time for corrections and/or adjustments. The submission deadline will be publicized at the beginning of each semester.

Master's Graduation Application Filing Deadlines

Month of Anticipated Completion of Degree Requirements	Filing Deadline
May 2022	September 1 until Nov. 1
August 2022	Feb. 1 until April 1
December 2022	March 15 until May 15

A student who files the required forms but fails to complete all graduation requirements by the appropriate date will be dropped from the graduation list and must reapply for a later graduation date by completing a Change of Graduation Date form available in the Graduate Records Office. NEIU will not backdate a student's graduation to a previous semester should the student fail to submit a Change of Graduation Date form.

Diplomas and transcripts are not released to graduates until they have paid the graduation fee and all holds and/or indebtedness to the University have been resolved.

Commencement Ceremony Participation

Students who apply for December graduation are eligible to participate in the December commencement ceremony. Students who apply for May graduation are eligible to participate in the May commencement ceremony. Students who apply for August graduation are eligible to participate in the following December commencement ceremony.

Graduate Certificate Programs

Graduate Certificate Programs

A Graduate Certificate Program is composed of a focused collection of courses that offers a skill set in and/or distinctive approach to a subject that cannot be otherwise gained through an existing Northeastern degree program or academic minor.

Graduate certificate programs must conform to Illinois Board of Higher Education (IBHE) guidelines and to the following IBHE Program Inventory Definitions:

1. A post-baccalaureate certificate “requiring completion of an organized program of study requiring at least 18 semester credit hours beyond the bachelor’s and...designed for persons who have completed a baccalaureate degree but do not meet the requirements of academic degrees at the master’s level.”
2. A post-master’s certificate “requiring completion of an organized program of academic study of at least 24 semester credit hours beyond the master’s degree but does not meet the requirements of academic degrees at the doctoral level.”

Students may be concurrently enrolled in a degree program and a certificate program. Such students will complete separate application to each program.

Courses composing a Northeastern graduate certificate will, upon their completion, be included on a student’s transcript and in the computation of a student’s grade point average.

Credit hours earned through a post-baccalaureate certificate from a program or combination of programs in which there is/are (an) approved graduate degree(s) may, upon approval of the program and the College of Graduate Studies and Research, count toward a master’s degree. At its discretion, a Northeastern graduate program may count all credits earned in certificate courses offered by that program. At its discretion, a Northeastern program may count up to 9 hours of credits in certificate courses offered by another program that offers courses in the shared certificate program.

A student enrolled in a graduate degree program in which there is a fully- or partially-embedded graduate certificate program is eligible to receive the certificate only if the student has made separate application and has been admitted to the certificate program.

A minimum grade point average of 3.0 must be achieved in graduate course work for the certificate to be awarded.

Acceptance of transfer credits toward a graduate certificate is at the discretion of the graduate program. Graduate programs may accept up to 9 hours of graduate transfer credits. Programs may set more stringent transfer credit limits.

Policies

Compliance / Policies

Northeastern Illinois University policies are intended to supplement and clarify Northeastern Board of Trustees (BOT) policies and regulations, and to comply with local, state, and federal laws and regulations. The following NEIU, state and federal policies are referenced:

- Student Code of Conduct
- Americans with Disabilities Act (ADA)
- Credit Hour Definition
- Crime Awareness and Campus Security Act
- Family Educational Rights and Privacy Act (FERPA)
- Grade Appeal
- NEIU Policy on Nondiscrimination
- Voter Registration Information
- Oral Proficiency
- Policy on Drug and Alcohol Abuse
- Reasonable Accommodation of Religious Observances
- Sexual Misconduct
- Student Right to Know Act

Student Code of Conduct

Northeastern Illinois University students are expected to exhibit the highest standards of academic integrity. Academic misconduct such as plagiarism or cheating is unacceptable and will be investigated in accordance with University policy on academic misconduct.

Student Code of Conduct

Northeastern Illinois University exists for the transmission of knowledge, the pursuit of truth, the development of students, and the general well-being of society. Free inquiry and free expression are indispensable to the attainment of these goals. As members of the academic community, students are encouraged to develop the capacity for critical judgment and to engage in a sustained and independent search for truth.

Freedom to teach and freedom to learn are inseparable facets of academic freedom. The freedom to learn depends upon appropriate opportunities and conditions in the classroom, on the campus, and within the larger community. All of those involved in the teaching/learning process should exercise their freedom with responsibility. Students have the responsibility to know and act in accordance with the rules, policies, and regulations that govern our University. Any student who violates the University's rules, policies, and regulations will be subject to a conduct proceeding. In addition, at all times students are expected to act ethically and in a manner that is appropriate and reflects the core values of Northeastern Illinois University, which include Integrity, Excellence, Access to Opportunity, Diversity, Community, and Empowerment Through Learning. The Student Code of Conduct is implemented within a culturally diverse environment that stresses fairness and equal access. **All Students are Guaranteed the Right of Due Process.**

Student Code of Conduct information is available on the Student Handbook (<https://www.neiu.edu/sites/neiu.edu/files/documents/2020/08/20/2020-2021%20Student%20Handbook.pdf>) (page 42).

For Non-Academic Code of Conduct violations please consult the Student Handbook (<https://www.neiu.edu/sites/neiu.edu/files/documents/2020/08/20/2020-2021%20Student%20Handbook.pdf>) (page 44).

Americans with Disabilities Act

Americans with Disabilities Act (ADA)

The Rehabilitation Act of 1973, Section 504 (<https://www.dol.gov/general/topic/disability/ada/>) / The Americans with Disabilities Act of 1990 (ADA) and amendments:

This legislation applies to the opportunities that must be available to students choosing to attend an institution of higher education. Under ADA, students pursuing a post-secondary education are responsible for documenting and requesting accommodations for their specific needs. Students are responsible for identifying themselves as students who have a disability. The student must provide the University with appropriate documentation regarding their disability and recommended accommodations.

Students are responsible for requesting specific academic adjustments or accommodations according to their documented needs. Eligibility for reasonable accommodations in post-secondary institutions is driven by the federal definition of disability as a physical or mental impairment that substantially limits or restricts the conditions, manner, or duration under which an average person in the general population can perform a major life activity, such as walking, seeing, hearing, speaking, breathing, learning, working, or taking care of oneself. In a university setting, students must advocate for their own academic needs.

Services for Students With Disabilities

1. Student Disability Services (<https://www.neiu.edu/university-life/student-disability-services/>) (SDS) assumes responsibility for seeing that the University is properly interpreting federal regulations requiring that the University take such steps as are necessary to ensure that no qualified student with disabilities is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination because of the absence of educational auxiliary aids for students with impaired sensory, manual, or speaking skills. The Affirmative Action Officer is responsible for coordinating the University's compliance with these regulations. Student Disability Services is responsible for receiving and coordinating inquiries from students regarding auxiliary aids, academic adjustments, or other reasonable accommodations.
2. The following procedure will apply for consideration of requests for auxiliary aids, academic adjustments, or other reasonable accommodations. Students should complete the steps listed below sufficiently in advance of the anticipated need for services. Such notice is required in order to give the various academic and service areas a reasonable period of time in which to evaluate requests.
 - a. Students must be admitted to and/or enrolled in the University.
 - b. Students requesting auxiliary aids, academic adjustments, or other reasonable accommodations should first contact the Student Disability Services. If the request requires modification of academic procedural requirements or necessitates special testing and/or course evaluation methods, students must provide a Provider's Report from a professional, licensed clinician. Such report is subject to verification by the University. If the request cannot be granted by the Student Disability Services, students should contact the University's Equal Opportunity Officer.
 - c. SDS will make a case-by-case determination of the student's educational need for the requested auxiliary aid, academic adjustments, or other reasonable accommodations. Auxiliary aids, academic adjustments, or other reasonable accommodations determined to be necessary will be provided at no cost to the student.
3. Students who believe that they have been discriminated against on the basis of a disability can seek resolution through the University's Discrimination Grievance Procedure (http://catalog.neiu.edu/policies/american-disability-act/Pol_G1_07_EO_Nondiscr_Appendix_0.pdf). Information and consultation on these procedures are available through the Equal Opportunity Office, Room C-216, phone: (773) 442-5412.

Credit Hour Definition

Credit Hour Definition

Consistent with the U.S. Department of Education (DOE) Program Integrity rules published October 29, 2010, Northeastern defines a credit hour as “an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

- (1) One hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately 15 weeks for one semester hour of credit, or the equivalent amount of work over a different amount of time; or
- (2) At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.”

For traditional lecture, seminar, special topics, contract, grant, video conferencing, and temporary courses, a one credit hour class meets a minimum of 50 minutes per week, and includes 100 minutes of out of class student work totaling 150 minutes per week over the course of the semester. For example, a three credit hour class meets 150 minutes per week and requires 300 minutes out of class student work per week.

Courses such as science laboratories, music ensembles, applied music, and art studios, typically meet a minimum of 100 minutes per credit hour per week.

Thesis, master’s project, independent study, tutored study, internship, practicum, fieldwork, and other individualized instruction courses must include: a) regularly scheduled contact, evaluation, and/or assessment with faculty, b) appropriate site experience and/or project activities, and c) independent work by the student, the combination of which must be equivalent to the amount of work as required in paragraph (1) of the DOE definition.

Credit hour criteria for student teaching, clinical, or practicum experience are determined in accordance with recommendations of a program’s specific accrediting body or applicable state regulation. In the event that the specific accrediting body or the applicable state regulation does not meet Northeastern’s credit hour policy minima, the program must obtain approval for an exemption from the University’s credit hour policy from the Faculty Council on Academic Affairs and the Provost.

Northeastern’s credit hour policy applies to all courses that award academic credit, regardless of the location of the course or the mode of delivery (e.g., hybrid, blended, online, etc.). Courses offered over a different period of time (i.e., half-semester courses, summer session courses, etc.) will require the same amount of classroom and out of class student work per credit hour as required of semester-long courses.

Curriculum committees and administration are charged with upholding the credit hour policy in their review and approval of all courses.

Crime Awareness and Campus Security Act

Security Awareness and Crime Prevention Program

The University's crime prevention program is based upon the dual concepts of minimizing criminal opportunities whenever possible, and encouraging students and employees to take an active role in their own security and the security of others. The University Police Department offers crime prevention training on a number of topics. Crime prevention officers conduct physical security surveys of the campus and conduct crime prevention presentations for the campus community. The following is a listing of some activities of the crime prevention program:

1. Escort Service - Police officers provide an escort service, particularly during hours of darkness, for persons walking on campus to the parking lots or adjacent city streets.
2. New Student Orientation Presentations
3. School Year Kick-off Presentations - A crime prevention presentation accompanied by brochures and other printed material is made available to students during a special presentation at the beginning of the school year.
4. Closed-Circuit Television Surveillance - Closed circuit television cameras survey all of the parking lots on campus and are recorded in the University Police Department.
5. Crime Prevention Presentations - Numerous crime prevention presentations are made annually to such campus groups as the Day Care Center staff and children, students with disabilities, international students, and other student or staff organizations upon request.
6. Printed Crime Prevention Materials - Printed crime prevention brochures, posters, and bookmarks related to personal security and our escort service are distributed at various locations on campus.
7. Computerized Alarm System - A computerized alarm monitoring system located in the University Police Department monitors a comprehensive network of intrusion, detection, and duress alarms.
8. Security Surveys - Comprehensive physical security surveys are made of campus facilities upon request.
9. Crime Prevention News - Crime prevention articles and materials are published in the student newspaper.
10. Sexual Assault Awareness, Education, and Prevention - In cooperation with several departments on campus, sexual assault awareness, education, and prevention presentations are made available to members of the campus community.
11. Code Blue Emergency Phones - The University has emergency direct dial phones located on campus walkways and throughout the parking facility and lots. The phones are readily recognizable by the blue light on top of the column that houses the emergency phone. These phones dial the University Police Department directly at the push of a button.
12. N-Safe and the Mobile 911 Shield Application

The 2020 Annual Safety & Security Information Report (<https://www.neiu.edu/sites/neiu.edu/files/documents/2020/12/17/2020%20Safety%20%26%20Security%20Report.pdf>) is provided as part of Northeastern Illinois University's commitment to safety and security on campus and is in compliance with the Jeanne Clery Disclosure of Campus Security Policies and Campus Crime Statistics Act, 20 U.S.C. (a) and (f).

Family and Educational Rights Privacy Act

Release of Information Pertaining to Students

In compliance with the Family Educational Rights and Privacy Act of 1974, as amended, the following policy outlines the procedures available for access to student records. This policy is intended to ensure the confidentiality of student records.

1. Definitions

- "Student" is defined as one who has attended or is attending Northeastern Illinois University and whose records are in the files of the University.
- "Education records" are those records which are directly related to a student and maintained by the institution or by a party acting for the institution. "Education records" do not include files made by and kept in the sole possession of the maker which are not accessible to any other person.
- "Directory information" includes name, address, telephone number, dates of attendance, enrollment status, level, previous institutions attended, field(s) of study, awards, honors, degrees conferred with dates, past and present participation in officially recognized sports and activities, prior military service, campus e-mail address, date and place of birth, and photographs. (See Section V, Release of Information).

2. Location of Education Records

All students have records in Enrollment Management Services and are maintained by the University Registrar.

Students may also have records in the following offices which are maintained by the administrative officer listed:

Nontraditional Degree Programs ¹	B-151	Director
College of Arts and Sciences ¹	BBH-158A	Dean
Daniel L. Goodwin College of Education ¹	LWH-4044	Dean
College of Business and Management ¹	CBM-184	Dean
Career Development	B-119	Director
Financial Aid	D-201	Director
College of Graduate Studies and Research	LWH-0006	Dean
Student Affairs	C-336	Vice President/Dean

¹ Some departments maintain records separate from the College. A list of departments or programs which have separate records, their location, and the person responsible for the record may be obtained from the office of the dean of the college in which the department or program is located.

3. Availability of Records to Students

A student's record is open to the student, with the following exceptions:

- Letters of recommendation placed in files prior to January 1, 1975 which were intended to be confidential and used only for the purpose for which they were prepared.
- Records of parents' financial status.
- Medical and psychological records. Medical and psychological records are not available to anyone other than those providing treatment, but can be reviewed by a physician or licensed professional of the student patient's choice.
- Some items of academic record under certain conditions. To ensure the validity and confidentiality of references prepared off campus and on campus, certain documents may carry waivers, signed by the student, relinquishing the student's right of access to the document.

Waivers are subject to the following conditions:

- Waivers can be signed only for the specific purposes of application for admission, candidacy for honor or honorary recognition, including financial aid, based at least in part on merit, and candidacy for employment;
- Waivers cannot be required;
- The student shall be told, upon request, the names of those supplying references. All items in the academic record not covered by waivers are open to the student. Material not covered by waivers may not be protected by keeping it out of the student's file.

4. Availability of Records to University Personnel

Student records are open to members of the currently employed University faculty and staff who have a legitimate need to know their contents, with the following provisions/ restrictions:

The university faculty or staff member must be performing a task that is specified in his or her position description or by a contract agreement, OR performing a task related to student's education, OR providing a service or benefit relating to the student such as health care, counseling, job placement or financial aid. A professor, therefore, may access the records of an enrolled student in his or her class.

In addition, Northeastern has contracted with The National Student Clearinghouse to provide services to students on our behalf (e.g., degree and enrollment verification).

- a. The determination of a "legitimate need to know" will be made by the person responsible for the maintenance of the record. This determination must be made scrupulously and with respect for the individual whose record is involved.
- b. Those letters and statements in an education record which are inaccessible to students (filed before January 1, 1975, or segregated by waivers) are to be used only for the purposes for which they were prepared.

5. Release of Information to Third Parties

- a. Directory information may be released to agencies or persons outside the university unless the student completes the appropriate form which indicates that this information should be withheld. This form may be obtained in Enrollment Management Services and must be filed within the first ten days of classes.
- b. Other information in the education record normally will be released to third parties (i.e., anyone not a member of the faculty or staff) only at the written request of the student. A student may secure from the appropriate office a "consent form" authorizing the release of specified records to specific individuals.
- c. Other information in the education record will be released to third parties without the consent of the student only as follows:
 - i. Information will be released:
 - To Federal and State Officers in connection with the audit and evaluation of federally supported educational programs and to enforce federal laws;
 - As required by State law;
 - To research projects on behalf of educational agencies seeking test norms, improving instruction, etc., provided that there is no personal identification of students;
 - To accrediting agencies carrying out their functions;
 - In response to a subpoena or court order;
 - To officials of another school, upon request, in which a student seeks or intends to enroll
 - To parents of a dependent (as defined by the IRS code) student.
 - Results of a disciplinary hearing to an alleged victim of a crime of violence.
 - To persons in an emergency if the knowledge of information is necessary to protect the health or safety of the student or other persons.
 - ii. Education records will be released to third parties only by the University Registrar, Director of Financial Aid or the Vice President for Student Affairs. No other University office will release education record information to third parties directly except in the case of institutional audits. Third party requests to other University offices shall be referred to one of the aforementioned officials.
 - iii. The third party must submit the request in writing and must specify a legitimate reason. A copy shall be filed with the University's General Counsel.
 - iv. A reasonable attempt will be made to notify the student prior to the release of information if: (a) the request for information takes the form of a subpoena or a court order (excluding certain law enforcement subpoenas and ex parte orders), and (b) disclosure without notice would infringe upon the student's rights under the Family Educational Rights and Privacy Act. Judgments on condition (b) will be made by the University's General Counsel.
 - v. A notation of the release made to third parties will be kept in the student's record by the University Registrar, Director of Financial Aid or the Vice President for Student Affairs except when the reason for the request is an institutional audit, procedural evaluation, or research. Reasons shall be evaluated in consultation with the University's General Counsel. Such notation is open only to the student and the person in charge of the record.
- d. The third party is prohibited by the Family Educational Rights and Privacy Act from subsequently releasing personally identifiable information to other (or fourth) parties, and shall be so informed in writing by the University official who releases information.

6. Access Procedure

The University has established the following procedures enabling the student to have access to his or her record within 15 working days of the request and has provided for interpretation and challenge.

- a. The student may see his or her file by filling out a specific request form at the office where the record of interest is maintained.
- b. Access is to be granted promptly and no later than 15 working days from the date of request.
- c. The student may make the request in person or by mail.
- d. The student may obtain copies of records upon request (for which the university may charge an appropriate fee per page) with the following exceptions:
 - i. Copies of transcripts from other schools will not be released.
 - ii. Copies of NEIU transcripts will not be released if the student is indebted to the University.
- e. The student may request and receive interpretation of his or her record from the person (or designate) responsible for the maintenance of the record.

7. Review on Challenge

- a. In the event a student challenges the content of the education record on the basis that an item(s) is inaccurate, misleading, or violates the privacy or other rights of the student, the custodian of the education record shall discuss the challenge with the student and attempt to resolve the challenge within a framework of maintaining the integrity, accuracy, and usefulness of the record. If the student wishes to insert a written explanation regarding the content of the record, such written explanation is to be accepted and included in the record.

- b. If the custodian and student are unable to resolve the challenge, they shall schedule a meeting with the appropriate dean, within 15 days of the challenge for further review.
- c. If no resolution can be effected, the matter will be referred to the appropriate Vice President's Hearing Panel.
- d. It is the obligation of the University to amend the education record if it is found that information contained therein is inaccurate, misleading, or otherwise in violation of the privacy or other rights of the student, and the student's statement commenting on the education records which may be inserted therein shall be maintained as part of the educational records and shall be disclosed, together with the contested portion, to any party entitled to receive the education records.

8. The Hearing

a. General principles:

A request for a hearing must be specific to a record, be submitted in writing to the custodian of the record, and include an explanation or justification of the request for a hearing. It is the responsibility of the student to prepare the written request.

b. The Hearing Panel shall be appointed by the appropriate Vice President. It shall consist of:

- i. At least one administration official of the University who does not have an interest in the direct outcome of the hearing;
- ii. One faculty member of the University who does not have an interest in the direct outcome of the hearing;
- iii. Two representatives from the Student Government or appropriate body.

The custodian of the record(s) or his or her designate shall be present as a resource person, but only as an *ex-officio* member of the panel.

c. The hearing panel process shall afford the student a full and fair opportunity to present evidence relevant to the issue being raised. The process will ensure that:

- i. Hearings will be scheduled within a reasonable period of time not to exceed 45 days from the date on which the appeal was heard by the appropriate dean;
- ii. Hearings will not be open to the public;
- iii. Neither the student in question, nor his/her representative, shall serve on the panel;
- iv. Decisions of the panel will be by majority vote and will be final;
- v. Results of the hearing, to include a summary of the evidence and the reasons for such decision, will be communicated in writing to the student and to the custodian(s) of the record being challenged within a period not to exceed 45 days after the conclusion of the hearing.

9. Notification Regarding Access to Records

Annual notification of this policy shall be made in official publications, such as the online Schedule of Classes and the Academic Catalog.

10. Continued Maintenance

Nothing in this policy requires the continued maintenance of any student record. However, if under the terms of this policy a student has requested access to the record, no destruction of the record shall be made before access has been granted to the student. Persons in charge of records should ensure that only pertinent items are retained in student files.

Students have the right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with requirements of FERPA. The name and address of the office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue SW
Washington, DC 20202-4605

Grade Appeal

Undergraduate and Graduate Grade Appeal Policies

Undergraduate Grade Appeal Policy

All students have a legitimate right to seek redress when they consider their final grade in a course to be unreasonable, unjust, or capricious. This grade appeal procedure shall be initiated during the term immediately following issuance of the grade in question; in cases involving special and unusual circumstances, this time period may be reasonably extended.

Procedure:

1. The student should consult the faculty member who issued the grade for reconsideration of the grade.
2. If, after seeing the faculty member, the student wishes to pursue the issue or if the faculty member is unavailable, he/she should then approach the faculty member's Coordinator or Department Chair and ask for an investigation of the grade appeal.

At this time the student must present a written statement to the Coordinator or Department Chair explaining the reasons for believing the grade to be unreasonable, unjust, or capricious. The Department/Unit Head is responsible for consulting the parties involved, gathering all pertinent information, and for preparing a written statement of the facts which will be given to the student and faculty member and be used in reviewing the facts with the student and the faculty member. The Coordinator or Department Chair shall be responsible for:

- a) either concurring with the faculty member that the grade should remain as recorded, or
- b) suggesting to the faculty member that the grade be reviewed.
- c) The student and faculty member shall be informed in writing of this conclusion. If the student believes the grade appeal has not been resolved satisfactorily, he/she may appeal the grade in writing to the appropriate dean.

3. If the Coordinator or Department Chair is the teacher of record, the student shall appeal in writing directly to the appropriate dean, instead of to the Department/Unit Head as in 2 above. (For undergraduate and unclassified graduate students, the appropriate dean is the Dean of the College in which the academic department is located. For graduate students in a degree program, the appropriate dean is the Dean of the Graduate College). The Academic Dean shall be responsible for requesting a written statement from the Coordinator or Department Chair. If the issue is not resolved to the student's satisfaction, the student may write to the Dean and request a hearing by the Grade Appeal Committee.

4. The Dean, in consultation with the Grade Appeal Committee, will review the statement prepared by the Coordinator or Department Chair. If the Dean believes the issue should be pursued, he/she will convene the Grade Appeal Committee for a hearing. If the Dean decides the issue should not be pursued, the grade remains as recorded. The decision of the Dean is final. All parties must be so notified.

5. For undergraduate and unclassified graduate students, the Academic Dean will have a standing Grade Appeal Committee, to be selected each year, composed of five members as follows:

- Two faculty members and two alternates selected by the college assembly.
- Two student members with two alternates selected by the Student Senate.
- The dean of the college involved, or his/her representative. For students in a graduate degree program, the Dean of the Graduate College will have a standing Grade Appeal Committee, selected each year, consisting of five members, as follows:
 - Two faculty members and two alternates selected by the Graduate Advisory Committee.
 - Two students in good standing, in a Master's Degree Program, selected by the Dean of the College.
 - The graduate dean or his/her representative.

6. The Grade Appeal Committee will investigate the case, and hold a hearing in which the student, the faculty member, and the Coordinator or Department Chair shall be invited to participate. The Committee deliberations following the hearing will be confidential.

7. If the Committee decides the challenged grade is unreasonable, unjust, or capricious, it shall so recommend to the Dean, who shall have the power to change the grade from a letter grade to a grade of "P" (pass). The credits for this course will count toward undergraduate degree requirements. If the committee decides there is insufficient evidence to support the student's claim, it shall recommend to the Dean that the original grade should stand.

8. In all instances the Committee will reach a conclusion and submit its recommendation in writing to the Dean, who shall render a written decision, copies of which shall be sent to the student and faculty member. The decision of the Dean shall be final.

Graduate Grade Appeal Policy

Every student has the right to appeal if they consider their final grade in a graduate-level course to be unreasonable, unjust, or capricious. A grade appeal can be initiated no later than two semesters (including summer) after the grade was assigned. The Dean of the College of Graduate Studies and Research makes the final decision on graduate grade appeals.

Process for appealing a grade in a graduate course:

1. The student must first consult the faculty member who issued the grade for reconsideration of the grade. The Chair or Coordinator and other members of the department are encouraged to be available for consultation with the faculty member and the student at this stage. Note: This is the only stage at which an appealed grade can be changed to an A, B, C, D, or F. At every subsequent stage of the grade appeal process, the Chair, Associate Dean of the graduate program's college or Dean of the College of Graduate Studies and Research can change the grade to a P only.
2. If the faculty member is unavailable or the student contests the faculty member's decision and wishes to continue the appeal, the student should (next) approach the Chair of the department in which the course was taught. The Chair may designate the relevant program's Coordinator to serve this role for this stage, if the department has a Coordinator. The student must present a written statement to the Chair explaining the reasons he/she believes the grade is unreasonable, unjust, or capricious. The Chair is responsible for investigating the student's claims by gathering relevant information, and preparing a written statement of the findings of the investigation. At the conclusion of this investigation, the Chair must recommend that the student's grade appeal be supported or denied. The Chair shall communicate this recommendation and its rationale in writing to the student and the faculty member.
3. If the faculty member who issued the grade is also the Chair, the student should appeal directly to the Associate Dean of the college in which the course was taught, submitting a written statement explaining the reasons he or she believes the grade is unreasonable, unjust, or capricious. The Associate Dean is responsible for investigating the student's claims by gathering relevant information, and preparing a written statement of the findings of the investigation. At the conclusion of this investigation, the Associate Dean must recommend that the student's grade appeal be supported or denied. The Associate Dean shall communicate this recommendation and its rationale in writing to the student and the faculty member (Chair).
4. If the student believes that the process was flawed or that there was evidence that was not considered, he/she can bring the appeal to the Dean of the College of Graduate Studies and Research. In addition to the appeal materials already provided to the Chair, Coordinator, or Associate Dean in Step 2 above, the student must justify in the appeal why he or she believes the decision should be reconsidered, including any new pertinent information. Disagreement with the outcome of the deliberations of the Chair, Coordinator, or Associate Dean is not sufficient on its own to pursue an appeal with the Dean. If the Dean of the College of Graduate Studies and Research agrees that the process was possibly flawed or there was evidence not considered, he/she will convene the Graduate Grade Appeal Committee to hear the grade appeal. The Graduate Grade Appeal Committee, selected each year, will consist of five members, as follows:
 - a. Two faculty members from the Graduate College Advisory Committee,
 - b. Two master's degree program students in good standing selected by the Dean of the College of Graduate Studies and Research, and
 - c. The representative of the Dean of the College of Graduate Studies and Research.
5. Before hearing any appeals, any student serving on the Graduate Grade Appeal Committee must fill out and sign a FERPA Privacy and Confidentiality Understanding/Agreement, available from the Associate Dean of the College of Graduate Studies and Research or the University Registrar.
6. The Graduate Grade Appeal Committee will investigate the case and will hold a hearing. The student, the faculty member, and the Chair, Coordinator, or Associate Dean involved with Step 2 shall be invited to participate. If the student fails to attend the agreed-upon, scheduled hearing, then the hearing will be cancelled and the grade appeal dismissed without further review.
7. The Graduate Grade Appeal hearing generally takes about one hour and has the following format:
 - a. The student has 10 minutes to present the appeal, after which the committee members may ask questions of the student.
 - b. The faculty member of the course has 10 minutes to respond, after which the committee members may ask questions of the instructor.
 - c. The Chair (if he/she is not the faculty member), Coordinator, or Associate Dean may add comments and answer any questions the committee members may have.
 - d. The student does not ask questions of the faculty member, Chair, Coordinator, or Associate Dean, and the faculty member, Chair, Coordinator, and Associate Dean do not ask questions of the student.
 - e. The student may have 2 or 3 minutes for final rebuttal and the committee may ask final questions of the student, faculty member, Chair, Coordinator, or Associate Dean.
 - f. Everyone except for the Graduate Grade Appeal Committee leaves the hearing room.
 - g. The committee members discuss the appeal. The Dean's representative will lead the discussion. When the discussion is complete, the committee members will take a vote on the appeal.
8. The committee will communicate to the Dean of the College of Graduate Studies and Research its written recommendation, which will be one of the following:

- a. If the Committee decides that the challenged grade is unreasonable, unjust, or capricious, it shall so communicate to the Dean its recommendation that the grade be changed to a P.
 - b. If the Committee decides there is insufficient evidence to support the student's claim, it shall recommend to the Dean that the original grade should stand.
 - c. If the committee cannot agree on the appeal, the lack of agreement will be communicated to the Dean.
9. After receiving the recommendation of the committee and reviewing the materials submitted by the student, the faculty member, and the Chair, Coordinator, or Associate Dean, the Dean of the College of Graduate Studies and Research may decide that the grade should remain as recorded, or that it should be changed to a P (Pass). If the grade is changed to a P, the credits for the course will count toward the student's degree requirements, but the grade will not contribute to the GPA.
 10. The Dean of the College of Graduate Studies and Research will share his/her decision in writing with the student, the faculty member, and the Chair, Coordinator, and/or Associate Dean, and a copy of the decision will be placed in the student's records. The decision of the Dean is final.

NEIU Policy on Equal Opportunity and Nondiscrimination

Policy on Equal Opportunity and Nondiscrimination

Northeastern Illinois University supports the principles of equal opportunity in employment and education. Northeastern does not discriminate in employment or education on the basis of race, color, religion, sex, pregnancy, disability, national origin, citizenship status, ancestry, age, order of protection status, genetic information, marital status, sexual orientation, gender identity, gender expression, arrest record status, military status, or unfavorable discharge from military service. Northeastern accepts complaints of discrimination and harassment from students, employees, applicants for admission or employment, and University visitors. The University does not tolerate retaliation against any person for coming forward with a complaint or concern, or for otherwise participating in the process of addressing discrimination or harassment.

This policy furthers Northeastern's commitment to the principles of equality and equal opportunity for applicants, students, faculty, staff and visitors to the University. It outlines how the University promotes learning and working environments free from all forms of discrimination and harassment. The policy provides a means to address complaints of discrimination and harassment based on the protected categories identified herein. The University will comply with all federal, state, and applicable local nondiscrimination and equal opportunity laws, orders, and regulations.

To access the full policy, click on this link - Equal Opportunity and Nondiscrimination (http://catalog.neiu.edu/policies/neiu-policy-nondiscrimination/Pol_G1_07_EO_Nondiscr_FINAL_.pdf)

To access the complaint form, click on this link - Discrimination Grievance Form (http://catalog.neiu.edu/policies/neiu-policy-nondiscrimination/Pol_G1_07_EO_Nondiscr_Appendix_0.pdf)

Students who believe that they have been discriminated against or harassed on the basis of a protected equal opportunity category can seek resolution through the University's Discrimination Grievance Procedure. Information and consultation on these procedures are available through the Equal Opportunity Office, main campus, room C-216, or at eeo@neiu.edu or (773) 442-5412.

Voter Registration Information

Voter Registration Information

The 1998 Higher Education Act Mandatory Good Faith Effort for the National Voter Registration Act reads, in part, that "[t]he institution will make good faith effort to distribute a mail voter registration form, requested and received from the State, to each student enrolled in a degree or certificate program and physically in attendance at the institution, and to make such forms widely available to students at the institution." The State of Illinois has provided the following link for students to use to print a voter registration form:

Illinois Online Voter Registration (<https://ova.elections.il.gov/>)

English Voter Registration Form and Spanish Voter Registration Form are available.

TurboVote

Northeastern Illinois University is committed to providing you with the information and materials you need to vote. Go here to NEIU's Turbovote site (<https://neiu.turbovote.org/register/>) and register online to vote in Illinois (you can also register if you live in another state – though online registration restrictions vary from state to state). Once you are registered in the TurboVote system it is easy to verify or update your voter registration, request an absentee ballot form by mail, and sign up for text and/or email election reminders. You can do this all for free. If you have already registered to vote, you can still sign up at NEIU's Turbovote site (<https://neiu.turbovote.org/register/>) to receive text or email reminders so you will not miss an election.

Oral Proficiency

Oral Proficiency

Northeastern Illinois University, in accordance with a 1987 State of Illinois statute, ensures that all persons providing classroom instruction to students are proficient in oral English. If an instructor's oral proficiency is in doubt, students should contact the department chair to obtain information about the University's procedure for handling complaints.

Alcohol and Drug Abuse Prevention Information

Alcohol and Drug Abuse Prevention Information

Consistent with its mission as a public institution of higher education, the University is committed to educating students, faculty, and staff on the dangers of alcohol and drug abuse, and to establishing standards of conduct that maintain a campus environment in which such abuse is prohibited. These standards are intended to be in full compliance with the Drug-Free Schools and Campuses Regulations (34 CFR Part 86) promulgated by the Department of Education to implement section 22 of the Drug-Free Schools and Communities Act Amendments of 1989, which adds section 1213 to the Higher Education Act and section 5145 to the Drug-Free Schools and Communities Act (collectively referred to as the "Act").

Students should refer to the Student Affairs website (<https://www.neiu.edu/university-life/student-affairs/>) and the Student Handbook (<https://www.neiu.edu/sites/neiu.edu/files/documents/2020/08/20/2020-2021%20Student%20Handbook.pdf>) for comprehensive Alcohol and Drug Abuse Prevention Information. For further information, call Student Affairs at (773) 442-4600.

Standards of Conduct and Prohibitions

Employees and students, in their affiliation with the university, shall not manufacture, possess, use, deliver, sell or distribute any substance prohibited by the Illinois Cannabis Control Act, the Illinois Controlled Substance Act, or any other State or federal statute, except as authorized by law, consistent with the regulations of the University's Board of Trustees. Further, faculty, staff, and students may not possess or consume alcoholic beverages on university property or at university-sponsored activities except in accordance with the university's Service of Alcoholic Beverages policy (https://www.neiu.edu/sites/neiu.edu/files/migrated-about-body/documents/ktvoigt/Pol_E4.5_Serv_Alcohol_Bev_2016.09.19.FINAL__0.pdf), which expressly limits consumption of alcoholic beverages to persons 21 years of age or older, who are attending as specific invitees of the President or appropriate Vice President or designee, a function specifically approved by the President or appropriate Vice President or designee, held in a specifically approved designated area.

Applicable Legal Sanctions

Employees and students who violate State and/or Federal law may be subject to criminal prosecution. A number of Illinois and Federal criminal statutes provide extended definitions of what constitutes illegal possession, use, and distribution of alcohol and drugs. Criminal penalties for violations of Illinois statutes include terms of imprisonment for up to sixty (60) years and fines of up to \$500,000. Equally severe penalties and sanctions may be imposed for violations of Federal statutes. Definitions of legal sanctions under Illinois law for the unlawful possession, use, and distribution of illicit drugs and alcohol are included in 720 ILCS Sec. 570/201 et seq. and 720 ILCS Sec. 550/1 et seq., copies of which are available for review by students and employees in the University library.

Health Risks

The abuse or illegal use of alcohol and the illegal use of controlled substances can seriously injure the health of employees and students, adversely impair the performance of their duties and their academic achievements, and endanger the safety and well-being of fellow employees, students, and others. Further information about the health risks associated with the use of alcohol and controlled substances is available in Student Health Services and Student Counseling Services offices.

Counseling and Support Services

STUDENTS

Student Counseling Services (<https://www.neiu.edu/university-life/student-counseling-services/>) offer counseling and referral services to students who have drug or alcohol abuse-related problems. Additionally, the office provides:

1. information about on- and off-campus substance abuse self-help groups.
2. referrals to off-campus prevention and treatment resources
3. substance abuse information and prevention literature

Student should refer to the Student Counseling website (<https://www.neiu.edu/university-life/student-counseling-services/>) for contact and scheduling appointment information or call (773) 442-4650 or email counsect@neiu.edu.

Disciplinary Sanctions

STUDENT SANCTIONS

The University will impose disciplinary sanctions on students who violate the University's foregoing policy up to and including expulsion and referral for prosecution and completion of an appropriate rehabilitation program, all in accordance with the Student Code of Conduct. Furthermore, student employees who violate the University's foregoing policy may be subject to termination of employment.

Reasonable Accommodation of Religious Observances

Reasonable Accommodation of Religious Observances

Consistent with Illinois Public Act 84-212 (<http://www.ilga.gov/legislation/ilcs/documents/010500050K26-2b.htm>), an act to prohibit public school districts and institutions of higher education from discriminating against students for observing religious holidays (effective August 26, 1985), Northeastern Illinois University subscribes to the following policy and procedures:

1. Northeastern Illinois University supports the concept of "Reasonable Accommodations of Religious Observances" in regard to admissions, class attendance, and the scheduling of examinations and other academic work requirements.
2. A student who is unable because of the observance of a religious holiday to attend classes on a particular day or days, or at a particular time of day, shall be excused from any examination or any study or other academic work assignments on such days or times.
3. Faculty and administrative personnel may require up to 10 calendar days advance notice of absences to observe religious holidays.
4. It is the responsibility of the faculty and administrative personnel to make available to such students an equivalent opportunity to make up the examinations, study or other academic work requirements which they missed due to such absences.
5. It is the responsibility of all students who also are employees of the University to make arrangements to fulfill their obligations to the University in advance of their absences, and/or to utilize accrued leave (if applicable) during the absences.
6. No fees or penalties may be imposed against the students who exercise such afforded opportunities.

To access the full policy, click on this link: Reasonable Accommodations of Religious Observances for Students and Employees (http://catalog.neiu.edu/policies/reasonable-accommodation-religious-observances/Reas_Accom_Religious_FINAL.pdf)

To access the complaint form, click on this link: Discrimination Grievance Procedure Form (http://catalog.neiu.edu/policies/reasonable-accommodation-religious-observances/Reas_Accom_Religious_Appendix.pdf)

Students who believe that they have been discriminated against or harassed on the basis of religious observances can seek resolution through the University's Discrimination Grievance Procedure. Information and consultation on these procedures are available through the Equal Opportunity Office, main campus, room C-216, or at eeo@neiu.edu or (773) 442-5412

Sexual Misconduct

Sexual Misconduct Policy

University Policy Statement

Northeastern Illinois University (Northeastern or the University) supports the principles of equal opportunity and non-discrimination and does not tolerate sexual harassment. Northeastern does not discriminate or permit discrimination by any member of its campus community against any individual on the basis of race, color, religion, sex, pregnancy, disability, national origin, citizenship status, ancestry, age, order of protection status, genetic information, marital status, sexual orientation, gender identity, gender expression, arrest record status, military status or unfavorable discharge from military service, or any other classification protected by law in matters of admissions, employment, housing, or in the educational programs or activities it operates. Harassment that is based on any of these protected categories is a form of discrimination and is not tolerated.

Northeastern complies with federal and state laws that prohibit discrimination based on the protected categories listed above, and complies with Title IX of the Education Amendments of 1972, which prohibits discrimination based on sex in the University's educational programs and activities. Northeastern accepts complaints of discrimination and harassment, including sexual harassment from students, employees, applicants for admission or employment, and University visitors. The University does not tolerate retaliation against any person for coming forward with a complaint or concern, or for otherwise participating in the process of addressing discrimination or harassment. In addition, Northeastern provides reasonable accommodations to qualified applicants, students and employees with disabilities and to individuals who are pregnant. The University's Sexual Harassment policy (https://www.neiu.edu/sites/neiu.edu/files/documents/2020/11/06/Pol_G1.8_Sex_Harass_2020.08.14_REV_FINAL_0.pdf).

Purpose of the Policy

The purpose of this policy is to advance Northeastern's long-held position that sexual harassment violates the standards of our community and is unacceptable, and to provide sexual harassment proceedings which will include a prompt, fair, and impartial process from the initial investigation to the final result. This policy furthers Northeastern's commitment to providing locations that are safe and secure from sexual harassment.

Support and Resources

Students who have experienced sexual harassment may contact the Title IX Office to learn about their rights and options, including how to file a complaint (Title IX web page (<https://www.neiu.edu/about/university-leadership/executive-team/legal-affairs-and-general-counsel/equal-opportunity-and-ethics/title-ix/title-ix-sexual-misconduct-complaint-form/>)). Anonymous complaints are accepted via online submission here (<https://www.neiu.edu/about/university-leadership/executive-team/legal-affairs-and-general-counsel/equal-opportunity-and-ethics/title-ix/title-ix-sexual-misconduct-complaint-form/>).

Please see the University's Notice of Rights and Options (https://www.neiu.edu/sites/neiu.edu/files/documents/2020/08/13/NEIU%20Notice%20of%20Rights%20and%20Options_08102020.pdf) document for comprehensive information regarding sexual harassment incidents. Students may directly contact the Title IX Coordinator at Main Campus Room C-216, titleix@neiu.edu or (773) 442-5412.

Students in need of support should visit the University's K(NO)W More web page (<https://www.neiu.edu/university-life/know-more/>) for resources and guidance. Students may seek support from the following confidential resources at Northeastern (offices exempt from mandatory reporting of sexual harassment matters): Confidential Advisor (<https://www.neiu.edu/staff/rae-joyce-baguilat/>): (773) 442-4686, University Ombuds (<https://www.neiu.edu/university-life/ombuds-office/>): (773) 442-4527, Office of Student Counseling Services (<https://www.neiu.edu/university-life/student-counseling-services/>): (773) 442-4650, and the Office of Student Health Services (<https://www.neiu.edu/university-life/student-health-services/>): (773) 442-5800.

Student Right to Know Act

Student Right to Know

In compliance with federal regulations, Northeastern Illinois University discloses our graduation rate to students, prospective students, and the general public, upon request.

Information regarding our graduation rate can be found at <http://www.neiu.edu/about/office-institutional-research-and-assessment> (<http://www.neiu.edu/about/office-institutional-research-and-assessment/>), (click on Data Digest, then, Graduation and Retention rates).

A printed copy may be obtained by sending a written request to:

Chicago, Illinois 60625

College of Graduate Studies and Research

College of Graduate Studies and Research

Michael J. Stern, Ph.D., Dean and Professor of Biology

Northeastern Illinois University, through its College of Graduate Studies and Research (CGSR), and in collaboration with the other colleges and faculty, provides the resources, facilities, and academic environment to advance learning, to foster creativity, and to nurture intellectual independence in graduate education. Graduate students pursue advanced studies and join the faculty in extending knowledge through research, scholarly and creative activities.

The College of Graduate Studies and Research offers the majority of its coursework during the late afternoon and evening hours to accommodate individuals who work during the day. Students should consult with their Graduate Program Advisor/Coordinator to plan an appropriate schedule of courses.

The College of Graduate Studies and Research offers master's degrees in 40 academic concentrations, as well as a variety of graduate certificate, licensure, endorsement, and FOCUS programs. All students engaged in graduate work at Northeastern Illinois University are admitted to the College of Graduate Studies and Research and are governed by its policies and procedures. Graduate students, therefore, have different tuition rates and grievance procedures. They are eligible to apply for graduate assistantships and tuition scholarships available through the College and departments.

Applications for admission are accepted for the academic terms as per the schedule provided with the application materials. Applicants are advised to check the College of Graduate Studies and Research website for any changes or special situations.

Organization of The College

The Dean is responsible for the implementation of institutional policies related to graduate education at Northeastern Illinois University. Such policies are established in collaboration with the Graduate College Advisory Committee, a group elected by and from the faculty of the University. The Dean's Office handles petitions for any exceptions to University policy related to graduate studies, and addresses graduate student issues, including complaints and graduate grade appeals. The Dean's Office also oversees the processes involved in the appointment of Graduate Assistants. The Graduate Admissions handles all matters related to admissions and the Graduate Records Office handles matters related to graduation and the student's graduate records. Applications for graduation are accepted for each academic term, as per the schedule published in the Schedule of Classes.

Each graduate program has a Graduate Program Advisor/Coordinator who serves as an important link with the College of Graduate Studies and Research in overseeing graduate education at Northeastern Illinois University. The Graduate Program Advisor/Coordinator evaluates applications for admission to their program, advises on programs of study, informs students of departmental regulations and procedures, monitors students' academic progress, and reviews and approves applications for graduation. Students are urged to keep in contact with their advisors and to visit the CGSR website (www.neiu.edu/graduatestudies (<http://www.neiu.edu/graduatestudies/>)) periodically for important information updates.

The Dean is also responsible for overseeing the administration of research at the University. In this capacity, the Dean works closely with the Research and Creative Activities Advisory Group to support and enhance research and creative activities throughout the university community.

Mailing Addresses and Office Hours:

College of Graduate Studies and Research Dean's Office (LWH-0041)

Northeastern Illinois University
5500 N. St. Louis Avenue
Chicago, Illinois 60625-4699

Graduate Admissions Office (D-101D)

Graduate Records Office (D-101D)

Northeastern Illinois University
5500 N. St. Louis Avenue
Chicago, Illinois 60625-4799

The CGSR Dean's Office is open Monday through Friday, from 8:30 a.m. to 4:30 p.m., and can be reached at graduatestudies@neiu.edu or (773) 442-6012. Both the Graduate Admissions and Graduate Records offices are typically open between 8:30 a.m. and 4:30 p.m. on Monday and Friday, and 8:30 a.m. to 6:00 p.m. on Tuesday through Thursday. You may reach the Graduate Admissions Office at graduateadmissions@neiu.edu or (773) 442-6001, and the Graduate Records Office at graduate-records@neiu.edu or (773) 442-6001.

Graduate student funding

The University provides a limited number of graduate merit and need-based tuition scholarships to qualified students in good academic standing upon the recommendation of their program faculty.

Students interested in an appointment as a graduate assistant may fill out the form available on the College of Graduate Studies and Research website at www.neiu.edu/graduatestudies (<http://www.neiu.edu/graduatestudies/>). A student's skills will be matched to available positions, and interviews will be arranged if an assistantship opportunity becomes available.

Graduate students should also contact the Financial Aid Office for the availability of various fellowships and other forms of financial assistance: <http://www.neiu.edu/financial-aid/>

Master's Goals

College of Graduate Studies and Research Master's Goals

It is the mission of Northeastern Illinois University to prepare a diverse community of students for leadership and service in our region and in a dynamic, multicultural world. In the College of Graduate Studies and Research, our programs offer opportunities for our students to achieve mastery in the following areas: Knowledge, Tools of Inquiry, Relevance, Communication, and Professionalism. Students will demonstrate that mastery through both coursework and a culminating experience appropriate to the program.

Knowledge

Graduate students will pursue and master advanced, specialized knowledge within their discipline.

Tools of Inquiry

Graduate students will develop academic curiosity and expertise in using tools of inquiry reflecting the norms and standards of their discipline. This expertise includes research ethics and methodologies, modes of critical thinking and problem solving, and appropriate uses of technology.

Relevance

Graduate students will apply their knowledge and tools of inquiry to contextualize their learning within broad global, public, and academic communities.

Communication

Graduate students will develop professional communication skills, giving them the ability to engage in the critical, open exchange of ideas. They will be able to participate in diverse, collaborative networks within and across disciplines.

Professionalism

Graduate students will be prepared to serve and lead effectively in a diverse, global society according to the professional standards of their discipline. They will be ready to establish themselves as ethical individuals in their professional lives.

Graduate Policies

GRADUATE POLICIES

The Graduate Policies section contains policies which pertain to all graduate students, such as policies regarding Academic Standing, Graduate Transfer Credits, Thesis, and Graduate Grade Appeals. Questions concerning these policies can be directed to the College of Graduate Studies and Research: graduatestudies@neu.edu.

Active Status

When a student is admitted to Northeastern's College of Graduate Studies and Research for graduate study, they are given an active student status that entitles them to various privileges of active students, such as the ability to register for courses and access to the library. A graduate student is expected to maintain active status from the time he/she begins the graduate program to the time he/she graduates.

Inactivation/Re-admission Policy

A graduate student who does not enroll in at least one course over six consecutive semesters, including the summer semester, will have his/her student status changed from "Active" to "Inactive".

A graduate student must be re-admitted to the same program, admitted to a different program, or admitted as a student-at-large to register for additional classes. Re-admission to a student's original program is not guaranteed.

All re-admitted students are subject to the catalog year requirements based on their semester of re-admission and enrollment.

Leave of Absence

Circumstances sometimes require that students interrupt their studies for longer than three semesters. Such students can apply for a Leave of Absence to avoid inactivation.

1. Only an active graduate student is eligible to apply for a leave of absence.
2. A graduate student may request a maximum of six consecutive academic terms of absence, including summer.
3. A graduate student is not expected to make any academic progress towards his/her degree while on a leave of absence.
4. A graduate student may not use any University resources while on a leave of absence.
5. A graduate student's academic status will not change during a leave of absence.
6. Students applying for a leave of absence must submit to their graduate program the Graduate Leave of Absence Request Form, located on the Registrar Services' forms page.
7. An international student must also gain approval via a signed memo from his/her International Programs advisor. The approval memo must be included with the form submitted to the graduate program.
8. Programs submitting a Leave of Absence Request form to the College of Graduate Studies and Research Dean's office must include a memo of support explaining how the student will complete his/her requirements within six years of his/her initial enrollment.

A graduate student finishing a leave of absence must register for coursework the semester of return as specified on the form. Failure to register for coursework the semester the student is scheduled to return will result in being moved to inactive status that semester. An inactive graduate student must reapply to the University for readmission to his/her graduate program. Readmission is not guaranteed. A readmitted student is subject to the catalog year requirements based on the semester of readmission (see Catalog Year policy).

Graduate Academic Standing Policies

To remain in good academic standing, a student in a graduate program (degree-seeking, licensure, endorsement, or certificate) must maintain a minimum cumulative GPA of 3.0. In addition, a graduate student in a degree or certificate program must make satisfactory progress toward his/her degree or certificate. A student must be in good academic standing to graduate.

Grade Point Average

A graduate student's Grade Point Average (GPA) is determined based on the grades received in all graduate-level courses taken, beginning from the term of initial enrollment in graduate status at Northeastern. All grades received, including those of courses that were taken multiple times (see Repeating Courses policy), will count toward a student's GPA and will appear on a student's transcript. A graduate student must have a minimum cumulative GPA of 3.0 to be awarded his/her degree or certificate.

DISMISSAL FOR ACADEMIC REASONS

A student in a graduate program (degree-seeking, licensure, endorsement, or certificate) may be dismissed from his/her program for the following academic reasons: sub-standard GPA (see Academic Probation policy); failure to make satisfactory progress toward completion of his/her program;

or receiving more than six credit hours of unsatisfactory grades (C, D, or F). A student may also be dismissed as a consequence of acts of academic misconduct (see the University Code of Conduct).

To avoid dismissal, a student who has experienced extenuating circumstances may meet with his/her program advisor to request development of a plan outlining the course of action the student must follow to return to good academic standing. This plan must be approved by both the program and the Dean of the College of Graduate Studies and Research or the Dean's designee. Failure to meet the terms of this plan may not be appealed and will result in dismissal.

ACADEMIC PROBATION

A student in a graduate program (degree-seeking, licensure, endorsement, or certificate) whose cumulative GPA falls below 3.0 will be placed on academic probation. If in subsequent terms, the student earns grades that restore his/her cumulative GPA to 3.0 or above, he/she will be returned to good academic standing. If a student needs to be placed on academic probation for a third time after he/she returned to good academic standing in two previous probation instances, he/she will be dismissed. A student whose cumulative GPA falls below 2.0 will be dismissed without academic probation.

A student who is on academic probation and who does not restore his/her cumulative GPA to 3.0 in subsequent terms will be permitted to remain on academic probation as long as he/she earns at least a 3.0 GPA for the term. If in any subsequent term, the student on academic probation fails to earn a 3.0 GPA for the term, he/she will be dismissed.

Graduate Student-at-Large: Dismissal and Reinstatement/Readmission

A graduate student-at-large will be dismissed if, upon the completion of four courses, they have earned a cumulative grade point average that is less than 2.0 (on a 4.0 scale; equivalent to a "C" average). A graduate student-at-large who has been dismissed may apply to be reinstated/readmitted no earlier than the second semester following the dismissal. The reinstatement/readmission application must include an appeal letter addressed to the Academic Standards Committee explaining the new circumstances that will allow the applicant to improve their academic performance. Deadlines for reinstatement/readmission following dismissal are July 15 for the Fall semester, November 15 for the Spring semester, and March 15 for the Summer semester. If reinstatement/readmission is granted, the student will be reinstated/readmitted on academic probation (see Graduate Academic Probation section).

Fulfilling Graduate Academic Requirements

The academic requirements of any degree or certificate program that a student is admitted to are determined by a student's "catalog year".

CATALOG YEAR

A graduate student's catalog year is the academic year when the student is first enrolled after being admitted to a graduate program. A student's catalog year is not affected while the student is on an approved leave of absence. A readmitted student is subject to the catalog year requirements based on the semester of his/her re-admission (see Inactivation/Re-admission Policy).

Change of Catalog Year

An active student may change his/her catalog year to a succeeding catalog if it is to the student's benefit. A completed Change of Catalog Year form should be submitted to Enrollment Management Services to update the student's record.

Continuing enrollment

Students availing themselves of the services of the academic staff or faculty or the facilities of the university in any way that directly or indirectly relates to fulfilling degree requirements or receiving course credit must be enrolled. For example, a student must be enrolled in the term in which a comprehensive examination is taken. Students who are actively engaged in fulfilling degree requirements but who are not enrolled in other course credit hours are required to enroll in a 1 credit hour continuing enrollment course. Such enrollment allows students access to university resources, such as library, advisement, and email privileges, while also meeting the continuing enrollment requirement. A student is not required to be registered in the term of graduation simply in order to graduate. However, students who complete degree requirements by availing themselves of university services without being enrolled will be assessed relevant tuition and fees prior to the release of the diploma and transcript. This policy does not apply to students who are only finishing the work required to resolve an incomplete grade.

Graduate Degree Credits

All graduate credits are at the 400 level or above, except for a limited number of 300 level courses that have been approved for graduate degree credits in a specific master's degree program (referred to as "300-starred" (300*) courses). Programs may permit students to apply up to three 300* courses, to a maximum of ten credit hours, to fulfill program requirements. Students should consult with their program advisors for details concerning graduate degree credits for 300*-level courses. A student who has taken a 300* course for credit at the undergraduate level may not repeat the course for credit at the graduate level.

A maximum of two courses with grades of "C" may be counted toward satisfying program requirements. Courses with grades below "C" do not count toward satisfying program requirements.

Repeating Courses

A student can take a specific course a maximum of two times (excluding course withdrawals), unless the course is formally approved as “repeatable.”

6-Year Completion

A graduate student has six years to complete his/her program. Courses that are more than six years old do not count toward fulfilling the requirements of a graduate program.

Waiver of Course Requirements

Students considering applying for a waiver of specific course requirements based on demonstrated competence may petition the appropriate graduate program advisor(s). If a waiver is approved, the student must complete alternate credits equal in number to those waived.

Graduate Transfer Credit Policy

Graduate transfer credits are any credits used to fulfill Northeastern Illinois University graduate degree requirements which are:

1. earned at Northeastern prior to the term of admission to a graduate program; OR
2. earned at a regionally accredited college or university or recognized international college or university. These transfer credits may be earned either prior to or after admission to a Northeastern graduate program.

All graduate transfer credits that are used to fulfill degree requirements need to be approved by the program.

Students should submit their transfer credit request form before the completion of 9 credit hours after admission to the program. Any delay in the completion of the transfer credit request may impact the student's graduation date. Credits transferred in the final semester before graduation will delay graduation until the credits are posted.

Credits earned for thesis hours are not transferable. Coursework credits are eligible for transfer credit only if they meet the following criteria:

1. Credits must be for graduate-level work;
2. The course grade must be a “B-” or higher;
3. Credits must have been completed within 6 years of expected graduation.

See the Graduate Certificate Programs policy (see below) for information explaining the relationship between related certificates and degree programs.

Coursework taken at Northeastern prior to admission to a graduate program: Credit for coursework taken at Northeastern prior to admission to a graduate program, which the student wishes to count towards that graduate program, is limited to no more than 50% of the program requirements, except in the case of credits from an earned graduate certificate. The entirety of credits from an earned graduate certificate can be counted towards a graduate degree program (see the Graduate Certificate Programs policy below). No additional transfer credit is allowed if credits from an earned certificate represent 50% or more of the total program requirement credits.

Coursework taken outside of Northeastern: Graduate transfer credits can be earned either before admission to the student's program or after admission to the program, provided that the total number of transfer credits (regardless of when they were earned) does not exceed 9 hours, unless approved specially as part of a formal university agreement. Formal university agreements allowing external transfer credits that would exceed 50% of the course credit requirements for any graduate program must be reviewed and approved via normal governance process. All transfer credits earned after the student has been admitted to his/her program must be approved by the advisor, program advisor, and the Dean of the College of Graduate Studies and Research prior to enrollment at the other institution.

Thesis Policy

In some graduate programs, the completion of a master's thesis represents the culminating experience in the discipline, or one of the possible culminating experiences. Engagement in thesis research requires a productive mentor-mentee relationship that reflects a cooperative agreement between the program and the thesis student. Registration and engagement in thesis work requires the consent of the thesis mentor and program approval.

Completion of the thesis requirement includes successfully fulfilling: 1) generally, at least six credit hours of thesis with a grade of P or HP; 2) a thesis defense; and 3) the approved submission of the finalized thesis to the College of Graduate Studies and Research. Students fulfilling the requirements of a thesis option must register for at least one graduate-level credit hour in all semesters in which they are actively working on their thesis, until the completion of the thesis requirements. The successful completion of six credits of thesis hours does not guarantee the satisfactory completion of the thesis requirement.

Thesis credit is graded each term a student is engaged in thesis work using grades of High Pass (HP), Pass (P), or No Pass (NP). Only HP and P grades are satisfactory and count for credit toward the degree. At most, six credits of thesis hours may be counted toward fulfilling degree requirements that include a thesis option.

If a student receives a grade of NP for thesis hours, a program may require the student to switch to one of the other possible culminating experiences in the discipline. Students receiving grades of NP in their thesis hours for two consecutive semesters will not be allowed to continue with the thesis.

Substitution of up to six credits of P/HP (Pass/High Pass) thesis hours for non-thesis research credit hours is allowable, with the approval of the program.

For more information about the thesis process and for program-specific guidance on the graduate thesis, please consult the College of Graduate Studies and Research *Manual of Thesis Procedures* and the program's graduate handbook.

Grading Scale for Graduate Thesis work:

High Pass: Outstanding academic progress on the thesis, an outstanding defense of the thesis, or an outstanding thesis.

Pass: Satisfactory academic progress on the thesis, a satisfactory defense of the thesis, or a satisfactory thesis.

No Pass: Student has not made satisfactory academic progress on their thesis or their thesis does not meet the academic standards of the program.

Degree Verification

If a graduate student has completed all academic requirements with a current application for graduation on file and he/she is waiting for the formal awarding of the degree, the University Registrar, upon the student's written request, will issue a letter certifying the student's status. Such letters are normally accepted by boards of education for salary increment purposes and by other universities as verification that the degree has been earned.

Graduate Grade Appeal Policy

Every student has the right to appeal if they consider their final grade in a graduate-level course to be unreasonable, unjust, or capricious. A grade appeal can be initiated no later than two semesters (including summer) after the grade was assigned. The Dean of the College of Graduate Studies and Research makes the final decision on graduate grade appeals.

Process for appealing a grade in a graduate course:

1. The student must first consult the faculty member who issued the grade for reconsideration of the grade. The Chair or Coordinator and other members of the department are encouraged to be available for consultation with the faculty member and the student at this stage. Note: This is the only stage at which an appealed grade can be changed to an A, B, C, D, or F. At every subsequent stage of the grade appeal process, the Chair, Associate Dean of the graduate program's college or Dean of the College of Graduate Studies and Research can change the grade to a P only.
2. If the faculty member is unavailable or the student contests the faculty member's decision and wishes to continue the appeal, the student should (next) approach the Chair of the department in which the course was taught. The Chair may designate the relevant program's Coordinator to serve this role for this stage, if the department has a Coordinator. The student must present a written statement to the Chair explaining the reasons he/she believes the grade is unreasonable, unjust, or capricious. The Chair is responsible for investigating the student's claims by gathering relevant information, and preparing a written statement of the findings of the investigation. At the conclusion of this investigation, the Chair must recommend that the student's grade appeal be supported or denied. The Chair shall communicate this recommendation and its rationale in writing to the student and the faculty member.
3. If the faculty member who issued the grade is also the Chair, the student should appeal directly to the Associate Dean of the college in which the course was taught, submitting a written statement explaining the reasons he or she believes the grade is unreasonable, unjust, or capricious. The Associate Dean is responsible for investigating the student's claims by gathering relevant information, and preparing a written statement of the findings of the investigation. At the conclusion of this investigation, the Associate Dean must recommend that the student's grade appeal be supported or denied. The Associate Dean shall communicate this recommendation and its rationale in writing to the student and the faculty member (Chair).
4. If the student believes that the process was flawed or that there was evidence that was not considered, he/she can bring the appeal to the Dean of the College of Graduate Studies and Research. In addition to the appeal materials already provided to the Chair, Coordinator, or Associate Dean in Step 2 above, the student must justify in the appeal why he or she believes the decision should be reconsidered, including any new pertinent information. Disagreement with the outcome of the deliberations of the Chair, Coordinator, or Associate Dean is not sufficient on its own to pursue an appeal with the Dean. If the Dean of the College of Graduate Studies and Research agrees that the process was possibly flawed or that there is substantive new evidence that was not considered, he/she will convene the Graduate Grade Appeal Committee to hear the grade appeal. The Graduate Grade Appeal Committee, selected each year, will consist of five members, as follows:
 - a. Two faculty members from the Graduate College Advisory Committee,
 - b. Two master's degree program students in good standing selected by the Dean of the College of Graduate Studies and Research, and
 - c. The representative of the Dean of the College of Graduate Studies and Research.

5. Before hearing any appeals, any student serving on the Graduate Grade Appeal Committee must fill out and sign a FERPA Privacy and Confidentiality Understanding/Agreement, available from the representative of the Dean of the College of Graduate Studies and Research or the University Registrar.
6. The Graduate Grade Appeal Committee will investigate the case and will hold a hearing. The student, the faculty member, and the Chair, Coordinator, or Associate Dean involved with Step 2 shall be invited to participate. If the student fails to attend the agreed-upon, scheduled hearing, then the hearing will be cancelled and the grade appeal dismissed without further review.
7. The Graduate Grade Appeal hearing generally takes about one hour and has the following format:
 - a. The student has 10 minutes to present the appeal, after which the committee members may ask questions of the student.
 - b. The faculty member of the course has 10 minutes to respond, after which the committee members may ask questions of the instructor.
 - c. The Chair (if he/she is not the faculty member), Coordinator, or Associate Dean may add comments and answer any questions the committee members may have.
 - d. The student does not ask questions of the faculty member, Chair, Coordinator, or Associate Dean, and the faculty member, Chair, Coordinator, and Associate Dean do not ask questions of the student.
 - e. The student may have 2 or 3 minutes for final rebuttal and the committee may ask final questions of the student, faculty member, Chair, Coordinator, or Associate Dean.
 - f. Everyone except for the Graduate Grade Appeal Committee leaves the hearing room.
 - g. The committee members discuss the appeal. The Dean's representative will lead the discussion. When the discussion is complete, the committee members will take a vote on the appeal.
8. The committee will communicate to the Dean of the College of Graduate Studies and Research its written recommendation, which will be one of the following:
 - a. If the Committee decides that the challenged grade is unreasonable, unjust, or capricious, it shall so communicate to the Dean its recommendation that the grade be changed to a P.
 - b. If the Committee decides there is insufficient evidence to support the student's claim, it shall recommend to the Dean that the original grade should stand.
 - c. If the committee cannot agree on the appeal, the lack of agreement will be communicated to the Dean.
9. After receiving the recommendation of the committee and reviewing the materials submitted by the student, the faculty member, and the Chair, Coordinator, or Associate Dean, the Dean of the College of Graduate Studies and Research may decide that the grade should remain as recorded, or that it should be changed to a P (Pass). If the grade is changed to a P, the credits for the course will count toward the student's degree requirements, but the grade will not contribute to the GPA.
10. The Dean of the College of Graduate Studies and Research will share his or her decision in writing with the student, the faculty member, and the Chair, Coordinator, and/or Associate Dean, and a copy of the decision will be placed in the student's records. The decision of the Dean is final.

Graduate Admissions Policy

Please see this policy in the Admissions section of the Catalog. (<http://catalog.neiu.edu/admissions/graduate-students/>)

Graduate Certificate Programs

A Graduate Certificate Program is composed of a focused collection of courses that offers a skill set in and/or distinctive approach to a subject that cannot be otherwise gained through an existing Northeastern degree program or academic minor.

Graduate certificate programs must conform to Illinois Board of Higher Education (IBHE) guidelines and to the following IBHE Program Inventory Definitions:

1. A post-baccalaureate certificate "requiring completion of an organized program of study requiring at least 18 semester credit hours beyond the bachelor's and...designed for persons who have completed a baccalaureate degree but do not meet the requirements of academic degrees at the master's level."
2. A post-master's certificate "requiring completion of an organized program of academic study of at least 24 semester credit hours beyond the master's degree but does not meet the requirements of academic degrees at the doctoral level."

Students may be concurrently enrolled in a degree program and a certificate program. Such students will complete a separate application to each program.

Courses composing a Northeastern graduate certificate will, upon their completion, be included on a student's transcript and in the computation of a student's grade point average.

Credit hours earned through a post-baccalaureate certificate from a program or combination of programs in which there is/are (an) approved graduate degree(s) may, upon approval of the program and the College of Graduate Studies and Research, count toward a master's degree. At its discretion, a Northeastern graduate program may count all credits earned in certificate courses offered by that program. At its discretion, a Northeastern program may count up to 9 hours of credits in certificate courses offered by another program that offers courses in the shared certificate program.

A student enrolled in a graduate degree program in which there is a fully- or partially-embedded graduate certificate program is eligible to receive the certificate only if the student has made a separate application and has been admitted to the certificate program.

A minimum grade point average of 3.0 must be achieved in graduate course work for the certificate to be awarded.

Acceptance of transfer credits toward a graduate certificate is at the discretion of the graduate program. Graduate programs may accept up to 9 hours of graduate transfer credits. Programs may set more stringent transfer credit limits.

Exceptions and Changes to Graduate Policies

Individual exceptions to the published policies of the College of Graduate Studies and Research may be made only after approval of the Dean or the Dean's designate following the submission of a written petition. Northeastern Illinois University and the College of Graduate Studies and Research reserve the right to make policy changes from time to time when necessary.

Graduate Programs

Master's Degree Programs

Degree Programs In Arts and Sciences:

- Biology, M.S. (<http://catalog.neiu.edu/arts-sciences/biology/master-science-biology/>)
- Chemistry, M.S. (<http://catalog.neiu.edu/arts-sciences/chemistry/master-science-chemistry/>)

- Teaching English as a Second Language (TESL) Endorsement

McNair Scholars Program

Angela Vidal-Rodriguez, Director

Purpose

The goal of the McNair Program is to increase the attainment of a Ph.D. by students from traditionally underrepresented groups in higher education. McNair participants are from disadvantaged backgrounds and have demonstrated strong academic potential. Program staff and university faculty members work closely with these participants through completion of a research project and undergraduate requirements. The program staff encourage their entrance into graduate programs, and track their progress to successful completion of advanced degrees.

Eligibility

Undergraduate students who intend to pursue a career that requires a Ph.D., and who meet the following criteria, may apply to the program:

- Completed at least 60 credit hours
- Status as a first-generation college student with income eligibility and/or a member of a group underrepresented in graduate education
- A GPA of 2.8 or above
- Strong desire to continue directly into graduate school shortly after graduation
- US citizenship or residency

Program Participation

McNair Scholars conduct a summer research project under the direction of a faculty mentor. Mentors and Scholars attend professional conferences and work together on the presentation of their research. Regular meetings with the program Academic Specialist and Director guide Scholars through the completion of their undergraduate degree requirements and assist with graduate school selection and application. Scholars attend three one credit seminars and graduate school visits. Workshops to support graduate school application include, financial literacy, GRE instruction, library skills, and presentations skills.

Complete program information is available in the McNair Scholars Program Office, B-141, by contacting the Program Director at (773) 442-4253, or at <http://www.neiu.edu/academics/mcnair-scholars> (<http://www.neiu.edu/academics/mcnair-scholars/>).

NEIU-301M. Developing A Research Thesis. 1 Hour.

An integrative, collaborative, research-based introduction to the process of thesis writing. Each student conducts a focused search of the literature and prepares a research proposal in response to a specific, identified issue and is introduced to the elements of scholarly writing. Epistemological and ethical issues of inquiry are explored.

NEIU-302M. College Teaching For TA's. 1 Hour.

A seminar class to introduce students to college teaching skills and prepare them for teaching assistantships. Class discussion, assignments, and activities focus on the theory and practice of teaching and learning at the post-secondary level. Students draw on their own college learning experiences to evaluate instructional techniques and materials for effectiveness and meaning.

NEIU-303. Preparing For Graduate Study. 1 Hour.

This one credit hour course supports the planning and implementation of applying to graduate programs in various disciplines of the humanities, sciences, and social sciences. The course will focus on core competencies of creating admission essays and curriculum vitae, identifying graduate schools and programs, and maximizing standardized test scores.

College of Arts and Sciences

Katrina Bell-Jordan, Ph.D., Dean, Professor of Communication, Media and Theatre
 Sudha Srinivas, Ph.D., Acting Associate Dean, Professor of Physics
 Timothy Libretti, Ph.D., Acting Associate Dean, Professor of English

The College of Arts and Sciences comprises 17 departments which offer bachelor's degrees in 27 majors with 49 minors, master's degrees in 14 different disciplines, and additional certificate programs. As the largest of Northeastern's three academic colleges, the College of Arts and Sciences also offers most of the undergraduate General Education-Distributive Learning curriculum.

The College of Arts and Sciences helps students develop their individual world view, encouraging them to acquire social and cultural awareness, as well as a broad knowledge of a variety of disciplines. Fine arts, humanities, natural sciences, social/behavioral sciences, and professional studies all enrich our students' learning environment by offering abundant opportunities for intellectual discovery, and by enabling them to become informed and responsible citizens. It is a further goal of the College to offer our students both academic and career-oriented programs of study. We support faculty/student research, peer-led team learning, internships and community-based fieldwork. Students have the opportunity to learn from professors who are outstanding in their fields and passionate about teaching.

Further information about the College can be found at www.neiu.edu (<http://www.neiu.edu>) under Academics.

Pre-Health and Pre-Law Advising

Pre-Professional Advising is available from David Nissim-Sabat, Director of Pre-Professional Advising in the College of Arts and Sciences. Pre-Professional students benefit from individualized advising in a student-centered atmosphere to create long-term planning. The goal is to build your future professional school prerequisites into your current degree program while also considering additional pre-professional experiences such as research, volunteer work, community service, campus involvement, entrance exam preparation, obtaining letters of recommendation and writing personal statements.

Departments/Programs

Anthropology, English Language Program, global studies, Philosophy, Teaching English to speakers of other Languages (TESOL), School for the advancement of English Language and learning (SAELL)

Lesa C. Davis, Ph.D., Professor of Anthropology, Chair
 Tracy Luedke, Ph.D., Professor, Coordinator of Global Studies
 Tina Villa, Ph.D., Coordinator of English Language Program
 John Casey, Ph.D., Associate Professor, Coordinator of Philosophy
 Jeanine Nthirageza, Ph.D., Professor, Coordinator of TESOL
 John Armour, M.A., Director of SAELL

Art + Design

Kimberly Ambriz, M.F.A., Associate Professor of Art, Chair

Biology

Jennifer Slate, Ph.D., Professor of Biology, Chair

Chemistry

Ken Nicholson, Ph.D., Associate Professor of Chemistry, Chair

Communication, Media and Theatre

Cyndi Moran, M.F.A., Professor of Communications, Media and Theatre, Chair

EARTH SCIENCE, ENVIRONMENTAL SCIENCE AND PHYSICS

Greg Anderson, Ph.D., Professor of Physics, Chair
 Elisabet Head, Ph.D., Associate Professor, Coordinator of Earth Science
 John Kasmer, Ph.D., Associate Professor, Coordinator of Environmental Science

Economics and Geography & Environmental Studies

Erick Howenstine, Ph.D., Professor of Geography & Environmental Studies, Chair

Scott Hegerty, Ph.D., Associate Professor, Coordinator of Economics

English and Linguistics

Timothy H. Scherman, Ph.D., Associate Professor, Chair

Richard Hallett, Ph.D., Professor, Coordinator of Linguistics

History

Charles Steinwedel, Ph.D., Professor of History, Chair

Justice Studies and Child Advocacy studies

Maria De La Torre, Ph.D., Associate Professor of Justice Studies, Chair

Rachel Birmingham, Ph.D., Associate Professor, Coordinator of Child Advocacy Studies

Mathematics and Math Development

Lidia Z. Filus, Ph.D., Professor of Mathematics, Chair

Matthew Graham, Ph.D., Assistant Professor, Coordinator of Math Development

Music and Dance

Robert Heitzinger, D.M., Associate Professor of Music, Chair

Political Science

Martyn de Bruyn, Ph.D., Professor of Political Science, Chair

Psychology

Amanda Dykema-Engblade, Ph.D., Associate Professor of Psychology, Chair

Lisa A. Hollis-Sawyer, Ph.D., Associate Professor, Coordinator of Gerontology Program

Social Work

Job Ngwe, Ph.D., Professor of Social Work, Chair

Sociology, Women's, GENDER and Sexuality Studies, Latina/o & Latin American Studies, and African & African American Studies

Olivia Perlow, Ph.D., Professor of Sociology, Chair

Sharon Bethea, Ph.D., Professor, Coordinator of African & African American Studies

Brandon Bisbey, Ph.D., Associate Professor, Coordinator of Latina/o & Latin American Studies

Brooke Johnson, Ph.D., Associate Professor, Coordinator of Women's, Gender and Sexuality Studies

World Languages and Cultures

Denise L. Cloonan Cortez de Andersen, Ph.D., Professor of Spanish, Chair

Undergraduate Majors

Baccalaureate degrees are offered in the following disciplines:

- Anthropology
- Art - (Art History and Studio Art)
- Biology
- Chemistry
- Communication, Media and Theatre
- Earth Science

- Economics
- English
- Environmental Science
- Environmental Studies
- Geography
- Global Studies
- Graphic Design
- History
- Justice Studies
- Latina/o/x and Latin American Studies
- Mathematics
- Music (Education or Performance)
- Music
- Philosophy
- Physics
- Political Science
- Psychology
- Social Work
- Sociology
- Spanish
- Women's, Gender and Sexuality Studies

The University offers licensure for teaching in PK-12 and K-12 schools in the following disciplines:

PK-12

- FOREIGN LANGUAGE: SPANISH

K-12

- VISUAL ARTS
- MUSIC

Students interested in teaching should consult the appropriate department and the Goodwin College of Education section of this catalog.

Undergraduate Minors

- African and African American Studies
- Anthropology
- Art History
- Art, Studio
- Asian Studies
- Biology
- Chemistry
- Child Advocacy Studies
- Communication
- Communication, Media and Theatre
- Creative Writing
- Criminology
- Dance
- Earth Science
- Economics
- English
- Environmental Studies
- French Studies
- Geography
- Geographic Information Science
- Gerontology
- Global Studies
- History
- Interaction Design
- Interdisciplinary English Studies
- Jewish Studies

- Journalism
- Korean
- Latina/o and Latin American Studies
- Lesbian, Gay, Bisexual, Transgender and Queer (LGBTQ) Studies
- Linguistics
- Mathematics Applied
- Mathematics ELED and Humanities
- Mathematical & Statistical Modeling of Complex Systems
- Media
- Music
- Philosophy
- Photography
- Physics
- Political Science
- Psychology
- Public Administration
- Social Justice
- Social Work
- Sociology
- Spanish
- Teaching English to Speakers of Other Languages
- Theatre Performance
- Women's, Gender and Sexuality Studies

Graduate Programs

Departments in the College of Arts and Sciences offer 14 master's degree programs which are listed below.

General requirements for graduate admission to the University and to specific degree programs can be found in the College of Graduate Studies section and in the appropriate departmental sections of this catalog. Graduate students who have specific questions should contact the appropriate departmental office.

- Master of Science in Biology
- Master of Science in Chemistry

- Master of Arts in Communication, Media and Theatre
- Master of Arts in English
- Master of Arts in Geography & Environmental Studies
- Master of Arts in Gerontology
- Master of Arts in History
- Master of Arts in Latin American Literatures and Cultures
- Master of Arts in Linguistics
- Master of Science in Mathematics
- Master of Arts in Music
- Master of Arts in Political Science
- Master of Social Work
- Master of Arts in Teaching English to Speakers of Other Languages

Certificate Programs

- Geographic Information Science (GIS), Graduate Certificate
- Gerontology Senior Advocate, Certificate
- Teaching English to Speakers of Other Languages, Graduate Certificate

Declaration of Major

Students who wish to declare a major or minor must complete the Undergraduate Major/Minor Declaration and TLP Declaration form and submit it to the appropriate College of Arts and Sciences Department. In addition to being available online, forms are available in all departmental offices, Enrollment Management Services, the Dean's Office in the College of Arts and Sciences, and Academic Advising. All declared majors should request the name of an advisor from their major departments.

In certain programs, special requirements must be fulfilled prior to admission to the major program. Students should consult the appropriate sections of this catalog for additional information, and contact the departmental chairperson.

Graduation Requirements

Students in the College of Arts and Sciences must meet all university requirements as well as the specific requirements for graduation within their particular major.

To be counted toward the major, courses transferred to the University must be accepted by the student's major department.

Transfer students must complete a minimum of 15 credit hours in courses at the 200 and/or 300-level in their majors at Northeastern Illinois University. At least 9 credit hours for a minor must be completed at NEIU.

CASEP - College of Arts & Sciences Education Program

Jeremy Babcock, Coordinator and Instructor
Lech Walesa Hall, 3098
(773) 442-5654

The College of Arts and Sciences Education Program (CASEP), now entering its 20th year, is an educational initiative for full-time, first-year students interested in becoming teachers. Seeking to provide early insights into teaching, CASEP's mission is focused on offering classroom coursework and experiences that highlight content as well as pedagogical practices. CASEP combines general education courses, supportive services for students, and early field experiences with discussion and feedback about teaching. CASEP's ultimate goal is to increase student success, which includes increasing overall student retention and decreasing time to degree.

When accepted into CASEP, the program allows students to begin teacher training during their first year of college, at least two years prior to entering Northeastern's Goodwin College of Education (GCOE). CASEP comprises 12 courses, which satisfy general education requirements or requirements for the GCOE. CASEP students take their courses with a cohort of like-minded individuals also interested in becoming teachers. Students are engaged by arts integration, communication, and team building strategies, and also conduct field trips and/or observations in Pre K-12 classrooms. Students in CASEP may participate in service learning or part-time employment opportunities in educational settings as well. CASEP is a selective program with a limited enrollment of 35-40 first-year students.

Once accepted to Northeastern, students can select CASEP as their success program option and request more information about CASEP at this link (<http://www.neiu.edu/academics/college-of-arts-and-sciences/departments/college-arts-and-sciences-education-program-casep/>) . If qualified, you will be invited to interview with the CASEP Coordinator for full acceptance into the program.

The following is the list of CASEP courses for 2021-22:

First Year Courses:

- Introduction to Communication, CMTC 100 **(required)**
- Writing I, ENGL 101 **(required)**
- Introduction to Theatre, CMTT 130 **(required)**
- U.S. History: 1877-Present, HIST 215 **(required)**
- One FYE course **(required)**: TESL 109A
- Language & Human Behavior, LING 120 **(elective)**
- Schools & Society, SOC 104 **(elective)**

Second Year Courses:

- Public Speaking, CMTC 101 **(required)**
- Writing II, ENGL 102 **(required)**
- American National Government, PSCI 216 **(required)**
- Philosophical & Historical Foundations of Public Education, EDFN 305 **(required)**
- Education and Individual Differences, EDFN 306 **(required)**
- Language & Human Behavior, LING 120 **(elective)**
- Schools & Society, SOC 104 **(elective)**

STUDENT CENTER FOR SCIENCE ENGAGEMENT

The Student Center for Science Engagement (SCSE) supports students in STEM disciplines in achieving academic and professional success. The Center's mission is to increase student interest and achievement in the sciences and to help prepare them for cutting edge, scientifically driven careers. The Center primarily serves students in the departments of Biology, Chemistry, Computer Science, Environmental Science, Earth Science, Mathematics, Physics, and Psychology, assisting students to explore these areas of study and showing them how to lead fulfilling careers.

Center staff, with graduate degrees in the sciences and education, offer one-on-one advising to help with creating a plan for gaining professional experience and with taking the steps needed to pursue careers and graduate study. SCSE staff engage with students to identify and pursue internships, jobs, and graduate study opportunities and also help with preparing application materials. The SCSE hosts a summer research program for students and faculty. Events and workshops are offered throughout the year to help students network with professionals in the sciences and find ways to apply their studies, find out about careers in the sciences, and prepare for life after graduation. Tutors in select upper level science courses are also available.

To meet with an advisor for help with academic and professional development planning, consult with a tutor, study alone or in a small group, attend a workshop or event, or, to receive more information about summer internships, visit the Student Center for Science Engagement located in BBH 235 and BBH 247, email scse@neiu.edu, and check out the SCSE website (<http://www.neiu.edu/academics/student-center-science-engagement/>).

African and African American Studies

- Minor in African and African American Studies (<http://catalog.neiu.edu/arts-sciences/african-african-american-studies/minor-african-african-american-studies/>)

Olivia Perlow, Ph.D., Professor of Sociology, Chair

Sharon L. Bethea, Ph.D., Professor, Program Coordinator

Core Faculty

Russell Benjamin, Ph.D., Professor, Political Science

Chielozone Eze, Ph.D., Professor, English

Alvin David Farmer, Jr., Ph.D., Associate Professor, Psychology

Courtney Francis, M.A., Instructor, Teaching English to Speakers of Other Languages

Nicole Holland, Ph.D., Professor, Educational Inquiry and Curriculum Studies

Aissetu Ibrahima, Ph.D., Assistant Professor, Social Work

Tracy Luedke, Ph.D., Professor, Anthropology

Christopher Merchant, Ph.D., Associate Professor, Psychology

Job Ngwe, Ph.D., Professor, Social Work

Jeanine Ntahirageza, Ph.D., Professor, Teaching English to Speakers of Other Languages

Donald Waddel, M.A., Instructor, Social Work

Durene Wheeler, Ph.D., Professor, Educational Inquiry and Curriculum Studies

AFAM-109. First Year Experience: Exploring Africa In Chicago. 3 Hours.

The Exploring Africa in Chicago course is designed to provide first year students with a brief overview of the African continent, and an opportunity to understand the rich and varied diversity of Africa and its peoples. Using Chicago as a lab, students will use standard research methods, library databases, websites, readings, speakers, films, and field experiences to discuss the rich heritage of African culture, music and arts, the continent's geography, pre-colonial and colonial history, oral and written history, its languages and ethnicity, the family systems, and political, economic, and democratic systems. Students will be encouraged to get out of the classroom and into various communities and institutions in the Chicagoland area, seek out individuals of African descent in academia, healthcare, business, industry and other professions, and use standard interview techniques to critically examine their contributions to the city of Chicago, to the United States, and to the world.

AFAM-200. Introduction To African And African American Studies. 3 Hours.

Introduction to African and African American Studies is an interdisciplinary and foundational course that introduces students to the field of African and African American Studies through an overview of the socio-economic, historical, psychological, political and cultural experiences of African peoples on the continent of Africa and throughout the Diaspora. Selected teachings are designed to give students a concise understanding of the heritage of African people in America and a framework to analyze the culture and institutional arrangements which both shaped the African Diaspora and was shaped by people of African descent throughout different parts of the world. Emphasizing an African-Centered philosophy and framework of analysis, the course content and emphasis includes a focus on students' acquisition of both an analytic ability and interdisciplinary skills of investigation and research and their development of a critical and comprehensive approach to challenging traditional Western orthodoxy, intellectual hegemony, and misinformation about Africa and its peoples. Particular emphasis is placed on the role of race, class, and gender in assessing similarities and differences in the African experience throughout the Diaspora.

AFAM-224. Contemporary African Culture. 3 Hours.

This course introduces students to the diversity of contemporary African cultural life as it has been addressed by cultural anthropologists. In Africa, one can find unique cultural practices and ways of living, as well as evidence that Africa is very much integrated into global economic and cultural flows. In this course students learn about Africans' experiences, both the patterns and the particularities, and gain a greater appreciation for the roles that Africans and African culture play in the world, including in the U.S. This course is cross-listed in the Anthropology Program (ANTH-224).

AFAM-301. Foundations Of African Civilizations. 3 Hours.

This is an interdisciplinary course examining African civilizations from the prehistoric past to contemporary periods utilizing an African centered perspective. The course uniquely employs a variety of multidisciplinary perspectives and materials from history, geography, anthropology, political science, art, sociology, linguistics and other disciplines. Course content and emphasis is placed on correcting misperceptions and stereotypes of Africa while exploring the rich and varied diversity of Africa, its rich history, the fundamental cultural commonalities shared by African peoples despite the diversity, and the significance and place of African civilizations on the world scene.

AFAM-302. Foundations Of Africans In The Diaspora. 3 Hours.

Foundations of Africans in the Diaspora is an interdisciplinary course that focuses on the history, culture and experiences of African descendents in North America, South America and the Caribbean utilizing the research and writings from history, sociology, and anthropology conducted on and by the descendents of African peoples in these geographic areas. The objectives that form the foundation of the content for this course represent several topical areas that are in keeping with the overall goals of the minor in African and African American Studies. The topical areas are aligned into units of study and include: The African Diaspora, Africans in North America, The African American experience, Africans in Latin America and the Caribbean, and the Afro-Brazilian, Mexican, Columbian, Jamaican, French, Cuban experiences. Course objectives will be achieved through individual readings and study, and class activities and lectures. The methods used in this course include lectures, open discussions, seminar discussions, structured activities, and media and are designed to accommodate diverse learning styles.

AFAM-303. Global Collaborations-Ghana. 4 Hours.

AFAM-303 provides students with an intensive, yet short-term cross-cultural exchange program that also provides significant experience in research and creative practices. Students travel to Ghana, West Africa, visit key cultural and historical sites, and engage in collaborative research and/or creative projects with students at Kwame Nkrumah University of Science and Technology (KNUST), guided by faculty from both NEIU and KNUST. Course sessions at NEIU before and after travel will frame the experience.

AFAM-319. Prehistory of Africa. 3 Hours.

Africa is the sole source of evidence for the origins of human culture. Many significant cultural developments and technological innovations occurred first in Africa. This course surveys the archaeological evidence for the origins of human behavioral patterns from the earliest hominins to the eve of European colonization of this diverse continent. Principal course themes include: the origins of human culture; the Early, Middle, and Late Stone Ages; the origins of food production and complex societies; the history of ancient kingdoms including internal growth and external influences; the impact of Islam and the European contact with Africa. This course is cross-listed in the Anthropology Program (ANTH-319).

AFAM-320. Religion And Healing In Africa and the African Diaspora. 3 Hours.

In numerous contexts throughout Africa and the African Diaspora there are cultural institutions that bring together healing, religious practices, spirit possession, and expressive culture (including music, dance, and costume) and direct them toward resolving the bodily and social misfortunes of participants. This course will investigate variations and continuities amongst a range of examples of this cultural institution, including African independent Christian churches, Candomble, Santeria, Vodou, and the "cults of affliction" or "ngoma" of Africa, in order to understand the resilience and relevance of an institution by means of which participants both analyze and respond to the world around them. This course is cross-listed in the Anthropology Program (ANTH-320).

Minor in African and African American Studies

The African and African American Studies Minor (AFAM) is the study, research, interpretation and dissemination of knowledge about the African/African Diaspora worlds that are found primarily in Africa, the United States, the Caribbean and South America but also among peoples of Asia and Europe. Interdisciplinary in both conception and practice, the AFAM program provides a challenging curriculum designed to critically examine the structure, organization, contributions, and perspectives of Africa and its peoples throughout the Diaspora. A major paradigm that informs the program's curriculum is an African-Centered framework that proceeds from a position internal to the cultures of African peoples. This approach is used concurrently with an awareness of and openness to the variation and richness of the total human experience. Additionally, selected teaching and course materials are designed to provide students with a concise understanding of the specific history, heritage and culture of African Americans. With a strong commitment to teaching excellence, the primary goals of the African and African American Studies program are to:

1. provide students with a comprehensive quality multicultural education and,
2. provide students the opportunity for a creative intellectual experience based upon the critical and systematic study of the life, thought and practice of African peoples in their current and historical development.

The AFAM minor is currently housed in the Sociology Department.

Note: Sociology majors and minors may use as electives any of the courses offered through the African and African American Studies Program.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

- * Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.
- ** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in African and african american studies:

Code	Title	Hours
Required Courses:		
AFAM-200	Introduction To African And African American Studies	3
AFAM-301	Foundations Of African Civilizations	3
AFAM-302	Foundations Of Africans In The Diaspora	3
Electives		9
Total Hours		18

Electives must be chosen from the selected interdisciplinary list of courses shown below.

Code	Title	Hours
ELECTIVES		
African and African American Studies		
AFAM-109	First Year Experience: Exploring Africa In Chicago	3
AFAM-224	Contemporary African Culture	3
AFAM-303	Global Collaborations-Ghana	4
AFAM-319	Prehistory of Africa	3
AFAM-320	Religion And Healing In Africa and the African Diaspora	3
Anthropology

ENGL-383	Postcolonial African Literature	3
Geography and Environmental Studies		
GES-302C	Regional Geography: Africa (Geography and Environmental Studies)	3
History		
HIST-111E	World History: Africa	3
HIST-329A	African American History To 1865	3
HIST-329B	African American History And Race Relations Since 1865	3
HIST-370	Precolonial Sub-Saharan Africa	3
HIST-371	Nineteenth And Twentieth Century Africa	3
HIST-372	History Of Southern Africa, 1800-Present	3
HIST-373	Women & Gender In African History (History)	3
Inner City Studies		

ICSE-301	Racism In Theory And Fact	3
ICSE-304	Communication In The Inner City	3
Justice Studies		
JUST-202	Writing Intensive Program:Justice And Inequality	3
JUST-314	Police In The Minority Community	3
JUST-331	Law And Racism In America	3
Music		
MUS-342	World Music	2
Philosophy		
PHIL-364	Critical Race Theory	3
Political Science		
PSCI-330	African American Politics and Social Change	3
PSCI-360	Politics Of Sub-Saharan Africa	3
PSCI-397	African Political Thought	3
Psychology		
PSYC-314	Psychology Of The African American Family	3
Social Work		
SWK-202	Community Analysis	3
SWK-203	Analysis Of Cross Culture Interaction	3
SWK-250	Issues In Social Service Delivery	3
SWK-314	Social Work Advocacy	3
Sociology		
SOC-309	Sociology Of Racism	3
SOC-316	Race And Ethnic Relations	3
SOC-344	African American Women:Feminism, Race, And Resistance	3
SOC-349	Black Social Movements	3

In order to ensure that minors obtain a wide range of knowledge and analytical ability, students are required to take elective courses in, at minimum, two different disciplines. Students must consult with a program adviser to plan a sequence of study through elective courses.

Anthropology

You can find the NEIU Anthropology Department webpage here: <https://www.neiu.edu/academics/college-of-arts-and-sciences/departments/anthropology> (<https://www.neiu.edu/academics/college-of-arts-and-sciences/departments/anthropology/>)

The discipline of anthropology uniquely incorporates both cultural and biological perspectives in its study of the diversity of past and present humans, as well as that of our close primate relatives. NEIU Anthropology provides an exciting curriculum in the subfields of cultural anthropology, biological anthropology, and archaeology, as well as the connections between them, that spans a wide range of topics. Students taking courses in anthropology develop a multifaceted understanding of human diversity steeped in time, multicultural ethnographic comparisons, and the science of our physical form. This enriching perspective is not only well suited for subsequent graduate studies and professional careers both in and outside of anthropology, but also for fostering an acceptance of others and negotiating the many facets of our modern global society. We also offer and encourage students to take any of our internship and field opportunities for a particularly valuable experience in practicing anthropology. Contact the anthropology chair or your advisor (see below) to discuss these and other research and field opportunities.

Finally, if you need General Education credits, check out our courses below; we offer several in the Natural Sciences and Social/Behavioral Science categories:

Code	Title	Hours
ANTH-109B	First Year Experience: Skeletons In Chicago's Closet	3
ANTH-109D	First Year Experience: Aliens, Curses, And The Chicago Cemetery: Explaining The Past	3
ANTH-109E	FYE: Sweet Home Chicago: Identity And Culture In The Windy City	3
ANTH-201	Anthropology: Being Human	3
ANTH-212	Introduction To Cultural Anthropology	3
ANTH-213	Introduction To Archaeology	3
ANTH-215	Human Origins And Adaptations	3
ANTH-282	Primates Of The World	3

For more information on courses, majoring, or minoring in Anthropology, please contact:

Prof. Lesa Davis, Advisor and Chair of Anthropology
 lcdavis@neiu.edu
 Ph. 773.442.5862

- Major in Anthropology (<http://catalog.neiu.edu/arts-sciences/anthropology/anthropology/>)
- Minor in Anthropology (<http://catalog.neiu.edu/arts-sciences/anthropology/minor-anthropology/>)

Lesla C. Davis, Ph.D., Professor of Anthropology, Chair of Anthropology

Tracy J. Luedke, Ph.D., Professor of Anthropology, Coordinator of Global Studies Program

Jon B. Hageman, Ph.D., Professor of Anthropology, Coordinator of University Honors Program

Russell Zanca, Ph.D., Professor of Anthropology

Zada N. Johnson, Ph.D., Associate Professor of Educational Inquiry & Curriculum Studies, Program Facilitator for Urban Community Studies, and Affiliate Faculty in Anthropology

ANTH-109B. First Year Experience: Skeletons In Chicago's Closet. 3 Hours.

Bones hold an enormous amount of information about individuals and populations. This active class investigates what can be learned from bones and teeth in the context of forensic anthropology, bioarchaeology, and paleobiology. We will start by learning the bones of the skeleton and move on to identifying age, sex, trauma, etc., in forensic and archaeological contexts. Finally, we will look at fossil bone and what it can reveal about past life. Students will work with bones and models in lab, complete group and individual projects, and will learn and apply useful techniques for college success. First year students only.

ANTH-109C. First Year Experience: Skin Of Chicago. 3 Hours.

We wear about 9 lbs. of it every day, but we take most of its functions, adaptations, uses, and subtle cultural signals for granted. Skin is something everyone should know inside and out. For anthropologists, skin is a place where issues of biology, comparative anatomy, culture, evolution, archaeology, tradition, taboo, ritual, art, diversity, and race all come together. An understanding of human skin helps to turn over the judgments people make about others based on skin color. Using Chicago as a field laboratory, we will discover the wonders of skin, ever mindful of how we fit inside our own.

ANTH-109D. First Year Experience: Aliens, Curses, And The Chicago Cemetery: Explaining The Past. 3 Hours.

Why have people proposed that aliens are responsible for the pyramids? This course explores how archaeologists evaluate data and reconstruct societies of the past by examining specific cases from scientific and other perspectives. You will also examine the implications of various interpretations of the past. The way we interpret the past can teach us a great deal about how modern thinking has informed, and is informed by, archaeology. This First Year Experience course counts for General Education credit in the Social/Behavioral Sciences.

ANTH-109E. FYE: Sweet Home Chicago: Identity And Culture In The Windy City. 3 Hours.

Identities comprise our sense of who we think we are and can include but are not limited to those stemming from ethnicity, race, faith, gender, class, and ability. Using ethnographic readings, films about the city's subcultures, and students' own experiences, this course explores how Chicagoans' identify with themselves and with one another. Students will use anthropology's insights to learn about different communities and neighborhoods and how and why identity matters. While covering a wide variety of topics, students will develop effective writing and communication skills that build a foundation for intellectual rigor and university success. First Year students only.

ANTH-201. Anthropology: Being Human. 3 Hours.

Anthropologists study what it means to be human, across all regions of the world and from the origins of the human species to life today. ANTH-201 introduces students to the subjects, methods, and theories of the three major subfields of anthropology--cultural anthropology, archaeology, and biological anthropology--and examines both what makes the subfields distinctive and how they connect to and complement one another. We will apply the multiple perspectives of anthropology's subfields to contemporary issues in order to demonstrate the value of a holistic approach to understanding the human experience. Counts for either NS or SB GenEd credit.

ANTH-212. Introduction To Cultural Anthropology. 3 Hours.

Cultural anthropology is the study of contemporary human social life. In this course, students learn about the discipline by reading its recent scholarship and experimenting with its research methods. The course addresses multiple, diverse domains of the human experience, including language and art, gender and sexuality, kinship and family, race and ethnicity, economics and politics, religion and health, globalization and migration. Students develop an appreciation for cultural diversity as they read the results of anthropological research conducted the world over and hone their analytical skills as they investigate the cultural worlds they engage with right here in Chicago.

ANTH-213. Introduction To Archaeology. 3 Hours.

Archaeology focuses on past societies by uncovering and analyzing what they left behind. Students will explore the theories and methods archaeologists use to interpret, reconstruct, preserve, and ultimately learn from the past. This class highlights how archaeology can address important social, economic, and ideological questions including the origins of food production, social inequality, and civilization. This course fulfills General Education/UCC credit in the Social/Behavioral Sciences area.

ANTH-215. Human Origins And Adaptations. 3 Hours.

This multi-faceted, data-oriented course explores the biological diversity of humans and other primates in the past and present. Using fossil casts, hands-on activities, and the scientific method, students will analyze the evidence for more than six million years of human evolution. This course reviews the principles of genetics and inheritance and examines the evolutionary processes that contribute to modern human variation. Students will also explore the ecology and behavior of lemurs, monkeys, apes, and other primates and their significance for understanding our origins.

ANTH-221. Peoples Of South America. 3 Hours.

South America is home to the world's driest deserts, some of its highest mountains, one of its richest fisheries, and an immense area of lowland rainforest. Explore the contemporary peoples and cultures of South America from the colonial period to the 21st century from Panama to the tip of Argentina. Students will learn about the effects of European and later national policies on indigenous populations, as well as strategies of resistance to those external pressures. (C).

ANTH-223. North American Indians. 3 Hours.

This course examines the cultures of North American Indian populations from the time of European contact to the modern day. The record of Indian-non-Indian interactions and relationships from colonial times to the present is analyzed. Changes in Indian cultures are explored in light of external pressures from the state, environmental changes, and shifting internal dynamics. (C).

ANTH-224. Contemporary African Culture. 3 Hours.

This course introduces students to the diversity of contemporary African cultural life as it has been addressed by cultural anthropologists. In Africa one can find unique cultural practices and ways of living, as well as evidence that Africa is very much integrated into global economic and cultural flows. In this course students learn about Africans' experiences, both the patterns and the particularities, and gain a greater appreciation for the roles that Africans and African culture play in the world, including in the U.S. This course is cross-listed in the African and African American Studies Program (AFAM-224). (C).

ANTH-225. Peoples Of Mexico/Central America/Caribbean. 3 Hours.

This wide-ranging course surveys the contemporary peoples and cultures of Mexico, Central America, and the Caribbean Islands, focusing on the diversity of ethnicities, languages, and local perspectives and responses to colonialism and globalization. (C).

ANTH-250. Latin American Archaeology. 3 Hours.

Interested in the roots of Latin American culture? This course provides an introduction to ancient indigenous civilizations that rose in three different geographic regions of Latin America: The Maya of Belize, Guatemala, Honduras, El Salvador and Mexico; the Mexica or Aztec of the Central Mexican Highlands; and the Inka of the Andes Mountains of Peru, Bolivia, and Ecuador. The dramatic impact of Spanish contact and conquest on native populations will also be covered. This course is broadly comparative and relies heavily on visual media to convey essence of prehistory and early history of Latin American civilization. (A).

ANTH-252. North American Archaeology. 3 Hours.

This fascinating course explores the prehistory of Native Americans in the from the initial peopling of the New World through the subsequent domestication of plants and development of complex civilizations in the United States, Canada, and northern Mexico. The wide variation, and commonalities, in cultures, practices, and material remain are explored. (A).

ANTH-261. Biology Of Behavior. 3 Hours.

Why do we act the way we do? Are we at the mercy of our genes or does environment shape our behavior? This engaging course looks at the nature/nurture debate and will evaluate claims of the biological basis of behavior. Topics discussed include: communication and the origins of language, hormonal and genetic influences on behavior, sociobiology and the evolution of behavior, possible universals of human nature, and the use and misuse of biology to justify or condemn human behavior. Special emphasis on critical review of popular media claims of the biological basis of behavior. (B).

ANTH-282. Primates Of The World. 3 Hours.

Nonhuman primates pique our interests because they are simultaneously familiar yet exotic in their actions and interactions. From the bipedal hopping sifaka and the venomous loris to colorful monkeys and nepotistic chimpanzees, living nonhuman primates display an impressive assortment of behaviors, abilities, and adaptations. This class is an introductory survey of the diversity of our closest cousins, and will use readings, video, and lectures to highlight primate ecology, behavior, and the complex interactions between human and nonhuman primates. Students will learn how primatologists study primates in the wild and the different conservation efforts underway to protect their future. (B).

ANTH-290. Graduating Anthropology. 1 Hour.

This course highlights the relevance of a liberal arts education in today's world and the particular strengths of an anthropological perspective. The course guides students in identifying the key skills they have gained through completing a degree in anthropology and in articulating the value of those skills to potential employers and graduate programs. Coursework includes preparation for postgraduation endeavors and hands-on training in producing effective c.v./resumes, cover letters, and graduate program statements of purpose. This course should be taken within one year prior to graduation.

ANTH-300. Writing Intensive Program: Writing In Anthropology. 3 Hours.

This required course provides anthropology majors with practical training in all aspects of effective disciplinary writing, from the mechanical to the conceptual. Topics covered include: identifying and vetting sources, critical reading and note-taking skills, writing conventions, literature reviews, citations, crafting an argument, outlining, revision, academic integrity, and presentations. Students will engage in a series of stepped research and writing activities leading to a final project that demonstrates the skills accrued over the semester. This course fulfills the Writing Intensive requirement. It must be taken within 2 semesters of declaring the major and before taking most 300 level ANTH courses.

Prerequisite: ENGL-101 with a minimum grade of C.

ANTH-302. Human Osteology. 4 Hours.

There are 206 bones in the adult human skeleton and more in that of a juvenile. Skeletal analysis is a core focus of biological anthropology with applications in archaeology, anatomy, medicine, forensics, and paleontology. This course represents an intensive study of the human skeleton focusing on bone growth, morphological variation (sex, ancestry, etc.), and identifying trauma/pathology. Students will learn to identify and side each bone, its landmarks, and bone fragments in fetal through adult skeletons. Class will include a mix of lecture and concentrated work with the osteology collection. Students will complete a comprehensive analysis of a human skeleton. (B).

ANTH-305. Archaeology Of Conflict And Warfare. 3 Hours.

This course adopts a comparative approach to the study of conflict and warfare in the ancient world. The scope includes prehistoric and historic time periods that represent a wide range in cultures and geography, and features examples from nearly all continents. Students will examine architecture, artifacts, bones, art, and more to explore the range and nature of human conflict, how it has changed over time, and some associated outcomes. Students will apply lessons of the past to modern situations and will also examine parallels with the modern era to emphasize the comparative perspective. (A).

ANTH-306. The Rise Of Complex Societies: The Archaeology Of State Formation And Urbanization. 3 Hours.

This course provides an in-depth, comparative exploration of the emergence of social hierarchy and centralized political formations in the Old and New Worlds. Students will become familiar with the political institutions, economic structures, and religious traditions of the world's earliest "civilizations" in the Americas, the Near East and China while probing anthropological theories on the rise of cities and states. Students will develop an understanding of the varied factors that drove parallel or divergent forms of social complexity and will partake in archaeological problem-solving involving both method and theory. (A).

Prerequisite: ANTH-213 with a minimum grade of C.

ANTH-307. Anthropology Of Gender, Sexuality And The Body. 3 Hours.

The course introduces students to approaches to gender in cultural anthropology, focusing especially on the body as the site where these historically and culturally specific notions of difference and identity are realized. Course materials address a variety of gendered bodily experiences cross-culturally and investigate the ways they are implicated in notions of masculinity and femininity. Course topics include initiation practices and other means of attributing sex/gender identities; reproduction and fertility control; beauty and body image; health and illness; warfare and violence; and sexuality and sexual orientation. (C).

ANTH-309. Egyptian Archaeology. 3 Hours.

This course explores ancient Egyptian society and culture from the Predynastic through the New Kingdom periods, with an emphasis on internal and external factors that helped shape and mold change and expansion of Egyptian society. Students will develop an understanding of long-term political, social, religious, and economic developments along the lower Nile River. (A).

ANTH-310. Middle Eastern Archaeology. 3 Hours.

The Middle East is widely known as "the cradle of Western Civilization," and this course explores the archaeological evidence for ancient cultures of the Middle East, particularly areas of modern-day Kuwait, Iran, Iraq, Syria, and Turkey, from prehistoric times to the fifth century B.C. Ancient Mesopotamian societies, including Akkadia, Assyria, Babylonia, and Sumer are examined through the end of the Iron Age. (A).

Prerequisite: ANTH-213 with a minimum grade of C.

ANTH-311. Designing Your Future: Next Steps. 1 Hour.

This course, open to all majors, highlights the relevance of a liberal arts education in today's world and the particular strengths it provides. The course guides students in identifying the key skills they have gained through completing their degree and in articulating the value of those skills to potential employers and graduate programs. Coursework includes a skills inventory, hands-on training in producing effective CV/resumes, cover letters, and graduate program statements of purpose, and a collaborative research project through which students will compile, analyze, and share information and planning regarding their postgraduation endeavors. Best taken in Jr. or early Sr. year.

ANTH-313A. Chimpanzee 101: Community, Culture, And Conservation. 1 Hour.

Field studies of wild chimpanzees in the 21st century have dramatically reshaped our understanding of these great apes and their kinship with us. It is clear that chimpanzees display an exceptional level of behavioral diversity and that some learned behaviors are passed through the generations within distinct communities. This one credit course takes a deep dive into chimpanzee behavioral ecology, hunting and tool culture, and will also detail recent community conservation efforts to protect chimpanzees and support their human neighbors. Prior anthropology coursework not necessary; just bring your curiosity to learn about our closest biological relatives. (B).

ANTH-313B. Evolution Of Skin Color. 2 Hours.

Human skin color displays a magnificent range of variation that far exceeds the black and brown and white we speak of everyday. This class examines the biology and evolution of human skin pigmentation and how anthropologists study a feature that leaves no fossil trace. Drawing from a diversity of fields, students will explore the biology of skin pigmentation, the factors that affect it temporarily, and the evolutionary processes that have produced the range we see in the world today. Understanding the biological nature of skin color will help to temper the cultural biases we have ascribed to it. (B).

ANTH-313C. 23 And Who?: Realities Of Personal Genetic Testing. 2 Hours.

Millions of people – maybe you too – have sent a sample of their DNA to direct-to-consumer genetic testing companies who promise results indicating ethnicity, ancestry, mental health insights, disease risk, Neandertal-relatedness, and so much more. This 2 cr. class will explore the phenomenon of personal genetic testing, its benefits and limitations, and the nature of genetic indicators for ancestral origins. Students will also examine personal privacy concerns as well as ethics and group identity issues that arise from the industry, including use of the growing DNA databases by law enforcement, pharmaceutical and insurance companies, and governments. (B).

ANTH-314. Anthropology Of Religion. 3 Hours.

Study of the ways that religions, both past and present, act to support or alter the social systems or sub-systems with which they are associated. The ways that individuals respond to the value systems and world views of various religions are examined, as well as the individual motivations for adherence to the various religions. (C).

Prerequisite: ANTH-212 with a minimum grade of C.

ANTH-315. Greek Archaeology: Bronze Age. 3 Hours.

The archaeology of Aegean Greece, from 3600-1000 BCE, is the focus of this engaging course. It includes the ancient societies of mainland Greece, Crete, and the Cyclades. As the origins of dynamic city-states, urbanization, art, and a writing system in the eastern Mediterranean, these areas are not only fascinating in their own right, but also prefigured later Classical and Hellenistic civilizations. (A).

ANTH-316. Greek Archaeology: Classical Age. 3 Hours.

This course explores the archaeology of ancient Greece from the end of the Bronze Age (1000 BCE) through the death of Alexander the Great (323 BCE). This fascinating era includes an examination of the Greco-Persian wars and the Greek colonization of Spain, France, Italy, and the shores of the Black Sea. We will explore the roles that politics, religion, and commerce played in the development of Classical Greek society, as evidenced in the archaeological record. (A).

Prerequisite: ANTH-213 with a minimum grade of C.

ANTH-317. Medical Anthropology. 3 Hours.

This course presents cultural anthropological perspectives on the subjects of health, illness, and healing. Students are introduced to illness categories, healing practices, relationships between patients and healers, and notions of the body as they exist cross-culturally. Course materials will address health and healing as associated with biomedicine, religion, spirit possession, and a range of other cultural responses to human suffering and its resolution. (C).

ANTH-319. Prehistory Of Africa. 3 Hours.

Africa is the sole source of evidence for the origins of many significant cultural developments and technological innovations. This course surveys the archaeological evidence for human behavioral patterns from the earliest hominins to the eve of European colonization of this highly diverse continent. Principal themes include: origins of human culture; Early, Middle, and Late Stone Ages; origins of food production and complex societies; history of ancient kingdoms including internal growth and external influences; and the impact of Islam and the European contact with Africa. This course is cross-listed in the African and African American Studies Program (AFAM-319). (A).

ANTH-320. Religion In Africa. 3 Hours.

Religion is a subject that has fascinated anthropologists since the discipline's beginnings. In this course, we look at religion as it is practiced across the African continent, in all its diversity and complexity. Readings include ethnographic examples of African approaches to Christianity, Islam, spirit possession, and religious healing that reveal the relevance of practices by means of which participants both analyze and respond to the world around them. This course is cross-listed in the African and African American Studies Program (AFAM-320). (C).

ANTH-321. Race And Language. 3 Hours.

Communication is fundamental to human life and to who we are. This course explores how and why people talk, write, and interact, to establish, convey, and negotiate race. Students will use ethnographic examples, assigned readings, podcasts, and films to survey the anthropological understanding of race, language, and culture. Whether in the context of language socialization through storytelling, or multilingualism and language ideologies, everyday speech is social action that informs power, agency, representation, and identity. Cross-cultural examples include Black ASL, e-chat, landscape memories for Western Apache, "jock talk," and experiences of race, ethnicity, and nationality for Chicago Latinx youth. (C).

ANTH-325. Archaeology Of Sex, Gender, And Sexuality. 3 Hours.

This course explores sex, gender, and sexuality in archaeology, historically, theoretically, and methodologically. Students will engage with a variety of perspectives and frameworks, including feminist approaches, for understanding the construction of personhood in the past, with attention to the relationship between concepts, practice, and evidence. The course will cover case studies from a diversity of temporal periods and geographic regions, placing emphasis on the articulation of gender with other aspects of identity and difference. Students will also examine the political implications of archaeological studies of gender, including perspectives and practices that foster a diverse and inclusive discipline.

ANTH-327. Dental Anthropology: Dental Morphology, Evolution, And Adaptation. 3 Hours.

This class will explore the evolution of mammalian teeth with a specific focus on primates. Students will first study the morphology, development, and functional adaptations of dentition. Special attention will be paid to the relationship between dentition and feeding ecology. The second portion of the class will primarily focus on the human dentition. Topics covered will include dental traits, the genetics of trait inheritance, geographic variability, and the application of dental anthropology in the bioarchaeological context. Throughout the semester students will be able to handle and study dental casts and will complete in-class labs on a variety of topics.

Prerequisite: ANTH-215 with a minimum grade of C.

ANTH-329A. Evolution Of The Human Diet. 3 Hours.

The human diet is a product of evolution, culture, and the environment. This class will explore nutrition, its influence during development, the role of diet in human speciation events, and evidence of diet in the archaeological record. Students will examine foraging strategies in contemporary human populations and how food choice might be influenced by genetics. Health implications of dietary shifts, including the development of agriculture and industrialization, will also be discussed. Finally, a portion of the course will focus on how non-human primate dietary adaptations and behaviors can be used to better understand our own lineage's changing dietary profile. (B).

Prerequisite: (or) and.

ANTH-332. Human Growth And Development In Evolutionary Perspective. 3 Hours.

Anthropologists study the dynamics of human growth and development from an evolutionary perspective. In this course, we will investigate the history of the study of human growth and the biological principles of growth. Students will examine the genetic and hormonal effects on human and other mammal growth including nutrition, disease, socio-economic status, pollution etc. Highlighting unique features of human growth in its various stages, we will also examine how anthropologists interpret variation in growth patterns among human populations and the possible adaptive significance of this variation. (B).

Prerequisite: ANTH-215 with a minimum grade of C.

ANTH-335A. Zooarchaeology. 3 Hours.

Zooarchaeology focuses on the identification and analysis of faunal (animal) remains from archaeological sites and what they can tell us about past human ecology and behavior. Zooarchaeologists study which animals were hunted and how they were butchered, prey and camp seasonality, the role of hunting versus scavenging, and the processes of animal domestication. This course will introduce students to theory and method in zooarchaeology and the basics of faunal analysis using lecture, review of current professional literature, discussion, and hands on labs. Students will relate their findings to broader questions in archaeology, paleontology, and paleoanthropology. (A).

Prerequisite: ANTH-213 with a minimum grade of C.

ANTH-337A. Anthropology Of Death. 3 Hours.

In death, the human body is transformed by the living into a powerful symbol. Treatment of the corpse is linked to ideas of death, the afterlife, and social boundaries. Studies of ancient burials reveal the nature of funerary practice and belief, as well as social organization. Human remains are often involved in rites of passage where the deceased are separated from the living and transformed into ancestors and other beings. This course focuses on how anthropologists study funerary rituals and beliefs about death from a cross-cultural perspective, and will examine the meaning of human practices of death and burial. (A).

Prerequisite: ANTH-212 with a minimum grade of C and ANTH-213 with a minimum grade of C and ANTH-215 with a minimum grade of C.

ANTH-339. Paleoanthropology: The Fossil Record Of Human Evolution. 3 Hours.

Paleoanthropology is the study of the human fossil record. This exciting course examines over 7 million years of human evolution and the biological processes that have shaped this most unique radiation. Using fossil casts, computer models of early humans as well as replicas of archaeological artifacts, students will explore the fundamentals of paleoanthropological research. The course will detail the controversies and differing interpretations of the fossil evidence for human evolution including the most current proposed evolutionary relationships of early humans to *Homo sapiens*. (B).

Prerequisite: ANTH-215 with a minimum grade of C.

ANTH-343. Anthropology Of The Body. 3 Hours.

The human body is a simultaneously biological and cultural entity—bones, blood, and flesh reveal the processes of biological evolution and also reflect cultural practices and ideas. This course takes a holistic approach to the body by juxtaposing perspectives from biological and cultural anthropology. For example, blood has adaptive biological qualities and is also a cultural metaphor for familial, ethnic, and national belonging. Senses reveal the evolutionary divergence of the human lineage and have prominent roles in different religious and healing practices. At the intersection of these perspectives lie significant insights regarding what it means to be a human being.

ANTH-349E. Environmental Archaeology. 3 Hours.

This course will provide an overview of how archaeologists study human-environment relationships. It will treat landscapes as dynamic products of natural processes, cultural activities, and social practices and expose students to the various techniques and methods by which archaeologists reconstruct ancient human-environment relationships, ranging from geomorphological to paleoecological methods. In addition to surveying techniques and methods useful to environmental archaeology, the course materials will include a series of empirical case studies detailing the anthropogenic landscape histories of several world regions. (A).

Prerequisite: ANTH-213 with a minimum grade of C.

ANTH-349S. Archaeology of South Asia. 3 Hours.

This course surveys the archaeology of South Asia, beginning with animal and plant domestication in the early Holocene and ending with the arrival of the British East India Company in the 17th century AD. Given the chronological breadth and spatial scope, the class will most fully detail archaeological and historical periods that contribute significantly to anthropological questions on the origins of domestication, the development of complex societies, the role of religion in early state authority, climate change and cultural change in the past, and the relationships between ancient agricultural and pastoral-based societies. (A).

Prerequisite: ANTH-213 with a minimum grade of C.

ANTH-355. History Of Anthropology. 3 Hours.

The course addresses developments in anthropology by tracing changes and continuities in the topics, theories, and methods employed in archaeology, biological anthropology, and cultural anthropology. Students will focus on the ideas and approaches that have informed the trajectory of a particular subfield. The course provides a historical context that enriches an understanding of anthropology not only as a field, but also as a part of a long, multidirectional disciplinary conversation.

ANTH-356. Human Diversity And The Question Of Race. 3 Hours.

Humans display a wide range of variation in their physical attributes. What is the relationship between this variation and racial categories and identities, and how has racial pseudo-science misled our understanding of actual biology? This thought-provoking anthropology course examines the hereditary, environmental, and evolutionary basis of how and why humans vary in features like skin color, eye shape, hair type, body proportions, freckles, blood type, disease susceptibility/resistance, and many other biological traits. Students will examine the range of human adaptations to different climates and environments and also learn why evolution sometimes operates to maintain deleterious traits in a population. (B).

Prerequisite: ANTH-215 with a minimum grade of C or BIO-303 with a minimum grade of C.

ANTH-357. Economic Anthropology: Shells, Pigs, And Gold. 3 Hours.

Is greed simply a part of human nature? do all humans simply have endless wants and desires for material goods? More than a century ago anthropologists began questioning assumptions of classical Western economics, and began to show that societies have diverse values as people pursue wealth and the good life. The course design gives students insights into the variety of economic systems by tapping into ethnographic literature that has overturned mainstream economic wisdom. Take a look at economics from a fresh and intriguing micro-level perspective that incorporates many other aspects of cultural life, including marriage and ecology. (C).

ANTH-359. Museum Studies. 3 Hours.

This course takes a multi-disciplinary approach to the study of museums, cultural heritage institutions, and natural history organizations and the contemporary issues and challenges facing them. Students will examine the theory and organization of museums as well as their historical and contemporary role in education, cultural preservation, research, and interpretation. This course will also take a critical look at the role of museums in colonialist endeavors, and at how they address social hierarches, race, and ethnicity. Students will enrich their classroom learning with working visits to a diversity of institutions in the Chicago area. Course is open to all majors.

ANTH-360. Scientific Racism: Eugenics Then And Again. 3 Hours.

Employing the new science of genetics, the early 1900's eugenics movement misused evolutionary principles to assert a racist, ableist agenda arguing for the inherent superiority and inferiority of different social groups. With widespread support from scientists, the movement resulted in laws governing marriage, immigration, incarceration, and reproduction. U.S. eugenics was so successful that its perspectives were adopted by the Nazis. This class will critically examine the misuse of science in eugenics and its legacy of racist ideas that continue to inform policy and popular imagination today. Students will also learn legitimate ways of invoking genetics relative to human variation. (B).

ANTH-363. Anthropology Of Tourism. 3 Hours.

This course introduces students to anthropological theories on tourism and to consider those theories in the contexts of the varied sites and forms of tourism practiced around the world today. The course will take a look at mass tourism as well as tourism that makes an effort to get "off the beaten track" in search of "authenticity" and "adventure" while also experiencing local tourist sites, commercialism, and cultural production of these contexts. Note that this course includes several field trips within Chicago.

Requirement: 45 credit hours completed.

ANTH-364. Culinary Anthropology. 3 Hours.

Anthropologists and historians research behaviors, origins, and traditions of human association with a variety of foodstuffs and foodways. We do so all in an effort to answer the "when", "how", and "why" questions connected to particular foods and the contexts in which eating them became appropriate and sought after. In this course we explore eating, foodstuffs, and cookery from nutritional, artistic, sensual, political, socioeconomic, and popular perspectives, among others. Students also explore Chicago's world cuisines by dining in and out in a variety of symposia, combining good eating and good thinking. (C).

Prerequisite: ANTH-212 with a minimum grade of C or HIST-111 with a minimum grade of C.

ANTH-365. Anthropology Of Islam. 3 Hours.

Do all Muslims practice their faith in the same way? Is there really only one type of Muslim society? Based on consideration of major Islamic beliefs, the history of Islamic expansion and civilization, and the cultures of contemporary Muslim societies, the thesis of this course is that there are numerous cultural approaches to Islam. Students learn by reading within and outside of anthropology to better inform themselves of contemporary issues and understandings of the dynamism that characterizes Islamic cultures. (C).

ANTH-368. Primate Biology And Adaptation. 3 Hours.

The primate adaptive radiation is over 50 million years old and exhibits some of the most striking anatomical adaptations found among mammals. This course focuses on the morphological diversity of primates. We will first examine the evolution of traits that distinguish primates from other mammals, and will then shift focus to features that differentiate species and lineages within the Order. Specifically, adaptations related to diet, feeding, foraging, communication, predator avoidance, positional behavior, habitat, reproduction, among others, will be highlighted. Students will work extensively with scientific literature and the bone and cast collection. (B).

Prerequisite: ANTH-215 with a minimum grade of C or ANTH-282 with a minimum grade of C or BIO-320 with a minimum grade of C or BIO-327 with a minimum grade of C.

ANTH-371. Forensic Anthropology. 3 Hours.

Forensic anthropology is an applied science that uses the methodology of biological anthropology to evaluate human skeletal remains in a medico-legal context. This course focuses on the theory and practice of building biological profiles and analyzing circumstances surrounding human death. Students will review the current state of forensic anthropology using published studies on estimating age/sex/ancestry/etc., identifying bone trauma and the postmortem interval, and applying methods of individuation (facial reconstruction, odontology, X-ray, DNA, etc.). The course also highlights the ethics and cross-disciplinary nature of forensic anthropology, and its central role in mass/natural disasters and worldwide human rights violations. (B).

Prerequisite: ANTH-215 with a minimum grade of C or ANTH-302 with a minimum grade of C.

ANTH-373. Urban Anthropology. 3 Hours.

Urban anthropology is the holistic study of human beings in cities. This course addresses various aspects of the broad sweep of urbanization, from the ancient urban revolution of the present shift to a majority of people living in cities, focusing especially on the urban United States. We will engage with anthropological work that balances social theory with rich ethnographic portraits, opening debates on the meanings and values of urban life. We will examine race, gender, inequality, institutions, and case studies on immigration, gentrification and sustainability, and using Chicago as our laboratory, students will conduct and write ethnographies of their own. (C).

Prerequisite: ANTH-212 with a minimum grade of C.

ANTH-374. The Maya. 3 Hours.

This is an exciting and in-depth exploration of ancient Maya society from its origins to Spanish contact. The course reviews chronologies, geography, and time periods used by Mayanists to help understand larger trends in Maya society. You will also evaluate issues and debates that currently exist within Maya studies. These include questions of economy, politics, social organization, religion, and ideology. Finally, the decipherment of the Maya script is examined. You will have the opportunity to critically examine a specific topic during the semester. (A).

Prerequisite: ANTH-213 with a minimum grade of C or ANTH-250 with a minimum grade of C.

ANTH-375. Anthropology Of Globalization. 3 Hours.

The course will address social forces, practices, and experiences related to the ever-increasing transnational interconnectedness of societies across the world. Through readings from the anthropological literature on globalization and related issues, we will critically address the ways "globalization" is conceived and theorized by contemporary scholars; its effects on the construction of identity; the roles of commodities, consumer culture, and the media; and the ways in which the processes referred to as globalization both broaden and expand notions of "community" and "culture", and present new varieties and intensities of difference, disjuncture, and marginalization. (C).

ANTH-376. Primate Behavior. 3 Hours.

One of the evolutionary hallmarks of being a primate is sociality and primates exhibit a diverse array of behavioral adaptations for navigating complex social groups. Primate behavioral ecology is a fascinating field that informs our understanding of primate interactions and the origins of our own behavior. This course will highlight how primatologists study behavior and how evolution and ecological variables shape primate sociality in the contexts of group structure, male/female dynamics, reproduction, feeding, predation pressure and social learning, among other topics. Students will examine the diversity of primate sociality using current primatological literature, discussion, video, assignments and zoo visits. (B).

ANTH-377A. Anthropology Of Television. 3 Hours.

Cultural anthropologists have long trained their sights on the ordinary practices of everyday life, understanding that careful study of mundane activities yields insights into the weightiest questions of human experience. However, despite its ubiquity in popular culture and centrality as a form of representation and forum for cultural debate, anthropologists have only slowly come to the study of television. This course addresses the relatively recent but burgeoning anthropology of television and suggests that attention to the ways people around the world make, watch, interpret, discuss, and critique television programs provides an important vantage on the workings of culture, power, and knowledge in the contemporary world.

ANTH-378. Anthropology Of Power. 3 Hours.

The study of politics concerns who gets what, why, and how in societies. Anthropologists study political systems by examining the varieties of human practices involving rules and laws, persuasion and coercion. This course surveys how politics have been studied by anthropologists for the past 130 years, from indigenous North Americans to Trobriand Islanders and especially how anthropologists increasingly became political themselves as more and more peoples began living under the authority of modern nation states. (C).

ANTH-379A. Pan-African Association Internship. 3 Hours.

Interns work 10 hours per week for the duration of a semester at the Pan-African Association, an organization that provides services to refugees in Chicago. Interns assist with in-home mentoring, English language training, job readiness training, and community outreach, among other duties and projects. The PAA Internship provides high-achieving Northeastern students with the opportunity to learn about the experiences of refugees in the U.S. and gain experience in the work of a refugee services organization and provides PAA with committed, hardworking students who can serve the goals of the organization and the needs of its clients.

Prerequisite: ANTH-212 with a minimum grade of C or GS-201 with a minimum grade of C.

ANTH-380. Archaeological Field School. 6 Hours.

Want to work on an archaeological site? In this intensive field course, students will explore field, lab and survey techniques on an actual archaeological dig. Students will learn excavation techniques and protocol in the treatment and recovery of artifacts, ecofacts, features, and structures. Students will also develop skills in mapping and use of various field technologies including GPS. Instruction will also include lab methods for processing, analyzing and curating material remains. Location of Field School may vary year to year. (A) Prereq.: ANTH-213 or ANTH-250 or ANTH-374 or consent of instructor.

ANTH-3811. Independent Study In Anthropology. 1 Hour.

Academic credit for special research project student conducts with individual guidance from a faculty member. Projects that could be completed in an established course are not appropriate for Independent Study. Student must submit project proposal to the faculty member in the semester prior to the one in which project is to be conducted; see "Individualized Study" in anthropology program entry for more information. Student must have completed two courses in the anthropological subdiscipline of proposed topic prior to enrolling in Independent Study. Independent Study requires approval of instructor, department chair and college dean. (A,B,C) Prereq.: Consent of Instructor.

ANTH-3812. Independent Study In Anthropology. 2 Hours.

See course description for ANTH-3811.

ANTH-3813. Independent Study In Anthropology. 3 Hours.

See course description for ANTH-3811.

ANTH-3821. Fieldwork In Anthropology. 1 Hour.

Academic credit for ethnographic, primatological, archaeological, paleontological, forensic, applied, or other relevant and typically off-campus anthropological fieldwork opportunities arranged for by the student. Student enrolls with anthropology faculty member who guides and oversees work. Fieldwork in Anthropology credits are designed to help students improve research skills, apply principles learned in the classroom, take advantage of fieldwork opportunities, and explore career options. Students must have completed two courses in the anthropological subdiscipline of the proposed fieldwork prior to enrolling in Fieldwork in Anthropology. Fieldwork in Anthropology requires approval of instructor, department chair and college dean. (A,B,C).

ANTH-3822. Fieldwork In Anthropology. 2 Hours.

See course description for ANTH-3821.

ANTH-3823. Fieldwork In Anthropology. 3 Hours.

See course description for ANTH-3821.

ANTH-3824. Fieldwork In Anthropology. 4 Hours.

See course description for ANTH-3821.

ANTH-3871. Field Museum Internship. 1 Hour.

Student intern assists Field Museum staff behind the scenes in the Mammals section (anatomy, prep, curation) or Anthropology section (scientific illustration). Work varies with assignment and can include specimen preparation/processing, collections management, resolving taxonomic issues, research, data management, apprenticeship with professional illustrator, and more. Internship requires significant commitment of 15-20 hours/week for the semester and a journal or final project depending on credit hours (1-6). Additional requirements listed in Anthropology entry of online Academic Catalog. Eligible students apply for internship through NEIU Anthropology Department. Approval is subject to consent of Field Museum staff. (B).

Prerequisite: ANTH-302 with a minimum grade of C or ANTH-368 with a minimum grade of C.

ANTH-3872. Field Museum Internship. 2 Hours.

(See ANTH-3871 for description.).

Prerequisite: ANTH-302 with a minimum grade of C or ANTH-368 with a minimum grade of C.

ANTH-3873. Field Museum Internship. 3 Hours.

(See ANTH-3871 for description.).

Prerequisite: ANTH-302 with a minimum grade of C or ANTH-368 with a minimum grade of C.

ANTH-3874. Field Museum Internship. 4 Hours.

(See ANTH-3871 for description.).

Prerequisite: ANTH-302 with a minimum grade of C or ANTH-368 with a minimum grade of C.

ANTH-3875. Field Museum Internship. 5 Hours.

(See ANTH-3871 for description.).

Prerequisite: ANTH-302 with a minimum grade of C or ANTH-368 with a minimum grade of C.

ANTH-3876. Field Museum Internship. 6 Hours.

(See ANTH-3871 for description.).

Prerequisite: ANTH-302 with a minimum grade of C or ANTH-368 with a minimum grade of C.

ANTH-3891. Lincoln Park Zoo Research. 1 Hour.

Student works with Lincoln Park Zoo biologists on a zoo-sponsored research project on primate or other mammal species. Focus can include: development and implementation of research design, ethological data collection including behavioral observations, analysis etc. Student arranges for project through NEIU Anthropology Department. These credit hours require a significant commitment on the part of the student and are only open to highly motivated, responsible students. Arrangements are subject to consent of Lincoln Park Zoo staff. Approximate credit to field hour ratios from 1cr., 50 field hours to 6 cr., 300 field hours. (B) Prereq.: ANTH-376.

Prerequisite: ANTH-376 with a minimum grade of C.

ANTH-3892. Lincoln Park Zoo Research. 2 Hours.

(See ANTH-3891 for description.).

Prerequisite: ANTH-376 with a minimum grade of C.

ANTH-3893. Lincoln Park Zoo Research. 3 Hours.

(See ANTH-3891 for description.).

Prerequisite: ANTH-376 with a minimum grade of C.

ANTH-3894. Lincoln Park Zoo Research. 4 Hours.

(See ANTH-3891 for description.).

Prerequisite: ANTH-376 with a minimum grade of C.

ANTH-3895. Lincoln Park Zoo Research. 5 Hours.

(See ANTH-3891 for description.).

Prerequisite: ANTH-376 with a minimum grade of C.

ANTH-3896. Lincoln Park Zoo Research. 6 Hours.

(See ANTH-3891 for description.).

Prerequisite: ANTH-376 with a minimum grade of C.

ANTH-390A. Senior Thesis Research. 2 Hours.

High achieving anthropology majors may enrich their academic experience by conducting a senior thesis. Student enrolls in Senior Thesis Research hours for the first semester and works one-on-one with faculty thesis advisor to develop project and outline steps and a timeline for completion. Grade earned will be based on the completed thesis proposal and other requirements as agreed to by student and thesis advisor. Other requirements may include obtaining necessary outside permissions, completion of literature review, data collection, etc. See anthropology program entry above for minimum GPA and additional requirements. Prereq.: Consent of faculty mentor.

ANTH-390B. Senior Thesis Writing. 2 Hours.

Student enrolls in Senior Thesis Writing for the 2nd semester of their thesis project in order to complete thesis. Student works one-on-one with faculty thesis advisor to develop project and outline steps and a timeline for completion. Grade earned will be based on the completed thesis. Final thesis product must follow departmental thesis format guidelines. Student is strongly encouraged to present their work at the annual NEIU Student Research/Creative Activities Symposium or similar venue. See "Senior Thesis Option" in anthropology program entry above for additional information. Prereq.: ANTH-390a.

Prerequisite: ANTH-390A with a minimum grade of C.

ANTH-401. Independent Graduate Study In Anthropology. 3 Hours.

Major in Anthropology

Anthropologists study what it means to be human, across all regions of the world and from our evolutionary origins to life today. We look at both human variability and human similarities in order to further understand our shared humanity from multiple angles. In doing so, anthropology also challenges assumptions and prejudices about identities, societies, and human differences. Anthropologists understand all human societies to be fundamental components of the human story, equally complex, rich with history, bearing a shared biological heritage, and worthy of our attention and understanding.

This critical vantage is one of the most valuable assets that anthropology majors carry with them beyond their time at NEIU.

In the Anthropology Program, students learn about the data, methods, and theories of the three major subfields of anthropology--cultural anthropology, archaeology, and biological anthropology--and examine what makes the subfields distinctive and how they connect to and complement one another. Students also learn how to apply anthropology's holistic, multi-perspective approach to addressing important contemporary issues.

Anthropology students explore an exciting range of subjects, including: race and ethnicity, the biology of skin color, family and kinship, ancient art and adornment, diet, food and cuisine, monkey ecology and behavior, site excavation and interpretation, the fossil record of human evolution, power and politics, social status in life and death, genetic inheritance and your ancestry, migration and globalization, indicators of age and sex in the skeleton, artifacts and their greater meanings, religion and healing, the evolution of disease, among many others.

In addition to addressing a broad range of subjects, our courses are presented in multiple formats, including online, hybrid, and face-to-face, one, two, and three credit hours, and full and half semester scheduling. We also have options for individualized research, field, and internship experiences for students who want to extend what they are learning beyond the classroom. Whether it is measuring bones, interviewing people, or mapping a temple site, anthropology students will find a variety of engaging opportunities in our program.

An Anthropology major provides students with a critical lens on the world and valuable analytical and communication skills that can be applied to a broad range of career goals.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Anthropology for the Bachelor of Arts Degree (34 credit hours)

Anthropology Program major requirements have changed over the last several years. Please consult your anthropology advisor to confirm the major requirements for your catalog year.

Code	Title	Hours
Required Courses (34 cr. total):		
Foundation Courses: Take any three out of the following four (9 cr.):		
ANTH-201	Anthropology: Being Human	3
ANTH-212	Introduction To Cultural Anthropology	3
ANTH-213	Introduction To Archaeology	3
ANTH-215	Human Origins And Adaptations	3
Writing Intensive Course (3 cr.)		
ANTH-300	Writing Intensive Program: Writing In Anthropology	3
Subfield Electives (21 cr.)		
One 300 level archaeology course (see course description with "(A)")		3
One 300 level biological anthropology course (see course descriptions with "(B)")		3
One 300 level cultural anthropology course (see course descriptions with "(C)")		3
Four additional ANTH electives, at least two of which must be at the 300 level; the remaining two may be 200 or 300 level; foundation courses may not be used as electives		12
Professionalization Course (1 cr.)		
ANTH-311	Designing Your Future: Next Steps	1

INDIVIDUALIZED FIELD, RESEARCH, INTERNSHIP, AND SENIOR THESIS ELECTIVES IN ANTHROPOLOGY

NEIU Anthropology offers a variety of individualized study options, including internships, fieldwork, research, and senior thesis hours (listed below) that may be counted as electives to satisfy ANTH major requirements. These individualized learning opportunities are a great way to apply what has been learned in the classroom and engage with anthropology in a new way. Most of these opportunities lack the formal structure of a class so the student should be prepared to work independently with some faculty oversight. Internships place students in a professional setting where they participate in the work experience. Field and research projects can be in the form of field schools at other institutions or a self-designed project the student carries out with a faculty advisor. Senior thesis projects are well-organized, 2-semester endeavors where the student designs and carries out an original research project, also with a faculty advisor. This option is ideal for (but not limited to) students committed to continuing their studies in graduate school.

Code	Title	Hours
ANTH-379A	Pan-African Association Internship	3
ANTH-3813	Independent Study In Anthropology	3
ANTH-3824	Fieldwork In Anthropology (various options, including National Museum of Mexican Art Internship)	4
ANTH-3876	Field Museum Internship	6
ANTH-3896	Lincoln Park Zoo Research	6

ANTH-390A	Senior Thesis Research	2
ANTH-390B	Senior Thesis Writing	2

All of these opportunities require prior planning, usually in the semester before they are scheduled but at least 3 weeks prior to the start of the semester in which they are to take place. Students must complete a plan of study/contract for completion of the work. For internships, additional approval must be secured from the institution where the work is being conducted. Note that only six individualized credit hours may count towards the major, and these hours must be spread across two or more subfields.

Please see individual course descriptions for specific information. Students wishing to enroll in any individualized learning opportunities must satisfy the following requirements:

- Minimum GPA of 3.0/4.0;
- Declared major, or in exceptional cases, minor, in anthropology;
- Prior completion of a minimum of two ANTH courses in the subfield area of the proposed project

TRANSFER STUDENTS

We welcome transfer students who want to study anthropology at NEIU! Students transferring from other institutions must complete a minimum of 15 ANTH credit hours at NEIU including:

- ANTH-300 WIP: Writing in Anthropology
- At least one 300-level course in each subfield (archaeology, biological anthropology, cultural anthropology)
- One additional 300 level ANTH elective of your choice.

Please consult with the anthropology chair or advisor if you have any questions.

This sample curricular map is provided to guide you in the planning of your progression for this major, from freshman through senior year. This guide should not replace regular consultations with your program advisor. For specific recommendations of courses not identified, please consult your program advisor.

Minor in Anthropology

A minor in anthropology can enrich your perspective by adding a valuable skill set to your degree. Anthropologists study what it means to be human, across all regions of the world and from our evolutionary origins to life today. Anthropology also challenges assumptions and prejudices about identities, societies, and human differences. Anthropologists understand all human societies to be fundamental components of the human story, equally complex, rich with history, bearing a shared biological heritage, and worthy of our attention and understanding.

This critical vantage is one of the most valuable assets that anthropology minors carry with them beyond their time at NEIU.

We have purposefully incorporated flexibility in your electives so you can tailor this minor to your specific interests. Take a look at the broad range of classes in our program and note that we offer classes in several different formats, including online, hybrid, and face-to-face, one, two, and three credit hour courses, and full and half semester schedules.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

- * Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.
- ** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Anthropology (18 credit hours)

Code	Title	Hours
Foundation Courses: Take any three out of the following four (9 cr.):		
ANTH-201	Anthropology: Being Human	3
ANTH-212	Introduction To Cultural Anthropology	3
ANTH-213	Introduction To Archaeology	3
ANTH-215	Human Origins And Adaptations	3
Electives (9 cr.):		
Three 300-level ANTH courses of your choice. No more than 3 individualized credit hours may apply to the minor. Individualized credit hours include internships, field hours, and independent study projects.		9

Art + Design

The fundamental objective of the programs in the Art + Design Department is to provide and promote a knowledge and understanding of the visual arts. The Bachelor of Arts in Art with a concentration in Studio Art offers hands on exposure to a variety of skills, both analytic and technical, in order to prepare students with the means to express concepts visually. The Bachelor of Arts in Art with a concentration in Art History introduces students to numerous periods of art, cultural and historical events, visual means of expression and communication, and research methods. The Art Education program prepares students to teach the visual arts in a PK-12 environment, and upholds state and national performance standards. The Bachelor of Fine Arts in Graphic Design is an applied arts program with a focus on the development of visual solutions to communication problems, and offers students guided hands-on experience in the creation of visual messages in print and electronic media. All of our programs prepare students to pursue careers in the fine and applied arts, graduate school, teaching, and lifelong learning.

The Art + Design Department offers three sequences leading to a Bachelor of Arts degree (Studio Art, Art History, and Art Education PK-12) and a Bachelor of Fine Arts in Graphic Design. Additional offerings include minors in Studio Art, Art History, Interaction Design and Photography. Students who wish to declare a major or minor should contact the Art + Design Department at 1.773.442.4910 or art@neu.edu and schedule an appointment with a departmental advisor.

For all majors in the department, transfer students must complete a minimum of 15 credit hours of art and design courses at NEIU and meet all requirements for the major. For all minors in the department, transfer students must complete a minimum of 9 credit hours of art and design courses at NEIU and meet all requirements for the minor. Transfer students are required to consult with a departmental undergraduate advisor to review transfer coursework prior to registering for art and design courses at Northeastern.

Students should be aware of the University requirements for a Bachelor's degree. All students must complete a minimum of 40 credit hours at the 300 level and fulfill the university's general education requirements. The special requirements of studio and lecture courses demand regular attendance. The department policy on attendance is aligned with the university attendance policy and students are required to follow all prerequisites within the curriculum.

The Art + Design Department assesses course fees to support students in the studios and to maintain a safe and healthy working environment. Additional information on individual course fees may be obtained by contacting the department.

Northeastern Illinois University is an accredited institutional member of the National Association of Schools of Art and Design.

- Major in Art (Studio Art concentration) (<http://catalog.neiu.edu/arts-sciences/art/studio-art/>)
- Major in Art (Art History concentration) (<http://catalog.neiu.edu/arts-sciences/art/art-history/>)

ART

ART-109. First Year Experience: Art, Architecture And Urban Design In Chicago. 3 Hours.

This field-based course explores art in an urban environment, examines the relationships between art and urban culture, and considers the role of art in an urban setting. Students will gain a familiarity with Chicago as a cultural home; they will evaluate the role of public art in Chicago, examine the design and purpose of open spaces, and gain a familiarity with the Chicago school of architecture.

ART-109B. First Year Experience: Chicago Create: Graphic Design For Fun & Communication. 3 Hours.

This course examines the lively graphic design community of the city of Chicago. Lectures will focus on introducing graphic design topics to students, as well as learning the skills needed to succeed in college. Students will learn about our community, local arts, local graphic designers and get the opportunity to learn basic design principles. This course includes field trips.

ART-120. Drawing I. 3 Hours.

This course focuses on basic drawing skills and stresses individual perceptual growth and the importance of physical and psychological factors in structuring visual experiences. Emphasis is placed on design and perception as well as the discussion of systems of perceptual interpretation and structure, concepts of abstraction and problems of evaluation.

ART-130. Two-Dimensional Design. 3 Hours.

Systematic exploration of order in two-dimensional space and study of the interaction of method and technique in organizing form on a two-dimensional surface.

ART-140. Three Dimensional Design. 3 Hours.

Studio experience and lecture exploring fundamental 3-D design theory and concepts through the solution of studio problems utilizing 3-D materials and techniques.

ART-170A. Studio Experiences: Photography. 3 Hours.

Problem solving approach in studio experiences with lecture and discussion. This course does not count towards major or minor requirements in Art.

ART-170B. Studio Experiences: Painting. 3 Hours.

Problem solving approach in studio experiences with lecture and discussion. This course does not count towards major or minor requirements in Art.

ART-170C. Studio Experiences: Sculpture. 3 Hours.

Problem solving approach in studio experiences with lecture and discussion. This course does not count towards major or minor requirements in Art.

ART-170E. Studio Experiences: Printmaking. 3 Hours.

Problem solving approach in studio experiences with lecture and discussion. This course does not count towards major or minor requirements in Art.

ART-170F. Studio Experiences: Ceramics. 3 Hours.

Problem solving approach in studio experiences with lecture and discussion. This course does not count towards major or minor requirements in Art.

ART-170G. Studio Experiences: Drawing. 3 Hours.

Problem solving approach in studio experiences with lecture and discussion. This course does not count towards major or minor requirements in Art.

ART-170H. Studio Experiences: Graphic Design. 3 Hours.

Problem solving approach in studio experiences with lecture and discussion. This course does not count towards major or minor requirements in Art.

ART-220. Drawing II. 3 Hours.

This course focuses on interpretive drawing experiences with a concentration on individual growth and perceptual acuity through a variety of materials and media. This course includes the study of the human form through live models.

Prerequisite: ART-120 with a minimum grade of C.

ART-230. Painting I. 3 Hours.

This introductory painting course familiarizes students with the painting process. Using oil paint as medium, students will explore themes such as still life, abstraction, symbolism, and the landscape. Students will be exposed to a variety of oil painting techniques and materials.

Prerequisite: ART-120 with a minimum grade of C.

ART-234. Digital Foundations. 3 Hours.

This course addresses foundational toolsets in the Adobe Creative Suite while introducing students to the basic logical processes required for using code as a creative material. This course combines technical training with processed based creative projects in order to familiarize students with the essential tools and modes of thinking for creating digital art and design. Students will gain an essential understanding of the importance of digital literacy and content creation within broad professional disciplines.

ART-240. Sculpture I. 3 Hours.

This introductory sculpture course familiarizes students with traditional and contemporary sculpture concepts, and exposes students to an overview of processes, tools, and materials used in sculpture. Students will also explore modeling, casting, and construction techniques.

Prerequisite: ART-140 with a minimum grade of C.

ART-250. Printmaking I. 3 Hours.

This introductory printmaking course emphasizes the processes of intaglio and relief. This course will also explore the possibility of the monoprint, as well as introduce basic research methods associated with personal studio practice.

Prerequisite: ART-120 with a minimum grade of C.

ART-261. Photography I. 3 Hours.

This course will familiarize students with digital photography techniques and computer software to use photography as a creative medium. Students will be introduced to basic aesthetic grammar of photography and a preliminary historical context for visually analyzing and creating photographs.

Prerequisite: ART-130 with a minimum grade of C.

ART-270. Ceramics I. 3 Hours.

This introductory ceramic course explores building techniques, surface treatment, design and decoration of ceramic objects. Through class projects students will be introduced to a variety of methods of constructing sculptural as well as functional objects. Focus will be placed on technique, craftsmanship and the development of individual artistic direction.

Prerequisite: ART-140 with a minimum grade of C.

ART-280. Art + Tech I. 3 Hours.

Through tutorials, collaborative experimentation and guided studio time this course introduces students to a variety of topics related to the intersection of art and technology. The course will survey techniques to utilize web code as a creative medium, design and digitally fabricate objects, investigate modes of interactivity via physical computing and reshape the frame of moving images. Readings will provide a historical and technical framework for examining the ever-evolving role that technology plays within society. Lectures will encourage students to approach software and electronics as art materials, while hands-on tutorials and collaborative making will encourage skill development.

Prerequisite: ART-234 with a minimum grade of C.

ART-281. Graphic Design I. 3 Hours.

This course is an introduction to techniques and concepts of graphic design and visual communication. Lectures and studio time will be used to analyze and practice applied creative activities in design, which includes image-making, typography and layout, as well as its historical and contemporary social aspects.

Prerequisite: ART-130 with a minimum grade of C.

ART-285. Image. 3 Hours.

Image class offers a guided exploration of techniques and processes used to create images for the purpose of specific communication. The course pays special attention to current trends in graphic design and fine art and includes discussions of various contemporary illustration techniques. Special attention is paid to both visual form, as well as the design process, communication and interpretation of work to challenge the student's ability to generate innovative images with a regard for both visual form and conceptual content.

Prerequisite: ART-281 with a minimum grade of C.

ART-289. Graphic Design (Survey). 3 Hours.

This course chronicles the development of visual communication methods from prehistoric times to late 20th century. Emphasis will be placed on the period from the mid 19th century to late 20th century developments in the field of graphic design. The course is structured as a lecture and discussion class. The class will take a contemporary approach to the subject, drawing parallels between the historical movements and the way that things look in design today. Topics will involve a critical approach to the subject matter.

ART-301. Contemporary Design. 3 Hours.

This class combines academic study of late 20th century and contemporary Graphic Design practices with an exploration of the professional design world. Graphic Design of the present day is examined in relation to architecture and interiors, and wider theoretical and contextual issues. The interrelationship between the fine and decorative arts is a strong theme throughout the class. Visits to museums, professional events, galleries, design fairs and studios provide opportunities to examine objects and meet practicing designers first hand.

Prerequisite: ART-314 with a minimum grade of C.

ART-303. Gender And Sexuality In Art + Design. 3 Hours.

This course focuses on the iconographical study of the depiction of gender identity, gender expression and sexual orientation spectrums in the visual arts. This exploration into stereotypes, archetypes and prototypes of gender and sexuality in the context of historical and societal conditions will intersect with race, ethnicity, class, disability, culture, and sub-culture. Primary literary sources, archaeological evidence, web archives, and contemporary creative output and practice will be used to support interpretive hypotheses.

ART-314. Typography. 3 Hours.

The second course in the graphic design sequence takes a deeper look at design and use of letter forms. Lectures and assignments focus on examining major type families and their characteristics, creating typographic contrast and hierarchy of information, history of type design and typographic grids. Students build skills for the art of typesetting and typographic layout, conceptual thinking and expressive typography.

Prerequisite: ART-281 with a minimum grade of C.

ART-315. Letterpress. 3 Hours.

Introduction to letterpress printing techniques including discussion of typographic rules using wood and metal type and image making using contemporary photopolymer plate making techniques.

Prerequisite: ART-281 with a minimum grade of C.

ART-320. Drawing III. 3 Hours.

This advanced drawing course emphasizes drawing concepts and techniques. Students will utilize a variety of traditional and nontraditional media in developing their own personal artistic vision. This course may be repeated up to three times.

Prerequisite: ART-220 with a minimum grade of C.

ART-321. Drawing IV. 3 Hours.

This advanced drawing course will continue the exploration of contemporary concepts and drawing techniques emphasizing personal expression. This course may be repeated up to three times.

Prerequisite: ART-320 with a minimum grade of C.

ART-330. Painting II. 3 Hours.

This course is designed as a continuation of the exploration of the painting process. During this semester, students will be using acrylic or oil paints to investigate themes both contemporary and historical such as abstraction, the figure, narrative painting and mixed media. Students will also learn about the use of mediums, brushes, and painting techniques.

Prerequisite: ART-230 with a minimum grade of C.

ART-331. Painting III. 3 Hours.

This advanced painting course will emphasize personal development and expression using the medium of choice. This course may be repeated up to three times.

Prerequisite: ART-330 with a minimum grade of C.

ART-332. Painting IV. 3 Hours.

This advanced painting course will focus on individual personal imagery, concepts, and ideas, with the goal of developing a personal voice. This course may be repeated up to three times.

Prerequisite: ART-331 with a minimum grade of C.

ART-333. Mural Painting. 3 Hours.

Working with a Chicago neighborhood, students will develop an understanding of the role of public art by collaborating on the planning and execution of a painted mural. This course may be repeated up to two times.

ART-340. Sculpture II. 3 Hours.

This intermediate sculpture course introduces students to the fundamentals of figure modeling and casting methods. Class time is devoted exclusively to modeling, mold making, and various casting techniques.

Prerequisite: ART-240 with a minimum grade of C.

ART-341. Sculpture III. 3 Hours.

This is an advanced level sculpture studio course, which revolves around wood and metal working techniques in relation to the sculptural object. This course will cover shop safety and also focus on experimentation with hand and power tools as well as finishing processes. This course may be repeated up to three times.

Prerequisite: ART-340 with a minimum grade of C.

ART-342. Sculpture IV. 3 Hours.

This advanced sculpture course continues to explore advanced sculpture techniques with an emphasis on independent studio practice and research. Students will demonstrate a working knowledge of advanced sculpture techniques by creating a body of coherent and creative work. This course may be repeated up to two times.

Prerequisite: ART-340 with a minimum grade of C.

ART-343. Art & Culture Study Tour To China. 3 Hours.

This course focuses on historic and contemporary art and culture in China, and includes a study tour to multiple cities in China. Students will have the opportunity to investigate a wide variety of art making processes as well as develop conceptual works based on both historic and contemporary practices as they relate to the travel experience in China. Together, the artistic and cultural experiences in this course will broaden student perspectives and provide new avenues for personal expressions in art and culture studies.

Prerequisite: (100 - 399 or 100A - 399Z).

ART-344. Writing Intensive Program: Professional Practices In Graphic Design. 3 Hours.

This writing intensive course will introduce students to writing and general business practices that are applicable to a career in graphic design. The course will cover such topics as: graduate school research, resume building, freelance business documents development (business plan, invoice and contacts for design services) and the development of a professional portfolio for pursuing a career in graphic design. Required for all Graphic Design majors and open to Studio Art majors with a concentration in Graphic Design.

Prerequisite: ENGL-101 with a minimum grade of C.

ART-350. Printmaking II. 3 Hours.

This intermediate printmaking course will emphasize the planographic processes, which include screenprint, lithography and monotype. This course will also explore the possibility of the monoprint as it relates to these processes as well as continue a focus on research as it relates to personal studio practice.

Prerequisite: ART-250 with a minimum grade of C.

ART-351. Printmaking III. 3 Hours.

This advanced printmaking course introduces students to advanced techniques within traditional printmaking processes as well as experimental and non-traditional approaches. Students will investigate the possibilities of advanced printmaking techniques in relation to personal artistic vision and continue a focus on the development of independent studio practice and research. This course may be repeated up to three times.

Prerequisite: ART-350 with a minimum grade of C.

ART-352. Printmaking IV. 3 Hours.

This advanced printmaking course continues to explore advanced printmaking techniques with an emphasis on independent studio practice and research. Students will demonstrate a working knowledge of advanced printmaking techniques by creating a body of coherent and creative work. This course may be repeated up to two times.

Prerequisite: ART-351 with a minimum grade of C.

ART-355. Studies In Art & Social Practice. 3 Hours.

In this studio art course, students will be introduced to the concept of socially engaged art and produce studio projects that consider art in its relationship to social change. Students explore creative solutions that promote and affect social engagement, social interaction and community building. Social practice-based artwork includes a wide range of media and concepts in contemporary art practice and in this course, students connect their art practice to political, cultural and ethical conversations with an emphasis on participation, dialogue and action. Consult the Schedule of Classes for studio discipline and/or specific topic to be covered.

ART-356. Studio Thesis Seminar. 1 Hour.

This course will introduce students to practices associated with the creation of a coherent and comprehensive studio project, with an emphasis on research that compliments a creative practice. Students will gain experience with a project from start to finish, which will include preliminary assignments to explore formal and conceptual aspects of their work, group critiques and research. This course will give students the opportunity to work on a project outside of a specific studio course as well as provide experience for the senior capstone exhibition. Prerequisite: Completion of all seven Foundations courses with a minimum grade of C.

Prerequisite: ARTH-106 with a minimum grade of C and ARTH-107 with a minimum grade of C and ART-120 with a minimum grade of C and ART-130 with a minimum grade of C and ART-140 with a minimum grade of C and ART-220 with a minimum grade of C and ART-234 with a minimum grade of C.

ART-358. Studies In Studio Art. 3 Hours.

This course is a theme-based studio course that will give students an in-depth understanding of a particular topic in the studio arts that might not be included in permanent course offerings. Techniques and ideas appropriate to the topic will be explored through assignments, research, and critiques. Students will be encouraged to develop their individual interpretation and understanding of the topic through course discussion and studio work. Prerequisite: Completion of all seven Foundations courses with a minimum grade of C.

Prerequisite: ARTH-106 with a minimum grade of C and ARTH-107 with a minimum grade of C and ART-120 with a minimum grade of C and ART-130 with a minimum grade of C and ART-140 with a minimum grade of C and ART-220 with a minimum grade of C and ART-234 with a minimum grade of C.

ART-361. Photography II. 3 Hours.

This course explores photography beyond the use of a single frame. Topics will emphasize themes of time and storytelling through use of moving images, documentary projects, long exposure photography, multiple exposure photography, combination of text and image, photographic books, photographs as objects, or installations.

Prerequisite: ART-261 with a minimum grade of C or ART-170A with a minimum grade of C.

ART-362. Digital Manipulation. 3 Hours.

In this course, digital manipulation techniques are introduced and complemented by the development of a body of work. Assignments incorporate the technical aspects of specific skills while emphasis is placed on conceptual application.

Prerequisite: ART-170A with a minimum grade of C or ART-261 with a minimum grade of C.

ART-363. Controlled Photographic Lighting For In Studio And On Location. 3 Hours.

This course will cover the tools and techniques used to control photographic lighting. Emphasis is placed on creating solutions to complex lighting situations.

Prerequisite: ART-361 with a minimum grade of C.

ART-364. Historic And Alternative Photographic Processes. 3 Hours.

This course will cover a variety of historic photographic processes and alternative ways of making images. Students will create a portfolio that demonstrates conceptual maturation, advanced aesthetic skill, and technical competence in photography.

Prerequisite: ART-170A with a minimum grade of C or ART-170B with a minimum grade of C or ART-170C with a minimum grade of C or ART-170D with a minimum grade of C or ART-170E with a minimum grade of C or ART-170F with a minimum grade of C or ART-170G with a minimum grade of C or ART-170H with a minimum grade of C or ART-120 with a minimum grade of C.

ART-365. Photography Seminar. 3 Hours.

This course focuses on refinement of aesthetic and technical skills while developing a personal style in a self-directed, long-term photography project.

Prerequisite: ART-362 with a minimum grade of C.

ART-366. View Camera. 3 Hours.

This class explores the tradition and benefits of using the large format view camera. Emphasis is placed on technical proficiency with the camera to control perspective and manipulate the plane of focus. Topics range from landscape, architectural and portrait photography. Cameras are supplied to students for the duration of the class.

Prerequisite: ART-361 with a minimum grade of C.

ART-370. Ceramics II. 3 Hours.

This intermediate ceramic studio course will emphasize materials, techniques, and design within a problem solving environment. Specific aesthetic and technical criteria will be examined and individual development will continue to be emphasized.

Prerequisite: ART-270 with a minimum grade of C.

ART-371. Ceramics III. 3 Hours.

This advanced ceramics course focuses on continuing the development of strong craftsmanship and knowledge of ceramic processes and techniques including developing personal clay bodies, glazes and firing kilns. Emphasis will be placed on reinforcing the principles of ceramic building techniques while exploring a personal artistic direction. This course can be repeated up to three times.

Prerequisite: ART-370 with a minimum grade of C.

ART-372. Ceramics IV. 3 Hours.

This advanced ceramics course emphasizes advanced ceramic processes and thematic investigations for creating relevant and meaningful work using traditional and non-traditional approaches to clay. This class focuses on the development of an independent artist's practice through open assignments designed to engage students in self-directed research of conceptual themes and advanced technical processes. This course can be repeated up to three times.

Prerequisite: ART-371 with a minimum grade of C.

ART-377. Geometry Of Space: Projection, Speculation, And Translation. 3 Hours.

This course will explore geometry and some of its underlying mathematics through the lens of Art and Design. Coursework and topics will focus on the transition from two dimensional to three dimensional space. Course projects will be supplemented with historical contexts which have motivated the development of geometry as a field of study.

ART-379. Interactive Arts: Web I. 3 Hours.

This course is an introduction to the design processes and web code languages essential for building websites and creating art on the web. Course projects will center on current web design best practices, contemporary standards and will cover how to write syntactically correct HTML5 and CSS3. Students will gather information, explore potential concepts, and iterate on design mockups in order to design and implement responsive web projects, which address User Interface and User Experience.

Prerequisite: ART-234 with a minimum grade of C.

ART-380. Interactive Arts: Web II. 3 Hours.

Interactive Arts: Web II focuses on advanced modes of web interaction and User Experience/User Interface design. Students will expand their code knowledge to include PHP, AJAX and XML, with a focus on SASS and JavaScript. Students will be introduced to libraries, plugins and APIs, which allow for advanced control and creativity with web projects, including Dom and data manipulation, object oriented programming, and advanced animation. Students will navigate advanced programming concepts while iterating solutions with design thinking. Course projects will engage experimental & emerging approaches to design on the web, interactive pieces of net art, sequential animations and web apps.

Prerequisite: ART-385 with a minimum grade of C or ART-379 with a minimum grade of C.

ART-381. Studio In Graphic Design. 3 Hours.

Through a combination of digital and analog media, students will create applied design projects and discuss principles involved in the thought process, creation and production of a design project. Suggested readings supplement the class experience. This course may be repeated up to three times.

Prerequisite: ART-281 with a minimum grade of C and ART-314 with a minimum grade of C.

ART-3841. Internship In Graphic Design. 1 Hour.

On-site experience in a design studio, design department, advertising agency or approved design setting where a student will observe and participate in everyday activities and projects.

Prerequisite: ART-281 with a minimum grade of C and ART-314 with a minimum grade of C.

ART-3842. Internship In Graphic Design. 2 Hours.

On-site experience in a design studio, design department, advertising agency or approved design setting where a student will observe and participate in everyday activities and projects.

Prerequisite: ART-281 with a minimum grade of C and ART-314 with a minimum grade of C.

ART-3843. Internship In Graphic Design. 3 Hours.

On-site experience in a design studio, design department, advertising agency or approved design setting where a student will observe and participate in everyday activities and projects.

Prerequisite: ART-281 with a minimum grade of C and ART-314 with a minimum grade of C.

ART-385. Code Is Not Neutral. 3 Hours.

This studio course explores web code, design practices, and associated social injustice implications, specifically, the ways in which "big tech" and surveillance capitalism contribute to and uphold white supremacy and the carceral state. Students will be introduced to contemporary artists and designers as social practitioners, investigate the ways web-based technologies and web code are used to raise awareness and facilitate community, and create projects that push back against power structures.

Prerequisite: ART-234 with a minimum grade of C.

ART-386. Interactive Arts: Form & Motion. 3 Hours.

This course will examine intermediate approaches to 3d design, digital fabrication and time-based media. Through tutorials, collaborative experimentation and guided studio time, this course encourages students to experiment with new media technology and collaborative approaches to reach new audiences. Course projects are multidisciplinary in nature and are supplemented by the tools available in the Make Space, which students will be trained on at the beginning of the course. Guest lectures and readings will provide a cultural and technical framework for process-based projects. This course is open to novices and to those seeking to expand their existing studio practice.

Prerequisite: ART-280 with a minimum grade of C.

ART-387. Special Topics In Graphic Design. 3 Hours.

This course offers an opportunity for advanced study in the field of graphic design, focusing on one particular area within the broad spectrum of design practice. The topics examined in the class will rotate to cover a different area of focus each semester. The course is structured as a lecture and studio class offering an opportunity for in-depth analysis and practice. Topics covered include editorial design, branding and identity design, interactive design, art direction for advertising etc. This course may be repeated up to three times.

Prerequisite: ART-314 with a minimum grade of C.

ART-388. Typography II. 3 Hours.

Typography II focuses on advanced study of typographic form, as well as experimental approaches to typographic practice. In addition to advanced typesetting studies of multiple-page documents, students will work on customizing display typefaces, using non-traditional methods to generate unique typographic elements and exploring alternative methods for making meaning through the intersection of language and typography.

Prerequisite: ART-314 with a minimum grade of C.

ART-389. Print Production. 3 Hours.

This course will provide the information and techniques necessary to prepare graphics and text for professional printing. Projects will address pre-press procedures such as specifying output requirements, obtaining cost estimates, determining paper selection and performing press checks. Lecture topics cover techniques and terminology necessary for traditional and digital printing. Students will practice creating and preparing digital files for high resolution output and offset printing. The class will visit local companies involved in print production.

Prerequisite: ART-388 with a minimum grade of C.

ART-3901. Independent Study In Visual Art. 1 Hour.

Independent Study in Visual Art allows a student the opportunity to investigate a special interest that is not covered in a regularly scheduled course and is intended for the highly motivated student who has completed outstanding and significant coursework in a studio area of emphasis. To sign up for an independent study, the student must work with a faculty mentor to develop a proposal for a rigorous course of directed study, which will include goals and outcomes, and receive approval from the faculty mentor, the Art + Design Department Chair, and the College Dean.

Requirement: At least one 300 level course in studio area of proposed project, minimum grade of B.

ART-3902. Independent Study In Visual Art. 2 Hours.

Independent Study in Visual Art allows a student the opportunity to investigate a special interest that is not covered in a regularly scheduled course and is intended for the highly motivated student who has completed outstanding and significant coursework in a studio area of emphasis. To sign up for an independent study, the student must work with a faculty mentor to develop a proposal for a rigorous course of directed study, which will include goals and outcomes, and receive approval from the faculty mentor, the Art + Design Department Chair, and the College Dean.

Requirement: At least one 300 level course in studio area of proposed project, minimum grade of B.

ART-3903. Independent Study In Visual Art. 3 Hours.

Independent Study in Visual Art allows a student the opportunity to investigate a special interest that is not covered in a regularly scheduled course and is intended for the highly motivated student who has completed outstanding and significant coursework in a studio area of emphasis. To sign up for an independent study, the student must work with a faculty mentor to develop a proposal for a rigorous course of directed study, which will include goals and outcomes, and receive approval from the faculty mentor, the Art + Design Department Chair, and the College Dean.

Requirement: At least one 300 level course in studio area of proposed project, minimum grade of B.

ART-3911. Internship In Art. 1 Hour.

This internship course offers students on-site experience in a commercial or fine art studio setting where they will observe and participate in everyday activities and projects. **Prerequisite:** A 300 level Art course, minimum grade of C, in the medium related to the internship.

ART-3912. Internship In Art. 2 Hours.

This internship course offers students on-site experience in a commercial or fine art studio setting where they will observe and participate in everyday activities and projects. **Prerequisite:** A 300 level Art course, minimum grade of C, in the medium related to the internship.

ART-3913. Internship In Art. 3 Hours.

This internship course offers students on-site experience in a commercial or fine art studio setting where they will observe and participate in everyday activities and projects. **Prerequisite:** A 300 level Art course, minimum grade of C, in the medium related to the internship.

ART-394C. Senior Exhibition In Graphic Design. 2 Hours.

All students pursuing a BFA degree in Graphic Design are required to participate in a senior exhibition, under the guidance of a graphic design faculty mentor. Students are free to select their mentor, however the department recommends that this be someone that the student has worked with in the past. Students are responsible for creating exhibition level projects in cooperation with their faculty mentors in order to receive a passing grade. The final projects should have a specific, well-conceived theme, direction and intent and demonstrate the formal skills learned during the pursuit of a BFA in Graphic Design.

Prerequisite: ART-344 with a minimum grade of C.

ART-395. Writing Intensive Program: Professional Practices In Studio Art. 3 Hours.

This writing intensive course will introduce students to writing and general business practices that are applicable to a career in the visual arts. The course will cover such topics as: resume building, grant writing, statement writing, application writing for galleries, internships and residencies as well as other methods for sustaining a career in the visual arts. This course is an investigation, discussion and evaluation of what it means to live and work as an artist now and examines research strategies for both professional activities and personal artistic growth. Required for all Art majors with a concentration in Studio Art.

Prerequisite: ENGL-101 with a minimum grade of C.

ART-396. Senior Seminar And Exhibition. 3 Hours.

Senior Seminar and Exhibition is a required capstone course for all Art majors with a concentration in Studio Art and will guide students to prepare and complete their senior exhibition. This course provides a studio-based experience with intensive critique sessions to facilitate the completion of the student's final body of work and offers the benefit of concentrated faculty input as well as critical dialogue among peers. Students will explore the concepts, theories, influences and experiences that inform and support the self-directed work they present for review up to and in their senior solo exhibition.

Prerequisite: ART-395 with a minimum grade of C.

ART HISTORY

ARTH-101. Art And Society. 3 Hours.

Study the function of art in a variety of cultures with specific reference to American culture. Application of insights gained through inter-cultural analysis of contemporary issues. Slide lectures, films, gallery and museum visits.

ARTH-106. Introduction To Art History I. 3 Hours.

A survey of the visual arts from ancient to medieval times, emphasizing the major styles in their historical contexts. Introduces the basic qualities of each medium, the descriptive and critical vocabulary of art history, and the concepts of style, subject matter and content in the visual arts. Topics include the patronage of, and audience for, art; the changing social status of the artist; and the social, political and religious functions of art and architecture. Slide lectures and museum assignments.

ARTH-107. Introduction To Art History II. 3 Hours.

A survey of the visual arts from renaissance to modern times, emphasizing the major styles in their historical contexts. Introduces the basic qualities of each medium, the descriptive and critical vocabulary of art history, and the concepts of style, subject matter, and content in the visual arts. Topics include the patronage of, and audience for, art; the changing social status of the artist; and the social, political and religious functions of art and architecture. Slide lectures and museum assignments.

ARTH-202. Writing Intensive Program: Methods Of Research In Art History. 3 Hours.

This course is a focused and in-depth study of art historical research and methodology. It includes a critical review of the history of art historical studies, presentations on research methods for primary and secondary resources, and a systematic consideration of art historical methodology. Special attention is given to the critical and theoretical approaches of the "new" art history. The course is conducted in an informal seminar format with slide presentations and classroom discussions of artworks and required readings. It fulfills the university writing intensive requirement within the major.

Requirement: one 300-level ARTH course minimum grade of C

Prerequisite: ENGL-101 with a minimum grade of C and ARTH-106 with a minimum grade of C and ARTH-107 with a minimum grade of C.

ARTH-300. Contemporary Art. 3 Hours.

This course examines American and European painting, sculpture, and related artworks from 1950 to the present. The major artists and styles of the period are presented chronologically and discussed in the context of contemporary culture and events. Other topics include the development of new media, the relationship of art to politics, the major critical and theoretical approaches to contemporary art, the concept of postmodernism in the visual arts, and the rise of the art market and its relationship to the avant-garde.

ARTH-305. Ancient Mesoamerican Art & Architecture. 3 Hours.

This course introduces students to the art and architecture of ancient civilizations of Mesoamerica. We will discuss the art of the Olmec, Teotihuacan, Maya, and the Aztec Empire. The course focuses on the styles and iconography of these civilizations and takes an interdisciplinary approach to examine the function and symbolism of the works.

ARTH-306. Ancient South American Art & Architecture. 3 Hours.

This course is an introduction to the art of the ancient civilizations that inhabited the Andean region (primarily Peru, Ecuador, and Bolivia). Since these cultures did not develop a written language, information about their worldview and religious practices comes from their art and the archaeological record. The course focuses on the styles and iconography of these civilizations and takes an interdisciplinary approach to examine the function and symbolism of the works.

ARTH-306T. Peru Study Tour. 3 Hours.

This course is designed as a seminar that culminates in a Study Tour to Peru. Students will be able to explore the arts in Lima and Cusco while discussing important issues regarding the establishment of museum collections, the looting of ancient objects, the production of art forgeries, and the role of ancient art in Peruvian tourism.

ARTH-307. Art Of Latin America (1810-Present). 3 Hours.

This course covers the art of Latin America from the period of Independence to the present. The focus will be primarily on the arts of Mexico and South America, although some time will be dedicated to movements in Cuba and Haiti as well. Topics include: Romanticism in Latin America, Modernismo, Mexican Muralism, Indigenismo, Constructivism, Surrealism, Concrete and Neo-Concrete Art, Geometric art, Optical and Kinetic art, Conceptual and Political Art, and contemporary issues.

ARTH-308. Art And Ritual: African, Oceanic, And Native North American Art. 3 Hours.

This is an interdisciplinary course that will engage students in the study of artistic traditions outside of the Western world. Students will examine the relationship between art and ritual through specific case studies, with an emphasis on African, Oceanic, and Native North American traditions. Topics may include: art and rites of passage, masking and performance, and the use of objects as mediators with the supernatural realm.

ARTH-309. Asian Art. 3 Hours.

This course focuses on the arts of India, China and Japan. Lectures discuss representative works in painting, sculpture, architecture, calligraphy and decorative arts from each of these areas as well as the cultural and historical context in which they were created.

ARTH-310. Early Christian And Byzantine Art. 3 Hours.

Study of the arts from the early Christian period to the end of the Byzantine Empire in the east: stylistic and iconographic development of architecture, painting, sculpture, manuscript illustration and minor arts in context of contemporary politics and religion.

ARTH-311. Medieval Art of the West. 3 Hours.

This course examines the history of medieval western European art and architecture from the sixth to the fifteenth century. The major works, styles, and regions of this period are presented chronologically and discussed within the context of the culture and events of the day. Individual works of art are analyzed for style, subject matter, iconography, and content. Works of architecture are analyzed for style, function, materials, and structure. Special attention is given to the political and religious institutions, the religious and philosophical trends, and the social structures that shaped medieval art, architecture, and aesthetic theory.

ARTH-312. Italian Renaissance Art. 3 Hours.

This course focuses on the history of Italian art from the fourteenth century to the early sixteenth century. The major artists, styles, and regions are presented chronologically and considered within the context of the culture and events of the day. Individual works of art are analyzed for style, subject matter, iconography, and content. The social status of the artist and the patronage of works of art during this period are discussed, and special attention is given to the political and religious institutions, the religious and philosophical trends, and the social structures that shaped Italian Renaissance art and aesthetic theory.

ARTH-312T. Study Tour In Italy: Venice, Florence, Rome. 3 Hours.

This course focuses on Italian art from 1300 to 1550. It includes a two-week study tour to Venice, Florence, and Rome. The major artists, styles, and regions are presented chronologically and considered within the context of the culture and events of the day. Individual works of art are analyzed for style, subject matter, iconography, and content. The social status of the artist and the patronage of art during this period are discussed, and special attention is given to the political and religious institutions, the religious and philosophical trends, and the social structures that shaped Italian Renaissance art and aesthetic theory.

ARTH-313. Art Of The United States Of America. 3 Hours.

This course examines the history of painting and sculpture in the United States from colonial times to World War II. The major artists and styles are presented chronologically and considered within the context of the culture and events of the day. Individual works of art are analyzed for style, subject matter, iconography, and content. The changing roles of artists and patrons are discussed, along with the complex relationship of American art to European art and culture. Special attention is given to the political institutions, the religious and philosophical trends, and the social structures that shaped American art and aesthetic theory.

ARTH-316. Seventeenth Century European Art. 3 Hours.

This course examines the history of European painting and sculpture of the seventeenth century. The major works, artists, styles, and regions are presented chronologically and discussed within the context of the culture and events of the day. Individual works of art are analyzed for style, subject matter, iconography, and content. The social status of the artist, the mechanisms of patronage, and the location and function of works of art are discussed. Special attention is given to the political and religious institutions, the religious and philosophical trends, and the social structures that shaped the art and aesthetic theory of the period.

ARTH-318. 19th Century European Art. 3 Hours.

This course investigates the history of nineteenth-century western European painting and sculpture. The major works, artists, styles, and countries are presented chronologically and discussed within the context of the culture and events of the day. Individual works of art are analyzed for style, subject matter, iconography, and content. The rise of the avant-garde, the decline of the art academies, and the beginnings of the commercial gallery system are discussed. Special attention is given to the political institutions, the philosophical and intellectual trends, and the social structures that shaped nineteenth-century European art and aesthetic theory.

ARTH-319. European Art 1900-1950. 3 Hours.

This course focuses on European painting and sculpture from 1900 to 1950. The major works, artists, styles, and countries are presented chronologically and discussed within the context of the culture and events of the day. Individual works of art are analyzed for style, subject matter, iconography, and content. The rise of the avant-garde is discussed, as are the decline of the traditional art academies, the beginnings of the commercial gallery system, and the introduction of new media. Special attention is given to the political circumstances, the intellectual trends, and the historical events that shaped the art and aesthetic theory.

ARTH-360. History Of Photography: 1820's To Present. 3 Hours.

Students investigate the history of photography, including social, aesthetic, theoretical, and technical aspects, through lectures, discussions, field trips to relevant photographic exhibitions, readings, group projects, writing assignments, and/or exams.

Prerequisite: (100 - 399 or 100A - 399Z).

ARTH-3901. Independent Study In Art History. 1 Hour.

Independent Study is available for juniors and seniors who are prepared to formulate and execute an independent research project in Art History, working under the direction of a faculty member. Students are expected to write a research paper. Independent Studies require the approval of a faculty mentor, the Art Department chair and the College Dean.

Requirement: at least one 300-level ARTH course minimum grade of B

Prerequisite: ARTH-106 with a minimum grade of C and ARTH-107 with a minimum grade of C.

ARTH-3902. Independent Study In Art History. 2 Hours.

Independent Study is available for juniors and seniors who are prepared to formulate and execute an independent research project in Art History, working under the direction of a faculty member. Students are expected to write a research paper. Independent Studies require the approval of a faculty mentor, the Art Department chair and the College Dean.

Requirement: at least one 300-level ARTH course minimum grade of B

Prerequisite: ARTH-106 with a minimum grade of C and ARTH-107 with a minimum grade of C.

ARTH-3903. Independent Study In Art History. 3 Hours.

Independent Study is available for juniors and seniors who are prepared to formulate and execute an independent research project in Art History, working under the direction of a faculty member. Students are expected to write a research paper. Independent Studies require the approval of a faculty mentor, the Art Department chair and the College Dean.

Requirement: at least one 300-level ARTH course minimum grade of B

Prerequisite: ARTH-106 with a minimum grade of C and ARTH-107 with a minimum grade of C.

ARTH-3931. Art History/ Museum Studies Internship. 1 Hour.

This internship allows students to get supervised professional experience in an art museum, gallery, or arts center. Hands-on experience may include: art handling, cataloguing, exhibition installation, research, acting as docents for exhibitions, writing and editing informational materials, press releases, and proposals, as well as participating in the daily operations of a museum, gallery, or arts center. The course can be repeated up to a maximum of 6 credits.

Requirement: the approval of the instructor and the department chair, and the consent of the museum, gallery, or arts center staff

Prerequisites: ARTH-106 and ARTH-107 and (ARTH-300 - 392 or ARTH-300A - 392Z).

ARTH-3932. Art History/ Museum Studies Internship. 2 Hours.

This internship allows students to get supervised professional experience in an art museum, gallery, or arts center. Hands-on experience may include: art handling, cataloguing, exhibition installation, research, acting as docents for exhibitions, writing and editing informational materials, press releases, and proposals, as well as participating in the daily operations of a museum, gallery, or arts center. The course can be repeated up to a maximum of 6 credits.

Requirement: the approval of the instructor and the department chair, and the consent of the museum, gallery, or arts center staff

Prerequisites: ARTH-106 and ARTH-107 and (ARTH-300 - 392 or ARTH-300A - 392Z).

ARTH-3933. Art History/ Museum Studies Internship. 3 Hours.

This internship allows students to get supervised professional experience in an art museum, gallery, or arts center. Hands-on experience may include: art handling, cataloguing, exhibition installation, research, acting as docents for exhibitions, writing and editing informational materials, press releases, and proposals, as well as participating in the daily operations of a museum, gallery, or arts center. The course can be repeated up to a maximum of 6 credits.

Requirement: the approval of the instructor and the department chair, and the consent of the museum, gallery, or arts center staff

Prerequisites: ARTH-106 and ARTH-107 and (ARTH-300 - 392 or ARTH-300A - 392Z).

Major in Art (Art History)

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Art (Art History)

Art majors in the Art History concentration must complete 39 credit hours of the following courses:

Code	Title	Hours
Art History Concentration Requirements		
15 Hours of Core Requirements:		
ARTH-106	Introduction To Art History I	3
ARTH-107	Introduction To Art History II	3
ART-120	Drawing I	3
ART-130	Two-Dimensional Design	3
ART-140	Three Dimensional Design	3
Writing Intensive Requirement		
ARTH-202	Writing Intensive Program: Methods Of Research In Art History	3
Additional Requirements		
Select 21 hours of 300 level art history courses		21
Total Hours		39

In addition, there must be a demonstration of reading competence in a foreign language approved by the advisor or 6 credit hours of a foreign language.

This sample curricular map is provided to guide you in the planning of your progression for this major. This guide should not replace regular consultations with your program advisor. For specific recommendations of courses not identified, please consult your program advisor.

Major in Art (Studio Art)

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Art (Studio Art)

ART MAJORS IN THE STUDIO ART CONCENTRATION MUST COMPLETE 54 CREDIT HOURS OF THE FOLLOWING COURSES:

Code	Title	Hours
Studio Concentration Requirements		
15 Hours of Core Requirements:		
ARTH-106	Introduction To Art History I	3
ARTH-107	Introduction To Art History II	3
ART-120	Drawing I	3
ART-130	Two-Dimensional Design	3
ART-140	Three Dimensional Design	3
15 Hours at the 200 Level:		
ART-220	Drawing II	3
ART-234	Digital Foundations	3
Select three of the following:		9
ART-230	Painting I	
ART-240	Sculpture I	
ART-250	Printmaking I	
ART-261	Photography I	
ART-270	Ceramics I	
ART-280	Art + Tech I	
ART-281	Graphic Design I	
24 hours at the 300 level:		
Select three 300 level courses in a studio area of emphasis selected in consultation with an advisor.		9
Select two 300 level art history courses (one Western and one non-Western).		6
ARTH-300	Contemporary Art	3
Writing Intensive Requirement		
ART-395	Writing Intensive Program: Professional Practices In Studio Art	3
Senior Capstone		
ART-396	Senior Seminar And Exhibition	3
Total Hours		54

Major in Graphic Design

The Bachelor of Fine Arts in Graphic Design is an applied arts program with a focus on the development of visual solutions to communication problems, and offers students guided hands-on experience in the creation of visual messages in print and electronic media through the use of type, color, photography, animation and various other techniques. In addition, students will receive a broad historic and theoretical understanding of Graphic Design. Career opportunities in advertising, marketing, publishing, branding and interactive services will be introduced to students and special attention will be paid to establishing a relationship with the local design community.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Bachelor of Fine Arts in Graphic Design

Admission Requirements to the program

To be admitted to BFA in Graphic Design, students must complete the following courses with a 3.0 GPA or higher and undergo a portfolio evaluation. Applicants to the program must have a 2.5 or higher overall university grade point average. Students are admitted in the fall semester of each year only and must submit all materials (including the portfolio) for fall admission during the spring semester of their sophomore year.

Code	Title	Hours

Students are required to complete the following courses:

Code	Title	Hours
Minor in Art History Requirements		
ARTH-106	Introduction To Art History I	3
ARTH-107	Introduction To Art History II	3
Select four courses at the 300-level in Art History in consultation with an an advisor		12
Total Hours		18

Minor in Interaction Design

Through intensive skill building and guided studio and collaborative projects, students will develop processes and approaches applicable to various forms of making within the field of interactive/digital media. Coursework focuses on the integration of digital media and design through aesthetics, usability and creativity. Required courses cover skills in web programming, design for interaction, UX/UI design, new and alternative media, machine language, computer vision, digital fabrication and physical computing. Students will have opportunities to design and fabricate cross-disciplinary products while embracing an interdisciplinary approach to making through various languages, processes and terminologies in a variety of disciplines.

Admission Requirements:

- A minimum cumulative GPA of 2.5
- Successful completion of ART 234: Digital Foundations with a minimum grade of C
- Successful completion of ART 280: Art + Tech I with a minimum grade of C

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.

Total Hours		21

Minor in Photography

Students in the Photography Minor acquire technical skills in digital imaging, photographic lighting, and traditional and alternative processes. The curriculum emphasizes individual artistic development while integrating the history of photography and critical theory. Students are given the tools to create visually compelling photographs that communicate their artistic ideas.

Admission Requirements:

- A minimum cumulative GPA of 2.5
- Complete Art 130 (2D Design) with a minimum of C
- Complete Art 261 (Photography I) with a minimum of C (or ART 170A - Studio Experiences: Photography)

University Core Curriculum Requirements

Minor in Studio Art

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Studio Art

Students are required to complete the following courses:

Code	Title	Hours
Minor in Studio Art Requirements		
15 Hour Core Requirements:		
ARTH-106	Introduction To Art History I	3
ARTH-107	Introduction To Art History II	3
ART-120	Drawing I	3
ART-130	Two-Dimensional Design	3
ART-140	Three Dimensional Design	3
6 Studio Hours, select any two of the following:		6
ART-230	Painting I	
ART-240	Sculpture I	
ART-250	Printmaking I	
ART-261	Photography I	
ART-270	Ceramics I	
ART-280	Art + Tech I	
ART-281	Graphic Design I	
Total Hours		21

Students in the Early Childhood Education programs that have selected a studio minor must complete an additional 9 hours at the 300-level to meet graduation and certification requirements. Students in Elementary Education must complete 9 hours at the 300-level.

Asian Studies

- Minor in Asian Studies (<http://catalog.neiu.edu/arts-sciences/asian-studies/minor-asian-studies/>)

Andrew Eisenberg, Ph.D., Professor of History, Program Coordinator

Minor in Asian Studies

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Asian Studies (18 credit hours)

1. Courses selected to complete this minor
 - a. must be chosen from two or more academic disciplines,
 - b. must include at least 12 hours in 300-level courses,

- c. must cover material about more than one Asian country,
and
 - d. cannot be counted toward meeting requirements for any other major or minor.
- 2. The student must secure the approval of the Program Coordinator for the list of courses selected to complete the minor. This approval should be requested well before the completion of the courses themselves.

Biology

The Department of Biology offers courses of study leading to the degrees of Bachelor of Science and Master of Science, or to a minor in biology.

The Bachelor of Science in biology is designed to prepare students for:

1. Master's Degree or Ph.D. programs in biology, including biomedical sciences, genetics, molecular biology, and ecology;
2. health professional degree programs, including in medicine, dentistry, optometry, nursing, pharmacy, physical therapy, and veterinary medicine;
3. Master of Arts in Teaching programs to obtain licensure to teach biology to high school students; or
4. career opportunities in research, biomedical sciences, agriculture, industry, government, and academic institutions.

The graduate program leading to the Master of Science degree meets the needs of:

1. students seeking additional training and/or research experience in order to obtain employment that requires post-baccalaureate training,
2. current high school teachers and other professionals who seek advancement in their careers or who want to stay current in the field, and
3. students interested in completing an M.S. before going on to a doctoral program.

Our advisors are available to speak with you.

- Undergraduate students: we offer daily advising. Gain advice about recommended elective courses appropriate for your particular career goals and about requirements for graduation. Please email BiologyAdvising@neiu.edu to obtain the advising schedule.
- Graduate students: please contact Dr. Jorge Cantú, j-cantu@neiu.edu, for questions about admission to the M.S. degree program in Biology or about graduate program requirements.
- Interested in pursuing professional training in medicine, dentistry, pharmacy, optometry, physical therapy, or other health-related professions? Students can meet with the Director of Pre-Professional Advising, David Nissim-Sabat (d-nissimsabat@neiu.edu) to receive guidance on recommended courses and the application process.
- At the Student Center for Science Engagement, you may gain additional advice about careers, graduate studies, internships, and research opportunities. Visit them in BBH-235 or contact scse@neiu.edu.
- For information about earning a license to teach biology at the high-school level, contact Vanessa King, v-king@neiu.edu, or Dr. Katy Smith, k-smith1@neiu.edu, in the Goodwin College of Education.

Follow us on Facebook (<https://www.facebook.com/NEIUBiology/>), Instagram (<https://www.instagram.com/neiubiology/>), and Twitter (<https://twitter.com/NEIUBiology/>). Our handle is @NEIUBiology.

Would you like more information about the major or minor in biology? Biology advisors would be happy to help you. Please email BiologyAdvising@neiu.edu to arrange an advising appointment.

- Major in Biology (<http://catalog.neiu.edu/arts-sciences/biology/biology/>)
- Minor in Biology (<http://catalog.neiu.edu/arts-sciences/biology/minor-biology/>)

Interested in the graduate program in biology? Click below for more information and contact the Graduate Program Advisor, Dr. Jorge Cantú at j-cantu@neiu.edu.

- Master of Science in Biology (<http://catalog.neiu.edu/arts-sciences/biology/master-science-biology/>)

Please visit the biology faculty & staff (<https://www.neiu.edu/academics/college-of-arts-and-sciences/departments/biology/faculty-and-staff/>) page to learn about our teaching and research interests.

Jennifer Slate, Ph.D., Professor, Chair
Elyse Bolterstein, Ph.D., Associate Professor
Jorge Cantú, Ph.D., Associate Professor, Graduate Program Advisor
Pamela Geddes, Ph.D., Professor, Associate Chair
John M. Kasmer, Ph.D., Associate Professor
Shubhangee Mungre, Ph.D., Professor
Joel Olfelt, Ph.D., Professor
Beth A. Reinke, Ph.D., Assistant Professor

Emily Rumschlag-Booms, Ph.D., Associate Professor

Aaron Schirmer, Ph.D., Professor, Associate Chair

Michael Stern, Ph.D., Professor

Emina Stojkovič, Ph.D., Professor

John N. Thomas, Ph.D., Associate Professor

Cindy Voisine, Ph.D., Associate Professor

UNDERGRADUATE STUDENTS: One of the first courses to take in the biology major is BIO-250: Essential Skills for Biologists. The course must be taken before or along with the first 300-level BIO course. Transfer students should take BIO 250 in their first semester at NEIU. For an outline of courses to take for the biology major or minor, see Biology Major Requirements (<https://www.neiu.edu/sites/default/files/documents/2021/03/29/Biology%20MAJOR%20course%20requirements.pdf>) or Biology Minor Requirements (<https://www.neiu.edu/sites/default/files/documents/2021/03/29/Biology%20MINOR%20course%20requirements.pdf>). **Need guidance on which courses to choose, help with registration, or information on graduation requirements? Please email** BiologyAdvising@neiu.edu **to make an appointment with a biology advisor.**

GRADUATE STUDENTS: Up to 10 credit hours from select 300-level courses (BIO 351 or any course numbered BIO 357 through BIO 368) can be taken by graduate students to complete course requirements for the M.S. degree in Biology. **Please contact the Graduate Advisor, Dr. Jorge Cantú,** at j-cantu@neiu.edu, **for graduate program inquiries or obtain advising as a graduate student.**

Biology Course Offerings:

STAM-203. Design In Nature. 3 Hours.

Design in Nature will explore the ways evolution has led to various structures, behaviors, and body forms and will use these same processes to develop bio-inspired creative works. Special emphasis will be placed on biological perception, perspective, and process and how these can inform the design process. The course introduces topics in a workshop format, where students will work individually and in teams in both the field and in a studio environment to explore ideas and develop creative works. This course fulfills the Engaged Learning-Boundary Crossing (ELE-X) requirement and is co-taught by the Biology Department's Dr. Beth Reinke.

STAM 367. The Study Of Light In Biology And Photography. 3 Hours.

Light is one of the most prominent features of our natural world and has been studied by artists and scientists for centuries. This interdisciplinary course will focus on the study of light as it pertains to photography and biology. Through a series of interactive lectures, laboratories, and studio projects, students will learn how biologists and photographers study the perception, quantification, and analysis of light. The course will also combine these distinct perspectives to explore the implications of natural and anthropogenic light on our health and urban environment. This course fulfills the Engaged Learning-Boundary Crossing (ELE-X) requirement and is co-taught by the Biology Department's Dr. Aaron Schirmer.

BIO-100. Introduction To Biology. 3 Hours.

This course addresses the problems of living things with emphasis on human physiology and the propagation of life, covering major biological concepts and principles. The course consists of lectures and labs; labs include required dissection. (the course does not fulfill major or minor requirements in biology.).

BIO-104. The Changing Natural Environment. 3 Hours.

A biological approach to understanding the natural environment. This course introduces basic ecological principles including biogeochemical cycling, energy flow, the origins of biodiversity, and population growth; considers how humans interact with natural systems; examines the origins of contemporary environmental issues, including the role of humans in contributing to environmental changes; and explores potential solutions to environmental issues that are based on biological and ecological principles. Lecture only. (Does not fulfill major or minor requirements in biology.).

BIO-105. Environmental Biology Lab. 1 Hour.

This course provides a field and laboratory experience to accompany the M&S Concepts Minor Section of "Changing Natural Environment". Data collected in the field and laboratory will be used for analysis in the paired MATH-147 course in statistics and probability. The field and lab course will focus on the process of science-from exploratory and inquiry based laboratory field work to scientific communication and presentation skill. Technology will be threaded throughout the course. Topics include diversity and viability in nature, ecosystem services, and flows of matter and energy. This course is linked to BIO-104 and MATH-147.

Prerequisite: (BIO-100 with a minimum grade of C or BIOL-100 with a minimum grade of C) and (MATH-180 with a minimum grade of C or MATH-199A with a minimum grade of C).

Corequisites: BIO-104, MATH-147.

BIO-109A. First Year Experience: Alien Invasions Of Chicago. 3 Hours.

Global trade and travel has been responsible for spreading microbes, plants and animals across great distances and previously insurmountable barriers, and many of these species, once introduced into a new area become ecological invaders. Species that become invasive have strong negative impacts, both economic and ecological, so a great deal of resources are dedicated to controlling or removing them. This course will survey the diversity of species that have invaded ecological communities in the Chicago area, look at the factors that allowed them to become invasive, look at the ways in which these invaders have had negative ecological and economic impacts in the region, and review examples of how ecological principles have been and are being applied to control them. Students will meet with local experts in the field, in order to get first-hand experience with some of the more infamous invasive species and see Chicago from the perspective of urban ecologists.

BIO-150. Essential Skills For Biologists. 2 Hours.

A practical approach to providing students with the basic skill they will be expected to have in upper-division biology courses, including lab safety; methods and units of scientific measurement; scientific record-keeping, communication and library research skills; and summarizing and presenting data. Lecture and laboratory.

Prerequisites: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 45 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300) and (ESL-120 or ELP-099 or NEIU English Placement Writing 7 - 9 or ENGL-101 - 102 or (Accuplacer WritePlacer 4 and Accuplacer Sentence Skills 095 - 120) or (Accuplacer WritePlacer 5 - 8 and Accuplacer Sentence Skills 020 - 120)) and (READ-095 - 116 or ACT Reading 20 - 36 or NEIU English Placement Reading 5 - 9 or Accuplacer Reading Comp 080 - 120).

Corequisite: BIO-201.

BIO-199. Topics In Teaching Middle School Biology. 4 Hours.

Corequisite: MATH-145.

BIO-201. General Biology I. 4 Hours.

The first course of the general biology series focuses on the cell and molecular aspects of biology, including: the basic structure of animal and plant cells; intracellular organelles; metabolic pathways; the cell cycle; and basic genetics. Laboratory exercises emphasize scientific methods, hypothesis testing, data interpretation, and writing. These exercises include experience with basic techniques such as microscopy, biological assays, and gel electrophoresis. Lecture and laboratory. Can be taken concurrently with BIO-250.

Prerequisites: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 45 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300) and (ESL-120 or ELP-099 or NEIU English Placement Writing 7 - 9 or ENGL-101 - 102 or (Accuplacer WritePlacer 4 and Accuplacer Sentence Skills 095 - 120) or (Accuplacer WritePlacer 5 - 8 and Accuplacer Sentence Skills 020 - 120)) and (READ-095 - 116 or ACT Reading 20 - 36 or NEIU English Placement Reading 5 - 9 or Accuplacer Reading Comp 080 - 120).

BIO-202. General Biology II. 4 Hours.

In this second course of the general biology series we introduce the diversity of life in the context of evolutionary theory, studying biological processes at levels of organization ranging from populations to ecosystems. Laboratory exercises emphasize scientific methods, hypothesis testing, data interpretation, and writing. These exercises include surveys of major groups of organisms and dissections. Lecture and laboratory. Can be taken concurrently with BIO-250.

Prerequisite: BIO-150 with a minimum grade of C and (BIO-201 with a minimum grade of C or BIOL-102 with a minimum grade of C).

BIO-250. Essential Skills For Biologists. 2 Hours.

Students will gain proficiency with basic biological skills that will be further developed in upper-division biology courses. These skills include hypothesis development, experimental design and execution, analyzing and presenting data, scientific record-keeping, communication and library research skills, methods and units of scientific measurement, and lab safety. Can be taken concurrently with BIO-201 or BIO-202.

BIO-299. Ecology Concepts. 3 Hours.

This course provides a foundation in core ecology concepts as they relate to the practice of middle school teaching. A quantitative perspective will be stressed and topic will be analyzed using tools from calculus, technology, concept and agent modeling whenever possible. Course will focus on scientific inquiry methodology and process, from exploratory and inquiry-based laboratory and field work to scientific communication and presentation skills.

Topics include population growth, competition, and flows of matter and energy. This course is linked to MATH-380.

Prerequisite: BIO-100 with a minimum grade of C or BIOL-100 with a minimum grade of C and (BIO-104 with a minimum grade of C or BIOL-104 with a minimum grade of C) and (MATH-380 with a minimum grade of C or MATH-199X with a minimum grade of C).

BIO-300A. Foods And Drugs: Biology And Society. 3 Hours.

This course explores the biological effects of food and drugs. Topics include, but are not limited to, the structures, types, and metabolism of various macronutrients (carbohydrates, fats, proteins) and legal and illegal substances (opioids, alcohol, cannabinoids). The course also covers relevant aspects of human physiology; the role of foods and drugs in causing, treating, and preventing disease; and critiques of current and historical views on food and drugs. Does not count toward requirements of the major or minor in Biology.

BIO-301. Cell Biology. 4 Hours.

Basic molecular and cellular processes. Structures of biomolecules. Energetics: enzymes, photosynthesis, respiration. Genetic control: chromatin, DNA replication, RNA transcription and regulation, protein synthesis. Cell functions, including: protein secretion; cell membrane structure; transport and surface interactions; cell cycle; cell motility; cell growth; cell origins. Lecture and laboratory.

Prerequisite: (BIO-201 with a minimum grade of C or BIOL-102 with a minimum grade of C) and BIO-150 with a minimum grade of C and CHEM-211 with a minimum grade of C.

BIO-303. General Genetics. 4 Hours.

This course is designed to provide students with a comprehensive background in genetics including classical/Mendelian genetics, bacterial and phage/viral genetics, the chromosomal and molecular basis of heredity, and population genetics. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-305. Writing Intensive Program:General Ecology. 4 Hours.

An introduction to the basic concepts of ecology. Study of the factors/interactions that determine the distribution and abundance of species at the individual, population, community, and ecosystem levels. You will satisfy the writing intensive requirement by writing in a variety of discipline-specific formats. Lecture, laboratory, and fieldwork, with up to two field trips scheduled on a Friday, Saturday, or Sunday.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and ENGL-101 with a minimum grade of C and ENGL-102 with a minimum grade of C.

BIO-307A. Interdisciplinary Research Skills I. 3 Hours.

This course provides an introduction to a set of topics that are at the forefront of research in the sciences. The course is structured around a series of modules, each covering a topic that is among the most significant in the fields of Biology, Mathematics and Psychology (see course schedule below). The modules, while complete in themselves, will also draw connections between scientific disciplines, and explore the inter-relationships between them.

BIO-308. Interdisciplinary Research Skills II. 3 Hours.

In this second course of our research skills series we introduce a set of topics that are at the forefront of research in the natural sciences with emphasis on quantitative analysis and interpretation of research articles. The course is structured around a series of modules, each covering a topic in the fields of Biology and/or Mathematics. The modules, while complete in themselves, will also draw connections between scientific disciplines, and explore the inter-relationships between them. The modules will vary depending on the assigned faculty to teach this course.

Prerequisite: BIO-307A with a minimum grade of C or BIO-307 with a minimum grade of C.

BIO-310. Evolution. 3 Hours.

A reading/lecture/discussion course on the facts, theories and principles of organic evolution. Lecture only.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-311. History of Science. 3 Hours.

Development of the scientific method and knowledge of the natural sciences from ancient civilization to the present. Lecture only.

BIO-312. Foods And Drugs: Biology And Society. 3 Hours.

This course explores the biological effects of food and drugs. Topics include, but are not limited to, the structures, types, and metabolism of various macronutrients (carbohydrates, fats, proteins) and legal and illegal substances (opioids, alcohol, cannabinoids). The course also covers relevant aspects of human physiology; the role of foods and drugs in causing, treating, and preventing disease; and critiques of current and historical views on food and drugs.

Prerequisite: (100 - 399 or 100A - 399Z or).

BIO-315. Communicating Biology. 3 Hours.

Students will explore the basics of communicating biology to scientists, non-scientists, and interested stakeholders. Through discussions, group work, and individual assignments, students will practice techniques associated with writing, presenting, and sharing biology and biological results. The assignments consist of formal and informal writing, presentations, and graphical design products.

Prerequisite: ENGL-101 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-318. Human Anatomy And Physiology I. 4 Hours.

This is the first course in a two course series of human anatomy and physiology. It will provide a foundation of anatomical terms and explain structure-function relationships of tissues and organs. The course will focus on the anatomy and physiology of integumentary, skeletal, muscular and nervous systems. Interaction and regulation of various systems to maintain homeostasis will be studied. In the lab component, students will get hands on experience with a human cadaver. They will examine and identify each system studied in class. Wherever possible, histology of tissues will be studied. Pathological conditions of each system will be discussed, including recent advances in treatment.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C.

BIO-319. Human Anatomy And Physiology II. 4 Hours.

This is the second course in a two course series of human anatomy and physiology. The course will focus on the anatomy and physiology of respiratory, circulatory, digestive, urinary, reproductive and endocrine systems. Interaction and regulation of these systems to maintain homeostasis will be studied. In the lab component, students will study human cadaver as well as anatomical models. Wherever possible, histology of tissues will be studied. Pathological conditions of each system will be discussed, including recent advances in treatment.

Prerequisite: BIO-318 with a minimum grade of C and BIO-301 with a minimum grade of C.

BIO-320. Animal Kingdom. 4 Hours.

Anatomy, physiology, classification and phylogeny of animals. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-322. Invertebrate Zoology. 4 Hours.

Taxonomy and comparative morphology of the major phyla of invertebrates, organisms that comprise about 95% of animal life. Topics include life histories of representative species. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-323. Entomology. 4 Hours.

Insects, their identification, classification, habits and ecological relationships with special emphasis on those common to the Chicago area. Lecture, laboratory and fieldwork.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-324. Ornithology. 4 Hours.

Birds, their identification, classification, habits and ecological relationships with special emphasis on those common to the Chicago area. Lecture, laboratory and fieldwork.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-325. Local Fauna. 4 Hours.

This course provides a survey of local animal groups in various ecosystems in the region, with an emphasis on field identification of vertebrate taxa. Class will regularly meet off-campus, and may have up to two field trips scheduled on a Friday, Saturday, or Sunday. Lecture, laboratory, and fieldwork. In addition to the prerequisites of BIO-150, BIO-201 and BIO-202, BIO-305 is recommended.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-326. Animal Parasitology. 4 Hours.

Taxonomy, anatomy, physiology and significance of parasitic animals; host-parasite interactions; distribution of parasites throughout the world; examination of their life cycles, and prophylaxis and therapy of parasitic infections. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-327. Mammalian Anatomy. 4 Hours.

Gross architectural elements of the mammalian body, with emphasis upon correlation of form and function. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-328. Animal Behavior. 3 Hours.

Comparative ethology in the animal kingdom and its adaptive significance based upon the evolution of form and function of the nervous system, sense organs and effector organs. Topics include instinct, learning, intelligence, social organization and their physiological integrating mechanisms. Lecture only.

Prerequisite: BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-330. Plant Anatomy And Morphology. 4 Hours.

Plants are a diverse and important group of organisms. In this course students compare the morphology and anatomy of vascular and nonvascular plants, use scientific method to answer a question about plants using microscopy and other anatomical or morphological techniques, and communicate results of their studies to classmates. The course includes instruction in plant identification techniques and in taxonomic methods. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-331. Plant Physiology. 4 Hours.

Physiochemical basis of plant life, emphasizing life processes of major significance to the seed plants. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C.

BIO-332. Local Flora. 4 Hours.

The study of local plant species, with emphasis on phylogenetic relationships, systematics, ecological relationships and economic or ethnobotanic uses. Focus will be on species that are flowering during the semester that the course is taught, usually summer or fall. Lecture, laboratory and field trips.

Prerequisite: BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-333. Economic Botany. 3 Hours.

Plants of particular economic significance to humans as sources of food, fibers, flavoring agents, drugs and industrial chemical; horticultural plants; the role of economic plants in past and modern society. Lecture Only.

Prerequisite: BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-334. General Mycology. 4 Hours.

The study of fungi, a distinct kingdom of unicellular and filamentous organisms, Fungi have tremendous ecological importance playing essential roles as decomposers as well as parasites and symbionts. Fungi also have significant economic importance in the food and beverage industries. This course covers all aspects of fungal biology, including laboratory culture, natural history, morphogenesis, genetics and physiology. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-340. Molecular Biology. 4 Hours.

This course is designed for upper level undergraduates and builds on Genetics and Cell Biology. Molecular biology is rapidly advancing the fields of biomedical and agricultural sciences. Understanding the chemistry of DNA, RNA and proteins has allowed scientists to manipulate these macromolecules to more fully understand cellular functions, treat human diseases and engineer more viable crops and live stock. This course will provide students with a broad understanding of molecular biology as well as teach modern molecular biology techniques routinely used in research labs, forensics labs and hospital diagnostic labs. Lecture and Laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and CHEM-211 with a minimum grade of C and (BIO-301 with a minimum grade of C or BIO-303 with a minimum grade of C or BIO-362 with a minimum grade of C).

BIO-341. General Microbiology. 4 Hours.

Study of the taxonomy and identification, ultrastructure and function, nutrition and growth, physiology, metabolism, molecular genetics, host-microbial interactions, immunology ecology and biotechnology of microorganisms and viruses. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C.

BIO-342. Pathogenic Microbiology. 3 Hours.

Systematic study of the distinctive cellular and molecular properties of pathogenic microorganisms including bacteria, fungi, viruses and protozoans. Mechanisms of infection, diagnosis, treatment and control of these microorganisms. Lecture only.

Prerequisite: BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-341 with a minimum grade of C.

BIO-343. Virology. 4 Hours.

The course is designed to give students a background of animal, plant and bacterial viruses with further emphasis on animal viruses. Topics covered will include but are not restricted to, replication strategies and life cycle, molecular mechanisms of infection, virus host interactions, viral evasion of body's immune response and various pathological conditions. Laboratory exercises will include growth and isolation of virus, plaques assays, DNA cloning and expression of heterologous gene using a viral vector. Upon completion of the course, students will have a knowledge base useful towards medical or other health related careers. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C.

BIO-344. Vertebrate Histology. 4 Hours.

This course will focus on the basic characteristics and identification of the primary vertebrate tissues, as well as their organization into organ systems. Where appropriate microanatomy will be integrated with organ functions. Examination of microscope slides, light micrographs, and electronmicrographs of tissues and organs will be used in the study of vertebrate histology. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C.

BIO-345. Emerging Infectious Diseases. 3 Hours.

Emerging infectious diseases are those that have not previously been seen and those that are re-emerging after having been controlled. This course will provide an introduction to significant emerging infectious diseases in humans. Through a combination of lecture, discussion, and in-class activities, this course will focus on factors that contribute to emerging infectious diseases, mechanisms of disease transmission, as well as analysis of specific diseases, their associated diagnosis and prevention.

Prerequisite: BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-341 with a minimum grade of C.

BIO-346. Parasites And Human Health. 3 Hours.

In-depth study of the major helminth, protozoan, and arthropod parasites of humans. The course will compare these organisms to other human pathogens and provide insight into their unique historical and contemporary importance at the individual host, population, and global scales. Using a mathematical epidemiological approach, this course is designed to give students a hands-on experience with topics including transmission, pathology, immunology, and distributions of parasites within and among human hosts. The course will also provide students with a broad understanding of diagnosis, control, treatment, and prevention. Lecture. Prerequisites: BIO-150, BIO-201, BIO-202, BIO-305, MATH-187 OR MATH-275. BIO-326 recommended.

Prerequisite: BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-305 with a minimum grade of C and (MATH-187 with a minimum grade of C or MATH-275 with a minimum grade of C).

BIO-350. Plant Ecology. 4 Hours.

An introduction to how the concepts of ecology have been developed for and applied to plant systems. This course is an extension of General Ecology and emphasizes not only the ways in which general principles have been applied to plants, but also concepts and methodology unique to plants. Lecture, laboratory and fieldwork.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-305 with a minimum grade of C.

BIO-351. Phycology. 4 Hours.

By studying the biology of algae, students will examine the complex ecological interactions of algae with their environments, the roles that algae have played in the evolution of life, and the increasing uses of algae in biotechnology. There will be several sampling trips to wetlands, lakes, and streams, including a Friday or Saturday field trip outside of Cook County. Students will design and conduct original research projects involving identification and study of algal taxa. The course fulfills the undergraduate requirement for a botany elective and can also be taken for graduate credit. Lecture, laboratory, and fieldwork.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-352. Aquatic Biology. 4 Hours.

Students will study the biological processes that occur in freshwaters, the measurement of those processes, and the interaction of biological processes with water chemistry. Students will learn to collect quantitative ecological samples through field work in area lakes and rivers and they will analyze the biological organisms and related water chemistry of their samples upon return to the lab. Students will design and conduct original research projects. there will be several field trips, including a Friday or Saturday field trip outside of Cook County. Lecture, laboratory and fieldwork.

Prerequisite: CHEM-211 with a minimum grade of C and BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-356. Microbial Ecology. 3 Hours.

This course focuses on the essential roles played by Bacteria, Archaea, and Fungi in the world around us and within us, and is recommended for students interested in environmental science, ecology, or medicine. The course builds on fundamental biological and ecological principles; explores ways that microbial communities are similar to plant and animal communities, and ways in which they are unique; examines microbial drivers of major biogeochemical cycles and ecosystem services; characterizes relationships of microbes with other organisms; and considers the history of microbial interactions with humans, as antagonists (diseases), symbionts (microbiomes), and tools (food and biofuels). Lecture only.

Prerequisite: BIO-305 with a minimum grade of C.

BIO-357. Community Ecology. 3 Hours.

The course is designed for upper-level undergraduates and graduate students who are generally interested in ecology, conservation biology, and restoration ecology. Specifically, the course focuses on community ecology, an area of ecology that emphasizes how the interrelationships among several species within an area determine the structure and function of ecological communities within an ecosystem. The course explores the attributes that characterize communities as well as their organizing principles. In addition, the course covers approaches to their study and the implications they have on ecosystems. Throughout the course, examples from marine, terrestrial, and freshwater communities will be used to address the conceptual basis of the class. This class relies heavily on active discussion of primary literature (current and classic) as well as in-depth writing on selected topics.

Prerequisite: BIO-305 with a minimum grade of C.

BIO-358. Biological Geography. 3 Hours.

Geographic distribution of living organisms and the biological and geological principles underlying this distribution. Lecture only.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-305 with a minimum grade of C.

BIO-359. Ecological Methods. 4 Hours.

Field and laboratory methodology for the ecologist. Includes instruction on experimental design, quantitative sampling, data acquisition and interpretation as well as the preparation of project reports. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-305 with a minimum grade of C and MATH-275 with a minimum grade of C.

BIO-360. Vertebrate Physiology. 4 Hours.

Functions and interrelationships of organ systems. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C.

BIO-361. Human Genetics. 4 Hours.

This course is designed for upper level undergraduate and graduate students, builds on General Genetics, and emphasizes human medical genetics.

Topics covered include but are not restricted to: known human genetic disorders; use of karyotyping, microsatellite analysis and sequencing in the diagnosis of genetic disorders; use of pedigrees, epidemiological and molecular studies in the identification of genetic contributions to multifactorial conditions and diseases. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-303 with a minimum grade of C.

BIO-362. Biochemistry. 4 Hours.

Chemistry and metabolism of carbohydrates, proteins, nucleic acids, lipids, vitamins and minerals associated with animal and plant life. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C and CHEM-231 with a minimum grade of C.

BIO-363. Immunology. 4 Hours.

The goals of the course are to study the role of cells and organs of immune system in health and disease. Topics covered will include but are not restricted to innate and adaptive immunity, molecular mechanisms of antibody diversity, major histocompatibility complex, complement system, immunodeficiency, allergies, immunology of cancer and organ transplantation. Recent developments in techniques and immunotherapies will also be discussed. The course will give the students theoretical and practical knowledge applicable to medical and other health related fields.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C.

BIO-364. Endocrinology. 4 Hours.

The study of hormones and other signaling molecules and their functions in growth control, maintaining homeostasis and reproduction. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C and CHEM-231 with a minimum grade of C.

BIO-365. Neurobiology. 4 Hours.

This course is designed for upper level undergraduate and graduate students. An in depth examination of nervous systems in vertebrates and invertebrates. Topics covered include but are not restricted to: excitable membrane physiology, synaptic mechanisms, and neuronal organization with emphasis on the integrative aspects of neural function. Lecture and laboratory. (Recommended one Physiology course - Bio 318, Bio 319, Bio 331 or Bio 360).

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C.

BIO-366. Cancer Biology. 3 Hours.

This course is designed for upper level undergraduate and graduate students and emphasizes the molecular and cellular basis of cancer. Topics covered include epidemiology of cancer, genetics of cancer, molecular mechanisms behind cancer, impact of viruses on human cancer development, and the biochemistry of cancer. Lecture only.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C and BIO-303 with a minimum grade of C.

BIO-367. Developmental Biology. 4 Hours.

This course is designed for upper level undergraduate and will build on concepts covered in introductory biology using skills and knowledge gained in Cell Biology and Physiology. We will look at patterns of normal and abnormal development in the embryo emphasizing development interactions between cells and systems and how these systems are disrupted during development leading to birth defects. The course is designed to give students the basic knowledge needed to go on into research or professional school. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-303 with a minimum grade of C and (BIO-301 with a minimum grade of C or BIO-327 with a minimum grade of C).

BIO-368. Genomics and Proteomics. 3 Hours.

Genomics and Proteomics involves the use of high throughput methods and state of the art techniques, databases, and computations to generate, organize, explore, and analyze large data sets of DNA and/or protein sequence. This course will provide an introduction to the fields of genomics and proteomics. Through a combination of lecture, discussion, and hands on activities this course will focus on the methods and techniques used in gathering and interpreting genomic and proteomic data to answer questions important to various aspects of modern day biology.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-303 with a minimum grade of C.

BIO-372. Biochemistry Of Metabolism. 3 Hours.

Biochemistry of Metabolism is lecture-based course that focuses on the processing of carbohydrates, lipids, proteins, and nucleotides. This course will offer a mechanistic view of metabolic pathways related to each macromolecule group, including feedback control. Each section will be linked to clinical situations and will incorporate current primary research literature in the field of metabolism. Quantitative analysis of chemical reactions, bioenergetics, thermodynamics and interpretation of research articles will be incorporated as part of the lectures.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-362 with a minimum grade of C.

BIO-380D. Topics In Biology:Microbial Genetics. 3 Hours.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-341 with a minimum grade of C.

BIO-380E. Topics In Biology:Introductory Bryology. 3 Hours.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-380H. Topics In Biology: Sensory Mechanisms. 3 Hours.

This course is designed for students interested in learning how organisms (including humans) detect, process and respond to sensory stimuli such as light, odors, touch, taste, and sound. Students will also learn about the mechanisms used by a wide range of organisms to sense both their internal and external environments. This comparative approach will emphasize common principles of sensory coding and transduction as well as unique strategies used to address specific biological needs. Lectures and associated readings will focus on physiological, neurobiological and behavioral analyses to understand both the proper functioning and dysfunction of sensory systems.

Prerequisite: BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C.

BIO-381. Independent Study I. 1 Hour.

Library study of a biological topic, including a thorough literature search and production of a review paper on the chosen topic.

BIO-382. Independent Study II. 2 Hours.

(See BIO-381 for description and prerequisites.).

BIO-383. Independent Study III. 3 Hours.

(See BIO-381 for description and prerequisites.).

BIO-390. Biology Senior Seminar. 3 Hours.

This course is intended for students who are within two semesters of graduation. The goals of the course are to provide students with the opportunity to explore topics of particular interest to them, in greater depth than is usually possible within the context of topic specific courses and to assess whether students are able to integrate knowledge gained from different courses and/or disciplines. As part of the course, students will be required to take the MFAT. THIS COURSE FULFILLS THE CAPSTONE REQUIREMENT FOR THE BIOLOGY MAJOR.

BIO-391. Internship In Biology. 3 Hours.

Field or laboratory experience at an off-campus site guided by a faculty advisor, and a site supervisor. Requirements include; submission of a summary of the planned intern project and results, including a review of the relevant literature; presentation of the project in either podium format. Students are also required to take the MFAT. THIS COURSE FULFILLS THE CAPSTONE REQUIREMENT FOR THE BIOLOGY MAJOR.

BIO-392. Independent Research I. 2 Hours.

Field or laboratory study of a biological topic or question to be carried out over the course of 1-2 terms. Requirements include; design and execution of the research project; review of relevant scientific literature; production of a scientific style paper describing the project and results; presentation of the project in either podium or poster format. Students will also be required to take the MFAT. THIS COURSE FULFILLS THE CAPSTONE REQUIREMENT FOR THE BIOLOGY MAJOR.

BIO-393. Independent Research II. 2 Hours.

Field or laboratory study of a biological topic or question to be carried out over the course of 1-2 terms. Requirements include; design and execution of the research project; review of relevant scientific literature; production of a scientific style paper describing the project and results; presentation of the project in either podium or poster format. Students will also be required to take the MFAT. THIS COURSE FULFILLS THE CAPSTONE REQUIREMENT FOR THE BIOLOGY MAJOR.

BIO-394. Seminar In Teaching Of Biology. 3 Hours.

This course will provide students with the opportunity to gain practical experience with methods of post-secondary teaching in the biological sciences. Students will participate in preparation, presentation and grading of lecture, laboratory and assessment materials. Students are required to identify a faculty mentor to advise and guide the teaching experience no later than the term before he/she registers for the course. As part of the course, students will be required to take the MFAT. THIS COURSE FULFILLS THE CAPSTONE REQUIREMENT FOR THE BIOLOGY MAJOR.

BIO-405. Biological Literature. 3 Hours.

Overview of scientific communication in biology with the focus on the researching, critiquing, and synthesizing of primary scientific literature. Other activities may include, but are not limited to writing grant proposals, presenting research, creating scientific posters, participating in peer review, and engaging in professional development to help further students' careers in biology.

BIO-408. Environmental Biology for Middle School Teaching. 4 Hours.**BIO-411. Spreadsheet Modeling In Ecology & Evolution. 3 Hours.**

This course will introduce students to the use of basic and advanced spreadsheet applications to model a wide variety of ecological and evolutionary processes and systems. Graphing capabilities, complex nested functions, and advanced software functions including writing macros, sampling from statistical distributions, using lookup tables will be used extensively. Students will complete independent projects in which they generate their own models using data from the literature and present their results both orally and in writing. Extensive work outside of the classroom will be required. Students are expected to have completed coursework in ecology and statistics before taking this course.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-412. Chronobiology. 3 Hours.

Most living organisms display oscillations in many biological, physiological, and behavioral processes. These oscillations confer adaptive advantages for survival on a planet that revolves on its axis once every 24 hours. Chronobiology is the study of these adaptations. Through a combination of group activities, discussion, and lecture this course focuses on the physiologic and genetic generation of 24 hour rhythms, as well as the behavioral and physiological processes that they control in various species.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-413. Evolutionary Biology. 3 Hours.

This course provides a comprehensive analysis of evolutionary patterns in both fossil and contemporary species. Topics addressed include an overview of the history of evolutionary biology, Hardy-Weinberg equilibrium assumptions about non-evolving systems, Darwinian and non-Darwinian mechanisms of evolutionary change, the Biological Species Concept and alternative species definitions, pre-zygotic and post-zygotic mechanisms of speciation, and current views on the origin and natural history of life on Earth.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-414. Comparative Biology Of Aging. 3 Hours.

This course provides a comparative analysis of aging, longevity, and mortality patterns in diverse prokaryotic and eukaryotic species. Topics addressed include an overview of the history of biological gerontology, life-table construction and analysis, populational and physiological measurements of senescence, theoretical models of aging and longevity, use of vital statistics mortality data, biochemistry of free-radicals and antioxidant molecules, and therapeutic intervention to prolong lifespan in various species.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-415. Animal Behavior. 3 Hours.

This course provides advanced study and analysis of selected topics within the field of Animal Behavior with emphasis on topics that are currently at the forefront of the discipline. Depending on the term, the course may emphasize studies of animal behavior within an ecological, evolutionary and/or neuroethological context.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-421. Biochemical Genetics. 3 Hours.

This course explores the biochemistry of the genetic material and the cell's ability to replicate, transcribe and translate genetic information. Recent discoveries in gene manipulation are discussed. Lecture and discussion.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-424. Analysis Of Development. 3 Hours.

This course provides an analysis of the mechanisms underlying developmental processes in the embryo and adult organisms with special emphasis on the role of the genes in development. Lecture only.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-425. Animal Models of Human Disease. 3 Hours.

Because of the ethical and logistical challenges of studying disease using human subjects, biologists use model organisms and model systems to understand the underlying mechanisms responsible for diseases, and to identify potential treatments and cures. Through lecture, literature research, and discussion this course will examine examples of how animal models are being used in biomedical research. Systems covered include mammalian species, non-mammalian vertebrate species, and invertebrate species. Course may be repeated for credit with permission from the Graduate Advisor.

BIO-427. Current Topics In Genetics. 3 Hours.

This course provides students with advanced study and analysis of selected topics within the field of Genetics, with emphasis on topics that are at the forefront of advances in the discipline. Course may be repeated for credit one time with permission from the Graduate Advisor.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-428. Current Topics In Human Genetics. 3 Hours.

This course provides an advanced study and analysis of selected topics within the field of Human Genetics, with emphasis on topics, such as the Human Genome and HapMap projects, epistasis, etc., that are at the forefront of advances in our understanding of human heredity, development and disease.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-441. Biology Of Viruses. 3 Hours.

The structure and replication of viruses, strategies of host defense and viral evasion, and use of viruses in biotechnology. RNA- as well as DNA-viruses will be included. Current research papers will be discussed to make students aware of advances being made in the field.

BIO-447. Current Topics In Cell Biology. 3 Hours.

Advanced study and analysis of selected topics within the field of Cell Biology, with emphasis on topics that are at the forefront of advances in the discipline. Course may be repeated for credit one time with permission from the Graduate Advisor.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-450. Foundations Of Ecology. 3 Hours.

Students will engage in readings and discussions of foundational papers in ecology, and classic case studies of field and laboratory experiments in ecology. The readings will provide an overview of the development of ecology as a science, look at the major debates in ecology, and examine the development of both theory and methodologies in ecology. Students will also present and discuss contemporary papers in light of these historical contexts. Students are expected to have completed coursework in ecology before taking this course.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-451. Biological Diversity. 3 Hours.

The course covers contemporary and historical patterns of biodiversity, current hypotheses for local, regional and global diversity trends, diversity case studies from plant and animal communities in aquatic and terrestrial systems. Lecture and discussion.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-452. Quaternary Ecology. 4 Hours.

This course provides an introduction to the principles and techniques of paleoecology with emphasis on the effects of global and regional climate/environmental change on ecosystems, communities, and populations during the Quaternary Period. Lecture and laboratory.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-453. Conservation Biology. 3 Hours.

This course will explore how ecological theory (including mathematical models), principles, and methodologies are applied to the conservation of populations, species, communities, and landscapes. Covered topics include biodiversity, the demographic and genetic structure of populations, population viability analysis, the problems that small populations face, extinction as a historical and contemporary process, current tools applied in conservation (e.g., GIS, molecular tools), and the application of ecological principles to nature reserve design and ecosystem management. Students will read extensively from the primary literature, lead class discussions, and solve applied and quantitative problems.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-454. Conservation Genetics. 3 Hours.

Advanced study of genetic theory and practice applied to the conservation of organisms. Current primary literature will be incorporated into the course through written assignments and discussions. Current conservation genetic techniques and computer-based data analysis methods will be practiced in the laboratory.

Prerequisite: BIO-303 with a minimum grade of C and BIO-305 with a minimum grade of C.

BIO-455. Restoration Ecology. 3 Hours.

This course explores how ecological research and concepts can be applied to the restoration of disturbed ecosystems. It will take into account current trends and challenges in restoring populations, communities and ecosystems. Students are expected to have completed coursework in ecology prior to taking this course.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-456. Bio-Environmental Analysis. 3 Hours.

Individual and group field projects providing experience in techniques appropriate to the analysis of natural communities and their environmental components. Studies include contrasts between selected natural areas and similar ones altered by humans. A summary interpretive paper, using data acquired, is required from each student. Lecture, laboratory, and fieldwork.

BIO-457. Current Topics In Ecology & Evolution. 3 Hours.

This course provides graduate students with an opportunity to explore a current topic in ecology and evolutionary biology from a variety of perspectives and scales, ranging from theory to molecular biology to community ecology. Each semester will be organized around a single book or edited volume. Students will read, present, and lead discussions on chapters from the selected book, along with related papers chosen from the recent primary literature. Students may take the course twice for credit, as long as the focal topic of the course is different.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-462. Enzymology. 3 Hours.

The course covers enzymes as protein catalysts. The structure of a biological catalyst as discerned by x-ray diffraction, chemical modification, nuclear magnetic resonance, and kinetic studies is analyzed and related to function. Lecture, demonstration, discussion, and laboratory.

Prerequisite: BIO-362 with a minimum grade of C.

BIO-463. Plant Biochemistry. 3 Hours.

This course focuses on metabolic pathways of particular importance to plants, such as photosynthesis, the dissemination of starch, nitrogen fixation, and the formation of certain secondary products. Also covered are metabolic pathways common to plants and other groups of organisms, and phytohormonal control. Lecture and discussion. Students are expected to have completed coursework in biochemistry or plant physiology prior to taking this course.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-464. Biochemistry And Molecular Biology Methods. 4 Hours.

This is a graduate-level lecture and laboratory course that provides training in essential experimental methods used in modern Biochemistry and Molecular Biology, including both wet-lab and computer analysis tools, while reviewing basic structure and function of biological molecules. Students are expected to have completed coursework in biochemistry or molecular biology prior to taking this course.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-470A. Seminars In Biology. 1 Hour.**BIO-471. Comparative Animal Physiology. 3 Hours.**

Physiological and biochemical evolution of animals with emphasis on the range and variety of physiological mechanisms and processes involved in adaptations to special habits and habitats. Lecture and laboratory.

Prerequisite: BIO-360 with a minimum grade of C.

BIO-475. Advanced Immunology. 3 Hours.

This course examines contemporary issues in immunology, related to diversity in immune response. Lecture and discussion of current papers on inheritance of immune response, tolerance, cancer immunology and immunotherapy. Lecture and discussion.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-4821. Independent Investigations. 1 Hour.

Students registering for this course will conduct a field or laboratory study of a biological topic or question, to be carried out over the course of 1-2 terms. Requirements include two or more of the following- design and execution of the research project; review of relevant scientific literature; production of a scientific style paper describing the project and results; presentation of the project in either podium or poster format. No more than 3 credits of BIO-482 can be applied to the requirements for the Biology MS.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-4822. Independent Investigations. 2 Hours.

See course description for BIO-4821. This is a 2-credit version of BIO-482.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-4823. Independent Investigations. 3 Hours.

See course description for BIO-4821. This is a 3-credit version of BIO-482.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-485L. Advance Topics In Biology: Applied & Environmental Microbiology. 3 Hours.**BIO-491. Seminar In Biology. 1 Hour.**

In this seminar experience, students select a specific topic of interest to them, research the topic, and give an oral presentation on the topic to a peer group. Time commitment is approximately 2 hrs per week. Departmental approval is required.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-5901. Library Thesis Hours. 1 Hour.

Guidance of students conducting literature/library research and writing a Thesis to fulfill requirements for the Master of Science degree in Biology, Option II. Students may register for 1-3 credits per term with a minimum of 4 credits required for Option II of the Biology M.S. All BIO-590 credits must be earned within the equivalent of 2 academic years.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-5902. Library Thesis Hours. 2 Hours.

See course description for BIO-5901. This is a 2-credit version of BIO-590.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-5903. Library Thesis Hours. 3 Hours.

See course description for BIO-5901. This is a 3-credit version of BIO-590.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-5991. Research Thesis Hours. 1 Hour.

This course is for students conducting research and writing a thesis to fulfill the requirements of the Research Thesis Option in the M.S. program in Biology. Students may register for 1-4 credits of BIO-599 per term; a total of 6 credits of BIO-599 is required for the Research Thesis Option. All BIO-599 credits must be earned within the equivalent of 2 academic years.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-5992. Research Thesis Hours. 2 Hours.

See course description for BIO-5991. This is a 2-credit version of BIO-599.

Prerequisite: BIO-405 with a minimum grade of C.

BIO-5993. Research Thesis Hours. 3 Hours.

See course description for BIO-5991. This is a 3-credit version of BIO-599.

Prerequisite: BIO-405 with a minimum grade of C.

Major in Biology

For an outline of courses to take for the biology major, see [Biology Major Requirements \(https://www.neiu.edu/sites/default/files/documents/2021/03/29/Biology%20MAJOR%20course%20requirements.pdf\)](https://www.neiu.edu/sites/default/files/documents/2021/03/29/Biology%20MAJOR%20course%20requirements.pdf).

Major in Biology for the Bachelor of Science Degree

(70-73 credit hours total: 43-46 credits in Biology + 27 credits in cognate areas)

Are you interested in learning about the world around you? The Biology Department at Northeastern Illinois University can give you the tools to ask and answer those pressing questions that interest you. Biology is the study of living organisms (bacteria, protozoans, fungi, algae, plants and animals); our students have the opportunity to learn about these organisms at the molecular, cellular, organismal and ecological levels.

Why choose the Biology Department at Northeastern Illinois University?

- You will engage directly with faculty in a small classroom or laboratory setting.
- You will practice relevant laboratory techniques, using updated equipment in renovated labs, through our intensive laboratory-based curriculum.
- You can use those lab skills, gained in the classroom, to take on a research project with our faculty in a wide range of specializations.
- You can customize your education to meet your career objectives through our flexible curriculum.

The Biology Major requires a set of six required biology courses, five elective courses in biology, a capstone course in biology, and a set of cognate courses in chemistry, mathematics and physics. As such, the curriculum provides broad training in the sciences, allows for students to take a sequence of courses that fit their particular interests within biology, and allows students to prepare themselves for specific careers in biology.

A maximum of 5 biology courses can be transferred toward the biology courses needed for the major. Only 3 of those transferred courses can be applied to satisfy the biology electives. There is no limit to the number of transferred credits applied to the required cognate courses.

Advising resources

- In addition to being assigned a biology advisor, we offer daily walk-in and virtual advising. Gain advice about recommended elective courses appropriate for your particular career goals. Please email BiologyAdvising@neiu.edu to obtain the advising schedule.
- Interested in pursuing professional training in medicine, dentistry, pharmacy, optometry, physical therapy, or other health-related professions? Students can meet with the Director of Pre-Professional Advising, David Nissim-Sabat (d-nissimsabat@neiu.edu) to receive guidance on recommended courses, graduate-school test preparation, and the application process.
- At the Student Center for Science Engagement, you may gain additional advice about careers, graduate studies, internships, and research opportunities. Visit them in BBH-235 or contact scse@neiu.edu.
- For information about earning a license to teach biology at the high-school level, contact Vanessa King, v-king@neiu.edu, or Katy Smith, k-smith1@neiu.edu, in the Goodwin College of Education.

The Department of Biology values the different lived experiences of our students, faculty, and staff. Diversity of thoughts, opinions, and backgrounds enhances learning, teaching, and discovery in the classroom, laboratory, and community. We work to create a sense of inclusivity through collaborative learning environments that allow students to work together to collect, analyze, and interpret data, as well as promote student interactions and discussions centered around those data.

As biologists, we recognize our responsibility as stewards of the natural environment, caretakers of human health, and innovators in the ethical development and equitable distribution of resources and knowledge. We empower students to relate the biological topics they are learning to pressing societal issues such as health care inequities and the impacts of climate change. By incorporating modern, cutting-edge technologies and research advances into our laboratory classes, we equip students with the tools they need to achieve excellence in their careers.

University Core Curriculum Requirements

General Education Distribution Area

Cr. Hrs.

Fine Arts (FA)*

6

2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).

Humanities (HU)* 9

3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)

Behavioral/Social Sciences (SB)* 9

3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work

Natural Sciences (NS and NSL)** 9

3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Required Biology Courses

The following six core courses are required of all majors.

Code	Title	Hours
BIO-201	General Biology I	4
BIO-202	General Biology II	4
BIO-250	Essential Skills For Biologists	2
BIO-301	Cell Biology	4
BIO-303	General Genetics	4
BIO-305	Writing Intensive Program:General Ecology	4
Total Hours		22

Five elective courses are also taken (18-20 credit hours), at least three of which must include a laboratory component. Four of these elective courses must be in Biology, with one from the approved Botany list and one from the approved Zoology list. The fifth course may be in Biology or from another department, if it has been approved by the Biology Department to count as an elective. Students should check with their Biology advisor for lists of approved elective courses. A maximum of three courses can be transferred to satisfy the electives for the Biology Major.

One capstone course must also be taken after a student has made substantial progress toward completing the major requirements. The capstone requirement can be satisfied by taking:

Code	Title	Hours
Select one of the following:		3-4
BIO-390	Biology Senior Seminar	
BIO-391	Internship In Biology	
BIO-392 & BIO-393	Independent Research I and Independent Research II	
BIO-394	Seminar In Teaching Of Biology	
BIO-307 & BIO-308	Interdisciplinary Research Skills I and Interdisciplinary Research Skills II	
ZHON-360 & ZHON-395	Honors Seminar In Research & Creative Processes and Honors Thesis/ Creative Project	
NEIU-301M & NEIU-302M & NEIU-303	Developing A Research Thesis and College Teaching For TA's and Preparing For Graduate Study	

Students should check the catalog or their advisor to determine the pre-requisites for each of these options 3-4 cr.

Required Cognate Courses

Code	Title	Hours
CHEM-211	General Chemistry I	5
CHEM-212	General Chemistry II	4
CHEM-231	Organic Chemistry I	4
MATH-187 or MATH-275	Calculus I Applied And Computational Statistics	4
Two semesters of Physics, either algebra-based or calculus-based with labs		
PHYS-201L or PHYS-206L	College Physics I With Lab University Physics I With Lab	5
PHYS-202L or PHYS-207L	College Physics II With Lab University Physics II With Lab	5
Total Hours		27

This sample curricular map is provided to guide you in the planning of your progression in the biology major. For other course plan options, or for specific recommendations of courses not identified, please make an appointment with a biology advisor at BiologyAdvising@neu.edu. We also offer many courses in the summer; completing courses during summer terms can speed time toward graduation.

First Year

Term 1		Hours
BIO-201	General Biology I	4
MATH-173	College Algebra	4
ENGL-101	Writing I	3
General Education Course - FYE		3
Term Hours		14

Term Hours		15
Total Hours:		120

Master of Science in Biology

Master of Science in Biology

The Master of Science in Biology program serves those interested in advanced training in applied or basic biological research and teaching. The program also provides a basis for further graduate or professional studies. The M.S. in Biology is broadly based, allowing students to tailor their courses to suit their interests. Laboratory skills are integral to many Biology careers, thus students are encouraged to include lab courses in their program of study. Faculty in the M.S. in Biology program have expertise in a range of sub-disciplines including ecology, organismal, cell, and molecular biology. All newly admitted students matriculate in the Fall semester.

Program Goals

Upon completion of the M.S. in Biology program students will have:

1. a strong understanding of disciplines across the breadth of Biology and a deep understanding of select Biology sub-disciplines.
2. developed the knowledge base necessary to critically evaluate research methods, data, and results, either produced by them or published in the primary literature.
3. developed strong written and oral presentation skills.
4. developed the analytical skills necessary to synthesize information in an area of research based on existing and new data.
5. developed strong research design and laboratory/field research skills.

Graduates completing the Non-Thesis or Library Thesis options for the M.S. in Biology will meet goals 1-4. Graduates completing the Research Thesis option will meet all 5 goals.

Admission Requirements

Note: Although applications for admission to the M.S. in Biology program are accepted throughout the year, all new students will start coursework (matriculate) in the Fall semester and are required to take BIO-405 during their first semester in the program. The application deadline for admission in the upcoming academic year is June 15.

Application forms for admission to the program may be obtained from, and must be submitted to, the College of Graduate Studies and Research (CGSR) Admissions Office. All students must fulfill the general requirements for admission to the CGSR. In addition, all students must meet the following requirements for admission to the M.S. in Biology program:

1. A Bachelor's degree in Biology or the course equivalent. The undergraduate course work must include both the Biology and related science courses (Chemistry, Physics and Math) that are standard components of the Biology major: two semesters each of General Biology, General Chemistry and Physics, and one semester each of Cell Biology, Ecology, Genetics, Organic Chemistry and Precalculus Mathematics or Statistics. General Education courses cannot be used to satisfy the Biology or cognate area requirements. Note: Undergraduate students who have not yet completed the Bachelor's degree are welcome to apply. Acceptance will be contingent on completion of the undergraduate degree and submission of official transcripts to the College of Graduate Studies and Research indicating that the degree was conferred.
2. An overall undergraduate GPA of 2.75, with a GPA of 3.0 in the undergraduate biology courses, is required for full admission to the program.
3. A typed, 1-2 page statement of Goals and Objectives. This statement must be written by the applicant to demonstrate their writing skills. It should specify as clearly as possible the applicant's academic and professional goals and the reasons for selecting the Biology M.S. program.
4. Two letters of recommendation from academic references (such as former or current professors) or work-related supervisors who are able to assess the applicant's potential for advanced graduate study.
5. GRE (Graduate Record Examination) scores are not required for admission, but they may be submitted to supplement an application.

Provisional Admission may be granted in exceptional circumstances. For more information, please refer to the section of the university catalog for the College of Graduate Studies & Research. Decisions regarding provisional admission are made on a case-by-case basis.

REQUIREMENTS FOR SECONDARY EDUCATION LICENSURE

Students interested in obtaining an Illinois teaching license along with a Master of Science in Biology should apply to the Biology M.S. and Teaching Endorsement programs. Students in these programs complete both the biology coursework and education coursework needed to fulfill the state's requirements for high school science teaching. For information about the teaching licensure requirements, please visit the Secondary Education program

page (<https://catalog.neiu.edu/education/educational-inquiry-curriculum-studies/master-arts-teaching-language-arts/#text>) in the Daniel L. Goodwin College of Education, or contact Ms. Vanessa King (v-king@neiu.edu) or Dr. Katy Smith (k-smith1@neiu.edu).

Applicants to the Biology M.S. and Teaching Endorsement programs must also meet the requirements for the Secondary Education Teacher Licensure Program. In addition to the requirements for admission to the M.S. in Biology program listed above, admission to the Teaching Endorsement Program requires:

1. An overall undergraduate GPA of 3.0.
2. A 15-30 minute personal interview.

Degree Requirements

The M.S. in Biology allows students to tailor their program of study to meet their individual needs. Students may attend full-time or part-time and have up to 6 years to finish the M.S. degree requirements. Graduate courses are offered during the late afternoon and evening hours and sometimes on Saturday mornings. Courses that are lecture only meet one evening per week and courses that include a laboratory/field component meet two evenings per week (Fall & Spring semesters). For summer classes the meeting times are similar but the number of meetings per week may increase. All graduate students are required to take BIO-405 and at least one course that includes a laboratory or field component. For students pursuing the Research Thesis Option, the research thesis fulfills the latter requirement.

Each student in the M.S. in Biology program will be required to assemble a portfolio of work that they complete during their tenure in the program. The portfolios will serve to:

1. document the progress of each student toward the degree, and the skills and knowledge base that they have achieved by the end of their tenure.
2. provide students with materials that will help them reach their professional goals.
3. provide the department with information that will allow us to assess the effectiveness of the program at achieving the goals and learning outcomes that we have established for the graduate curriculum.

Portfolios will be assembled on an ongoing basis, and will include examples of scholarly work from courses completed by the student in the NEIU graduate program and work produced specifically for the portfolio. Work produced specifically for the portfolio will be produced independently and will be for the purpose of achieving candidacy in the program (see below) or for being awarded the M.S. degree at the end of a student's tenure.

Specific requirements for the portfolio will be provided by the department, but all portfolios will include:

1. Personal statements, reports of academic progress and/or self-assessments written at different stages of completion of the degree requirements.
2. Curriculum vitae or resumés written at several stages of degree completion.
3. Representative samples from student's coursework (e.g., annotated bibliographies, summary/critiques of papers from the primary literature, poster presentations, supporting documentation for oral presentations, research proposals, review papers or research papers, and other examples of critical or synthetic writing).
For students who choose to complete the Research Thesis or Library Thesis Option, the portfolio will include (in addition to the items in categories a, b, and c above) their approved thesis proposal and a copy of the final thesis manuscript.
4. Literature-based writing assignments in which students demonstrate their ability to read, interpret, and synthesize information at a level expected of a graduate student in biology.
5. Short pieces of writing that demonstrates a student's ability to communicate their skills or expertise to both professional and lay audiences.

Candidacy in the Biology Program

Students need to apply for candidacy within the Biology program after they have completed at least 12 and no more than 18 credit hours of course work, including BIO-405. Candidacy also requires a GPA in courses that count towards the M.S. in Biology degree of at least 3.0. Students admitted on a provisional basis must satisfy all prerequisite deficiencies before they can receive candidacy. Evaluation of the portfolio will be included in decisions regarding advancement to candidacy. Students must satisfy their candidacy requirements and be declared candidates for the degree before they can register for either Library or Research Thesis credits. Candidacy application forms can be obtained through the Graduate Advisor or the Biology Department Office.

Degree Tracks

Research Thesis Option

This option is recommended for individuals who are interested in a career in biological research, are working in applied fields of Biology or are interested in further graduate or professional studies. Students interested in this option should arrange appointments with faculty in their area of interest and the

graduate program advisor early in their program, to discuss potential thesis topics. Students completing the Research Thesis option will meet all 5 program goals listed above.

Students pursuing the Research Thesis Option must complete a minimum of 33 credit hours of graduate course work, including BIO-405 and Research Thesis Hours. Up to two (2) credits of Independent Investigations (BIO 4821-3) can replace an equal number of the Research Thesis Hours credits. Students must have advanced to candidacy (see below), identified a thesis advisor, and formed a thesis committee before they can submit the research proposal. The research proposal must be approved by the Biology Department before the student can register for Research Thesis credits. Exit requirement for the Research Thesis Option is successful completion of the research project and the public, oral defense of the Research Thesis. Students who register for the research thesis and subsequently decide not to complete the thesis may apply the credits they do complete for research thesis towards the requirements of the other options.

Library Thesis Option

This option is recommended for students who are interested in exploring a particular topic through literature research. The student will choose a library thesis advisor who will guide the student in identifying an appropriate question, preparing a thesis proposal, and writing the thesis. The goals of the library thesis are to explore a specific topic through the current literature with the aim of determining whether a specific question or questions can be answered through existing knowledge or whether additional experimentation/ research are required to address the question. Students completing the Library Thesis Option will meet program goals 1-4 listed above.

Students pursuing the Library Thesis track must complete a minimum of 34 credit hours of graduate course work, including BIO-405, at least one course that includes a laboratory or field component, and Library Thesis Hours. The student must have advanced to candidacy (see above), have identified a thesis advisor and two readers, and obtained department approval of the thesis project before registering for Library Thesis Hours credits. Exit requirement for the Library Thesis Option is successful public, oral presentation and defense of the Library Thesis.

Non-Thesis Option

This option is recommended for students who desire a more flexible approach to graduate training in Biology, and who are not interested in research. It is a popular track for those in teaching or using the M.S. to become more competitive for admission to professional/health programs. Students completing the Non-Thesis Option will meet program goals 1-4 listed above.

Students must complete a minimum of 36 credit hours of graduate course work, including BIO-405, at least one course that includes a laboratory or field component, and the professional/academic portfolio. For students in the Non-Thesis Option, the portfolio will be evaluated at least 3 times during their tenure and the final portfolio must be submitted to their advisor no later than week 8 of their final semester in the program. Exit requirement for the Non-thesis track is acceptance of the portfolio by the Biology Graduate Advisory Committee.

Thesis Proposals

Students interested in pursuing either the Library or Research Thesis options need to submit a thesis proposal for review and consideration by the department before they will be permitted to register for thesis credits. Potential topics are first discussed with a prospective thesis advisor to determine a project focus. The student drafts a proposal for review by the faculty advisor, which presents the background and scope of the project, hypothesis/ hypotheses to be tested (question(s) to be addressed in the case of a library thesis), methodology (for research theses only), anticipated timetable, and literature review. At the same time, in consultation with the research advisor, the student must form his/her thesis committee (thesis advisor + 2 additional Biology faculty members for the Research Thesis or thesis advisor + 2 additional readers for the Library Thesis). Once approved by the committee, the proposal is then submitted to the Biology faculty for review and consideration. Faculty members are typically given a minimum of one week to provide comments and recommendations about the proposal. Students are required to have their proposal circulated to the department at least three weeks before the first semester in which they want/plan to register for thesis credits. The deadline for registering for thesis credits is the end of the first week of classes during a given semester. Check the current schedule of classes for specific dates.

Graduate Degree Time-Limit

Students in all Options have a maximum of 6 yrs to complete their degree. Students requiring an extension of an additional semester or more to complete their degree should petition the College of Graduate Study & Research and the Biology Graduate Advisory Committee before the 6-yr deadline is reached. Students taking more than 6 yrs may lose credits earned early in the program and may be required by the CGSR to complete additional course work. Students not taking courses regularly (every year) may be dropped from the program.

Courses

Only 400-level and a limited number of select 300-level courses (i.e. the 300* courses), can be applied toward the credit requirements for the graduate degree. The College of Graduate Study & Research limits the number of 300* credits that can count towards the M.S. degree to 10 credits.

Transfer credits: A maximum of 9 hours of transfer graduate credit can be applied to the requirements for the M.S. degree. The transfer credits must be approved by both the College of Graduate Study & Research (CGSR) and the Biology Department. Students interested in transferring credits need to submit official transcripts, a complete/detailed syllabus from the course(s), and rationale for transfer to the CGSR representative in Enrollment Management Services. The petition form for transferring credits is available on the College of Graduate Study and Research web page. Following

matriculation, students wishing to take classes at another institution and transfer the credits to NEIU must have the courses preapproved by the Biology Graduate Advisor.

Courses from other NEIU departments: Students may have up to 9 cr. hours of graduate level course work taken in other departments counted toward their Biology degree. The Biology Graduate Advisor must pre-approve all course work from other NEIU departments. Students interested in taking graduate courses outside the Biology Department should first contact the Biology Graduate Advisor to verify that the course credits can count towards the M.S. in Biology degree; the student then needs to contact the Department offering the course to request permission to enroll in the course. Lastly, to be considered as part of the student's degree requirements, the student must submit a written rationale for the course, as well as a copy of the course syllabus. This should be done no later than the first week of classes during the semester the course is taken.

Minor in Biology

For an outline of courses to take for the biology minor, see [Biology Minor Requirements \(https://www.neiu.edu/sites/default/files/documents/2021/03/29/Biology%20MINOR%20course%20requirements.pdf\)](https://www.neiu.edu/sites/default/files/documents/2021/03/29/Biology%20MINOR%20course%20requirements.pdf).

miNOR IN BIOLOGY (21-22 credit hours)

Are you interested in learning about the world around you? The Biology Department at Northeastern Illinois University can give you the tools to ask and answer those pressing questions that interest you. Biology is the study of living organisms (bacteria, protozoans, fungi, algae, plants and animals); our students have the opportunity to learn about these organisms at the molecular, cellular, organismal and ecological levels.

Why choose the Biology Department at Northeastern Illinois University?

- You will engage directly with faculty in a small classroom or laboratory setting.
- You will practice relevant laboratory techniques, using updated equipment in renovated labs, through our intensive laboratory-based curriculum.
- You can use those lab skills, gained in the classroom, to take on a research project with our faculty in a wide range of specializations.
- You can customize your education to meet your career objectives through our flexible curriculum.

The Biology Minor requires that students take General Biology I (BIO 201), General Biology II (BIO 202), Essential Skills for Biologists (BIO 250), and three biology elective courses, at least two of which must include a laboratory component. Students may choose electives to fit their particular interests within Biology and to prepare for specific careers of interest.

A maximum of 3 biology courses can be transferred toward the Minor in Biology. Only 2 of those transferred courses can be applied to satisfy the biology electives. At least 9 credits toward the Minor must be completed at NEIU.

Advising resources

- In addition to being assigned a biology advisor, we offer daily walk-in and virtual advising. Gain advice about recommended elective courses appropriate for your particular career goals. Please email BiographyAdvising@neiu.edu to obtain the advising schedule.
- Interested in pursuing professional training in medicine, dentistry, pharmacy, optometry, physical therapy, or other health-related professions? Students can meet with the Director of Pre-Professional Advising, David Nissim-Sabat (d-nissimsabat@neiu.edu) to receive guidance on recommended courses, graduate-school test preparation, and the application process.
- At the Student Center for Science Engagement, you may gain additional advice about careers, graduate studies, internships, and research opportunities. Visit them in BBH-235 or contact scse@neiu.edu.
- For information about earning a license to teach biology at the high-school level, contact Vanessa King, v-king@neiu.edu, or Katy Smith, k-smith1@neiu.edu, in the Goodwin College of Education.

The Department of Biology values the different lived experiences of our students, faculty, and staff. Diversity of thoughts, opinions, and backgrounds enhances learning, teaching, and discovery in the classroom, laboratory, and community. We work to create a sense of inclusivity through collaborative learning environments that allow students to work together to collect, analyze, and interpret data, as well as promote student interactions and discussions centered around those data.

As biologists, we recognize our responsibility as stewards of the natural environment, caretakers of human health, and innovators in the ethical development and equitable distribution of resources and knowledge. We empower students to relate the biological topics they are learning to pressing societal issues such as health care inequities and the impacts of climate change. By incorporating modern, cutting-edge technologies and research advances into our laboratory classes, we equip students with the tools they need to achieve excellence in their careers.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
--	-----------------

Fine Arts (FA)*	6
------------------------	---

2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).

Humanities (HU)* 9

3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)

Behavioral/Social Sciences (SB)* 9

3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work

Natural Sciences (NS and NSL)** 9

3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Required courses for the Biology Minor

Code	Title	Hours
BIO-201	General Biology I	4
BIO-202	General Biology II	4
BIO-250	Essential Skills For Biologists	2
Three elective courses in Biology must also be taken, at least two of which must have a laboratory component		11-12
Total Hours		21-22

Chemistry

Chemistry is a physical science with far-reaching applications that touch virtually every aspect of our day-to-day existence. Careers in chemistry offer numerous possibilities in a wide range of industries and in education.

The Chemistry program offers courses leading to the degrees of Bachelor of Science and Master of Science. The undergraduate curriculum in Chemistry and Biochemistry programs prepares students for careers in industry and environmental chemistry positions as well as for graduate study. Undergraduate courses also provide appropriate backgrounds for students planning careers in medicine, dentistry, pharmacy, nursing and related professional health fields.

In 1985, Northeastern Illinois University was added to the American Chemical Society's (ACS) Approved List of baccalaureate chemistry programs in colleges and universities. Being included on the Approved List means that the chemistry curriculum meets standards established by the ACS Committee on Professional Training. Students completing the ACS track will earn a certificate stating that they have met ACS standards for professional training.

Transfer students majoring in chemistry need to contact a program advisor immediately so that transfer credits may be evaluated and an appropriate program of study planned.

Chemistry courses are designed to be taken in sequence. Students will not be permitted to register for courses if they do not have credit for the required prerequisites.

Undergraduate students are encouraged to participate in research programs with faculty members and may take CHEM-305, and CHEM-399 for that purpose. Internships with local chemical industries and laboratories are also encouraged through CHEM-365, and CHEM-366. Please consult with the undergraduate advisor concerning these courses.

Students should also be aware of the University requirements for the Bachelor's degree.

- Major in Chemistry (<http://catalog.neiu.edu/arts-sciences/chemistry/chemistry/>)
- Minor in Chemistry (<http://catalog.neiu.edu/arts-sciences/chemistry/minor-chemistry/>)
- Master of Science in Chemistry (<http://catalog.neiu.edu/arts-sciences/chemistry/master-science-chemistry/>)

Kenneth Nicholson, Ph.D., Associate Professor, Chair

Samantha Brown-Xu, Ph.D., Assistant Professor

Jing Su, Ph.D., Associate Professor

Stefan Tsonchev, Ph.D., Professor

CHEM-103. Chemistry And Society. 3 Hours.

Introduction to chemistry based on the study of some of the processes and materials which chemistry contributes to our civilization. Elementary chemical principles are used to explain the behavior of synthetic polymers, toxic substances, food additives, cleaning products, and other chemically manufactured materials. Knowledge of basic algebra skills assumed. Lecture 3 hours.

Prerequisite: (MATH-091 - 499 or MATH-091A - 499Z or NEIU Math Placement Result 02 - 45 or ACT Math 19 - 36 or Accuplacer Elementary Algebra 060 - 084 or Accuplacer College Level Math 020 - 120 or Accuplacer Adv. Algebra & Func 200 - 300 or SAT Math 500 - 800).

CHEM-108. Chemistry Concepts For Educators. 4 Hours.

This lab-oriented course covers the basic principles of chemistry while supporting future educators in the implementation of interdisciplinary mathematics and science curricula. Topics include atomic theory, solution chemistry, inorganic and organic chemistry, states of matter, physical and chemical properties, appropriate use of nomenclature, chemical bonding, and use of quantitative calculations using appropriate number techniques in science. The historical context of how chemistry contributes to our civilization will also be considered. Elementary chemical principles will be used to explain the behavior of everyday chemicals (including food and cleaning supplies) in addition to more scientific and industrial applications. Issues of contemporary critical technologies, such as biomaterials, natural products, alternative fuels, bioremediation, fuel cells, green technology, biodefense, and smart materials may be examined. This course is aligned to the Next Generation of Science Standards and the National Science Teachers Association Standards. Course outcomes include developing students' ability to apply knowledge of chemistry to a variety of real-world problems and settings with particular emphasis on scientific inquiry, the nature of science, civic engagement, and applications to teaching.

Prerequisite: MATH-150 with a minimum grade of C.

CHEM-110. Chemical Concepts. 3 Hours.

Lab-oriented survey course in chemistry designed for the non-science major including such topics as the historical development of chemistry, atomic theory, solution chemistry, organic and biochemistry. Knowledge of basic algebra skills assumed. Lecture 2 hours, lab, 2 hours.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

CHEM-211. General Chemistry I. 5 Hours.

Introduction to general inorganic chemistry, including stoichiometry, concentration units, gas laws, atomic structure, bonding, periodic laws, states of matter, solutions, acid-base theories, rate, equilibrium and oxidation-reduction theory. Lecture and Laboratory. Lecture 4 hours, lab 3 hours.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

CHEM-211C. Enrichment Seminar In General Chemistry I. 1 Hour.

Enrichment seminar accompanying CHEM-211. Students do problem solving in collaborative learning groups on material derived from and supplementing General Chemistry I to gain a deeper understanding of concepts and applications. Lecture 2 hours.

Corequisite: CHEM-211.

CHEM-212. General Chemistry II. 4 Hours.

This is the second course in the General Chemistry sequence. Topics include reaction kinetics, gaseous and aqueous phase equilibria, acids and bases, entropy, free energy and electrochemistry.

Prerequisite: CHEM-211 with a minimum grade of C and MATH-173 with a minimum grade of C.

CHEM-212C. Enrichment Seminar In General Chemistry II. 1 Hour.

Enrichment seminar accompanying CHEM-212. Students do problem solving in collaborative groups on material derived from and supplementing General Chemistry II to gain a deeper understanding of concepts and applications. Lecture 2 hours.

Corequisite: CHEM-212.

CHEM-213. Writing Intensive Program: Quantitative Analysis. 5 Hours.

Statistical analysis of data, chemical equilibrium, simultaneous equilibria, classical and non-classical gravimetric and volumetric techniques, acid-base and oxidation-reduction reactions, spectrophotometric and potentiometric measurements. Lecture 3 hours, lab 6 hours.

Prerequisite: CHEM-212 with a minimum grade of C and ENGL-101 with a minimum grade of C.

CHEM-231. Organic Chemistry I. 4 Hours.

Study of the structure, properties, reaction mechanisms and nomenclature of aliphatic and aromatic hydrocarbons and their derivatives. Lecture and laboratory. Lecture 3 hours, lab 3 hours.

Prerequisite: CHEM-212 with a minimum grade of C and CHEM-211 with a minimum grade of C.

CHEM-231C. Enrichment Seminar In Organic Chemistry I. 1 Hour.

Enrichment seminar accompanying CHEM-231. Students do problem solving in collaborative learning groups on material derived from and supplementing Organic Chemistry I to gain a deeper understanding of concepts and applications. Lecture 2 hours.

Corequisite: CHEM-231.

CHEM-232. Organic Chemistry II. 4 Hours.

Continuation of CHEM-231. A study of structure, properties, reaction mechanisms, synthesis and infrared and nuclear magnetic resonance spectroscopy of the alcohols, acids, amines and other monofunctional compounds. Lecture and laboratory. Lecture 3 hours, lab 3 hours.

Prerequisite: CHEM-231 with a minimum grade of C.

CHEM-232C. Enrichment Seminar In Organic Chemistry II. 1 Hour.

Enrichment seminar accompanying CHEM-232. Students do problem solving in collaborative learning groups on material derived from and supplementing Organic Chemistry II to gain a deeper understanding of concepts and applications. Lecture 2 hours.

Corequisite: CHEM-232.

CHEM-300. Interdisciplinary Seminar In STEM. 2 Hours.

This course uses a hands-on approach to modern inquiry-based research problems and techniques in the physical and computational sciences. The course is structured around a series of modular problem-based exercises, covering topics from the fields of Chemistry, Computer Science, Earth Science, Mathematics, and Physics, and is designed to provide the content and pedagogical background for students to be successful peer leaders. The cross-disciplinary modules will draw connections between scientific disciplines, and showcase common research tools and techniques used in the sciences. The workshop will also incorporate discussions on a range of topics, from scientific ethics, scientific methodology, and error analysis.

Prerequisite: MATH-185 with a minimum grade of C.

CHEM-305. Independent Study In Chemistry. 3 Hours.

An introduction to original chemical research under faculty supervision. Independent Studies require the approval of the instructor, department chair and the College Dean.

Prerequisite: CHEM-213 with a minimum grade of C and CHEM-232 with a minimum grade of C.

CHEM-311. Physical Chemistry I. 4 Hours.

Theoretical and experimental study of the structure and properties of matter, including the gaseous state, chemical thermodynamics, chemical equilibrium, liquids and phase equilibria, solutions of nonelectrolytes and ionic solutions. Lecture and laboratory. Lecture 3 hours, lab 3 hours. It is strongly suggested that the student has completed a year of physics with laboratory.

Prerequisite: CHEM-231 with a minimum grade of C and MATH-187 with a minimum grade of C and MATH-202 with a minimum grade of C and (PHYS-206 with a minimum grade of C or PHYS-201 with a minimum grade of C or PHYS-207 with a minimum grade of C or PHYS-202 with a minimum grade of C).

CHEM-311C. Physical Chemistry I Seminar. 1 Hour.

This course accompanies Physical Chemistry I, CHEM-311. Students will do problem solving in collaborative learning groups on material derived from and supplementing Physical Chemistry I lecture, in order to gain a deeper understanding of concepts and applications.

Corequisite: CHEM-311.

CHEM-312. Physical Chemistry II. 4 Hours.

Continuation of CHEM- 311, including the kinetic-molecular theory, transport properties, chemical kinetics, statistical mechanics, quantum theory, atoms and diatomic molecules and spectroscopy. Lecture and laboratory. Lecture 3 hours, lab 3 hours.

Prerequisite: CHEM-231 with a minimum grade of C and MATH-202 with a minimum grade of C and MATH-187 with a minimum grade of C and (PHYS-206 with a minimum grade of C or PHYS-201 with a minimum grade of C or PHYS-207 with a minimum grade of C or PHYS-202 with a minimum grade of C).

CHEM-312C. Physical Chemistry II Seminar. 1 Hour.

This course accompanies Physical Chemistry II, CHEM-312. Students will do problem solving in collaborative learning groups on material derived from and supplementing Physical Chemistry II lecture, in order to gain a deeper understanding of concepts and applications.

Corequisite: CHEM-312.

CHEM-316. Inorganic Chemistry. 4 Hours.

A thorough study of bonding in non-transition and transition elements, periodic trends and tendencies, structural relationships and mechanisms of inorganic reactions. Lecture and laboratory. Lecture 3 hours, lab 3 hours.

Prerequisite: CHEM-212 with a minimum grade of C.

CHEM-319. Chemical Aspects Of Environmental Chemistry. 3 Hours.

A survey of the chemical principles involved in environmental problems. Topics include atmospheric, aquatic and geographic chemistry, sources of pollutants and the consequences of pollution. Lecture 3 hours.

Prerequisite: CHEM-212 with a minimum grade of C.

CHEM-320. Industrial Aspects Of Environmental Chemistry. 3 Hours.

Industrial aspects of environmental chemistry covering specific topics such as energy, water and wastewater treatment, treatment and disposal of domestic and industrial wastes, techniques for detecting and analyzing chemical pollutants, environmental modeling and analyzing chemical pollutants, environmental modeling and recycling strategies. Lecture 3 hours.

Prerequisite: CHEM-213 with a minimum grade of C and CHEM-232 with a minimum grade of C.

CHEM-321. Environmental Chemistry In The City. 2 Hours.

This is a laboratory and field course that will concentrate on topics of environmental interest in the city of Chicago. Field work will include visits to the Chicago River, Lake Michigan, the Chicago Forest Preserve, and other locations in the metropolitan area. Students will learn proper methods of sample collection, storage, and transport. Chemical analysis of collected samples by titrimetric, gravimetric, spectroscopic, chromatographic, and electrochemical methods will take place in the field and in the laboratory. Lecture 1 hr, Lab/Field 2.5 hrs. Prerequisite: CHEM-213 with a Grade of C or better.

Prerequisite: CHEM-213 with a minimum grade of C.

CHEM-330. Instrumental Analysis: Spectroscopy. 4 Hours.

The course includes an intensive laboratory introduction to infrared spectroscopy, mass spectrometry, nuclear magnetic resonance spectroscopy and Raman spectroscopy. Research projects are part of the course to develop instrumental methods for qualitative and quantitative analysis of various chemical materials used in everyday life. Lecture and laboratory. Lecture 3 hours, lab 6 hours.

Prerequisite: CHEM-231 with a minimum grade of C.

CHEM-331. Instrumental Analysis: Quantitative Methods. 5 Hours.

In this course, students will learn about instrumental methods used to determine composition of materials, including gas and liquid chromatography, UV-VIS spectroscopy, fluorescence emission spectroscopy, atomic absorption and emission spectroscopy, and potentiometry. The course emphasizes the theory and practice of designing an analytical method.

Prerequisite: CHEM-231 with a minimum grade of C.

CHEM-333. Introduction To Polymer Chemistry. 3 Hours.

This course provides an introduction to the broad field of polymer chemistry. Topics will focus on the properties, synthesis, processing, and applications of polymers that have industrial and commercial importance. The properties of biological polymers and environmental concerns of polymers will also be discussed.

Prerequisite: CHEM-231 with a minimum grade of C and CHEM-232 with a minimum grade of C.

CHEM-347. Advanced Organic Chemistry: Polyfunctional Compounds. 3 Hours.

Chemistry of polyfunctional compounds, condensed aromatic and heterocyclic systems, electrocyclic reactions and molecular rearrangements. Lecture 3 hours.

Prerequisite: CHEM-232 with a minimum grade of C.

CHEM-348. Advanced Organic Chemistry: Bio-Organic Compounds. 3 Hours.

The chemistry of complex molecules such as proteins, nucleic acids and carbohydrates is studied from the point of view of their physical properties and their reaction, synthesis and structure-function relationships. Lecture 3 hours.

Prerequisite: CHEM-232 with a minimum grade of C.

CHEM-349. Organic Synthesis. 4 Hours.

A systematic approach to the synthesis of complex organic compounds will be developed. The retrosynthetic approach will be taken, with a final target molecule being the goal of the synthesis. It will be taken apart, step-by-step to arrive at reasonable starting materials for the synthesis. Availability and expense of potential starting materials, necessity of protecting groups, and production of isomeric and/or stereoisomeric mixtures will be among the points of consideration for each synthesis. An accompanying laboratory will involve several multistep syntheses, which serve to illustrate principles developed in lecture and build upon experimental techniques encountered in prerequisite organic chemistry courses.

Prerequisite: CHEM-232 with a minimum grade of C.

CHEM-350. Principles Of Toxicology. 3 Hours.

This course offers an introduction to the basic principles of the broad field of toxicology. The mechanisms involved in what constitutes a toxic response will be explored, including examples of toxic chemicals targeting specific biochemical pathways in the human body. Major groups of toxic chemicals such as pesticides, metals, solvents, vapors, radiation and radioactive materials, animal venoms and poisons, will be surveyed. Also addressed are the applied areas of food, forensic/ analytical, and occupational toxicology.

Prerequisite: CHEM-231 with a minimum grade of C.

CHEM-353. Principles of Pharmacology. 3 Hours.

This course will focus on the action of drugs on major organ systems, including the nervous, cardiovascular, gastrointestinal, respiratory, and reproductive systems, as well as drugs for cancer, infectious, and inflammatory diseases. It is also covers pharmacokinetics, drug-receptor interactions, and drug metabolism for these categories of therapeutic agents.

Prerequisite: CHEM-231 with a minimum grade of C.

CHEM-355. Principles Of Medicinal Chemistry. 3 Hours.

This course offers an introduction to the principles of drug design and the molecular mechanism by which drugs act on the human body. It covers basic structure and function of drug targets, lead compound identification, optimization of drug-target interaction and improvement of pharmacokinetic properties of drugs. Tools in the modern drug discovery and development such as high-through-put synthesis and screening, structure-activity relationships, and computer-aided drug design will be also addressed.

Prerequisite: CHEM-231 with a minimum grade of C.

CHEM-356. Bioorganic Chemistry Laboratory. 4 Hours.

This course offers a laboratory introduction to bioorganic chemistry, with experiments involving each of the main classes of biomolecules, including proteins, carbohydrates, lipids, and nucleic acids.

Prerequisite: CHEM-231 with a minimum grade of C and CHEM-232 with a minimum grade of C.

CHEM-357. Chemical Kinetics. 3 Hours.

The study and evaluation of various theories of reaction rates and mechanisms of chemical reactions. Lecture 3 hours.

Prerequisite: CHEM-311 with a minimum grade of C.

CHEM-362. Biochemistry. 4 Hours.

Chemistry and metabolism of carbohydrates, proteins, nucleic acids, lipids, vitamins and minerals associated with animal and plant life. Lecture and laboratory.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and BIO-301 with a minimum grade of C and CHEM-231 with a minimum grade of C.

CHEM-365. Internship In Chemistry I. 6 Hours.

Experience in chemistry in an off-campus location, e.g. business or government. The student registering selects well-defined academic goals to be achieved. These goals will be selected in cooperation with an on-campus advisor. Independent studies require the approval of the instructor, department chair and the College Dean.

CHEM-366. Internship In Chemistry II. 6 Hours.

Continuation of CHEM-365. Independent studies require the approval of the instructor, department chair and the College Dean.

CHEM-372. Biochemistry Of Metabolism. 3 Hours.

Biochemistry of Metabolism is lecture-based course that focuses on the processing of carbohydrates, lipids, proteins, and nucleotides. This course will offer a mechanistic view of metabolic pathways related to each macromolecule group, including feedback control. Each section will be linked to clinical situations and will incorporate current primary research literature in the field of metabolism. Quantitative analysis of chemical reactions, bioenergetics, thermodynamics and interpretation of research articles will be incorporated as part of the lectures.

Prerequisite: BIO-150 with a minimum grade of C and BIO-201 with a minimum grade of C and BIO-202 with a minimum grade of C and (BIO-362 with a minimum grade of C or CHEM-362 with a minimum grade of C).

CHEM-391. Chemistry Capstone Seminar. 3 Hours.

Critical review of research presented by visiting university and industrial chemists and student preparation of original and library research topics. The course will also explore issues related to becoming a morally responsible scientist and will include ethical problem solving. Lecture 4 hours. May be taken concurrently with CHEM-311.

Prerequisite: CHEM-311 with a minimum grade of C or CHEM-312 with a minimum grade of C.

CHEM-399. Undergraduate Research. 3 Hours.

Original laboratory research conducted with a faculty member. The course will usually require some library research, 10-12 hours per week laboratory work and the preparation of a formal, typed report. The course is useful for those students seeking recognition under the guidelines authorized by the American Chemical Society.

Prerequisite: CHEM-311 with a minimum grade of C and CHEM-330 with a minimum grade of C.

CHEM-401. Carbohydrates. 3 Hours.

Structure, stereochemistry and reactions of monosaccharides, disaccharides, oligosaccharides and polysaccharides. Lecture 3 hours. Graduate Standing.

Prerequisite: CHEM-312 with a minimum grade of C.

CHEM-402. Organometallic Chemistry. 3 Hours.

The metal-carbon bond including organometallic synthesis, structure, reaction mechanisms and thermodynamics. Main group metal-carbon compounds, transition metal-carbon compounds and such special topics as Grignard compounds, ferrocenes, carbonyl complexes and inorganic multiple bonding. Lecture 3 hours. Graduate Standing.

Prerequisite: CHEM-312 with a minimum grade of C and CHEM-316 with a minimum grade of C.

CHEM-403. Physical Methods Of Organic Chemistry. 3 Hours.

Various physical techniques of interest to the organic chemist are discussed including spectroscopic methods as proton and carbon-13 nuclear magnetic resonance, infrared and electronic spectroscopy and mass spectrometry, with emphasis on interpreting the combined data. The three credit hours include 2 hours of lecture and 1 hour of lab. Graduate standing.

Prerequisite: CHEM-312 with a minimum grade of C.

CHEM-404. Chemical Thermodynamics. 3 Hours.

Principles of thermodynamics and their application to chemical problems with particular emphasis on partial molal qualities, the chemical potential and the thermodynamics of chemical equilibria. Lecture 3 hours. Graduate Standing.

Prerequisite: CHEM-312 with a minimum grade of C.

CHEM-405. Quantum Chemistry. 3 Hours.

Application of quantum mechanism to chemistry. Topics include the Schrodinger equation and simple applications, the postulates and general principles of quantum mechanics, the harmonic oscillator, three-dimensional systems, atoms and molecules, and molecular spectroscopy. Lecture 3 hours. Graduate standing.

Prerequisite: CHEM-312 with a minimum grade of C.

CHEM-406. Coordination Chemistry. 3 Hours.

Scope of transition metal coordination complexes, coordination number and structure, ligand types, isomerization, complex stability, bonding, reaction mechanisms, magnetic moments. Lecture 3 hours. Graduate Standing.

Prerequisite: CHEM-312 with a minimum grade of C and CHEM-316 with a minimum grade of C.

CHEM-407. Symmetry In Chemistry. 3 Hours.

Introduction to those aspects of group theory and symmetry which are particularly relevant to chemistry including point groups, molecular vibrations, hybrid orbitals and crystal field theory. Lecture 3 hours.

Prerequisite: CHEM-312 with a minimum grade of C or PHYS-335 with a minimum grade of C.

CHEM-408. Independent Study In Chemistry. 3 Hours.

Research in a particular area of chemistry under faculty supervision.

CHEM-408A. Independent Study In Chemistry. 3 Hours.**CHEM-411. Organic Reaction Mechanisms. 3 Hours.**

Reaction pathways in organic chemistry including isotope effects, linear free energy relationships, stereochemistry, configurational analysis and pericyclic reactions. Lecture 3 hours. Graduate Standing.

Prerequisite: CHEM-312 with a minimum grade of C.

CHEM-412. Reaction Kinetics. 3 Hours.

Methods of studying reaction rates and mechanisms, derivation of mechanisms from rate laws. Theories of unimolecular and bimolecular reactions, and chain mechanisms and appropriate mathematical analysis. Lecture only. Lecture 3 hours. Graduate Standing.

Prerequisite: CHEM-312 with a minimum grade of C.

CHEM-413. Modern Inorganic Chemistry. 3 Hours.

In-depth survey of modern developments in inorganic chemistry, including noble gas chemistry, multiple bonding in coordination complexes, unusual oxidation states of elements, template reactions, inorganic polymers, and inorganic catalysis. Lecture 3 hours. Graduate Standing.

Prerequisite: CHEM-316 with a minimum grade of C.

CHEM-414. Advanced Analytical Chemistry. 3 Hours.

Electronic and computer-instrument interface, practical aspects of modern instrumental techniques based on various methods of optical spectroscopy and chromatography. Lecture 3 hours.

Prerequisite: CHEM-331 with a minimum grade of C.

CHEM-416. Nanoscience. 3 Hours.

This course introduces the students to the modern field of nanoscience and develops concepts and methodology for creation of new functional nanomaterials. Emphasis is put on the molecular self-assembly approach. The methods of film deposition, lithography, chemical synthesis and atom optics are covered as well. Scanning probe microscopy is introduced as a method of choice for studying and building nanoscale materials. Applications in the fields of electronic devices and nanomedicine are discussed.

Prerequisite: CHEM-312 with a minimum grade of C.

CHEM-430. Fourier Transform Spectroscopy. 3 Hours.

Prerequisite: CHEM-311 with a minimum grade of C and CHEM-312 with a minimum grade of C.

CHEM-431. Separation Methods. 3 Hours.

Review of thermodynamic and kinetic parameters as their impact on selectivity and efficiency of separation process, classification and application of modern chromatographic techniques. Lecture 3 hours.

Prerequisite: CHEM-331 with a minimum grade of C.

CHEM-450. Gas Chromatography. 3 Hours.

Principles and instrumentation, including classification and methods for selection of stationary phases, optimization of operational parameters, and various detection systems. Separation techniques prior to analysis, applications and hyphenated methods will be discussed. Lecture 3 hours. Graduate Standing and Consent of Instructor.

Prerequisite: CHEM-331 with a minimum grade of C.

CHEM-451. Liquid Chromatography. 3 Hours.

Review of thermodynamic and kinetic parameters as they impact on selectivity and efficiency of liquid chromatographic separations. Classification of mobile phases, including selection and ways to improve resolution. Principles of conventional liquid chromatographic techniques and their applications, including hyphenated methods. Lecture 3 hours. Consent of instructor. Graduate Standing.

Prerequisite: CHEM-331 with a minimum grade of C and CHEM-450 with a minimum grade of C.

CHEM-455. Method Development And Validation In Liquid Chromatography. 3 Hours.

Systematic approaches to the successful development of HPLC-based analytical methods and their optimization. Practical tools based on the use of computer simulation in method development. HPLC-methods validation presented on the basis of the currently accepted United States Pharmacopeia terminology.

Prerequisite: CHEM-451 with a minimum grade of C.

CHEM-456. Advanced Chromatographic Methods. 3 Hours.

Principles, methods and applications of various advanced chromatographic techniques of interest to the analytical chemist, including such chromatographic methods as chiral separations, ligand exchange chromatography, capillary electrophoresis, micellar chromatography, micellar electrokinetic capillary chromatography, and supercritical fluid chromatography. Lecture 3 hours.

Prerequisite: CHEM-451 with a minimum grade of C.

CHEM-5901. Thesis Hours: Chemistry. 1 Hour.

Guidance of students conducting research and writing a thesis to fulfill the requirements for the Master of Science degree in Chemistry.

CHEM-5902. Thesis Hours: Chemistry. 2 Hours.

See course description for CHEM-5901.

CHEM-5903. Thesis Hours: Chemistry. 3 Hours.

See course description for CHEM-5901.

Major in Chemistry

Chemistry is a physical science with far-reaching applications that touch virtually every aspect of our day-to-day existence. The Department of Chemistry offers an ACS-certified Bachelor of Science degree in Chemistry with two major concentrations to choose from. Each concentration requires core courses in Chemistry along with courses in Calculus and Physics.

The Biochemistry concentration requires courses in General Biology, Cell Biology, and Biochemistry in addition to the core Chemistry courses. The biochemical training that students receive will prepare them to enter professional degree programs such as Medicine, Dentistry, Pharmacy, and other health fields. The Biochemistry concentration is also recommended for students who want to obtain graduate degrees in Biochemistry, or work in the biomedical industry.

The Chemistry concentration gives students a strong foundation in Organic, Analytical, Inorganic, and Physical Chemistry. Hands-on laboratory and research skills are emphasized. This concentration is recommended for students who want to have careers in chemical industry and those who plan to enter a Chemistry Master's or Ph.D. program.

The undergraduate curriculum prepares students to succeed in graduate programs and professional schools, or to enter careers in chemical industry. Our majors have been accepted at many prestigious institutions for advanced degrees, or are quickly placed in the workforce after graduation. The Department of Chemistry is proud of the success of all of our graduates and strives to continue designing new coursework and programs to help NEIU students achieve their educational and career goals.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

- ⁴ CHEM-362 Biochemistry is cross-listed with BIO-362 Biochemistry.
- CHEM-372 Biochemistry of Metabolism is cross-listed with BIO-372 Biochemistry of Metabolism.
- ⁵ Major elective credit is given only if the course is not used to count towards the required courses in the major.
- ⁶ PHYS-206L and PHYS-207L are strongly recommended for all Chemistry majors and are required for the ACS certified degree.

Students with foreign credentials are evaluated by the Office of Admissions as having 90 credit hours must take as a minimum the following six courses:

Code	Title	Hours
CHEM-213	Writing Intensive Program: Quantitative Analysis	5
CHEM-232	Organic Chemistry II	4
CHEM-311	Physical Chemistry I	4
CHEM-312	Physical Chemistry II	4
CHEM-330	Instrumental Analysis: Spectroscopy	4
or CHEM-331	Instrumental Analysis: Quantitative Methods	
CHEM-391	Chemistry Capstone Seminar	3

Additional courses may be required in chemistry, physics or mathematics. Students should see their advisor.

Total Hours	24
-------------	----

American Chemical Society (ACS) approved program in Chemistry:

Graduating majors may receive a certificate stating that they have completed a program which meets the ACS standards for Professional Training if they fulfill the following requirements:

1. Take PHYS-206L as prerequisite for CHEM-311.
2. Take PHYS-207L as prerequisite for CHEM-312.
3. Take CHEM-311 and CHEM-312 during the junior year.

CHEM-316, CHEM-330, CHEM-331, CHEM-347 and CHEM-348 are required. Two additional 300-level electives must then be selected.

Completion of this program requires a minimum of 50 cr. in chemistry with a minimum grade point average of 3.0 and no chemistry grades below C in any required course.

This sample curricular map is provided to guide you in the planning of your progression for this major. **This guide should not replace regular consultations with your program advisor.** For specific recommendations of courses not identified, please consult your program advisor.

Master of Science in Chemistry

This program provides graduate education for students planning careers in industry, business, teaching or planning additional graduate work or professional studies. Four options in the program are available, the Separation Science Emphasis, the Business-Oriented Separation Science Emphasis, the General Program Emphasis, and the Chemical Education Emphasis. Students in the program can follow the Separation Science Emphasis in order to be prepared for careers in pharmaceutical, cosmetics, nutrients, and food industries. The Business-Oriented Separation Science Emphasis enhance the educational experience of the Separation Science chemists beyond what could be achieved if the Separation Science and the Business Administration were pursued independently. It serves those who would like to advance into management positions. The General Program Emphasis prepares students to enter professional schools or to continue further graduate work in chemistry. The Chemical Education Emphasis serves in-service middle and high school teachers who attained a bachelor's degree in chemistry and hold a teaching certification/license to become highly qualified teachers trained in advanced chemistry and pedagogical content knowledge of teaching science in secondary schools. They will also be well prepared to conduct research in the area of Chemical Education or teach at 2-year colleges.

Requirements for Admission to the Program:

Students must fulfill the requirements for admission to the College of Graduate Studies and Research.

Full admission to the program requires at least a 3.0 (B) average in the following prerequisite undergraduate courses:

1. two semesters of general chemistry, two semesters of organic chemistry, two semesters of physical chemistry, and one semester of analytical chemistry (all of these must include laboratory);
2. two semesters (normally eight credit hours) of physics including laboratory; and
3. two semesters (normally eight credit hours) of calculus.

Conditional admission to the program may be granted when a student has a marginal undergraduate record or a deficiency in prerequisite undergraduate courses. All conditions must be fulfilled for candidacy (see below).

If the admission file/evaluation is not completed by the time of registration, the student may choose to register as a graduate student-at-large provided the appropriate application has been filed with the Office of Admission and Records in accordance with their established deadlines.

Requirements for the Degree:

- **Course Work:** (30 credit hours) A total of 30 credit hours must be earned. The majority of students take approximately ten formal courses. Options are available to earn credit hours for research, independent study, and thesis work as outlined below.
- For students admitted to Master's programs for the Fall 1997 semester and thereafter, graduate coursework is at the 400-level. However, two of the following courses may be taken as part of the master's program if they have not been previously taken as part of an undergraduate program. No other 300 level courses can apply. Consult with your program advisor or the Graduate College for details

Code	Title	Hours
CHEM-316	Inorganic Chemistry	4
CHEM-330 or CHEM-331	Instrumental Analysis: Spectroscopy Instrumental Analysis: Quantitative Methods	4
Total Hours		8

Core Courses

All students with the exception of the Business-Oriented Separation Science Emphasis must take at least one course in each of the four areas of the Core Courses.

Code	Title	Hours
Analytical Chemistry		
CHEM-450	Gas Chromatography	3
Inorganic Chemistry		
CHEM-402	Organometallic Chemistry	3
CHEM-406	Coordination Chemistry	3
CHEM-413	Modern Inorganic Chemistry	3
Organic Chemistry		
CHEM-403	Physical Methods Of Organic Chemistry	3
CHEM-411	Organic Reaction Mechanisms	3
Physical Chemistry		

CHEM-404	Chemical Thermodynamics	3
CHEM-405	Quantum Chemistry	3
CHEM-412	Reaction Kinetics	3

Separation Science Emphasis

Required Coursework:

Students in the Separation Science Emphasis program must take 21 hours from the CORE and 9 hours of the following Required Coursework in the Separation Science:

Code	Title	Hours
CHEM-451	Liquid Chromatography	3
CHEM-455	Method Development And Validation In Liquid Chromatography	3
CHEM-456	Advanced Chromatographic Methods	3
Total Hours		9

Students writing a thesis take 12 hours from the CORE, the 9 hours of Required Coursework in the Separation Science Emphasis, and 9 hours of Independent Study (CHEM-408, 3 cr.) and Thesis hours: Chemistry, 1 - 3 cr. in the area of Separation Science. These Thesis credit hours are added over multiple semesters to make 6 credits total. Non-thesis students take 18 hours from the CORE, the 9 hours of Required Coursework in the Separation Science, and 3 hours of Independent Study in the area of Separation Science.

BUSINESS-ORIENTED SEPARATION SCIENCE EMPHASIS

REQUIRED COURSEWORK:

Students in the Business-Oriented Separation Science Emphasis program must take 3 hours Gas- Chromatography (CHEM 450) from the CORE, 9 hours of the required course work in the Separation science, 3 hours Independent Study in the area of Separation Science, and 15 hours of the following Required Business Competencies Coursework:

Code	Title	Hours
Required Courses:		
COBM-401	Accounting For Managers	3
COBM-402	Business Economics And Finance For Managers	3
COBM-403	Topics In Management And Marketing	3
COBM-404	Business Statistics And Operations Decisions For Managers	3
Select one elective from the following Managerial Competencies courses or approved by the department:		
MNGT-474	Human Resources Policy And Decision Making	3
MNGT-480	Entrepreneurship	3
MNGT-489	Management Of Organizational Change	3
MNGT-490	Innovation And Creativity	3
MNGT-491	Strategic Technology & Innovation Management	3

General Program Emphasis

Students in the General Program Emphasis must take 30 credit hours from the CORE and/or Separation Science Emphasis and are also encouraged to do research and/or thesis work. Students writing a thesis take 21 hours from the CORE and/or Separation Science Emphasis and 9 hours of the Independent Study (CHEM-408 3 cr.) and Thesis hours: Chemistry 1-3 cr. in the area of Chemistry. These Thesis credit hours are added over multiple semesters to make 6 credits total. Non-thesis students take 27 hours from the Core and/or Separation Science Emphasis and 3 hours of Independent Study in the area of Chemistry.

Chemical Education Emphasis

Required coursework:

Students in the Chemical Education Emphasis program must take 21 hours from the CORE and/or Separation Science Emphasis and 9 hours of Required Coursework in Education listed below or other 400 level courses from the College of Education approved by the Chemistry Department.

Code	Title	Hours
EDFN-410	Education As A Social Institution	3
LTCY-502	Literacy Instruction In Content Areas In Secondary Grades	3
LTCY-506	Writing Instruction In Middle & High School	3

EDFN-442	Media Technology For Educators ¹	3
Total Hours		12

¹ EDFN-442 Highly Recommended

Students writing a thesis take 12 hours from the CORE and/or Separation Science Emphasis, the 9 credit hours from the Required Coursework in Education and/or other 400 level courses from the College of Education approved by the Chemistry Department, and 9 hours of Independent Study (CHEM-408) and Thesis hours: Chemistry 1-3 cr. in the area of Chemical Education. These Thesis credit hours are added over multiple semesters to make 6 credits total. Non-thesis students must take 18 hours from the Core and/or Separation Science, the 9 hours of Required Coursework in Education and/or other 400 level courses from the College of Education approved by the Chemistry Department, and 3 hours of Independent Study in the area of Chemical Education.

- **Research and Thesis Work:** Students are encouraged to do laboratory or library research and/or more formally, write a thesis, and may do so under the following condition:
 - acceptance by research or thesis advisor.
Academic credit for research and thesis work is normally earned through Independent Study (CHEM-408) and Thesis hours: Chemistry (CHEM-5901, 1 cr., CHEM-5902, 2 cr., and CHEM-5903, 3 cr.) Individual arrangements are made between the student and the research advisor.
- **Final Examination:** Students writing master's theses are required to make a public oral defense of their work. Non-thesis students must make a public oral presentation of their research work, or take a comprehensive written departmental examination. Consult the graduate advisor for details.
- **Students with Foreign Credentials:** Students with foreign credentials should check with the Graduate College regarding transcript evaluation and English language testing. Since this is often a lengthy process, it is advisable for the international student with residency status to begin taking graduate courses in chemistry as a student-at-large while waiting for official word on admission. Consult the graduate advisor.
- **Merit Tuition Scholarships and Assistantships:** The Chemistry program is regularly allotted Tuition Scholarships to defray the cost of tuition for graduate students. Check with the graduate advisor for eligibility requirements well in advance of registration.

Students wishing to pursue their master of science degree on a full-time basis may occasionally do so with modest support from the University in the form of an assistantship. To be eligible for an assistantship the student must have completed at least two terms at the University and have a grade point average of at least 3.25 (on a 4.0 scale).

Minor in Chemistry

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Chemistry (22 credit hours)

Code	Title	Hours
CHEM-211	General Chemistry I	5
CHEM-212	General Chemistry II	4

CHEM-213	Writing Intensive Program: Quantitative Analysis	5
CHEM-231	Organic Chemistry I	4
CHEM-232	Organic Chemistry II	4
Total Hours		22

Substitutions require written approval by the chemistry advisor.

Transfer students must take a minimum 9 credit hours in chemistry at Northeastern to complete a Chemistry Minor. These courses must be approved by the chemistry advisor.

Students in the Elementary Education and Early Childhood Education programs who have selected this minor must complete a minimum of 9 hours at the 300-level to meet graduation and certification requirements.

Child Advocacy Studies

- Minor in Child Advocacy Studies (<http://catalog.neiu.edu/arts-sciences/child-advocacy-studies/minor-child-advocacy-studies/>)

Core Faculty

Rachel Birmingham, Ph.D., Associate Professor, Justice Studies, Coordinator of CAST

Susan Auman, M.S.W., Instructor, Social Work

Catherine Korda, M.S.W., Instructor, Justice Studies

Christopher Merchant, Ph.D., Associate Professor, Psychology

CAST-301. Introduction To Child Advocacy Studies. 3 Hours.

This course provides a survey of the emerging field of Child Advocacy Studies, which researches and seeks remedies for the maltreatment of children and youth, including specific acts of violence and neglect, in the context of the pernicious effects of racism, poverty, sexism, and heterosexism, including the unique problems faced by immigrant and displaced children. The course examines the various economic, political, social and cultural circumstances that may contribute to the abuse and maltreatment of children and youth. It also teaches students about the strategies and tactics used by various local governmental and nongovernmental agencies, courts and medical establishments to address these problems.

CAST-302. Psychosocial Advocacy For Developmental Maladjustment. 3 Hours.

This course is designed to provide the student with a survey of the various psychosocial, developmental, and public health difficulties that are faced by children and adolescents with specific focus on prevention and intervention strategies that are being employed by mental health and social service professionals at both community and societal levels. This course will also introduce the student to the ways that prevention/intervention strategies are developed, employed, and evaluated.

Prerequisite: CAST-301 with a minimum grade of C.

CAST-303. Child Advocacy Studies: Assessment And Evaluation. 3 Hours.

This is the third required course of the Child Advocacy Studies minor. It focuses on a combination of knowledge and skills necessary to providing direct service to children. The course begins with an examination of the mezzo- and macro-level systems and institutions that provide services for children and youth in the United States. The skills portion of the course supports students in gaining a beginning level of mastery in interviewing, assessment, and evaluation pertinent to serving children and youth who become identified as potential victims of abuse and neglect. The age-focus in this course includes early childhood, middle childhood, and adolescence.

Prerequisite: CAST-301 with a minimum grade of C and CAST-302 with a minimum grade of C.

CAST-304. CAST Internship Seminar. 3 Hours.

The focus of the CAST seminar course is to increase the student's sense of confidence in practicing as beginning level practitioners. This goal is achieved by building the student's awareness of her/his own strengths and limitations as a worker, along with the integration of knowledge, values and skills used in the generalist approach to practice with children, adolescents, and their families. Utilizing a collaborative supervision model, this experiential course supports students in achieving further mastery in the knowledge and skills obtained throughout the CAST coursework.

Prerequisite: CAST-301 with a minimum grade of C and CAST-302 with a minimum grade of C and CAST-303 with a minimum grade of C.

Minor in Child Advocacy Studies

Minor in Child Advocacy Studies (18 credit hours)

The Child Advocacy Studies minor provides students with knowledge and skills to deliver high quality services to infants, children, youth and their families. The program's goal is to prepare emerging practitioners to work effectively within various child-serving organizations and institutions. The program includes a focus on immigrant children and their families as well as children who are at risk or who have been impacted by violence and trauma. It also includes collaborative relationships with community-based providers that directly serve children and their families, and with advocates for equitable access to programs and services.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

- * Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.
- ** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Requirements for the MINOR in Child Advocacy Studies

To earn a CAST minor students must complete six classes (18 cr.) as follows:

- Four required courses (12 cr.),
- Two electives (6 cr.) from different disciplines drawn from the list of approved electives below.

While completing the final required course, CAST-304 students work 80 hours in the field at a site that has been approved by the CAST advisor.

Core Courses Required for Minor:

Code	Title	Hours
CAST Required Courses		12
CAST-301	Introduction To Child Advocacy Studies	
CAST-302	Psychosocial Advocacy For Developmental Maladjustment	
CAST-303	Child Advocacy Studies: Assessment And Evaluation	
CAST-304	CAST Internship Seminar	
Approved Electives ¹		6
JUST-318	Gangs In Chicago	
JUST-321	Violence Against Women	
JUST-326	Juvenile Justice System	
JUST-395	Hunger & Homelessness	
PSYC-215	Child Psychology	
PSYC-318	Psychopathology Of Childhood	
PSYC-320	Adolescent Psychology	
SOC-105	Social Inequalities And Social Change	
SOC-329	Sociology Of Violence	
SOC-332	Schools, Domination & Liberation: Sociology Of Education	
SOC-340	Sociology Of Sexualities	
SOC-358	Sociology Of Youth And Youth Culture	
SWK-301	Social Work And The Law	
SWK-307	Services To Children & Adolescents	
SWK-308	Social Work Practice With Immigrants & Refugees I	
SWK-320	Domestic Violence Social Work:Theory And Practice	
Total Hours		18

¹ Approved Electives are chosen from the selected interdisciplinary list of courses shown above.

The program will accept one elective course (3 cr.) from another college or university toward the minor, subject to the approval of the advisor.

Communication, Media, and Theatre

The Department of Communication, Media and Theatre (<http://www.neiu.edu/cmt/>) (CMT) links three creative and demanding disciplines, all of which focus on social interaction, technology, and performance. The department offers an undergraduate Bachelor of Arts degree and a graduate Master of Arts degree.

CMT Undergraduate Program - Bachelor of Arts Degree

The undergraduate Bachelor of Arts degree allows students to concentrate in one of three areas (Communication, Media, or Theatre) or blend their interests together in creative and innovative ways. CMT students can go into corporate, non-profit, or government positions, or continue into advanced graduate school programs. Potential careers include Public Relations, Social Media, Podcasting, Advertising, Corporate Communication, Politics and Activism, Journalism, Film and Television Criticism, Video and Audio Production, Acting or Directing for Stage or Screen, Set Design, Costume Design, Makeup Design, and many others.

Undergraduate students in the CMT program acquire proficiency in the theory and practice of communication, media, and theatre arts as well as develop an appreciation of differing values and perceptions of the world. Students acquire hands-on media training in a state-of-the-art media laboratory and firsthand theatre experience in the Stage Center Theatre. The CMT department also has a successful internship program that has helped many of our graduates secure employment upon graduation.

Students may declare a Communication, Media, and Theatre major or one of our seven minors by visiting the CMT Department office (FA 240) or emailing cmt@neiu.edu. At the time of declaring a major or minor in the Department, the student will be assigned an academic advisor from the Department faculty.

CMT majors may waive up to six credit hours of General Education requirements in either the Fine Arts or Humanities distribution area (or a combination of three credits in each distribution area).

Students in other majors who are looking for First-Year Experience (FYE) courses, General Education Courses, Engaged-Learning-Experience Boundary-Crossing (ELE-X) courses, or a one-credit course at the 300-level to complete the 40-credit 300-level requirement may be interested in taking any of the following courses:

Code	Title	Hours
COURSES OF INTEREST FOR NON-CMT MAJORS		
First-Year Experience (FYE) Courses		
CMTM-109A	First Year Experience: Chicago On Video: One Pixel At A Time	3
CMTT-109	First Year Experience: Staging Chicago: Performances In, For, & About Chicago	3
General Education Courses		
CMTC-100	Introduction to Communication	3
CMTM-160	Introduction To Cinema	3
CMTT-130	Introduction to Theatre	3
Engaged-Learning-Experience Boundary-Crossing (ELE-X) Courses		
CMTC-313	Communication, Gender & Identity	3
CMTC-330	Communication Research Methods	3
CMTM-377	Gender And Media	3
CMTM-379	Media Law & Ethics	3
CMTT-339	Technical Theatre Production	3
CMTT-393	Drama For Teaching And Learning	3
One-Credit 300-Level Courses		
CMTM-390	NEIU Cinémathèque	1

CMT Graduate Program - Master of Arts Degree

The graduate Master of Arts degree in Communication, Media, and Theatre includes coursework that is largely historical and theoretical in nature and is designed to provide advanced study in these disciplines. Students will further their understanding of interpersonal, intercultural, and organizational relationships; confront complex social problems; think critically about new media technologies; and understand the role of film, television, and the dramatic arts in contemporary social life. The program is designed for students interested in advanced corporate, non-profit, or public service positions; current teachers at the elementary or secondary level; and those preparing for positions in higher education or further graduate study.

All newly admitted students begin coursework in the fall semester in a cohort

- Major in Communication, Media and Theatre (<http://catalog.neiu.edu/arts-sciences/communication-media-theatre/communication-media-theatre/>)
- Minor in Communication, Media and Theatre (<http://catalog.neiu.edu/arts-sciences/communication-media-theatre/minor-communication-media-theatre/>)
- Minor in Communication (<http://catalog.neiu.edu/arts-sciences/communication-media-theatre/minor-communication/>)
- Minor in Media (<http://catalog.neiu.edu/arts-sciences/communication-media-theatre/minor-media/>)
- Minor in Journalism (<http://catalog.neiu.edu/arts-sciences/communication-media-theatre/minor-journalism/>)
- Minor in Theatre Performance (<http://catalog.neiu.edu/arts-sciences/communication-media-theatre/minor-theatre/>)
- Minor in Theatre Design, Technology, and Management (<http://catalog.neiu.edu/arts-sciences/communication-media-theatre/minor-theatre-design-technology-management/>)
- Master of Arts in Communication, Media and Theatre (<http://catalog.neiu.edu/arts-sciences/communication-media-theatre/master-arts-communication-media-theatre/>)

Cyndi Moran, M.F.A., Professor, Department Chair

Katrina E. Bell-Jordan, Ph.D., Professor, Dean of the College of Arts and Sciences

Maura Cherney, Ph.D., Assistant Professor

Sarah Fabian, M.F.A., Assistant Professor

Adam Goldstein, M.F.A., Assistant Professor

Seung-Hwan Mun, Ph.D., Associate Professor

Shayne Pepper, Ph.D., Associate Professor

Edie Rubinowitz, M.P.A., Associate Professor

CMTC-100. Introduction to Communication. 3 Hours.

The study of human communication with emphasis on how we communicate, the factors that influence the success of our communication interactions, and the areas in which communication take place.

CMTC-101. Public Speaking. 3 Hours.

The development of skills common to all forms of oral communication with emphasis on public speaking. Students will study organization, delivery, sources of materials and language usage.

CMTC-202. Voice and Diction. 3 Hours.

Emphasis on improving voice quality, volume, projection, rate, articulation, and pronunciation.

CMTC-210. Advanced Public Speaking. 3 Hours.

Concentrated study of public speaking and research for public speech, with attention to speech criticism and providing experience in various types of public speaking. Students will videotape selected talks for critique.

CMTC-213. Interpersonal Communication. 3 Hours.

This course studies how humans relate through the use of verbal and nonverbal symbols. Through participation and involvement, students explore how communication creates, maintains, and deteriorates relationships. Students also examine messages, meanings, feedback, nonverbal elements, listening, barriers and breakdowns as they affect relationships.

CMTC-214. Business And Professional Communication. 3 Hours.

This course focuses on the development of oral and written communication skills that are essential for professional life, including topics such as problem solving, listening, interviewing, and presentational skills.

CMTC-215. Small Group Communication. 3 Hours.

This course provides an in-depth study of small group communication processes. Students explore topics such as decision-making and problem solving, leadership, conflict, and diversity issues. Students are required to participate in group project.

CMTC-300. Mediated Communication. 3 Hours.

This is an investigation of the effects media and technologies have on social interaction and communication behaviors such as speaking, listening, understanding, and interpreting.

CMTC-301. Nonverbal Communication. 3 Hours.

This course explores the nature of non-verbal messages such as body language, facial expression, and artifacts in various communication contexts.

CMTC-305. Writing Intensive Program: Writing In Communication, Media & Theatre. 3 Hours.

This course is a writing intensive experience designed to introduce students to the functions and applications of various writing practices and theories in communication, media, and theatre. Students will gain an understanding of the foundations of these disciplines; recognize the broad categories of theoretical perspectives, such as humanistic, social scientific, and critical; and evaluate the contributions of various theories in interpersonal, rhetorical, organizational, media, dramatic, and intercultural contexts. This course includes formal (graded) and informal writing exercises of varying length and complexity, including but not limited to: free-writing, reading responses, and article critiques, as well as more advanced analysis and application papers.

Prerequisite: ENGL-101 with a minimum grade of C.

CMTC-306. Special Topics In Communication. 3 Hours.

This special topics course provides undergraduate students with the opportunity to study in depth a particular topic of communication. Topics will include, but are not limited to, the role and importance of communication in religion and science, politics, negotiation, intimacy and desire, and social difference.

CMTC-308. Independent Study in Communication. 3 Hours.

Individual investigation into a topic of the student's choice. Requires approval of instructor, chair and dean.

CMTC-310. Persuasion. 3 Hours.

This course examines contemporary theories and practices of persuasion through analysis and evaluation of persuasive messages in society from the used car lot to the presidential campaign.

CMTC-313. Communication, Gender & Identity. 3 Hours.

This course investigates some of the effects that gender and other identities have on communication behaviors, such as naming, language acquisition, professional orientation, conflict management, self-image, dress and social roles.

CMTC-314. Organizational Communication. 3 Hours.

This course examines organizational communication processes such as organizational culture, diversity, workplace participation and democracy. Students will assess (in)effective communication practices in organizations.

CMTC-315. Leadership Communication. 3 Hours.

This course examines the theory and practice of the social-emotional and task-related aspects of leadership processes. Students will explore standard works in classical leadership theory and contemporary frameworks related to motivation, emotional intelligence, and toxic leadership dynamics.

CMTC-316. Family Communication. 3 Hours.

This course studies the family system with a focus on the role communication plays in maintaining it. Students explore the functions of family roles, rules, and power and ways to increase or decrease communication effectiveness in this system.

CMTC-317. Intercultural Communication. 3 Hours.

This course explores issues in intercultural communication. Students will examine their own as well as other people's cultures. Major topics include race and ethnicity, immigration, social class, intercultural conflict, and social justice and how these reflect and/or affect verbal and nonverbal communication processes.

CMTC-319. Conflict Communication. 3 Hours.

This course examines the communication processes in interpersonal, organizational, and intercultural conflict, with attention to theories, research and practice related to conflict management.

CMTC-329. Health Communication. 3 Hours.

This course is designed to provide an introduction to communication processes in various health care contexts. The course will integrate interpersonal, small group, organizational, and mass communication theory and research into a survey of areas such as communication between patients and caregivers, the role of culture in health practices, images of health in the mass media, and new directions in health communication technologies.

CMTC-330. Communication Research Methods. 3 Hours.

An introduction to the principles and methods of social scientific research as they relate to the antecedents, processes and outcomes of communication behaviors. This course is intended to cultivate skills necessary for interpreting and critically evaluating research results and for designing research projects. Topics include forming research questions and hypotheses, reviewing and critiquing literature, applying quantitative and qualitative research techniques, coding and analyzing observations and writing research reports.

CMTC-383. Professional Internship 1. 3 Hours.

Professional activities in a selected field of communication, performed and supervised at public or private facilities, corporate communication sites, businesses, agencies, etc.

CMTC-384. Professional Internship 2. 6 Hours.

(See CMTC-383 for description.).

CMTC-385. Professional Internship 3. 9 Hours.

(See CMTC-383 for description.).

CMTC-386. Professional Experience Seminar. 3 Hours.

The course will provide students with an opportunity to work in a professional communication, media or theatre position while examining the experience with a faculty member and their peers. For many students, a professional placement is a new, unfamiliar experience with a set of demands that are distinct from the academic world. This course will allow students to earn credit for an internship in their desired field, while enhancing their professionalism through discussion and reflection. Consent of the instructor is required.

CMTC-400. Special Topics In Communication. 3 Hours.

This special topics course provides graduate students with the opportunity to study in depth a particular area (e.g., intercultural, group, gender, family, organizational, interpersonal), topic (e.g., identity and difference, intimacy and desire, corporate consulting, political rhetoric), or method (e.g., rhetorical criticism, auto/ethnography, content analysis) of communication. The focus will be on critically examining foundational and contemporary works that advance the theory, research, and practice about this area, topic, or method.

CMTC-401. Introduction to Graduate Study. 3 Hours.

Problems, methods and resources involved in graduate study and research in all areas of communication, media and theatre.

CMTC-402. Seminar In Research Methods. 3 Hours.

An introduction to the principles and methods of Communication, Media and Theatre research. This course is intended to cultivate skills necessary for interpreting and critically evaluating research results and for designing research critiquing literature, applying quantitative and qualitative research techniques, coding and analyzing observations, and writing research reports.

CMTC-404. Communication Theory. 3 Hours.

An analysis of communication theories, including the nature of theories, message design and reception. Course covers a broad range of theories in the communication discipline, including both humanistic and social scientific approaches. Nonetheless, particular theories analyzed each semester will vary, depending on the instructor.

CMTC-414. Seminar In Organizational Communication. 3 Hours.

This course will provide an advanced look at the major elements of organizational theory that apply to organizational communication. This field, in a modern sense, began in the 1950's and since then has grown to be one of the biggest forces in communication today. We will examine what theories direct the reality of organizations and how much of that reality is managed for the purposes of controlling individuals, whether overtly or symbolically.

CMTC-416. Seminar In Interpersonal Communication. 3 Hours.

This is a seminar exploring the basic themes, concepts and debates in research on personal relationships. Students will learn to critically analyze theory and research about relationships. The course requires a major paper on one particular facet of communication in personal relationships.

CMTC-434. Independent Study In Communication. 3 Hours.

Individual investigation into selected topics in the theory and practice of communication. This course requires approval of the instructor, Department Chair and the appropriate College Dean(s).

CMTC-5901. Thesis Hours. 1 Hour.

Guidance of student work toward the completion of a thesis to fulfill the requirements for the Master of Arts degree in Communication, Media, and Theatre. Students may register for 1--#3 credits per term with a total of 6 credits required to complete the thesis project. This course requires approval of the instructor, Department Chair, and the appropriate College Dean(s).

Requirement: Approval of the graduate advisor.

CMTC-5902. Thesis Hours. 2 Hours.

See course description for CMTC-5901.

CMTC-5903. Thesis Hours. 3 Hours.

See course description for CMTC-5901.

CMTE-490. Instructional Communication. 3 Hours.

Selected topics in methods and materials related to speaking and listening; instructional problems relative to type of programs, trends in instruction, sources, resources and research. Individual projects will adapt resources and methodology to a particular type of school and classroom, such as the inner city.

CMTE-492. Teaching College Speech. 3 Hours.

This course examines the tasks of the communication teacher; philosophy, objectives, materials and methods of instruction, communication curricula and departmental operations; and professional relationships in the community.

CMTM-105. Introduction To Journalism. 3 Hours.

This survey course introduces students to the field of journalism, its basic concepts, processes and practices. It is intended as a guide to the workings of the journalism industry, including its various branches, the basis of news judgment, and the nature of journalism in the era of new media. Its hands-on approach is designed to provide a theoretical as well as "real world" understanding of the news and application of principles related to the production and dissemination of the news.

CMTM-109A. First Year Experience: Chicago On Video: One Pixel At A Time. 3 Hours.

In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the field-specific concepts and terminology of video production. Students in this dynamic, hands-on class will turn the lens on other students engaged in hands-on learning....producing children's theatre, testing water samples, conducting fieldwork, examining issues of social justice... and get a taste of both documentary production and advanced undergraduate coursework at NEIU. Students will also get to explore uses of video at the community level - from high school students covering sports events, to local immigrants keeping their cultural ties alive.

CMTM-160. Introduction To Cinema. 3 Hours.

This course introduces students to the basic elements of cinema (editing, cinematography, sound, etc.) and explores how these elements contribute to our understanding of the themes and meanings of a particular film. After gaining a foundational understanding of these formal elements, students assess how topics such as genre, narrative, authorship, and ideology help to shape cinema.

CMTM-205. Fundamentals Of Media Writing. 3 Hours.

This course helps students solidify grammar and writing skills so they can enter the competitive field of media. It focuses on punctuation and spelling issues and introduces the "Bible" of print media, The Associated Press Stylebook. Fundamentals of Media Writing picks up where Introduction to Journalism, CMTM-105, leaves off by moving students from talking about and analyzing journalistic writing to learning the basic tools to begin practicing the profession. The course serves as a skill-building foundation and prerequisite for News Writing, CMTM-367.

CMTM-250. Introduction To Audio Production. 3 Hours.

This course introduces students to the process of audio production. The course also explores sound as an industry and an art form, as well as a tool of self-expression and of story telling. Through a series of production exercises, working individually and in groups, the student becomes familiar with the process of audio production from concept to field recordings, to scripting and editing, to producing and mixing and then to sharing the finished work with others.

CMTM-260. Introduction to Video Production. 3 Hours.

This class will introduce students to the principles and practices of digital video production, with an emphasis on single camera field production and digital, non-linear editing. Aesthetics and conventions of television programs, independent/ art videos, and documentaries will also be examined.

CMTM-265. Mass Media and Society. 3 Hours.

Development and problems of the media; the history, regulation, and social and economic implications of the media; American media systems and their relation to the media's cultural content and function.

CMTM-310. Independent Study In Media. 3 Hours.

Individual investigation into a topic of the student's choice. Must have approval of instructor, chair and dean.

CMTM-3111. Fieldwork in Video Production. 1 Hour.

Academic credit (1-6 cr.) for guided video production fieldwork. Reserved for students who have been invited to participate in documentary, narrative, experimental, commercial or other relevant and typically off-campus field production opportunities. Student enrolls with media faculty who directs project and oversees student performance. Students will utilize research skills, apply principles learned in classroom, contribute meaningfully to a long-strand production, earn credit in a broadcast or higher-profile production, and explore career options. May be taken more than once, for a maximum of six credit hours.

Prerequisite: CMTM-260 with a minimum grade of C or MASS-260 with a minimum grade of C.

CMTM-3112. Fieldwork in Video Production. 2 Hours.

See CMTM-311 for course description.

Prerequisite: CMTM-260 with a minimum grade of C or MASS-260 with a minimum grade of C.

CMTM-3113. Fieldwork in Video Production. 3 Hours.

See CMTM-311 for course description.

Prerequisite: CMTM-260 with a minimum grade of C or MASS-260 with a minimum grade of C.

CMTM-3114. Fieldwork in Video Production. 4 Hours.

See CMTM-311 for course description.

Prerequisite: CMTM-260 with a minimum grade of C or MASS-260 with a minimum grade of C.

CMTM-3115. Fieldwork in Video Production. 5 Hours.

See CMTM-311 for course description.

Prerequisite: CMTM-260 with a minimum grade of C or MASS-260 with a minimum grade of C.

CMTM-3116. Fieldwork in Video Production. 6 Hours.

See CMTM-311 for course description.

Prerequisite: CMTM-260 with a minimum grade of C or MASS-260 with a minimum grade of C.

CMTM-350. Podcasting And Audio Documentary. 3 Hours.

This course will focus on the production of podcasts from conception to completion. Students will analyze and understand the history of the growing medium. They will learn basic audio production skills such as recording and mixing and then create their own podcast episode using digital audio tools. Students will develop interviewing and storytelling skills to compose stories with dialogue, ambient sound, and music. Students will learn from professionals in the industry and examine how podcasts are promoted to reach niche or mass audiences.

CMTM-360. Advanced Video Production. 3 Hours.

This hands-on class will expand students' understanding and application of the tools of video production. Student projects will primarily be individually produced, single camera video programs. We will screen many examples of video works, of a variety of genres and with an eye for the impact of the mode of transmission on the product. We will pay critical attention to audio for video, focus on the development of one's own "voice," and emphasize constructive criticism and revision.

Prerequisite: CMTM-260 with a minimum grade of C or MASS-260 with a minimum grade of C.

CMTM-361. Digital Video Editing. 4 Hours.

This hands-on class introduces students to the principles and practices of digital, non-linear video editing, including the aesthetics and conventions of film and video cutting, history and theories of editing, and technical aspects of editing. Students will use sample footage to edit, present and critique several projects, and they will edit a final piece using footage of their own choosing.

Prerequisite: CMTM-260 with a minimum grade of C or MASS-260 with a minimum grade of C.

CMTM-362. Video Production Workshop. 3 Hours.

In this intensive, hands-on class students will produce short non-fiction video modules, linked to a specific theme each term. Students will work in small production teams, and will write, direct, shoot and edit their segments, rotating responsibilities. Students will screen, critique and revise modules, create finished shows, and organize and promote screenings.

Prerequisite: CMTM-260 with a minimum grade of C or MASS-260 with a minimum grade of C.

CMTM-363. Documentary Film. 3 Hours.

Historical survey of the international non-fiction film, including creative films, anthropological films, and television journalistic documentaries.

CMTM-364. Writing For Media - Revolving Topics. 3 Hours.

This revolving topics course provides exposure to a variety of writing topics and writing formats that will give students studying media the opportunity to develop in-depth written works in a workshop environment, with an emphasis on constructive criticism and revision. Consult the Schedule of Classes for specific topics.

CMTM-364A. Writing The Sitcom. 3 Hours.

This is a course devoted to writing the television half-hour situation comedy - a highly conventionalized television form. Students will discuss theories of comedy, analyze the structure of the sitcom, and learn industry standards for formatting and developing a script from initial idea to final script. Students will work in an approximation of a television "writers' room" in which feedback and critique are part of the creative process.

CMTM-364B. Solutions Journalism. 3 Hours.

This version of Writing for Media will focus on a new way of covering the news called "Solutions Journalism." Students will read, analyze, and write news stories that address problems but also focus on the solutions.

CMTM-365. Contemporary Issues in Mass Media. 3 Hours.

Advanced study of the socio-psychological impact of the media upon contemporary society.

Prerequisite: CMTM-265 with a minimum grade of C or MASS-265 with a minimum grade of C.

CMTM-366. Multimedia Storytelling. 3 Hours.

This course will involve writing for various media platforms with practice in the multimedia creation of original works; experience in writing forms and content typical of various media and criteria for evaluating written work; discussion of career opportunities.

Prerequisite: CMTM-260 with a minimum grade of C or CMTM-250 with a minimum grade of C.

CMTM-367. News Writing. 3 Hours.

This course will take students through the basics of news writing and reporting. The course will demand in-class writing assignments that will help students prioritize information and write with accuracy under deadline. Students will discuss and be tested on current affairs and evaluate a variety of news sources. Students will cover local events and generate story ideas.

Prerequisite: CMTM-205 with a minimum grade of C.

CMTM-368. Community Media. 3 Hours.

The course will familiarize students with the important journalistic function uniquely served by community-based media, a function increasingly important in today's media landscape of centrally produced content controlled by fewer and fewer owners focused primarily on the economic needs of those owners and the advertisers. The course will introduce students to different forms of community media - print, video, audio, and new technologies - and how these contribute to the building of community.

CMTM-369. Special Topics In Journalism. 3 Hours.

This special-topics course will cover a particular aspect of journalism each time it is offered. Example topics include: Journalism of Impact, News and Social Media, Sports Journalism, Health Reporting, and The Future of News. Students in each class will take a deep analytical dive into a topic within the field of journalism. Depending on the topic, students may be expected to do original reporting, produce news stories, or complete a research project. Students will also be encouraged to work with campus media outlets.

CMTM-370. Public Relations. 3 Hours.

Examination of the history, development and practice of the public relations field, with attention to the planning, implementation and execution of public relations campaigns and the survey techniques and strategies used by public relations practitioners.

CMTM-371. American Cinema (Origins-1950). 3 Hours.

This course is an investigation of the evolution of American film history from its origins to the end of World War II. Students are introduced to the creative, industrial, and technological developments of the given period using a variety of analytical approaches. Films are investigated according to their historical, technological, aesthetic, and ideological significance as well as their genre placement.

CMTM-372. American Cinema (1950-Present). 3 Hours.

This course is an investigation of the evolution of American film history from the end of World War II until the present. Students are introduced to the creative, industrial, and technological developments of the given period using a variety of analytical approaches. Films are investigated according to their historical, technological, aesthetic, and ideological significance as well as their genre placement.

CMTM-373. World Cinema. 3 Hours.

An examination of the major influential film movements and filmmakers from around the world and their impact on the language of cinema. This course is intended to develop an understanding of the evolution of narrative film history by analyzing films according to their historical, technological, aesthetic and ideological significance.

CMTM-374. Special Topics In Film. 3 Hours.

This revolving topics course provides exposure to a variety of topics that will give students studying film the opportunity to engage in broader as well as more in-depth investigations of the history, concepts and theoretical approaches to film studies and the body of scholarship in this field. Consult the Schedule of Classes for specific topics.

CMTM-374A. American Horror Film. 3 Hours.

As one of the revolving topics in the Studies in Film course, this class will introduce the history, evolution, and important themes of the American horror film, serving as an overview of the genre and locating it in American historical, cultural, and literary contexts. Approaches will include close readings of films as well as psychoanalytic, ideological, and feminist analyses. A number of films and clips will be screened and discussed in the context of course readings.

CMTM-375. Contemporary Hispanic Cinema. 3 Hours.

An introduction to some of the major contemporary films and filmmakers from Spain and Latin American countries. The course will not only analyze the artistic merits of the films, but also examine the social, economic, historical and political context within which they were created and how their themes are related to national identity, as well as international concerns.

CMTM-376. Television History. 3 Hours.

An overview of the cultural history of television from its origins in radio to cable and satellite communication, primarily in the U.S., but with some comparison to international contexts. Television programs are the primary focus and will be used to explore topics such as technology, regulation, audience measurement, commercial and educational/public broadcasting, advertising and programming strategies.

CMTM-377. Gender And Media. 3 Hours.

This course examines representations of gender and sexuality in popular media. Students will begin with feminist theories of representation and follow theoretical developments that include issues of race, ethnicity, masculinity, and queer theory as they relate to film, television, and new media.

CMTM-378. New Media Technologies. 3 Hours.

This course explores emerging media technologies, including descriptions of the technologies, how their implementation affects existing media institutions, and social implications of the technologies. Emphasis is on historical perspectives on emerging media technologies in the global information society including digital audio-visual media, computers and consumer electronics, and various networking technologies. The course provides students with an understanding of the background, structure, functions, and current status for each technology. Emerging convergent media revolutionizing the global knowledge system will also be covered, including deregulatory policies, corporate mergers, and industrial restructuring.

CMTM-379. Media Law & Ethics. 3 Hours.

This course introduces students to the study of legal and ethical issues affecting U.S. mass media from journalistic and business perspectives. Specifically, the course will explore the legal and ethical responsibilities and rights of communicators and media professionals across various issues, including the First Amendment, defamation, privacy, newsgathering, regulation over media content, intellectual property rights, and regulation of electronic media and advertising industry. It will also help students think through media issues from a moral reasoning perspective by taking a variety of cases through an ethical framework.

CMTM-380. Special Topics In Television. 3 Hours.

This special topics course provides exposure to a variety of topics in television studies. Students will investigate historical, industrial, theoretical, and critical approaches to television studies. Consult the Schedule of Classes for specific topics.

CMTM-380A. Television Genres. 3 Hours.

Television Genres will cover a variety of scholarly approaches to the study of television programs. Genres can be studied for how they change over time, in response to cultural changes or economic exigencies. This course will take up theoretical questions of televisuality (the aesthetic conditions of the television text), and then focus on a number of particular genres. We will be primarily focusing on U.S. television, but there will be some attention to global questions, especially those of flow and format.

CMTM-383. Professional Internship 1. 3 Hours.

Professional activities in a selected field of media, performed and supervised at public or private facilities, corporations, business agencies, etc.

CMTM-384. Professional Internship 2. 6 Hours.

(See CMTM-383 for description).

CMTM-385. Professional Internship 3. 9 Hours.

(See CMTM-383 for description).

CMTM-390. NEIU Cinémathèque. 1 Hour.

A "cinémathèque" is a small, specialized theater where important films are screened, discussed, archived, preserved, and loved. Drawing upon the tradition of cinémathèques across the world, this course will provide an opportunity for students to screen, discuss, and research important works of cinema here at Northeastern Illinois University. With on-campus resources such as 35mm prints screened by the Chicago Film Society and our extensive holdings of the Criterion Collection in the Ronald Williams Library, students will learn about the material practices surrounding film such as archival collection, preservation, and restoration as well as distribution, exhibition, criticism, and reception.

CMTM-410. Independent Study In Media. 3 Hours.

Individual investigation into selected topics in theory and practice of media. Independent studies require the approval of the instructor, Department Chair and appropriate College Dean (s).

CMTM-465. Mass Communication Theory. 3 Hours.

This course is designed to investigate the concepts, ideologies, and resulting scholarship that are relevant to the study of mass communication. Students will study a variety of mass communication theories and will critically evaluate the merits of these perspectives. Students will develop research projects to further interpret and utilize mass communication theories.

CMTM-466. Media And Cultural Studies. 3 Hours.

This graduate seminar is designed to expose students to a "cultural studies" approach to media. Cultural studies scholars are primarily concerned with issues of power, and this approach has long informed the discipline of critical media studies. The focus on media will explore structures of power and inequality as they relate to the politics of identity and experience. Drawing upon foundational readings in the field as well as current media and cultural studies scholarship, students will spend the semester exploring the way in which these structures of power materialize in media texts and industrial formations.

CMTM-467. Special Topics In Film & Television. 3 Hours.

This special topics course provides graduate students an opportunity to explore historical and theoretical approaches specific to studies of film and television. Special topics may include film history and theory, television history, national cinemas, genres, industrial technologies and trends, and issues of representation such as race, class, and gender. Required: Graduate standing.

CMTM-468. Seminar In New Media. 3 Hours.

This course will explore critical approaches to "new media" by considering the dual meaning of the term. On one hand it describes the sense of "newness" often accompanying emerging media technologies throughout history, but it also describes the important contemporary shift from analog to digital media. Students will examine the history of several media technologies at critical moments of development, change, or rupture as well as analyze issues relevant to digital media such as file sharing, social networking, identity theft, surveillance, and cyberwarfare.

CMTT-109. First Year Experience: Staging Chicago: Performances In, For, & About Chicago. 3 Hours.

In Staging Chicago students will read, watch, write, and perform plays about Chicago. Special attention will be paid to plays that premiered in Chicago and were produced by Chicago artists. In addition to reading plays, students will have an opportunity to stage scenes and present their own theatrical interpretation of the Second City.

CMTT-130. Introduction to Theatre. 3 Hours.

Survey of the components of theatrical experience and the function of the various contributors to theatrical production. Attendance at selected theatrical productions is required.

CMTT-203. Voice For The Performer. 3 Hours.

This course offers an intensive exploration of spoken vocal performance technique for the actor. Students will examine the function and usage of breath, create healthy connection between breath and sound, build resonance, and improve articulation skills leading to dynamic performances in a variety of texts and forms.

CMTT-220. Improvisation. 3 Hours.

Emphasis on mastering improvisational theatre games for both actor training and performance.

CMTT-221. Acting 1. 3 Hours.

The basic skills of acting including the actor's internal preparation for playing a role and the development of his/her external technique for projecting the role to the audience.

CMTT-240. Foundations Of Theatrical Design. 3 Hours.

This course introduces the elements of art and principles of visual design as they relate to the theatrical design areas of scenery, costumes and lighting. Students will learn how to analyze a play for design and apply this foundational knowledge to a dramatic text by creating the scenery, costumes and lighting design ideas based on text analysis, point of view, and research in the form of a production notebook.

CMTT-242. Costume Construction. 3 Hours.

Students will learn theatrical costume construction techniques through the study of basic fabric handling, pattern cutting, hand and machine sewing, and fabric dying. Students will also learn costume care and storage.

CMTT-249. Makeup. 3 Hours.

Fundamentals of stage and television makeup for straight and character roles; emphasis on the application of makeup, historical periods and uses of masks.

CMTT-309. Independent Study in Theatre. 3 Hours.

Individual investigation into a topic of the student's choice. Approval of instructor, department chair and dean.

CMTT-321. Acting 2. 3 Hours.

Building on the skills developed in Acting 1, this course deepens the student's exploration of the professional craft and demands of acting. Class sessions will take a rigorous approach to theatrical movement, character analysis, safe emotional connection, and the embodiment of action, intention, and point of view necessary for impactful storytelling. Course materials will focus on current plays and playwrights driving the national and global theatrical conversations of today.

Prerequisite: CMTT-221 with a minimum grade of C.

CMTT-331. Western Theatre History. 3 Hours.

This course charts the history and development of theatre and drama of the "West" from the approaches of the ancient Greeks through the early twenty-first century. Students will engage in active study of the societal conditions that sparked theatrical response as well as the evolution of civic and artistic approaches that have been synthesized into the Western branch of today's common theatrical forms.

CMTT-332. History Of Theatre 2. 3 Hours.

Chronological survey of the development of theatre and drama of the Western World from the Renaissance period to the twentieth century.

CMTT-333. Contemporary Theatre. 3 Hours.

This course is an intensive survey of contemporary theatre from the twentieth century to the present with an emphasis on the past five years of theatrical culture and global contributors to the field. Students will learn about dramatic structure and characters. They will read, analyze and discuss a variety of dramatic works that are in dialogue with the emerging socio-political climate around the globe. As a capstone of this course, students will research a given topic and write an original ten-minute play, and submit it to the Nuevas Voces: A Ten-Minute Playwriting Contest.

CMTT-334. Special Topics In Theatre. 3 Hours.

In-depth study of the major works of a single dramatist or movement, the relationship of those works to the period in which they were produced, and their place in the history of dramatic literature. Consult the Schedule of Classes for specific topics.

CMTT-337. Women In Playwriting. 3 Hours.

This course examines the work of the dynamic women who have shaped theatre through their words and stories. The class will investigate the lens of women playwrights and the diverse range of art created through that lens.

CMTT-339. Technical Theatre Production. 3 Hours.

The study and practice of technical theatre production in the areas of scenery, lighting, costumes, and props. Students collaborate and execute the designs for the Stage Center Theatre Mainstage Season.

CMTT-340. Set Design. 3 Hours.

Comprehensive study of the principles of scene design theory and practice.

Prerequisite: CMTT-130 with a minimum grade of C.

CMTT-341. Lighting Design. 3 Hours.

Comprehensive study of the principles of lighting design theory and practical application.

Prerequisite: CMTT-130 with a minimum grade of C or PERF-130 with a minimum grade of C.

CMTT-342. Costume Design. 3 Hours.

In-depth study of the basic design skills, identification of textiles, as well as analysis of dramatic texts for costuming and coordinating designs with a theatre production team.

Prerequisite: CMTT-130 with a minimum grade of C.

CMTT-343. Stage Management. 3 Hours.

In-depth study of the job of the Stage Manager, including production planning, prompt book design, scheduling and managing rehearsal time, and actually stage managing and calling a show.

Prerequisite: CMTT-130 with a minimum grade of C.

CMTT-345. Directing. 3 Hours.

Principles and techniques of the director's art.

Prerequisite: CMTT-130 with a minimum grade of C or CMTT-221 with a minimum grade of C or CMTT-350 with a minimum grade of C or CMTT-351 with a minimum grade of C or CMTT-359 with a minimum grade of C.

CMTT-346. American Musical Theatre. 3 Hours.

Survey of the history and evolution of American musical theatre, particularly focusing on the "Broadway musical", within the context of the political, economic, social and cultural events.

CMTT-347. Playwriting. 3 Hours.

Study of dramatic art with practice in the writing of plays for dramatic production. An attempt will be made to provide laboratory productions of outstanding student works.

CMTT-349. Summer Theatre. 3 Hours.

A laboratory class covering all phases of theatre production in conjunction with the production of a play script. Includes acting, directing, set and costume design, choreography, lighting, props publicity and theatre management as related to the production of a play script.

CMTT-350. Children's Theatre Workshop:Elementary. 4 Hours.

This course offers a comprehensive look at all facets of creating and producing theatre for Elementary school aged youth. Students research professional approaches to theatre for young audiences, rehearse, design, market, create youth engagement experiences, and build education strategies in order to generate critical storytelling experiences for young people. The course culminates in a class mounted production of a play for Chicago Public School student audiences in Stage Center Theatre.

CMTT-351. Children's Theatre Workshop:Middle and High School. 4 Hours.

This course offers a comprehensive look at all facets of creating and producing theatre for Middle and High School aged youth. Students research professional approaches to theatre for young audiences, rehearse, design, market, create youth engagement experiences, and build education strategies in order to generate critical storytelling experiences for young people. The course culminates in a class mounted production of a play for Chicago Public School student audiences in Stage Center Theatre.

CMTT-357. Interpretation Of Shakespeare. 3 Hours.

This course will offer an in-depth examination of the life, legacy, and theatrical craft of William Shakespeare. Through an interactive exploration of selected works, performance techniques, and global productions of the bard's work, we will seek to humanize Shakespeare the playwright, and examine the artistic voice that has resonated across centuries and continues to impact every aspect of our lives and every stage on which we perform.

CMTT-358. Acting 3. 3 Hours.

This course will serve as a professional preparatory laboratory for advanced acting students. Students will engage in a rigorous, practice-based study of professional acting practices, audition technique training, audition repertoire building, the business and industry of theatre, and career preparation. Actors in the course will work to cultivate a body of work that truly represents their true artistic self and then share that body of work with the profession. The course arc leads directly to a professional showcase of student work for invited leading members of the professional Chicago theatre community including directors, producers, casting directors, and management reps.

Prerequisite: CMTT-321 with a minimum grade of C.

CMTT-359. Experimental Theatre. 3 Hours.

In this course, students will study and perform experimental modes of theatre. Methods may include collaborative devising, verbatim theatre, playback theatre, physical theatre, relational performance, solo storytelling, game theatre, and live art techniques.

CMTT-383. Professional Internship 1. 3 Hours.

Professional activities in a selected field of theatre, performed and supervised at public or private facilities, theatres, organizations, schools, etc.

CMTT-384. Professional Internship 2. 6 Hours.

(See CMTT-383 for description.).

CMTT-385. Professional Internship 3. 9 Hours.

(See CMTT-383 for description.).

CMTT-393. Drama For Teaching And Learning. 3 Hours.

CMTT-393 is a practical, process-oriented course designed to introduce students to techniques for using drama as a teaching tool. From 20th century techniques for using drama as a teaching tool in elementary and middle schools, to contemporary approaches to drama as a means of community engagement and social intervention with youth and adults, students will explore multiple methods for applying drama and theatre in a variety of pedagogical settings. Course assignments are hands-on and emphasize various techniques in a space conducive to developing increased proficiency, both individually and in groups.

CMTT-423. Independent Study in Theatre. 3 Hours.

Individual investigation into selected topics in methods and materials for dramatic activities. Permission of instructor, chair, dean & graduate director.

CMTT-430. Performance Theory. 3 Hours.

This graduate level course will examine the theory and study of performance creation and interpretation through the lenses of narrative and aesthetic. Students will explore a variety of theoretical, philosophical, and performative approaches to understanding diverse performance narratives and the visual interpretation, composition, and storytelling that render such narratives meaningful to artist and audience alike.

CMTT-446. Arts Administration. 3 Hours.

This course will examine best practices in arts administration including institutional approach, mission development, structures, strategies, policies, and success assessment in the not-for-profit, commercial, and educational arts sectors. Students will investigate active and current "real world" case studies in an exploration of the competitive landscape of artistic producing and presenting.

CMTT-473. Special Topics In Theatre. 3 Hours.

This revolving topics course allows graduate students the opportunity to study in-depth, specific theatre methods, movements and motivators. Consult the Schedule of Classes for specific topics.

Major in Communication, Media, and Theatre

The undergraduate degree is a liberal arts oriented degree program which allows students to concentrate, via elective course selection, in any of the three areas of study offered within the department:

Communication (CMTC), Theatre (CMTT), and Media (CMTM).

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Master of Arts in Communication, Media, and Theatre

Master of Arts in Communication, Media and Theatre (30 credit hours)

This graduate program is designed to provide advanced study of communication research and the principles and practices of communication, media and theatre, for teachers of communication at the secondary level, elementary school teachers, candidates for teaching positions in higher education, students interested in positions in business and industry, and as a preparation for further graduate study. All newly admitted students begin coursework in the fall semester.

Minimum Requirements for Admission to the Program

Students must fulfill the requirements for admission to the College of Graduate Studies and Research before admission into the CMT graduate program can be considered. Applicants are required to have completed 15 undergraduate credit hours (a minimum of 9 credit hours at the advanced [300 or above] undergraduate level) in Communication, Media or Theatre or related areas at an accredited institution of higher education with a B average. Applicants will also be asked to submit a writing sample. Students must satisfy these requirements prior to being admitted into the program. All final admission decisions rest with the CMT Graduate Advisor.

Students at large will only be authorized to enroll in graduate-level courses with approval of the graduate advisor and the course instructor.

Requirements for the Degree:

30 credit hours are required in consultation with the graduate advisor. A maximum of six hours in cognate areas may be included in the program with the approval of the graduate faculty committee of the Department of Communication, Media and Theatre.

Required Courses:

Code	Title	Hours
Core courses		
CMTC-401	Introduction to Graduate Study	3
CMTC-402	Seminar In Research Methods	3
CMTC-404	Communication Theory	3
CMTT-430	Performance Theory	3
CMTM-465	Mass Communication Theory	3
5 Electives selected from 400-level courses in Communication, Media and Theatre		15
Total Hours		30

Electives

Code	Title	Hours
CMTC-400	Special Topics In Communication	3
CMTC-414	Seminar In Organizational Communication	3
CMTC-416	Seminar In Interpersonal Communication	3
CMTC-434	Independent Study In Communication	3
CMTE-490	Instructional Communication	3
CMTE-492	Teaching College Speech	3
CMTM-410	Independent Study In Media	3
CMTM-466	Media And Cultural Studies	3
CMTM-467	Special Topics In Film & Television	3
CMTM-468	Seminar In New Media	3
CMTT-423	Independent Study in Theatre	3
CMTT-431	Comparative Performing Arts	3
CMTT-446	Arts Administration	3
CMTT-473	Special Topics In Theatre	3

In addition to coursework, students must (a) take comprehensive exams, or (b) apply to write a thesis, in order to graduate. Theses must have the approval of the appropriate graduate committee. Students should enroll in CMTC-5901, CMTC-5902 or CMTC-5903. The course counts towards the requirement of 400-level electives. Students may enroll one time only.

Students who complete a thesis must pass an oral examination on topics included in the thesis.

Further information will be provided upon acceptance into the program. Please contact the CMT Graduate Advisor for current information about CMT Graduate Course offerings.

30 credit hours are required in consultation with the graduate advisor. A maximum of six hours in cognate areas may be included in the program with the approval of the graduate faculty committee of the Department of Communication, Media and Theatre.

Minor in Theatre Performance

This minor allows students with a vested passion in Theatre Performance to develop the essential foundations and vocabulary of acting craft through a structured and layered approach to artistic process. The minor provides the core artistic tools and professional preparation emphasis that emerging actors need to thrive in professional theatrical rooms, on set, and in content development. A minor in Theatre Performance prepares NEIU artists for the art and business of theatre and entertainment while providing them with invaluable skills to aid in self-expression, social change and activation, and performance-based culture building.

Minor in Theatre Design, Technology, and Management

This minor, also known as Theatre DTM, allows students with a vested passion in theatre design, technical areas, and management positions, to develop the essential foundations and vocabulary of craft through a structured, layered approach to professional production processes in theatre. The minor recognizes designers, technicians, and management staff as generative artists in theatrical spaces and provides the core creative tools and professional preparation emphasis needed to thrive in professional theatrical rooms. A minor in DTM prepares NEIU artists for the art and the business of theatre and entertainment while providing them with invaluable skills to aid in self-expression, social change activation, and performance-based culture building.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Theatre Design, Technology, and Management (18 credit hours)

Code	Title	Hours
Minor in Theatre Design, Technology, and Management		
Required Core Course:		3
CMTT-240	Foundations Of Theatrical Design	
Select two of the following Design courses:		6
CMTT-340	Set Design	
or CMTT-341	Lighting Design	
or CMTT-342	Costume Design	
or CMTT-343	Stage Management	
Select one of the following Literature or History courses:		3
CMTT-331	Western Theatre History	
or CMTT-333	Contemporary Theatre	
or CMTT-334	Special Topics In Theatre	
or CMTT-337	Women In Playwriting	
or CMTT-346	American Musical Theatre	
or CMTT-357	Interpretation Of Shakespeare	
or CMTT-393	Drama For Teaching And Learning	
Select one of the following Performance courses:		3
CMTT-203	Voice For The Performer	
or CMTT-221	Acting 1	
or CMTT-321	Acting 2	
or CMTT-345	Directing	
Select one of the following Design Practicum courses:		3
CMTT-309	Independent Study in Theatre	
or CMTT-383	Professional Internship 1	
Total Hours		18

Earth Science

In Earth Science, we use an integrated approach to understand the composition, structure, evolution, and dynamic of planet Earth. This covers processes ranging from the deep inner earth to those at the earth's surface to the outer limits of our atmosphere. The program combines geology, mathematics, physics, chemistry, and field studies to address how the earth works over various spatial and temporal scales. The main subject areas you will study include general and historical geology, properties of Earth materials, igneous petrology, sedimentology and stratigraphy, structural geology, field methods, and climate science. You will examine slow, long-term processes such as mantle convection, plate tectonics, and mountain building, as well as processes with short timescales including current, societally relevant problems such as the study of natural hazards, seismicity, volcanism, climate change, and mineral-, energy-, and water-resource exploitation.

Our curriculum offers wide a spectrum of methods and research topics drawn from the different research groups and expertise of faculty within the Department (biogeochemistry & water resources, climate & tectonics, igneous petrology & volcanism). Students are mentored in the lab and in outdoor field experiences in independent studies, capstone research projects, and/or internships. From satellite imagery and climate modeling to laboratory experiments and petrographic studies to field observations and biogeochemical analysis of water resources, we focus on techniques, skills, and knowledge that prepares you for a diversified job market in the twenty first century. Individual academic advising and personalized curricula provide a wide range of elective offerings that are best suited for your career interests.

Our highly interdisciplinary program in Earth Science can lead to your Bachelor of Science degree or an undergraduate minor. No matter what your interests are, you will leave the program with a better understanding of the forces and processes that shape our global environment and the world around you.

- Major in Earth Science (<http://catalog.neiu.edu/arts-sciences/earth-science/earth-science/>)
- Minor in Earth Science (<http://catalog.neiu.edu/arts-sciences/earth-science/minor-earth-science/>)

Greg Anderson Ph.D., Professor, Chair
 Elisabet Head, Ph.D., Associate Professor, Department Coordinator
 Nadja Insel, Ph.D., Associate Professor, Undergraduate Advisor
 Kenneth Voglesonger, Ph.D., Associate Professor

ESCI-109. First Year Experience: Chicago Rocks! Geology In The City. 3 Hours.

Chicago has been at the bottom of the sea, buried under a mile of ice, and set in a warm, tropical paradise. Such diverse changes have shaped Chicago and the surrounding region, including the lake, the rivers, the ground we walk on (and build on), and the decisions we make about land use, resources, and waste management. Explore Chicago Rocks - as well as water, weather, and land forms - in the context of current issues related to resource use and the environment. Field trips and hands-on experiences highlight the extent to which geology influences the character of the Chicago area.

ESCI-109W. First Year Experience: Chicago's Muddy Waters- Environmental Geology. 3 Hours.

Chicago's vital bodies of water - Lake Michigan, Chicago River, and others - interact with the urban landscape and the soils and rocks of the ground beneath. Such interactions influence environmental issues in everyday life, including "What happens when water goes down the drain?" and "Why do certain areas flood after it rains?" These questions are explored in the context of Chicago's geology, to evaluate the critical factors affecting soil and water contamination, flooding, and our drinking water. Laboratory analysis of water and soil, collected on local field trips, will clear the 'muddy water' about environmental geology impacts in local neighborhoods. (Lecture 2 hr., lab 2 hr.).

ESCI-121. Introduction To Earth Science. 3 Hours.

Basic concepts of geology, meteorology, oceanography, and the solar system. Discussion of topics of current interest in the earth sciences. Laboratory involves the study of minerals, rocks, maps and weather instruments. Lecture 2 hours, lab 2 hours.

Prerequisite: (MATH-091 - 499 or MATH-091A - 499Z or NEIU Math Placement Result 02 - 45 or ACT Math 19 - 36 or Accuplacer Elementary Algebra 060 - 084 or Accuplacer College Level Math 020 - 120 or Accuplacer Adv. Algebra & Func 200 - 300 or SAT Math 500 - 800).

ESCI-123. Environmental Geology. 3 Hours.

Earth, its structure, composition and resources. Mineral and energy resources, their formation and distribution, their supply and demand projections for the future. Water resources and water quality. Environmental impact of resources, nuclear and other waste disposal, geological aspects of earthquake and volcanic hazards. Lecture 3 hours.

Prerequisite: (MATH-091 - 499 or MATH-091A - 499Z or NEIU Math Placement Result 02 - 45 or ACT Math 19 - 36 or Accuplacer Elementary Algebra 060 - 084 or Accuplacer College Level Math 020 - 120 or Accuplacer Adv. Algebra & Func 200 - 300 or SAT Math 500 - 800).

ESCI-211. Physical Geology. 4 Hours.

This course emphasizes basic geologic processes and concepts with a focus on understanding the Earth as a system. In this course we will study how the rock cycle, geotectonics, volcanoes, and earthquakes are interrelated, and examine the way internal and external processes interact at the Earth's surface to shape our landscape. Formation, relevance, and implication of water, mineral, and energy resources, as well as climate change, will be part of the fundamental intellectual inquiry into the past, present, and future of our planet.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

ESCI-303. Environmental Geology In The Field. 4 Hours.

This course introduces students to standard approaches, equipment, and tools used in geological field investigations and lab-based methods in order to develop and test geological ideas and concepts. Special attention is given to the fundamental aspects of geologic mapping, field observations, data gathering, use of a geologic compass, topographic and geologic map use and interpretation, and the construction of geologic cross sections. A significant part of the course will involve case studies as well as hands-on field and laboratory analyses with a focus on Midwestern geological features and landforms. The course includes two mandatory weekend field trips.

Prerequisite: ESCI-121 with a minimum grade of C or ESCI-211 with a minimum grade of C.

ESCI-306. Writing Intensive Program: Earth Materials. 4 Hours.

This course focuses on identifying common rocks and minerals and understanding their association to plate tectonic settings and landscape dynamics. Observational skills and hand sample identification are emphasized.

Prerequisite: ESCI-211 with a minimum grade of C and ENGL-101 with a minimum grade of C.

ESCI-307. Climate Change: Evidence, Causes, Effects. 4 Hours.

This course will provide an integrative understanding of the components of the climate system, including the science behind climate change, the range of natural climate variability and external drivers of climate change, as well as impacts of a changing climate on multiple sectors. The course explores the basic science underpinning environmental dynamics and climate change, and the practical problem solving and communication skills to critically assess and discuss these topics. We will use case studies and media stories as backdrop to illustrate the many environmental and climate issues we face today.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

ESCI-308. Geology Of The National Parks. 3 Hours.

Study of the geological processes producing and controlling the lands within the National Park System. Lecture 3 hours.

Prerequisite: ESCI-121 with a minimum grade of C or ESCI-211 with a minimum grade of C.

ESCI-309. Geochemistry. 3 Hours.

Chemical composition of the earth, element abundances, cosmochemistry, meteorites, origin of elements, geochronology, geothermometry, geobarometry, principles of trace element distribution. Igneous, metamorphic and sedimentary environments. Lecture 3 hours.

Prerequisite: CHEM-211 with a minimum grade of D and (ESCI-306 with a minimum grade of D or ESCI-206 with a minimum grade of D).

ESCI-310. Geology Of The Chicago Region. 4 Hours.

The geologic history of Chicago integrates the effects of changes in climate and sea level, varied sedimentary processes, and the influence of the tectonic framework of the Midwestern US region. This course explores the diversity in Chicago's geologic past and present, including the continuing evolution of a geologic landscape affected by glacial, stream, and coastal processes, and examines the impact of local geology on resources and land use, as well as the impact of human processes on the geologic environment. Interpretation of map evidence and real-time data, individual research, and local and regional field experiences supplement class discussion. Lecture 2 hours and Lab 3 hours.

Prerequisite: ESCI-211 with a minimum grade of C.

ESCI-311. Mineralogy And Petrology I. 4 Hours.

This course is an introduction to fundamental mineralogical and petrological principles. Igneous and metamorphic processes are explained using crystallization theory, phase diagrams, thermodynamics, and geochemistry. We survey the distribution, chemical composition, and mineral associations in rocks of the Earth's crust and upper mantle, and investigate the relationships between these and tectonic environments. Lab methods include studying physical and optical properties of rocks and minerals.

Prerequisite: CHEM-211 with a minimum grade of C and (ESCI-306 with a minimum grade of C or ESCI-206 with a minimum grade of C).

ESCI-312. Historical Geology. 4 Hours.

Evolution of the earth and its flora and fauna, paleoecology; principles of paleontological stratigraphy and techniques of relative and absolute age determination. Lecture 3 hours, lab 2 hours.

Prerequisite: ESCI-121 with a minimum grade of C or ESCI-211 with a minimum grade of C.

ESCI-314. Paleontology. 4 Hours.

Principles, study of invertebrate phyla, morphology, taxonomy, evolution and paleoecology as well as occurrence of various fossil types. Lecture 2 hours, lab 3 hours.

Prerequisite: ESCI-212 with a minimum grade of C or ESCI-312 with a minimum grade of C.

ESCI-315. Glacial Geology. 4 Hours.

This course focuses on interpreting glacial processes and glacial environments, both past and present. Applying techniques that include map interpretation and correlation, remote sensing, and comparison of sediment and topographic data, students will analyze glacier dynamics, the development of glacial landscapes, and the geologic record of glaciations and glacial processes. Lecture 2 hours, Lab 3 hours. Prereq: ESCI-121 or ESCI-211.

Prerequisite: ESCI-121 with a minimum grade of C or ESCI-211 with a minimum grade of C.

ESCI-316. Volcanic Processes And Hazards. 4 Hours.

This course will cover physical and chemical controls on the timing, style, and magnitude of volcanic eruptions, as well as the products (including natural resources) that form from volcanic activity. Data obtained from a variety of analytical techniques associated with physical and chemical processes at volcanoes will be evaluated and applied to solve volcanic problems. Impacts of volcanic eruptions on society and the strategies to reduce risk, such as volcanic monitoring, will be discussed.

Prerequisite: ESCI-211 with a minimum grade of C and CHEM-211 with a minimum grade of C.

ESCI-317. Sedimentology And Stratigraphy. 4 Hours.

This course introduces students to the basic principles used in the study of sedimentology and stratigraphy, including the knowledge and tools to investigate sediment formation, transportation, and deposition. Students learn the fundamentals of fluid flow, sediment transport, physical properties of sediments, and the formation of sedimentary structures, as well as how to connect these with the environments in which sedimentary rocks form. Special emphasis is placed on stratigraphic nomenclature and observation of thin sections in the lab, and the application of various concepts to stratigraphic columns in the field.

Prerequisite: ESCI-306 with a minimum grade of C or ESCI-206 with a minimum grade of C.

ESCI-319. Petrology. 4 Hours.

Classification of rocks. Study of mineralogical and textural relations of major rock groups in hand specimens and thin sections. Chemical composition of rocks. Chemical and petrographic data interpretation. Interrelation of petrological processes and plate tectonics. Description of selected and widely referred petrologic complexes. Lecture 2 hours, lab 3 hours.

Prerequisite: ESCI-311 with a minimum grade of C.

ESCI-320. Limnology. 4 Hours.

In this course, students will explore the geological aspects of freshwater systems, focusing on Lake Michigan. Topics that will be covered include the origin of Lake Michigan, tectonic and climatic settings of the Lake, physical sedimentary processes, sedimentary geochemistry, geochronology and paleolimnology. Students will also explore the multidisciplinary aspects of biogeochemical cycling of elements, the role of planktonic organisms in these cycles. Lecture 2 hours, Lab 3 hours.

Prerequisite: ESCI-211 with a minimum grade of C.

ESCI-324. Oceanography I. 4 Hours.

Ocean boundaries and bottom topography. Origin and evolution of ocean basins. Nature and characteristics of coastal and marine sediments. Gathering of oceanological data development of the marine sciences.

Prerequisite: ESCI-121 with a minimum grade of C and ESCI-207 with a minimum grade of C.

ESCI-326. Independent Study In Earth Science. 3 Hours.

Research in the geological sciences, oceanography, meteorology, or astronomy under the guidance of a faculty member. Independent Studies require the approval of the instructor, department chair and the appropriate College Dean.

ESCI-327. Aqueous Environmental Geochemistry. 4 Hours.

This course builds on students' fundamental knowledge of aqueous chemistry and highlights applications relevant to geological sciences. The course focuses on using chemical principles to study surface and near surface water and water-rock/water-soil interactions. Topics include basic thermodynamics, chemical speciation, mineral solubility, complexation, acid-base reactions, oxidation-reduction reactions, carbonate chemistry, and an introduction to geochemical modeling. The practical applications of these topics will develop quantitative skills required for addressing geological and environmental issues.

Prerequisite: ESCI-211 with a minimum grade of C and CHEM-212 with a minimum grade of C.

ESCI-329. Soil Science. 4 Hours.

Fundamentals of soil including origin, composition, and classification; physical, chemical and biological properties; significance of soil properties for evaluation of soil as a resource; soil fertility and amelioration, soil and watershed use and conservation, and environmental concerns, including soil contamination and remediation.

Prerequisite: ESCI-121 with a minimum grade of C or ESCI-211 with a minimum grade of C.

ESCI-330. Structural Geology. 4 Hours.

This course introduces the basic concepts of brittle and ductile deformation processes and how they control the strength, mechanical behavior and development of structures in the Earth's continental crust. The course provides a basic understanding of the forces driving deformation and associated displacements and strains. Emphasis is placed on (1) illustrating how deformation processes change under the influence of changing pressures and temperatures with increasing depth in the lithosphere, and (2) examining the types of structures produced by single episodes of deformation of crust, and how their styles and geometries vary as a function of depth in the continental crust.

Prerequisite: ESCI-303 with a minimum grade of C and ESCI-317 with a minimum grade of C.

ESCI-331. Geological Structures And Map Interpretation. 4 Hours.

Determination of the attitude and thickness of inclined strata and their bearing on outcrop patterns; preparation of geological maps from given field data; and interpretations of aerial photos, topographic maps, and geological maps depicting folds, faults, unconformities and intrusive bodies; preparation of geological cross sections. Lecture 2 hours, lab 3 hours.

Prerequisite: ESCI-211 with a minimum grade of C.

ESCI-333. Internship In Earth Science. 3 Hours.

Field experience at an off-campus site. Student will work a minimum of 150 hours with an earth science agency or organization. Evaluation will be based in part on the student's creation of a tangible product. Details of internship will be arranged by the student, faculty advisor and site supervisor.

ESCI-335. Meteorology. 4 Hours.

This course introduces the processes at work in the earth's atmosphere and the physical laws that control them; horizontal and vertical circulations, atmospheric stability, radiation balance, precipitation, air masses, frontogenesis, and severe weather. Laboratory work involves extensive use of maps and charts.

Prerequisite: PHYS-201L with a minimum grade of C or PHYS-206L with a minimum grade of C.

ESCI-337. Principles Of Hydrogeology. 4 Hours.

Introduction to the theory and principles of groundwater flow as well as streamflow. Topics include the hydrologic equation, evapo-transpiration, well drilling and testing, porosity and permeability, Darcy's law, confined and unconfined aquifers, flow-nets, geology of groundwater occurrence, water table maps, geophysical exploration methods, well logs, streamflow and hydrographs. Lecture 3 hours, Lab 2 hours.

Prerequisites: ESCI-211 and (MATH-185 or MATH-106 or NEIU Math Placement Result 35 - 45 or ACT Math 25 - 36 or Accuplacer College Level Math 031 - 120 or SAT Math 580 - 800 or Accuplacer Adv. Algebra & Func 250 - 300).

ESCI-339. Field Hydrogeology. 4 Hours.

Field techniques of measuring infiltration, soil moisture, aquifer permeability and hydraulic conductivity. Practice in conducting geophysical surveys and drilling, logging and developing ground water wells. Methods of sampling water for chemical analysis. Visits to drilling, monitoring and waste management sites. Methods of recording, analysing, mapping and reporting field data. Lecture 2 hours, lab 3 hours.

Prerequisite: ESCI-337 with a minimum grade of C.

ESCI-340. Introduction To Geotechnical Engineering. 4 Hours.

Introduction to basic concepts of design and engineering of earth materials. Geotechnical soil properties, engineering soil classification, site characterization, earthwork, interactions of water with Earth materials. Overview of engineering design of roadways, landfills, dams, levees, and tunnels. Especially useful for those interested in environmental aspects of geology. Lecture 2 hours, laboratory 3 hours.

Prerequisite: (MATH-104 or MATH-177 or MATH-185 or NEIU Math Placement Result 35 - 45 or ACT Math 25 - 36 or Accuplacer College Level Math 031 - 120 or SAT Math 580 - 800 or Accuplacer Adv. Algebra & Func 250 - 300) and.

ESCI-341. Environmental Hydrology. 4 Hours.

The course introduces surface water hydrology, emphasizing applications in urban and agricultural environments of the glaciated Midwest. The course includes basic principles of the processes, interrelationships, and measurement of precipitation, infiltration, evaporation, evapotranspiration, interflow, overland flow, stream flow, and ground water flow. Also covered are an introduction to quantification of watershed hydrologic budgets, hydrographs, flood routing, hydraulic drainage and control structures, and estimation of extreme events. Lecture 2 hrs., laboratory 3 hrs.

Prerequisite: ESCI-211 with a minimum grade of C and MATH-185 with a minimum grade of C.

ESCI-347. Climate Change: Past, Present, Future. 4 Hours.

This course investigates the characteristics and causes of short (1 year) to long-term (>1 million years) climate change over the past ~400 million years and ~100 years into the future. The course will present an overview of the methods and techniques used to reconstruct Earth's climate history in the past, and will investigate ongoing climate changes in the present, and those predicted for the future. Students will be introduced to an educational state-of-the-art climate model (EdGCM) to simulate, implement, and analyze the effects of climate change by using real-world data and scientific approaches.

ESCI-350. Geotectonics. 4 Hours.

Geotectonics is the study of large-scale motion and deformation of earth's crust and mantle, the relationship of geodynamics to volcanic activity, earthquakes, and surface features, as well as the deep structure and movement of the interior of the earth. Interdisciplinary instruction of geological, geophysical, and geochemical concepts will allow students to develop a broad working knowledge of classic and current plate tectonics. Historical and recent papers on plate tectonics will be read, discussed, summarized in written reports, and presented to the class. Laboratories will consist of analyzing geologic, geophysical, geochemical, and remotely sensed evidence of current and ancient geodynamics.

Prerequisite: ESCI-211 with a minimum grade of C.

ESCI-370. Interdisciplinary Seminar On Climate Change. 2 Hours.

This university-wide seminar provides important views on the critical issue of climate change, drawing from many perspectives and disciplines. Faculty from different NEIU departments and other institutions will present an overview of socio-economic, political, cultural, racial, gender, ethical, and scientific perspectives on the issue of climate change. The main objective of the seminar is to gain an understanding of the dynamic linkages and feedbacks between the climate system and society and to critically evaluate climate change solutions in the context of sustainability and social & environmental justice.

ESCI-390. Field Geology. 5 Hours.

This course introduces standard geologic field techniques and data analysis. It is a multiple-week intensive course in geologic mapping and field investigation that focuses on: (1) Collecting and recording data using common geologic field methods and tools; (2) Synthesizing geologic data collected in the field by producing geologic maps and cross-sections; (3) Developing a reasonable geologic history based on multiple lines of evidence. Students will be exposed to a spectacular landscape, where different geologic processes are present and well-exposed. Lecture 3 hours, Lab 3 hours.

Prerequisite: ESCI-330 with a minimum grade of C and ESCI-311 with a minimum grade of C.

Major in Earth Science

Major in Earth Science for the Bachelor of Science Degree

The Bachelor of Science in Earth Science prepares students for graduate study, or a wide range of positions in Environmental Geoscience fields, including industry, consulting, or state/federal agencies. In addition to required and elective ESCI courses, additional courses in cognate fields (math and science) are required for completion of the degree program. All students are urged to plan their program with the help of ESCI faculty advising.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Earth Science requirements (66-67 cr. hrs.)

Code	Title	Hours
Required Courses		
ESCI-211	Physical Geology	4
ESCI-306	Writing Intensive Program: Earth Materials	4

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Earth Science (19-20 credit hours)

Code	Title	Hours
Required Courses		
ESCI-211	Physical Geology	4
ESCI-306	Writing Intensive Program: Earth Materials	4
ESCI-307	Climate Change: Evidence, Causes, Effects	4
ESCI-312	Historical Geology	4
One elective Earth Science course at the 300-level		3-4
Total Hours		19-20

Students also should be aware of the University requirements for the Bachelor's degree. All students must complete a minimum of 40 semester hours at the 300 level.

Economics

The Department of Economics (<http://econ.neiu.edu>) offers courses of study leading to the degree of Bachelor of Arts. Economics is all about how people make decisions using theory and numerical analysis. Business, governments, and non-profits all value people who can help the best course of action and make sense of the complicated issues we face every day. Not only does an economics degree provide students with a marketable set of business tools - problem-solving, data analysis, and policy modeling - it gives graduates the ability to handle challenges in a wide range of areas. It's more than a technical degree. It's real world skills for real world problems.

ENROLLING IN COURSES

Students considering a major in Economics should begin with our two-course Principles sequence, including ECON 215: Principles of Macroeconomics and ECON 217: Principles of Microeconomics. (These can be taken in any order, or even during the same semester.) In addition, students majoring in Economics should be sure to complete Math 165 or MATH 177, which is a prerequisite for statistics and some of our 300-level courses. Upper-division courses do not need to be taken in any sequence, and course schedules are designed to accommodate students who require either daytime or evening courses.

Students in all majors are welcome to enroll in Economics courses. Economics is a valuable complement to any major, and students with interests in politics, world affairs, finance, or urban issues may want to go beyond the Principles level and explore our field courses. An Economics minor is an excellent complement to a degree in math, political science, computer science, or any other field.

BECOMING A MAJOR

You do not need to declare a major to enroll in degree courses, but you should declare as soon as possible. The Economics Major or Minor can be declared once you are fully admitted student at NEIU. To become an Economics Major or Minor, please complete the Major Declaration Form (<https://www.neiu.edu/academics/registrar-services/declaring-major/minor/>) and deliver it to the department office in BBH 346C, by email to econ@neiu.edu, or to one of our faculty members. You will then be assigned an advisor and should schedule an advising session as soon as possible to discuss the program and requirements.

After completing the Principles sequence (ECON-215 and ECON-217), Economics majors must take our two theory courses (ECON-303 and ECON-304), a statistics course (ECON-220), a writing and tools course (ECON-221), and six elective courses (for 36 credits total).

The department regularly offers elective courses in the following subfields:

- **Applied Microeconomics and Urban Economics** (306, 309, 322, 330, 333, 334, 336, 377)
- **Applied Macroeconomics and Financial Economics** (307, 321, 343, 344, 345)
- **Data Analysis and Quantitative Methods** (310, 318, 330, 339, 343, 346)

Please contact Dr. Scott Hegerty (S-Hegerty@neiu.edu) or one of the faculty advisors in the Department of Economics (<https://www.neiu.edu/academics/college-of-arts-and-sciences/departments/economics/contact-economics/>) to develop a plan of study.

The Department of Economics offers a Major and a Minor program of study. Students should meet with a faculty advisor upon joining the program and throughout their academic careers to develop a plan of study. Students are encouraged, but not required, to organize their electives according to the Department's three informal concentrations (urban/micro, financial/macro, and data analysis).

- Major in Economics (<http://catalog.neiu.edu/arts-sciences/economics/economics/>)
- Minor in Economics (<http://catalog.neiu.edu/arts-sciences/economics/minor-economics/>)

The economics major is excellent preparation for careers in the public or private sector, or for graduate study in quantitative or social science fields. An economics minor is an excellent complement to a variety of majors, including mathematics, political science and computer science.

Students should also be aware of the University requirements for the Bachelor's degree (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>).

Erick Howenstine, Ph.D., Professor, Chair
 Christina Ciecierski, Ph.D., Professor, Advisor
 Ryan Gallagher, Ph.D., Associate Professor, Advisor
 Scott W. Hegerty, Ph.D., Associate Professor, Advisor, Coordinator
 Hardik Marfatia, Ph.D., Associate Professor, Advisor
 Michael Wenz, Ph.D., Associate Professor

ECON-100. Financial Literacy. 3 Hours.

This course will provide students with an introduction to basic financial literacy. Students will cover the basics of the financial system, including basic banking, investment, budgeting, contracting and debt management. This course will cover both personal finance, small business organization and the relationships between households and businesses in the economy.

ECON-109. First Year Experience: Money Matters: The Chicago Economy. 3 Hours.

This course is designed to provide students with an introduction to surviving in the Chicago economy. The five foundations of the First Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the introductory field-specific concepts and terminology of economics. Students will be introduced to economic and financial literacy while learning what makes Chicago one of the greatest economic engines in the world. Students will examine the Chicago economy and collect data on major economic sectors in Chicago today with an eye on what it will take for workers, households and businesses to succeed in Chicago's future.

ECON-200. Essentials Of Economics. 3 Hours.

This course will provide students with an overview of general economic issues, principles and concepts in both microeconomics and macroeconomics. Through its integrated design, students will have the opportunity to analyze individual firms and markets as well as aggregate economic indicators. Topics to be covered include: inflation, unemployment and economic growth, with a focus on the government's role in its attempts to regulate the economy. Upon completion of the course, students will have gained a basic understanding of how people make decisions, how people interact, and how the economy as a whole works so that they may be able to conceptualize how the economy works, make better business decisions and establish a framework for viewing and interpreting the economic world around them.

Prerequisite: MATH-091 with a minimum grade of D.

ECON-215. Principles Of Macroeconomics. 3 Hours.

Elementary aggregate economics. Among the topics covered are economic instability, countercyclical economic policies, money, the banking system, government economic activity, fiscal policy, monetary policy and national income theory.

ECON-217. Principles Of Microeconomics. 3 Hours.

Among the topics covered are supply, demand, prices, the working of markets, the markets of labor and for other factors of production, distribution of the product and contemporary economic problems.

ECON-220. Business And Economics Statistics I. 3 Hours.

Introduction to the principal methods of statistical analysis as applied to business and economic problems. Topics covered include descriptive statistics, introductory probability and probability distributions, statistical estimation, hypothesis testing and regression and correlation analysis with computer applications.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C and (MATH-165 with a minimum grade of C or MATH-167 with a minimum grade of C or MATH-177 with a minimum grade of C or MATH-185 with a minimum grade of C or MATH-187 with a minimum grade of C or MATH-202 with a minimum grade of C or MATH-203 with a minimum grade of C).

ECON-221. Writing Intensive Program: Tools For Economists. 3 Hours.

This course introduces students to a wide variety of resources used by academic and applied economists. Students will learn the basics of word processing and spreadsheet design, with particular emphasis placed on the written description of data, tables and graphs, as well as academic and business writing styles. Students will also learn how to locate, interpret, and present publicly available economic data that are commonly cited in academic, business, and mass-audience publications. This is a reading- and writing-intensive course that satisfies NEIU's Writing Intensive Program (WIP) requirement for economics majors.

Prerequisite: (ECON-215 with a minimum grade of C or ECON-217 with a minimum grade of C) and ENGL-101 with a minimum grade of C.

ECON-300. Economic Perspectives. 3 Hours.

This course uses a multidisciplinary pedagogical approach to introduce economic insights to students from all disciplines. This course is designed to engage students from outside economics to combine tools from other disciplines with tools from economics toward problem-solving. Students will be given an introduction to basic economic tools. Students will also identify a topical economic problem and present multiple analyses of the same topic from different perspectives.

ECON-303. Intermediate Macroeconomic Theory. 3 Hours.

Consumption and investment theory, the definitions and determination of national income, employment and the price level. Also considered are the economic effects of fiscal and monetary policy.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C and (MATH-165 with a minimum grade of C or MATH-167 with a minimum grade of C or MATH-177 with a minimum grade of C or MATH-185 with a minimum grade of C or MATH-187 with a minimum grade of C or MATH-202 with a minimum grade of C or MATH-203 with a minimum grade of C).

ECON-304. Intermediate Microeconomic Theory. 3 Hours.

A systematic study of the role of the price system in organizing economic activity and an evaluation of its effectiveness; price determination and resource allocation under competition, monopoly, oligopoly and monopolistic competition; theories of demand, cost, partial, and general equilibrium.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C and (MATH-165 with a minimum grade of C or MATH-167 with a minimum grade of C or MATH-177 with a minimum grade of C or MATH-185 with a minimum grade of C or MATH-187 with a minimum grade of C or MATH-202 with a minimum grade of C or MATH-203 with a minimum grade of C).

ECON-306. Labor Economics. 3 Hours.

Analysis of supply and demand for labor, the determination of wage rates, employment, working hours and labor force participation; with emphasis on the effects of unionism and government activities on these areas.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-307. Money And Banking. 3 Hours.

The nature and functions of money and the role of the monetary sector in the determination of income and employment with particular attention on the institutional framework, money markets, commercial banking, deposit expansion, the Federal Reserve System and monetary policy and its instruments.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-308. Comparative Economic Systems. 3 Hours.

Analysis of the structure, institutions and performance of alternative economic systems: capitalism, socialism, communism. Selected countries are studied as examples of each system.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-309. Public Finance. 3 Hours.

An investigation of the economic effects of governmental activities. The major types of taxes and expenditure proposals are considered. In addition, intergovernmental fiscal relations and fiscal policy are discussed. The course will emphasize, but not be restricted to American fiscal institutions.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-310. Writing Intensive Program: Business And Economic Statistics II. 3 Hours.

This course is a continuation of ECON-220. Topics to be covered include analysis of variance, multiple regression and correlation, time series analysis, nonparametric tests, and decision theory with computer applications.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D and ECON-220 with a minimum grade of D and ENGL-101 with a minimum grade of C.

ECON-312. Mathematical Economics. 3 Hours.

Conventional macro- and microeconomic theories are set out in mathematical form utilizing algebra and calculus. Topics to be covered include sets, functions, matrices, differential and integral calculus and optimization.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C and (MATH-165 with a minimum grade of C or MATH-167 with a minimum grade of C or MATH-177 with a minimum grade of C or MATH-185 with a minimum grade of C or MATH-187 with a minimum grade of C or MATH-202 with a minimum grade of C or MATH-203 with a minimum grade of C).

ECON-313. Economic History Of Europe. 3 Hours.

Development of the modern economic systems and institutions of Europe from their late medieval and Renaissance beginnings; the revival of trade, the growth of towns, the commercial revolution, the development of new systems of economic thought to support capitalism, the industrial revolution, the rise of new economic forms such as socialism, modified capitalism, and "mixed" economies in the twentieth century.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-314. The Development Of Economic Thought. 3 Hours.

Historical survey of the major streams of economic thought including classical, Marxian, Institutional, neoclassical, radical and monetarist thought. The course covers the origins, methods and validity of economic theories.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-316. Independent Study In Economics. 3 Hours.

Intensive study of special topics of economics; faculty guidance.

ECON-318. Introduction To Econometrics And Forecasting. 3 Hours.

Introduction to the methods by which economic theories are tested with emphasis on applications. Topics include bivariate and multiple regression techniques, hypothesis testing, and violation of the common assumptions. Computer usage.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D and ECON-220 with a minimum grade of C and (MATH-165 with a minimum grade of D or MATH-110 with a minimum grade of D or MATH-177 with a minimum grade of D).

ECON-320. Writing Intensive Program: Non Profit Management, Administration & Communications. 4 Hours.

This course is designed to prepare students for careers in the non-profit world and to introduce the principles of effective professional communications. Students will be required to volunteer a minimum of two (2) hours per week with a non-profit organization and to produce weekly correspondence related to the internship.

Prerequisite: ENGL-101 with a minimum grade of C.

ECON-321. International Monetary Theory & Relations. 3 Hours.

This course will provide an analysis of the international monetary system and the institutions that link national economies through exchange rates, balance of payments, and international asset transactions. Particular attention will be paid to the evolving international monetary system of flexible exchange rates and highly mobile international capital. This course will be valuable to students interested in careers in international economic policy, international banking, and finance, and in international political economy.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C.

ECON-322. International Economics. 3 Hours.

This course will examine international trade in goods and services, and international movements of labor capital, with a focus on the role of domestic and international political forces, regional issues, and urban systems. Traditional trade theories and policies will be discussed, as well as topical issues such as immigration, foreign direct investment, environmental policy, international political economy, and "global cities."

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C.

ECON-323. Writing Intensive Program: Economic Development. 3 Hours.

This course will examine the process of economic development primarily at the nation level throughout the world. Students will study important theories of development and will be expected to apply these to writing and research on a specific country, and to disseminate their work to the class.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D and ENGL-101 with a minimum grade of C.

ECON-324. The Economics Of The European Union. 3 Hours.

This course will provide an overview of the history, objectives and economics policy issues of the European Union. The focus of the course will be on a theoretical analysis of the principal economic problems facing the European Union. These problems include: agricultural policy, trade policy, the creation of a single market and single currency, further expansion, and relations with the United States. The course requires that students have a background and sound understanding of the principles of macro and micro economics.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-330. Urban And Regional Economic Development. 3 Hours.

This course introduces students to the basic theories and practice of local economic development. Subject matter is limited to topics most relevant to domestic (i.e. U.S.) local economic development. Topics covered include the history of local economic development policy, competing theories of development, and the structure and impact of various economic development policies. Methods for gauging the composition and health of a local economy are also reviewed in detail. The concepts and methods covered in this course are used regularly by local economic development practitioners. Students interested in urban/regional economics and/or urban planning will find this course especially insightful.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C.

ECON-332. Industrial Organization. 3 Hours.

Analysis of the competitive structure of industries and the major determinants of industrial organization such as economies of scale, mergers, vertical integration, advertising and their effects on competitive firm behavior. Examination of the economic foundations and effects of government policies to regulate monopoly.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-333. Urban Economics. 3 Hours.

Presentations of fundamental economic tools applicable to urban problems; identification of the economic causes of these problems and analysis of policies designed to correct them.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-334. Cost-Benefit Analysis. 3 Hours.

Alternative economic policies resulting from weighing the merits of spending public expenditures on various public projects. A systematic approach to the evaluation of individual projects in the selection of the best project to accomplish a given purpose, and in the establishment of priority order among the projects competing for limited funds.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-336. Health Economics. 3 Hours.

This is a course in applied economic theory that examines the determinants of health status as well as the determinants of the market quantity and price of health care services. Specific topics covered include: consumer factors which determine demand for health and health care utilization; the role of health insurance in determining health and health care utilization; behavior of health care providers under various types of financial reimbursement mechanisms and market structures.

Prerequisite: ECON-217 with a minimum grade of C and MATH-091 with a minimum grade of C.

ECON-337. Environmental Economics. 3 Hours.

This course allows students to explore and understand the role of economics in analyzing environmental issues and in the development of environmental policy. Some of the topics covered include: air and water pollution, transitioning from depletable to renewable resources; biodiversity and issues of sustainability, energy and transportation.

Prerequisite: ECON-217 with a minimum grade of C and ECON-215 with a minimum grade of C.

ECON-340. Managerial Economics. 3 Hours.

The application of economic theory to the analysis of business decision-making. Topics include the theory of production, cost, pricing, and capital budgeting. Specific tools such as constrained maximization and regression analysis are applied in a case approach to the estimation and forecasting of revenues and costs, and to the preparation of budget forecasts.

Prerequisite: ECON-215 with a minimum grade of D and ECON-217 with a minimum grade of D.

ECON-343. Macroeconomic Data Analysis. 3 Hours.

The manipulation, presentation, and interpretation of real macroeconomic data. Concepts include GDP, inflation, interest rates, exchange rates, and nominal and real variables. Students will gain experience applying formulas, preparing graphs, and uncovering basic statistical relationships among data series.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C and (MATH-165 with a minimum grade of C or MATH-167 with a minimum grade of C or MATH-177 with a minimum grade of C or MATH-185 with a minimum grade of C or MATH-187 with a minimum grade of C or MATH-202 with a minimum grade of C or MATH-203 with a minimum grade of C).

ECON-344. Financial Economics. 3 Hours.

This course will provide students with the economic tools that are critical to understanding the idea of risk and return and how various factors affect the valuations of assets like bonds, stocks, mutual funds or houses. These concepts are also useful for the types of analysis done by financial experts in banks, financial institutions, and companies who also have to understand the risk-return of various assets and overall financial decisions. This course also emphasizes the deep interconnections of finance with macroeconomics more generally.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C.

ECON-345. The U.S. Federal Reserve. 3 Hours.

This is an applied course on the U.S. Federal Reserve policy and practices. Students will be expected to research Fed policy and prepare briefings on the state and trajectory of the U.S. economy. The class will collaborate on a presentation to the Chicago Fed as part of the Student Fed Challenge, a competition involving Universities throughout the Chicago Fed district.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C.

ECON-346. Applied Economic Statistics Using R. 3 Hours.

This course provides an introduction to the open-source statistical software R, including operations, packages, and coding principles. Students will apply statistical concepts using economic data, gaining experience with the software while deepening their knowledge of economics.

Prerequisite: (ECON-215 with a minimum grade of C or ECON-217 with a minimum grade of C) and (ECON-220 with a minimum grade of C or MATH-305 with a minimum grade of C or MNGT-368 with a minimum grade of C).

ECON-377. Real Estate Economics. 3 Hours.

This course provides an overview of the economics of real estate markets. Primary focus is on the interaction of supply and demand in determining real estate property valuations and other real estate-related assets such as mortgage-backed securities. Different methods of determining real estate valuations are examined, including residential, cost, hedonic, and income-based approaches for commercial and residential properties. Additionally, the link between real estate markets and the broader economy is examined, including emphasis on the mortgage industry and mortgage markets.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C.

ECON-3953. Internship In Economics. 3 Hours.

The internship in economics is designed for students in the Department of Economics with a declared major or minor and who are approaching the terminus of their program and wish to apply their learned knowledge within a non-academic and professional setting. For many students, an internship constitutes a first glimpse into "how economists work" outside of the classroom and, consequently, serves as a guide for future career goals and opportunities. Additionally, well-received interns often obtain strong letters of recommendation and/or the option of permanent employment.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C and ECON-303 with a minimum grade of C and ECON-304 with a minimum grade of C.

ECON-3956. Internship In Economics. 6 Hours.

See course description for ECON-3953.

Prerequisite: ECON-215 with a minimum grade of C and ECON-217 with a minimum grade of C and ECON-303 with a minimum grade of C and ECON-304 with a minimum grade of C.

ECON-401. Fundamentals Of Business Economics. 4 Hours.

Provides knowledge of microeconomic and macroeconomic theory necessary for advanced business analysis.

Major in Economics

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Economics for the Bachelor of Arts Degree (36 credit hours)

Code	Title	Hours

3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Economics (18 credit hours)

Code	Title	Hours
Required Courses		
ECON-215	Principles Of Macroeconomics	3
ECON-217	Principles Of Microeconomics	3
ECON-220	Business And Economics Statistics I	3
Electives (any three 300-level Economics courses)		9
Total Hours		18

ECON-3956	Internship In Economics	6

English

The English Department offers a variety of courses, programs, student organizations and regular events that help students develop a set of crucial skills and dispositions necessary for professional and personal success: critical thinking, creativity, empathy, clear and persuasive written and oral presentation. We offer a range of courses from traditional surveys of British and American literature and canonical authors to specialized electives in Creative Writing, diverse literatures (Latinx, Caribbean, Post-Colonial African, African-American, Chicano), rhetoric and composition, women's and LGBTQ+ literatures and cultures, film and graphic novel.

Beyond these classroom experiences, however, students will find support and opportunity to bring their skills and creativity to broader communities within and outside the Department: in research for regional and national conferences built around our courses and our chapter of Sigma Tau Delta English Honors Society; presenting their work at Northeastern's annual student Research and Creative Activities Symposium; attending readings by professional poets and novelists in our 82 Writers Series; or participating in or leading a variety of literary and cultural events run or sponsored by the Department.

Degree and For-Credit Programs

The Department offers an undergraduate (B.A.) degree, two undergraduate minors in English and Creative Writing, and M.A. degree. In addition, we offer the M.A. degree and units of concentration (6 related courses, e.g. Cultural Studies or Literature and Gender Studies) for in-service teachers on a cohort model, on-site at Districts in the Chicago area. We also participate in the College of Arts and Sciences Professional Development Seminar Series of 3-hour seminars for in-service teachers for CPDU credit.

Undergraduate Degrees and Minors

The B.A. in English is a 37-credit major, with six required courses and six electives. In order to ensure student progress, each term our offerings include a full array of our required courses (ENGL 210: Literary Methods and Practice; ENGL 218, 219, 221 and 222—surveys of British and American Literature, three of which must be completed for the degree; a major author—ENGL 314, 329, 330, 331, or 349; and ENGL 345: Practical Criticism and Theory. Given its scope, ENGL 345 is now a four-credit course, allowing students in the major the extra credit they need to round out the university requirement of 40 credit hours at the 300-level.

In addition, we offer a wide variety of upper division electives in diverse literatures and cultures, film, composition studies, and creative writing. Eight of our upper-division courses have been designated Engaged Learning Experiences (ELEs) with more coming on-line each year.

The B.A. in English/Secondary Education listed under English programs is no longer accepting students. As of Fall 2019, students seeking teacher certification in English/Language Arts need to complete the B.A. in English above and apply to the Teacher Certification/M.A.T. cohort program in the College of Education during their last term as undergraduates. For requirements and information, refer to the Secondary Education Graduate Program (<https://www.neiu.edu/academics/daniel-l-goodwin-college-of-education/departments/educational-inquiry-curriculum-studies/secondary-education-graduate-programs/>).

The English Department's Creative Writing minor (18 credits) provides undergraduate students of any major with opportunities to develop as writers within a variety of creative contexts. The courses in the program enable students to develop both writing craft and technical proficiency. After foundations courses (ENGL 235: Introduction to Creative Writing and ENGL 340A: The Elements of Style, taken in sequential terms) students are encouraged to take a core sequence, which will enable them to move from writing individual pieces to developing longer book-length compositions. Electives are available in a wide variety of sub-genres, including Hybrid Forms, Short Story, Personal Essay, Flash Forms and Creative Non-Fiction. English majors may use up to 9 credit hours of 300-level work in Creative Writing from their major coursework for the Creative Writing minor.

The undergraduate Minor in English (18 credits) provides a broad cultural literacy in British and American literature (students must choose three survey courses (9 credits) from those listed above for the English Major) and a choice of electives at the 300 level (9 credits).

Graduate Programs (M.A. in English - Literature and Composition concentrations)

The graduate program in English (33 credits) develops skills in critical thinking, writing, and research, encourages intellectual curiosity, and provides training for careers and professional advancement in related fields such as teaching, editorial work, journalism, publishing, writing, and research. Students pursuing the MA in English choose between two degree concentrations, Literature or Composition. The two-track curriculum provides two separate fields of study within English, offering multiple career opportunities as well as preparing students for doctoral work. Students may also pursue the M.A. in English at the same time as they complete teacher certification.

ENGL-101. Writing I. 3 Hours.

Specialized instruction and practice in beginning writing. Work in usage, grammar, style, paragraphs, and short essays.

Prerequisites: (ELP-120 or ELP-099 or NEIU English Placement Writing 7 - 9 or (Accuplacer WritePlacer 4 - 8 and Accuplacer Sentence Skills 095 - 120) or (Accuplacer WritePlacer 5 - 8 and Accuplacer Sentence Skills 020 - 120) or Accuplacer Writing 200 - 300).

ENGL-102. Writing II. 3 Hours.

Continuation of practice in composition with emphasis on a variety of forms of writing and long essays, culminating in the annotated research paper.

Prerequisite: (ENGL-101 or NEIU English Placement Writing 8 - 9).

ENGL-109A. First Year Experience: Chicago's Literary Diversity: Reading The Neighborhoods. 3 Hours.

This course explores how literary Chicago enters into discourses on race and ethnicity in twentieth century literature. Beginning with Great Migration, students sample literary history produced by people who settled or passed through Chicago. Writers have used Chicago as a setting for major works and sociological studies have attempted to focus on Chicago's neighborhoods and how they were formed as a result of immigration from other countries and migration from the American South. The course examines several works from popular perspectives, fiction, autobiography, journalism, humor, folktales, cultural criticism and regional studies to reach a better understanding of the city.

ENGL-109B. First Year Experience: Reading And Writing The Literary And Political Landscapes Of Chicago. 3 Hours.

From the Haymarket "riot" of 1886 to the Pullman Strike of 1894 to the Black Sox scandal of 1919 to the trial of Abbie Hoffman and the Chicago Seven in the aftermath of the Democratic Convention of 1968, Chicago has, to say the least, a colorful and quite literally, explosive political history. As with any major urban center in the United States, Chicago bears the historical scars and contemporary fruits of vibrant and violent class conflict, labor insurgencies, racial strife, immigrant struggles, and activism for social justice. Part and parcel of this historical legacy is a rich spate of cultural production that attempts to comprehend this past in those historical moments and in our contemporary era.

ENGL-109C. First Year Experience: Drama And Diversity In Chicago. 3 Hours.

In this class, we will analyze and experience Chicago theater. By emphasizing theater that challenges social cultural norms, we will consider how drama works to create and define diverse urban communities and how it offers alternative visions to the status quo. This class will emphasize writing and reading about drama, interviewing theater personnel and taking notes on actual theater performances, and relating art to social and political diversity. We will attend 3-4 performances during the course of the semester.

ENGL-109D. First Year Experience: Windy City Words: Ethnolinguistic Chicago. 3 Hours.

This course integrates the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-Discovery, and Transitions) with concepts from the study of literacy and language. Using the city as a field site, students actively explore the linguistic and cultural diversity of Chicago through independent research, readings, online resources, speakers, and other experiences.

ENGL-109E. First Year Experience: Your Chicago: Write On!. 3 Hours.

This course interweaves foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery, Transitions) with specific concepts of creative writing. Explore and experience Chicago's vibrant cultural scene while cultivating literary culture in class. Students study their local literary heritage reading, analyzing, and discussing works of classic and contemporary Chicago authors and attending and annotating literary readings at local bookstores and cafes; experimenting with a range of writing exercises, prompts, and assignments, students will craft their own stories, recognize their unique writing process, and learn techniques to revise and polish their prose, culminating in a student reading.

ENGL-201. The World Of Poetry. 3 Hours.

A literature course which has three main objectives: 1) to familiarize students with the literary conventions of poetry; 2) to develop in students a critical stance towards literature; and 3) to develop in students an appreciation of both western and non-western cultures as experienced through literature.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-202. The World Of Drama. 3 Hours.

A literature course which has three main objectives: 1) to familiarize students with the literary conventions of drama; 2) to develop in students a critical stance towards literature; and 3) to develop in students an appreciation of both western and non-western cultures as experienced through literature.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-203. The World Of Fiction. 3 Hours.

A literature course which has three main objectives: 1) to familiarize students with the literary conventions of the short story and novel genres; 2) to develop in students a critical stance towards literature; and 3) to develop in students an appreciation of both western and non-western cultures as experienced through literature.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-203A. The World Of Creative Nonfiction. 3 Hours.

The World of Nonfiction is a literature course which has three main objectives: 1) to familiarize students with the literary conventions of creative nonfiction forms, including memoir and personal essay; 2) to develop in students a critical stance toward literature; and 3) to develop in students an appreciation of both western and non-western cultures as experienced through literature.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-205. Literatures And Literacies. 3 Hours.

This course an introduction to language arts for elementary education majors. As such, it provides practical foundation in the methods essential to the study of language arts, including active reading, critical thinking, and purposeful writing, and it includes skills such as note taking, quoting, using MLA style, summarizing arguments, and synthesizing and documenting others' opinions. This course will also explore multiple perspectives on controversial topics relevant to literary and literacy studies.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-206. The Bible As Literature. 3 Hours.

This course introduces students to the major characters, settings, and literary devices of the Bible. It deepens students' understanding of the history of canon formation, textual scholarship, and interpretation as it relates to the Bible. Further, it expands their appreciation of the impact of the Bible on literature, history, and culture.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-102 with a minimum grade of C.

ENGL-209A. Red Scare: Literature Of The McCarthy Era. 3 Hours.

The course focuses on the perceived communist threat on 1940s/50s United States and how politics affected writers such as Arthur Miller, Langston Hughes, Lillian Hellman and others as well as screenwriters in Hollywood through such films as *On The Waterfront* and *High Noon*. Research papers and projects will draw connections between societal perceptions of the times and their influence on Hollywood films and literature through genres of fiction, poetry, and drama.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-210. Writing Intensive Program: Methods for English Majors. 3 Hours.

Writing Intensive course designed as first course for English majors. Provides practical foundation in the methods essential to English Studies: active reading, critical thinking, and purposeful writing. Skills such as note taking, quoting, using MLA style, summarizing arguments, and synthesizing and documenting others' opinions will be emphasized. Course will also explore multiple perspectives on controversial topics relevant to the discipline. Coursework develops strategies of effective critique, argument, and analysis, and will consist of informal writing, review essays, and thesis-driven analyses of rhetorical and literary texts. Open discussion and critical thinking required.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-102 with a minimum grade of C.

ENGL-218. American Literature:Beginnings To 1865. 3 Hours.

A course covering representative writing of the Colonial, Early National and Romantic periods in American literature, emphasizing both dominant and emergent themes and literary forms in each period where students will build the necessart cultural literacy for higher-level courses in American Literature.

ENGL-219. American Literature:1865 To The Present. 3 Hours.

A course covering representative writings of the Realist, Modern and Postmodern periods in American Literature, emphasizing both dominant and emergent themes and literary forms in each period. Here students will gain a broad background for higher-level courses in postbellum American Literature.

ENGL-221. English Literature:The Beginnings To C. 1750. 3 Hours.

Representative works in English literature from Beowulf to the middle of the eighteenth century.

ENGL-222. English Literature: C. 1750 To The Present. 3 Hours.

Representative works in English literature from the middle of the eighteenth century to the modern era.

ENGL-235. Introduction To Creative Writing I. 3 Hours.

Preliminary study to enable students to develop positive approaches to the craft of writing and to explore techniques of the craft.

ENGL-291. Children's Literature. 3 Hours.

Preparation for effective teaching of literature in the elementary school; wide reading of books for young children; story selection and story telling; authors and illustrators of children's books; classroom methods of stimulating creative expression; individual and group reading guidance.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-300. Russian Literature: From Gogol To Chekhov. 3 Hours.

Works (primarily novels, novellas and stories) of the major figures in nineteenth-century Russian literature (Turgenev, Tolstoi, Dostoyevski, etc.), relating them to the social, political and religious issues they touched on.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-301. Independent Study In English. 1 Hour.

An independent study on the tutorial model, initiated at the student's suggestion to an instructor; course content designed in consultation with the instructor. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-301A. Special Topics In Literature And Culture: Department-Taught Course. 1 Hour.

A 1-credit, 8-week course taught by multiple faculty members of the English department. Every week, the course will be lead by a different professor. Sample special topics include "Popular Culture During the Great Recession"; "the Rhetoric of the Long Civil Rights Movement"; and "Romanticism and Revolution." No formal papers. No tests.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-302. Literatures And Theories Of Love. 3 Hours.

What does it mean to love? As philosopher John Armstrong writes, "This is to raise one of the deepest, and most puzzling, questions we can put to ourselves." This course explores diverse narratives and theories of love, especially emerging from marginalized thinkers such as bell hooks, James Baldwin, and Emma Pérez. As the course explores, love not only underwrites conceptions of the self, but more broadly, enables and generates new forms of community, ethics, and politics. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-303. Contemporary LGBTQ+ Literature. 3 Hours.

This course uses an intersectional approach to explore fiction, film, and other texts that address the ways LGBTQ+ identities are layered, fluid, evolving, and sometimes conflicting. We will emphasize close reading of fiction, the ability to write clearly and analytically about literature, the history and culture of LGBTQ+ lives, and the role literature plays in our everyday lives. Required: ENGL-210 and one other English course at the 200 level.

Prerequisite: and.

ENGL-304A. Literary Editing. 3 Hours.

Students will learn and implement skills involved in literary editing, including developmental and copy editing, and proofreading, supporting the production of the annual issue of SEEDS: A Literary & Visual Arts Journal or a collaborative anthology.

Prerequisite: ENGL-235 with a minimum grade of C.

ENGL-305A. Literary Publishing. 3 Hours.

Students will learn and implement skills involved in the publication of a literary journal, including navigation of process and product, supporting the production of the annual issue of SEEDS: A Literary & Visual Arts Journal or a collaborative anthology.

Prerequisite: ENGL-235 with a minimum grade of C.

ENGL-307. Medieval Studies- The Development Of The Arthurian Legend. 3 Hours.

The legend of King Arthur from allusions in early chronicles, through Welsh folk tales, through the courtly versions of twelfth-century France to the compilation by Sir Thomas Malory. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-308. English Literature From Beowulf To Malory. 3 Hours.

A survey of English Medieval literature that, in dealing with major works (e.g. Beowulf, The Canterbury Tales, Morte D'Arthur, etc.), situates them in the relevant political and linguistic contexts, as well as the literary context of competing "minor" works and genres. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-309. Reading & Writing In A Changing Digital Economy. 3 Hours.

Through hands on experience and theoretical and rhetorical analyses, students will explore processes and issues with writing and reading in digital environments. Topics include connecting visually with the written word, exploring online textual identities, collaboration and intellectual property, and web design, with an emphasis on how writing in digital environments impacts English studies. Students will produce a variety of non-traditional and traditional academic texts in this course, using current presentation, web-based or freeware programs. The class is open to students who are new to digital writing but will also benefit those with experience in composing New Media and digital texts.

ENGL-310. Writing Intensive Program: Introduction To Composition Studies. 3 Hours.

Examines some contemporary issues in composition studies, such as process theory, the role of grammar in writing instruction, digital and visual literacies, and scholarly considerations of writers' subjectivities. Introduces the discipline's modes of inquiry: theory, empirical research, and practice. Provides instruction in professional resources and bibliographic databases so that students can become independent learners in the discipline. Written assignments include responses to readings and a literature review. This course fulfills the NEIU Writing Intensive requirement for Secondary Education English majors and for English majors who as transfer students may have already taken a course comparable to ENGL-210.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-311. Introduction To Popular Culture Studies. 3 Hours.

This course introduces students to the theoretical debates and interpretative strategies of popular culture studies. Using an interdisciplinary approach, this course explores how popular culture is produced, distributed, consumed, and responded to in diverse, contradictory ways. Forms analyzed will include movies, comics, television, photography, music, fan fiction, and video games.

ENGL-312. Literature Of Colonial Times. 3 Hours.

Prose and poetry of the Puritan and Revolutionary eras. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-313. American Literary Renaissance-1830-1860. 3 Hours.

Prose and poetry of Hawthorne, Melville, Emerson, Thoreau, Whitman, Dickinson, and others. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-314. Chaucer And His Age. 3 Hours.

Close study of selected early poems of Chaucer (ballads, envoys, and narratives), to present and introduction to the language and themes of Chaucer's poetry and his age. The major portion of the course will be devoted to a close reading of *The Canterbury Tales* in the original Middle English. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-315. Literature Of The English Renaissance. 3 Hours.

Prose and poetry (not drama) of the English Renaissance in the sixteenth century. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-316. Forms Of Poetry. 3 Hours.

This course will examine some of the traditional poetic forms-lyric, narrative, and dramatic- which have been used by poets throughout literary history. Readings and discussion will engage students in an analysis of each form- its technical characteristics, its place in literary history, and its relevance to contemporary writers and readers of poetry. Students will write imitations of several poetic forms as well as critical essays about them. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-317. Modern American Drama. 3 Hours.

This course considers the development of modern American drama, as well as the contributions of regional and storefront theaters. It also examines the convergences and divergences of drama as literature and performance, as well as other challenges and limits to understanding modern American drama, and concludes with original research presentations by students. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-319. Writing Culture And Identity. 3 Hours.

In this course, students will explore theoretical, political, and cultural understandings of difference and identity through intensive reading and writing. Students will develop a deep understanding of cultural difference and the ability to write argumentative, personal, and theoretical essays about human diversity in a variety of forms.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-102 with a minimum grade of C.

ENGL-320. Globalizing Literacies. 3 Hours.

This course presents textual circulation as trade in cultural practices throughout early modern or protoglobalization (1600-1800) when European traditions were exported to the United States that, after being established through cultural syncretism, were exported to the rest of the world throughout the first (1870-1914) and second (1980-present) globalization periods. From these perspectives, students will examine central themes in textual production and consumption, such as the development of an American literary tradition and Americanization educational initiatives through particular genres, such as newspapers and magazines, as a part of a nationalized cultural identity, including ways this identity has been resisted and reconfigured.

ENGL-321. Literature Of The Romantic Movement. 3 Hours.

Poetry and prose from 1780 to 1830 including Blake, Burns, Wordsworth, Coleridge, Byron, Shelley, Keats, Lamb, Hazlitt, and DeQuincey.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-322. The American Short Story. 3 Hours.

The evolution of the American short story as a self-conscious form of literature from Washington Irving to Joyce Carol Oates. The theories of Romanticism, Realism, Naturalism are illustrated. Each student selects one writer of short stories to explore in some depth through an individual report. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-323. Modern British Drama. 3 Hours.

This course examines the development of modern British drama since the 1890s, studying writers like Shaw, Wilde, Yeats, O'Casey, Beckett, Pinter, Stoppard, and Churchill. Covering over a century of a dynamic period in the history of British drama, this course explores important influences such as Norwegian Henrik Ibsen's Realism, French "Symbolism" Movement, Irish Literary Revival, poetic drama, the Theatre of the Absurd, and Postmodernist aesthetics. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-324. The Romantic Novel. 3 Hours.

The nineteenth century novelists from England and the Continent are studied against the great socio-political movements of the age- the French, Russian and Industrial Revolutions. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-327. Chicago Drama. 3 Hours.

This course examines the history of Chicago drama from the early performances of Joseph Jefferson to modern and contemporary playwrights, such as Tennessee Williams and David Mamet, who have found success in or been shaped by Chicago, as well as its contributions to drama in the U.S. and around the world. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-328. Seventeenth Century Literature. 3 Hours.

Studies in seventeenth century literature exclusive of Milton. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-329. Milton. 3 Hours.

Milton's work and the intellectual milieu of the period. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-330. Shakespeare: Comedies, Romances And Poetry. 3 Hours.

This course explores Shakespeare's comedies, their late transformation into romances, and select narrative poetry. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-331. Shakespeare: Tragedies And Histories. 3 Hours.

This course explores Shakespeare's works in the genres of tragedy and history, emphasizing close reading and historical context. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-332. Elizabethan And Jacobean Drama. 3 Hours.

Exploration of English dramatic works from circa 1580-1642, including Marlowe, Greene, Middleton, Marston, Dekker, Jonson, Webster, and Beaumont. This course will pay particular attention to genres that dominate outside the Shakespeare canon (revenge tragedy, city comedy, tragicomedy), as well as detailing the social, cultural, and intellectual developments that characterize this golden age of English stagecraft. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-333. Mythological Backgrounds Of English And American Literature. 3 Hours.

Middle-Eastern, Nordic and Graeco-Roman mythological systems; reading in archetypal interpretation of literature with representative illustrations from fiction, drama and poetry. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-334. Biblical Backgrounds Of English And American Literature. 3 Hours.

Influence of the Bible, especially the King James version, on the style and content of famous English and American writers. Selected reading from Old and New Testaments and from writers influenced by them. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-335. Written Communications For Business. 3 Hours.

Designed primarily for Business and Management majors covering principles and practices of writing required in professional work. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-336. Technical Writing. 3 Hours.

This course asks students to study the ways writers prepare professional documents, including reports, proposals, and web sites, in a world where our languages are becoming increasingly technical, jargon-filled, and diverse. Students will write in these modes as well to give them experience with the kinds of technical writing they may encounter in fields such as business, science, engineering, and more.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-102 with a minimum grade of C.

ENGL-337. DC And Marvel Superheroes: Aesthetics, Ethics, Politics, And Commerce. 3 Hours.

Over the course of the twentieth century, superheroes have elevated into a popular artform. Moreover, they have become vehicles for thinking about political movements; figures for engaging in ethical debates; and intellectual properties buttressing multi-million-dollar, multimedia franchises. This course will focus on how mainstream US comics (DC and Marvel) imagine heroism and justice across the decades during different historical crises from the Great Depression to Black Lives Matter. As this course foregrounds, superheroes must be studied within the matrices of class, race, ethnicity, gender, sexuality, nationality, and disability. No prior knowledge of comics is necessary. Capes are optional.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-340. Independent Study In English. 2 Hours.

An independent study on the tutorial model, initiated at the student's suggestion to an instructor; course content designed in consultation with the instructor. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-340A. Elements Of Style For Creative Writers. 3 Hours.

The course will cover style conventions of the English language, including: punctuation, grammar, usage, and sound. There will be a focus on sentence and line analysis. Students will consider how these conventions and their deployment impact a reader's experience, and the issues of perspective, power, and bias encoded therein. Students will also develop a working definition of their own writerly style while experimenting in using, subverting, and experimenting with conventions. Students will be encouraged to work within their own desired genre(s); the reading selections will be modern and contemporary texts which move across fiction, nonfiction, poetry, drama, and hybrid.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-235 (may be taken concurrently) with a minimum grade of C.

ENGL-341. Restoration And Eighteenth Century Literature I. 3 Hours.

Politics in England leading to the restoration of Charles II; his court; Restoration playwrights; the bawdy Restoration stage and reaction to it; the new sentimental drama; the newspaper and the essay. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-342. Restoration And Eighteenth Century Literature II. 3 Hours.

Intensive study of contrasts in the Age of Enlightenment; interrelationship of politics and writers; neoclassic literature; beginning of the novel; eighteenth century criticism and biography. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-343. Global Ecologies: U.S. Literature In The Age Of Environmentalism. 3 Hours.

This interdisciplinary course explores why studying the environment is one of the most urgent, intellectual responsibilities of all disciplines, including English. Global Ecologies centers on how the environment is represented, imagined, and refigured across a range of literary and cultural texts, and the course studies how the environment is inextricable from understanding a range of social relations from race and class to ethics and politics.

ENGL-345. Practical Criticism. 4 Hours.

This course provides an upper level survey of some of the more important critical approaches to literature, with an emphasis on practical applications as well as theory. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-346A. Critical Writing For Creative Writers. 3 Hours.

This course is a seminar and writing workshop for creative writers. Students will examine assigned models; choose outside reading of their own; produce various creative, creative-critical, and critical-creative pieces; submit at least one book review for possible publication; and through this process "enter the discourse."

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-347. Rust Belt Literature. 3 Hours.

This course will introduce students to literature (poetry, fiction, non-fiction) of the region of the United States known as the Rust Belt in its historical, political, social, aesthetic, and broader cultural contexts, including the process of its continual redefinition. Students will read representative texts from a diverse range of authors and periods, and discuss such issues as desegregation, clean water, racism, and classism, among others.

Prerequisite: ENGL-102 with a minimum grade of C and ENGL-210 with a minimum grade of C.

ENGL-348. Prose And Poetry Of The Victorian Age. 3 Hours.

Selected Victorian poetry, with consideration of the social background of the period (1837-1910). Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-349A. Toni Morrison: A Deep Dive. 3 Hours.

In contrast to other advanced courses covering diverse writers working within a genre, literary period or cultural situation, this course is a "deep dive" into the particular social, political, and economic factors contributing to the work of a single author over the long arc of her career, along with her particular contributions to literary culture in her time. Extensive reading involving a representative array of Toni Morrison's work and a wide variety of critical essays on that work will provide students excellent bases for their research, writing, and class discussion, culminating in an essay or creative project suitable for public presentation or publication.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-210 with a minimum grade of C.

ENGL-349B. James Baldwin: A Deep Dive. 3 Hours.

In contrast to other advanced courses covering diverse writers working within a genre, literary period or cultural situation, this course is a "deep dive" into the particular social, political, and economic factors contributing to the work of a single author over the long arc of his career, along with his particular contributions to literary culture in his time. Extensive reading involving a representative array of James Baldwin's work and a wide variety of critical essays on that work will provide students excellent bases for their research, writing, and class discussion, culminating in an essay or creative project suitable for public presentation or publication.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-210 with a minimum grade of C.

ENGL-349G. Gloria Anzaldúa: A Deep Dive. 3 Hours.

In contrast to other advanced courses covering diverse writers working within a genre, literary period or cultural situation, this course is a "deep dive" into the particular social, political and economic factors contributing to the work of a single author over the long arc of her career, along with her particular contributions to literary culture in her time. Extensive reading involving a representative array of the author's work and a wide variety of critical essays on that work will provide students excellent bases for their research, writing and class discussion, culminating in an essay or creative project suitable for public presentation or publication. This section of the course focuses on the work of Gloria Anzaldúa, as well as her collaborators and literary intellectual/ artistic successors.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-350. The Victorian Novel. 3 Hours.

A study of the development of the novel in England from Dickens to Hardy, seen against the contemporary social and literary background. Theme and technique of the novel, methods of publication, major and minor writers. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-351. The English Novel Of The Eighteenth Century. 3 Hours.

The development of the English novel as a genre in the eighteenth century, including such precursors of the novel as Bunyan, Defoe, Lyly and Behn. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-352. Jewish-American Literature: People Of The Books. 3 Hours.

This course studies how the United States shapes the meaning of Jewish identity and culture, and conversely, how Jewish literature helps shape the meaning of American identity and culture. Working in a range of forms from comic books to genre fiction, Jewish writers throughout the modern era creatively and critically interrogate and re-imagine what it means to be Jewish-American, and more broadly, investigate and challenge what it means to be American. Required: ENGL-210 and one other English course at the 200 level.

ENGL-353. Writing About Music In The U.S.: Contemporary History And Criticism. 3 Hours.

This is a course designed for students who want to read, write, and think about music—and, by extension, literature and culture—more critically. This is not a survey of canonical writing about music, but it will focus on predominantly American writing of the last 20 years that challenges various narratives about popular music, including hip hop, rock, pop, country, and jazz. The course will focus on argumentative and often scholarly writing about music, and each student will write an extended piece of writing about music. Required: ENGL-210 and one other English course at the 200 level.

Prerequisite: ENGL-101 and.

ENGL-354. Star Wars: Narratives, Politics, And Economics Of A Billion-Dollar, Multi-Media Franchise. 3 Hours.

Star Wars is a billion-dollar franchise that spans multiple generations, nation-states, and media forms. The ever-expanding empire includes movies, novels, toys, comic books, video games, television shows, fan fiction, and cosplay. Taking a multidisciplinary and transmedia approach, this course studies how this fictional galaxy is informed by wider historical, political, economic, and cultural processes from the economic and energy crises of the 1970s to social justice movements in the present. The course explores questions such as: How do historical crises inform global franchises? How do marginalized voices occupy a franchise? No prior knowledge of Star Wars is necessary.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-355. The Production Of "America": Work, Class, & Political Economy In U.S. Literature & Culture. 3 Hours.

This class will explore U.S. literature and culture with an eye toward understanding the material conditions of production in the United States, particularly as represented in literary and cultural works, as well as how national identity is ideologically produced in U.S. culture. The class will foreground issues of class and political economy in reading literature and culture from a working-class perspective.

Requirement: English 101 with a C or better, and two of the following: ENGL-210 and one other English course at the 200 level

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-356A. Graphic Novels And Comics. 3 Hours.

This course studies comics as a complex medium that offers new ways to think about and represent a range of social and cultural issues, such as gender, sexuality, race, ethnicity, class, national belonging, and the environment. Students will learn the critical vocabulary necessary to understand how the medium works, and read diverse comics in various historical and geographical contexts. Required: ENGL-210 and one other English course at the 200 level.

ENGL-357. Land, Labor, & Literature: Studying The Works Of U.S. Working-Class & Colonized Writers. 3 Hours.

We will study the representations of land and labor and the desire to reclaim them in the works of working-class and colonized writers in the U.S. Particular attention will be paid to the historical and cultural contexts in which texts are produced as well as theories of class and race.

ENGL-358. Making Your Liberal Arts Degree Work: Writing For The Professional World & Internships. 3 Hours.

This course provides a personal and professional communications orientation, covering the integrated landscape of digital media. Students will learn to adapt their writing for such practices as social marketing, blogging, headline writing, messaging, networking, community building and resumé development. Whether a students' ultimate career goals lead them to freelance, startup, non-profit or corporate endeavors, this course helps students learn more about putting their degree to work. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-359. Independent Study In English. 3 Hours.

An independent study on the tutorial model, initiated at the student's suggestion to an instructor; course content designed in consultation with the instructor. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-360. Detective Fiction. 3 Hours.

Literary and historical study of the detective story- from Poe and Sherlock Holmes- to Hammett and the present. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-361. Development Of The American Novel. 3 Hours.

The novel as a developing form from Charles Brockden Brown to William Faulkner and beyond. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-362. United States Fiction: Traditions And Counter-Traditions. 3 Hours.

A study of canonical and non-canonical fiction in the United States and the varieties of traditions composing U.S. literary history. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-364. Reading Film. 3 Hours.

A course in film emphasizing methods of reading films as we would texts. Through close viewing, critical analysis of narrative structure, attention to visual form and representational practice, students will explore the complexity of film beyond the level of "entertainment." To paraphrase a famous question asked about poetry, this course will explore "how a film means." Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-365. Caribbean Literature. 3 Hours.

This course will introduce students to literature (poetry, fiction, non-fiction, and drama) of the Caribbean in its historical, political, social, and cultural contexts. Students will discuss such issues as cultural and racial hybridity, immigration/emigration/exile, and post-colonization, among others. Students will read representative texts from a diverse range of authors such as Jean Rhys, V.S. Naipaul, Earl Lovelace, Edwidge Danticat, and Junot Díaz. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-367. Re-Thinking Race And Gender. 3 Hours.

We start with historical narrative, re-thinking how we learn to practice race and gender from within the larger systems of white supremacy and patriarchy. The course explores models for disrupting systemic patterns, and ways to turn rethinking into everyday action. The aim throughout is to interrogate structures and relations of race and gender, and how they get naturalized. Designed and cross-listed for advanced undergraduates, graduates, and teachers. When taught as a Summer Institute, course runs for eight days over three weeks. Required: Junior/Senior or Graduate status, or instructor consent. Prereqs: ENGL-101 with a grade of "C" or above.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-368. American Realism. 3 Hours.

An examination of the literature that reflects the movement from American romanticism to realism and through realism to literary naturalism, approximately 1865-1910. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-369. U.S. Latino/a Literature And Culture. 3 Hours.

This course introduces students to Latino/a literatures in the US from the contact period to the present. It offers an overview of major forms and themes in literature from Latino/a native, immigrant and exiled writers with in-depth analysis of representative texts from various genres including essays, novels, poetry and drama. Writers will include Latino/as of North American, Central American, South American and Caribbean descent. The course is taught in English with readings in original English or translation. Readings, assignments, instruction and discussion will focus on questions of aesthetics, culture, politics and history, with an added emphasis on inclusion of under-represented groups and intercultural connections.

ENGL-370. Folklore And The Fairy Tale. 3 Hours.

Readings from both traditional and contemporary folktales, including modern adaptations of traditional stories. Emphasis on similarities in different tales, and the differences in similar ones, with the aim of learning how the same elements pervade the archetypal stories and how variations in detail bespeak different ethnic and cultural interests and concerns. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-371. Studies In Women's Literature. 3 Hours.

Literature by or about women; includes writing by women, portrayals of female characters, attitudes toward women and women's roles; other thematic concerns. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-372. American Women Writers Of The Nineteenth Century. 3 Hours.

Comprehensive study of texts and contexts of women's writing in the US during the nineteenth century, including the origins of its feminist tradition. Texts include a variety of genres (novel, short story, lecture, travel narrative) and traditions (sentimental, romantic, realist, political, utopian). Special emphasis on the social, political, economic and legal forces bearing upon women as professional writers along with the ways women's fiction articulates the realities of nineteenth-century women's lives. Assignments include close reading of individual texts and a more comprehensive final project involving primary research. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-373. Yiddish Literature In Translation. 3 Hours.

Yiddish literature from its beginning to the present from Eastern European and West Germany to the East Side and West Roosevelt Road. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-374A. Hybrid-form Writing. 3 Hours.

This course examines models related to and provides tools for the production of Hybrid-form Writing (writing in and across multiple genres/forms). Hybrid-form work takes place at both the discrete level (individual, usually long-form pieces) and the manuscript level (a book-length project that relies on multiple forms). The emphasis is on long-form/extended projects, which must be rooted in a considered line of inquiry. This inquiry happens at multiple stages and levels: students experiment with different forms, students engage in pre-writing to conceive of projects, and students consider how form affects content/why certain forms might be culturally or personally privileged.

Prerequisite: ENGL-235 with a minimum grade of C and (ENGL-384 with a minimum grade of C or ENGL-386 with a minimum grade of C).

ENGL-374B. Creative Writing: Flash Forms. 3 Hours.

Flash forms are often studied (if at all) as a footnote within a contemporary literature or creative writing course, the literary version of the short story's cute younger cousin. However, while flash forms have become increasingly popular over that past two decades, they have been around for centuries. In this course, students will investigate the form's origins and the cultural contexts and developments that gave rise to its current prevalence. Students will study and practice specific craft elements while also exploring the plasticity of the form. They will read and write stand-alone pieces and investigate the possibilities and varieties of collections and chapbooks of flash.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-235 with a minimum grade of C.

ENGL-374N. Writing The Now: A Cross-Genre Writing Workshop. 3 Hours.

Students will respond to current sociopolitical issues via creative writing work across genres including fiction, creative nonfiction/the personal essay, poetry, drama/screenwriting, graphic narrative, and more, while examining writers' and artists' responses to historic moments and movements. The course will also cover hyper-contemporary creative and theoretical texts, while considering how literary art gets politicized and otherwise activated in the moment. Students will work independently on a multi-genre semester-long portfolio and share writing within the classroom community, as well as in a public-facing symposium.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-235 with a minimum grade of C.

ENGL-375. Becoming A Writing Tutor. 3 Hours.

This class considers theories of writing and the teaching of writing and trains students to become writing tutors. Students will apply the knowledge gained in class as they work with undergraduate writers, helping them to create ideas, draft and revise essays, and edit their work. To succeed in this class, students need to be strong writers and collaborators and to have an interest in the practice and politics of writing.

ENGL-376. Advanced Composition. 3 Hours.

Interdependence of rhetoric, grammar, logic, semantics, psychology, and criticism in communication of ideas; practice in various types of writing with focus on students' interest.

ENGL-377. Argumentative Prose. 3 Hours.

An advanced course in which students will learn to write argumentative essays on a wide range of subjects, using as models for discussion the argumentative prose of professional writers. The course will cover many aspects of argumentative writing, including the study of inductive and deductive reasoning and logical fallacies and the analysis of organizational and stylistic techniques. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-378. Twentieth Century Fiction I. 3 Hours.

Development of the modern novel from Conrad to writers of the 1930s and 1940s against a background of historical and literary movements; emphasis on Conrad, James, Joyce, Lawrence, Faulkner and Hemingway. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-379. Twentieth Century Fiction II. 3 Hours.

Development of the novel in English in recent decades against a background of historical and literary movements; includes work of West, Green, Lowry, Durrell, Bellow, Nabokov, Burgess, Barth, Lessing, Murdoch, Mailer, Updike and Pynchon. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-380. Multi-Cultural Literature In America. 3 Hours.

Designed for future teachers of English, the multi-genre course provides students with an awareness of representative literature from the various ethnic cultures that are a part of American Life. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-381. African-American Literature. 3 Hours.

A survey of African-American Literature in its social, cultural, and political context, beginning with Phyllis Wheatly, continuing through the slave narratives of the pre-Civil War era to the masterpieces of the Harlem Renaissance and the works of contemporary writers, such as James Baldwin, Toni Morrison, Ishmael Reed, Alice Walker, August Wilson and Gwendolyn Brooks. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-382. Chicana/o/x Literature. 3 Hours.

This course examines the emergence and development of Chicana/o/x literature in relation to the historical conditions that gave rise to it within the Chicana/o/x Movement and the definition and redefinition of Chicana/o/x identity and politics. The course will also focus on feminist and LGBTQ perspectives within Chicana/o/x Literature and the Chicana/o/ movement. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-383. Postcolonial African Literature. 3 Hours.

A survey of African literature in its cultural, historical, social and political contexts. Africa is a continent of diverse peoples, cultures, languages, customs, food, economies, experiences of colonialism/imperialism and so on. With such diversity of daily life and historical and cultural experiences comes a wealth of literature; oral literature, drama, poetry, short stories and novels. This course will cover diverse authors such as Chinua Achebe, Wole Soyinka, Zakes Mda, Nuruddin Farah, Buchi Emecheta, Tsitsi Dangarembga, etc. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-383S. Special Topics In Latina/o And Latin American Literary And Cultural Studies. 3 Hours.

Varying topics in the field of Latinx and Latin American literary and cultural studies.

ENGL-384. Creative Writing: Poetry I. 3 Hours.

Students write poetry which is discussed and critiqued in class by instructor and students.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-235 with a minimum grade of C.

ENGL-385. Creative Writing: Poetry II. 3 Hours.

Students write poetry which is discussed and critiqued in class by instructor and students.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-235 with a minimum grade of C.

ENGL-386. Creative Writing: Fiction I. 3 Hours.

Students read published fiction and explore topics in craft while writing, and discussing one another's work.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-235 with a minimum grade of C.

ENGL-387. Creative Writing: Fiction II. 3 Hours.

Students read published fiction and explore topics in craft while writing, and discussing one another's work.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-235 with a minimum grade of C.

ENGL-388. Modern British And American Poetry. 3 Hours.

Introduction to modern poetry in English: its origins, dominant themes, and characteristic techniques. Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-389. Contemporary Poetry. 3 Hours.

A survey of poetry in English from 1950 to the present. This course will examine the major themes and techniques of poets writing during the period.

Required: ENGL-210 and one other English course at the 200 level.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-390. Young Adult Novel. 3 Hours.

Advanced study in literature for young adults, grades 7-10. Evaluation and selection of recent books in the area as well as the history of the genre.

Criteria for selection: Book lists, indexes, professional literature in the field. Individual work on problem of special interest.

Prerequisites: ENGL-102 and ENGL-210 - 236.

ENGL-391. Seminar On One Woman Writer. 3 Hours.

This course will give students the opportunity to study the full range of one woman writer's life and work, along with documents from a variety of disciplines (e.g., history, economics, psychology and its predecessor pseudo-sciences, law--both in secondary and primary forms). Out of this work, students will produce a research paper, presentation, or in some cases a website, video or podcast that allows them to enter the public discourse recovering the voices of women of all backgrounds from medieval times to the present day.

Prerequisite: ENGL-102 with a minimum grade of C and ENGL-210 with a minimum grade of C.

ENGL-392A. Writing/Life: Advanced Creative Writing Practice. 3 Hours.

Students engage in a semester-long independent creative writing project, while participating in collaborative service learning, and acquiring skills regarding the creative process, participating in creative communities, editing, and publication. Meetings are a combination of seminar, discussion, studio, and workshop.

ENGL-393. Literature Live: Studying The Works Of NEIU Visiting Writers. 3 Hours.

Each semester, the Creative Writing Minor hosts "The 82" reading series, named for the Kimball bus line that brings many of us to and from campus. In this course, students will study the works of these local writers and others who have visited or will be coming to campus and with whom they will have a chance to engage. Students will engage with the work of these writers with an eye toward understanding and exploring the subtleties of craft to assist in their own creative writing as well as developing the skills of literary analysis. Students will be expected to attend a certain number of public readings on and off campus.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-394. Writing The Personal Essay. 3 Hours.

In this course students will write in the creative non-fiction genre of the personal essay. This will involve work on techniques and approaches in a workshop setting, as well as critiques of other students' work. This course will also explore the personal essay as a literary form through readings of classic and recent examples.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-3941. Creative Writing Internship. 1 Hour.

This is a supervised field experience in a profession that utilizes creative writing (magazine or book publishing, journalism, advertising, arts non-profit, etc). With the approval of the department chair, students may enroll for academic credit from 1-6 hours. In consultation with a faculty advisor and field supervisor, the student will contract field service hours and create an individualized work plan. Students will also meet regularly with the faculty advisor and be evaluated qualitatively and quantitatively for a final grade. By department permission only.

Prerequisite: ENGL-235 with a minimum grade of C and (ENGL-384 with a minimum grade of C or ENGL-386 with a minimum grade of C) and (ENGL-385 with a minimum grade of C or ENGL-387 with a minimum grade of C or ENGL-374 with a minimum grade of C).

ENGL-3942. Creative Writing Internship. 2 Hours.

This is a supervised field experience in a profession that utilizes creative writing (magazine or book publishing, journalism, advertising, arts non-profit, etc). With the approval of the department chair, students may enroll for academic credit from 1-6 hours. In consultation with a faculty advisor and field supervisor, the student will contract field service hours and create an individualized work plan. Students will also meet regularly with the faculty advisor and be evaluated qualitatively and quantitatively for a final grade. By department permission only.

Prerequisite: ENGL-235 with a minimum grade of C and (ENGL-384 with a minimum grade of C or ENGL-386 with a minimum grade of C) and (ENGL-385 with a minimum grade of C or ENGL-387 with a minimum grade of C or ENGL-374 with a minimum grade of C).

ENGL-3943. Creative Writing Internship. 3 Hours.

This is a supervised field experience in a profession that utilizes creative writing (magazine or book publishing, journalism, advertising, arts non-profit, etc). With the approval of the department chair, students may enroll for academic credit from 1-6 hours. In consultation with a faculty advisor and field supervisor, the student will contract field service hours and create an individualized work plan. Students will also meet regularly with the faculty advisor and be evaluated qualitatively and quantitatively for a final grade. By department permission only.

Prerequisite: ENGL-235 with a minimum grade of C and (ENGL-384 with a minimum grade of C or ENGL-386 with a minimum grade of C) and (ENGL-385 with a minimum grade of C or ENGL-387 with a minimum grade of C or ENGL-374 with a minimum grade of C).

ENGL-3944. Creative Writing Internship. 4 Hours.

This is a supervised field experience in a profession that utilizes creative writing (magazine or book publishing, journalism, advertising, arts non-profit, etc). With the approval of the department chair, students may enroll for academic credit from 1-6 hours. In consultation with a faculty advisor and field supervisor, the student will contract field service hours and create an individualized work plan. Students will also meet regularly with the faculty advisor and be evaluated qualitatively and quantitatively for a final grade. By department permission only.

Prerequisite: ENGL-235 with a minimum grade of C and (ENGL-384 with a minimum grade of C or ENGL-386 with a minimum grade of C) and (ENGL-385 with a minimum grade of C or ENGL-387 with a minimum grade of C or ENGL-374 with a minimum grade of C).

ENGL-3945. Creative Writing Internship. 5 Hours.

This is a supervised field experience in a profession that utilizes creative writing (magazine or book publishing, journalism, advertising, arts non-profit, etc). With the approval of the department chair, students may enroll for academic credit from 1-6 hours. In consultation with a faculty advisor and field supervisor, the student will contract field service hours and create an individualized work plan. Students will also meet regularly with the faculty advisor and be evaluated qualitatively and quantitatively for a final grade. By department permission only.

Prerequisite: ENGL-235 with a minimum grade of C and (ENGL-384 with a minimum grade of C or ENGL-386 with a minimum grade of C) and (ENGL-385 with a minimum grade of C or ENGL-387 with a minimum grade of C or ENGL-374 with a minimum grade of C).

ENGL-3946. Creative Writing Internship. 6 Hours.

This is a supervised field experience in a profession that utilizes creative writing (magazine or book publishing, journalism, advertising, arts non-profit, etc). With the approval of the department chair, students may enroll for academic credit from 1-6 hours. In consultation with a faculty advisor and field supervisor, the student will contract field service hours and create an individualized work plan. Students will also meet regularly with the faculty advisor and be evaluated qualitatively and quantitatively for a final grade. By department permission only.

Prerequisite: ENGL-235 with a minimum grade of C and (ENGL-384 with a minimum grade of C or ENGL-386 with a minimum grade of C) and (ENGL-385 with a minimum grade of C or ENGL-387 with a minimum grade of C or ENGL-374 with a minimum grade of C).

ENGL-395. The Craft Of The Short Story. 3 Hours.

In this course students will combine the study of the form of the short story with writing short stories. Readings will include classical and contemporary works from across many countries and traditions. Emphasis will be on studying texts and working on craft in workshops.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-396. Screenwriting: The Short Script. 3 Hours.

This is a workshop course in screenwriting, concentrating on producing a short script. Students will study the particular form and conventions, as well as the specific format, of writing a screenplay. Readings will include exemplary screenplays in several genres, as well as essays on the philosophy and technique of screen writing. In workshop students will produce a short script.

Prerequisite: ENGL-235 with a minimum grade of C.

ENGL-397. Summer Creative Writing Institute. 3 Hours.

Offered only in summer as an intensive course that runs for ten extended class days. Experimenting with both prose and poetry, students participate in workshops as well as sessions with invited speakers covering subjects such as the craft of poetry and prose, the profession of writing and publishing, and the MFA. The emphasis is on an intense workshop experience and an atmosphere of constructive critique leading to the production of a significant portfolio of writing.

Prerequisite: ENGL-235 with a minimum grade of C.

ENGL-398A. Creative Non-Fiction I. 3 Hours.

Students write non-fiction prose which is discussed and critiqued in class by instructor and students.

Prerequisite: ENGL-235 with a minimum grade of C.

ENGL-398B. Creative Non-Fiction II. 3 Hours.

Students write non-fiction prose which is discussed and critiqued in class by instructor and students.

Prerequisite: ENGL-235 with a minimum grade of C.

ENGL-403. Writing The Now. 3 Hours.

Students will merge their training in analysis of sociopolitical issues and literary works that emerge from such with creative writing across multiple genres. As critical observers and creative beings, students will examine writers' and artists' responses to historic moments and movements. Students will read hyper-contemporary creative and theoretical texts, while considering how literary art gets politicized and otherwise activated. They will work independently on a multi-genre semester-long portfolio and share writing within the classroom community, and in a public-facing symposium. Literature of the moment will serve as models and source-texts, and students will respond through production of creative/critical manuscripts.

Requirement: 300-level undergrad creative writing course, graduate-level creative writing work, or permission of instructor.

ENGL-404. Elements Of Style For Creative Writers. 3 Hours.

The course reviews style conventions of the English language, including punctuation, grammar, usage, and sound, focusing on sentence and line analysis. Students will consider how deployment of conventions and issues of perspective, power, and encoded bias impact a reader's experience. Students will develop a working definition of their own writerly style while experimenting in using, subverting, and experimenting with conventions. Students will be encouraged to work within their own desired genre(s); modern and contemporary texts which move across genres will serve as models. Students seeking to develop editing and teaching skills will do the fine-detail work necessary to do so.

Requirement: 300-level undergraduate creative writing course, graduate-level creative writing work, or permission of instructor.

ENGL-409A. Writing In Public: Community Literacies, Public Intellectuals, And Rhetorics Of Change. 3 Hours.

This course looks at "public" writing and teaching in the work of marginalized communities, social movements, and public intellectuals. The primary goal is to understand writing as a contested, political act that can influence the public sphere but can also serve as a tool for oppression and control. This course is appropriate for students interested in theories and the teaching of writing and for students interested in critical and community education.

Requirement: At least six credits in the English MA program or by consent of instructor.

ENGL-410. Literary Methods And Practice. 3 Hours.

A foundation course that will build on existing skills and prepare for further graduate-level studies, with a goal of contextualizing and conceptualizing critical attitudes and approaches to literary text. Its aim is to provide advanced critical and scholarly tools for understanding literature and will address criticism and critical method, close reading and analysis and bibliographical and research technique. Required in the first year of study in the Literature Concentration.

ENGL-411A. Cultural And Literary Studies: History, Theory, Practice. 3 Hours.

This course introduces students to the institutional history, theoretical debates, and interpretative strategies of cultural studies, with a particular interest in how the study of culture, understood broadly, intersects and changes literary studies. Using an interdisciplinary approach, this course explores how cultural processes and forms are produced, distributed, consumed, and responded to in diverse, contradictory ways. Moreover, the course will emphasize how all culture must be studied on multiple scales, ranging from the local to the global.

ENGL-413A. Crafting The MA List: Composing Literary, Cultural, And Compositional Fields. 3 Hours.

This course examines some of the history and theories of English as a discipline to help students develop deep background knowledge of the field and conduct independent research that will help them construct their MA exam lists/fields of study. The collaborative work of the class helps students connect the various threads of English they are examining individually to the larger context of English Studies, and students are given extensive guidance as they work toward professional research agendas.

ENGL-414. Seminar In Reading Film. 3 Hours.

A seminar in film emphasizing methods of reading films as we would texts. Students will explore the complexity of film through close viewing, critical analysis of narrative structure, and attention to visual form and representational practice. To paraphrase a famous question asked about poetry, this course will explore "how a film means."

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-416. Ekphrastic Practice: Responding To Art In Inquiry-Based Creative Writing. 3 Hours.

Ekphrasis is, in its simplest sense, writing that examines and describes a piece of art. This Creative Writing course takes that as a starting notion and pursues its potential as a writerly practice. Students will: examine multiple-genre book-length and individual pieces of Ekphrastic writing; consider those works as sites of inquiry about the complex relationship between source and response, content and form; from their experiences and observations in this work as both writer and reader, plan and execute a small manuscript-length project of creative writing that is both in the ekphrastic mode and rooted in inquiry.

ENGL-418. Studies In Shakespeare. 3 Hours.

Advanced study of Shakespeare's work, organized by theme. This course will explore a number plays grouped together by an organizing principle (such as "Shakespeare and History," "Shakespeare and the Other," "The Roman Plays," "Romance"). These works will also be placed in their historical context, paying close attention to genre, structure, and language. Students will also study theoretical approaches to Shakespeare's work in reading of contemporary critical works.

ENGL-419. Elizabethan And Jacobean Drama. 3 Hours.

Exploration of English dramatic works from circa 1580-1642, including Marlowe, Greene, Middleton, Marston, Dekker, Jonson, Webster, and Beaumont. This course will pay particular attention to genres that dominate outside the Shakespeare canon (revenge tragedy, city comedy, tragicomedy), as well as detailing the social, cultural, and intellectual developments that characterize this golden age of English stagecraft.

ENGL-420. Teaching Shakespeare. 3 Hours.

This intensive summer course focuses on the teaching of Shakespeare's drama. In order to develop methods for teaching these plays at all levels we will study a few selected plays along with secondary literature. Moving from close textual analysis to a workshop will allow students to work on practical approaches to teaching the plays at the level of plot, characterization, theme, genre, performance, and more. Course material will be expanded with the help of documentaries, films, small group workshops, and guest faculty. Prerequisite: MA or at-large status. Or Permission of Instructor.

ENGL-422. Milton. 3 Hours.

Study of a turbulent and exciting "century of revolutions" by concentrating on the figure most associated with seventeenth-century English literature, John Milton. We will read all of his major poetry as well as some significant prose writings. We will also attempt to contextualize Milton in his period by studying other major figures such as Ben Jonson, Andrew Marvell, and John Bunyan.

ENGL-426. Seminar In Romantic Literature. 3 Hours.

Advanced study of the major poets of the Romantic period, involving oral reports, and culminating in a term paper.

ENGL-427A. Pedagogies Of College Level Writing. 3 Hours.

In this course, students apply theoretical learning to practical considerations of teaching writing at the college level through textbook and assignment analysis, syllabus design, and lesson design for writing aspects, such as developing rhetorical strategies, attending to grammar and responding to student work. The course also addresses everyday aspects of teaching such as incorporating effective discussions, setting up culturally sensitive classes, and understanding the realities of employment at the college level. The course is open to students in MA composition or literature students, and students with graduate standing in related field.

ENGL-428. The English Novel. 3 Hours.

Study of the English novel from its origins in the 18th century "Rise of the Novel" tradition, through Gothic/Romantic and Victorian Fiction, to Modernism and Post-Modernism. Individual readings may vary, but students are likely to read works by Defoe, Bronte, Woolf, Lawrence, Conrad, etc.

ENGL-429. Writing Across The Curriculum. 3 Hours.

Through class discussion and activities, textual analyses and inquiry-based research assignments, this class explores connections between writing and the creation and representation of knowledge within academic disciplines. Topics include defining what counts as appropriate evidence in various fields, and the role of English departments in writing in the disciplines pedagogy. Though not intended to be guided instruction in the mechanics of writing, students will gain deeper insight into what counts as quality writing in their disciplines, so in addition to MA Composition graduate students, this course is open to graduate students in other fields with written permission by the instructor.

ENGL-430. Studies In Literary Criticism. 3 Hours.

A study of some of the central problems and issues of contemporary criticism, as exemplified by the writings of major theorists.

ENGL-431. Bibliography And Research In English. 3 Hours.

Material, methods, and tools of literary research; use of libraries; preparation of scholarly papers.

ENGL-432. Alternative Literacies. 3 Hours.

This course will explore literacy theories within and beyond composition studies by considering competing models of literacy and the cultural dimensions of writings, such as economic class or multilingualism, as well as the implications of these for the practice of writing and writing instruction.

ENGL-433. Seminar In Composition Theory. 3 Hours.

This course includes an extensive examination of current composition methodologies with emphasis upon the eclectic needs of the composition student.

ENGL-434. Seminar In Basic Writing Theory. 3 Hours.

A survey of types of students in basic writing classes, a review of placement tests for identifying levels of writing competency, and a careful examination of various basic writing methodologies.

ENGL-435. Writing Assessment: Theory And Practice. 3 Hours.

Theoretical background on evaluating student writing, as well as practical training in how to diagnose and remediate problems with grammar and content at the secondary and college level.

ENGL-436. Rhetorics Of Composition. 3 Hours.

This course will provide students with a background in Classical Rhetoric and then examine how the conventions of Classical Rhetoric have been translated or transformed into rhetorics of composition, such as Expressionistic Rhetoric, Cognitive Rhetoric, Epistemic Rhetoric and Social Construct Rhetoric.

ENGL-437. English Studies And Technology. 3 Hours.

Many scholars in English argue that the computer is radically revising the way we read and write texts. Using sources from literary and rhetorical studies, this class will consider how computer technology is contributing to new notions of the author, text, and audience as well as to the ways computers affect students' reading and writing.

ENGL-438. Research In Composition. 3 Hours.

Materials and methods for library research in composition theory; preparation of scholarly work on composition; research designs and measurement techniques for qualitative and quantitative studies in composition.

ENGL-439. Stylistics. 3 Hours.

Examination of the historical relationship of style to rhetoric; techniques for improving prose style; aspects of style as a part or writing evaluation.

ENGL-446. Critical Writing For Creative Writers. 3 Hours.

This course is a seminar and writing workshop in one. Students will: examine models of texts that operate in the critical-creative or creative-critical mode; choose outside reading of their own through an inquiry-based process for the purpose of producing multi-modal work; produce various critical, creative, creative-critical, and critical-creative pieces; submit a book review/essay for possible publication; and through this process "enter the discourse," as writers working in multiple modes.

Requirement: 300-level undergraduate creative writing course, graduate-level creative writing work, or permission of instructor.

ENGL-456A. Graphic Novels And Social Conflicts. 3 Hours.

This course studies graphic novels as a complex medium that offers new ways to think about and represent a range of social conflicts, including class, race, gender, ecology, history, and national belonging. Students will learn the vocabulary necessary to understand how the medium functions and how to read diverse graphic novels from various contexts. Some questions considered are: How do the visual and verbal dimensions of the graphic novel enable forms of thinking not possible in other media? Why do some theorists identify graphic novels as a medium in which some of the most progressive forms of feminism are unfolding?

ENGL-466. American Renaissance Revisited. 3 Hours.

A critical study of mid-19th century U.S. literature that explores the writers identified with the "American Renaissance" and their relationship to other important literary developments such as the slave narrative and women's domestic fiction.

ENGL-467. The Age Of Literary Realism In The United States. 3 Hours.

A study of U.S. literary realism, the cultural and socio-historical conditions of its emergence, and its relation to other later 19th century literary genres such as sentimentalism and naturalism. Authors might include Twain, Howells, James, Chesnutt, Wharton, Dreiser, Chopin, and others.

ENGL-468. U.S. Literary Modernism & Its Others. 3 Hours.

A study of literary developments in the United States from the early 20th century to the Cold War, focusing on the rise of modernism, proletarian literature, literature of the Harlem Renaissance, and other important bodies of literature.

ENGL-469. Seminar In Southern Literature. 3 Hours.

Intensive reading of twentieth-century Southern literature exclusive of Faulkner with emphasis on the sociological and psychological aspects of the literature as they mirror in America's South.

ENGL-470. Seminar In Faulkner. 3 Hours.

Intensive reading of the short fiction and novels of William Faulkner with specific attention on his development as a novelist and his place among twentieth century American authors.

ENGL-471. Studies In The American Novel. 3 Hours.

A study of major developments in the U.S. novel, this course might feature a variety of foci, including the rise of the novel in America, particularly literary periods or genres, key moments of transition in U.S. literary history, or other key evolutions in novelistic practice in the United States.

ENGL-476. Oil Fictions: Reading Along The Transnational Pipeline. 3 Hours.

This course brings together multiple literary genres and cultural forms to study diverse voices along the transnational oil pipelines, from privileged subjects whose desires, values, and lifestyles are enabled by mass oil consumption, to the communities and geographies that suffer the consequences of this oil dependency, social relations typically rendered invisible and inaudible by the dominant forms of globalization.

ENGL-477. Producing "America":Issues Of Work, Class, And Political Economy In U.S. Literature And Culture. 3 Hours.

This course will focus on literary and cultural works that represent the material conditions of production in the United States as well as on the way we ideologically produce American identity and culture in ways that obscure or make visible the work people do to make our material lives possible. The class will foreground issues of class and political economy in reading literature and culture from a working-class perspective.

Requirements: Admission to an English MA program or consent of instructor.

ENGL-478. Screenwriting. 3 Hours.

This is a workshop course in screenwriting, concentrating on producing a short to medium-length script. Students will study the particular form and conventions, as well as the specific format, of writing a screenplay. Readings will include exemplary screenplays in several genres, as well as essays on the philosophy and technique of screen writing.

Prerequisite: ENGL-410 with a minimum grade of C.

ENGL-479A. Latina/o/x Literature. 3 Hours.

This course offers graduate-level study of US Latina/o/x literatures, including writing from the early period to the present. Readings may offer a broad representation of writers from North America, South America, Central America and the Caribbean or may cover various genres including essays, novels, poetry and drama. Assignments, lectures and discussion will center on questions of identity, culture, history, politics and aesthetics. For students who are teaching or plan to teach, the course will also provide analysis of pedagogical methods in Latina/o/x studies.

ENGL-480. Ethnic Literatures. 3 Hours.

A study of "ethnic," "minority," and U.S. Third World literatures, of the conditions of their emergence as literary formations in relation to cultural, social, and literary developments, and of their relationship to racial and ethnic studies.

ENGL-481. Latin American Literature. 3 Hours.

This course explores major works in Latin American literature across various genres (novel, drama, poetry). The rich pre-colonial, colonial, and post-colonial periods will be studied through works which represent the struggles of different people from different classes, with differing origins, and who hold disparate religious beliefs in this large and diverse region.

ENGL-482. Contemporary Poetic Forms. 3 Hours.

A study of the diverse poetic forms emerging in American poetry since the 1960's- free verse, new formalism, and many experimental forms- as well as the hands-on experience of writing in these forms.

ENGL-483. Postcolonial Literature. 3 Hours.

This course studies literary works produced by or about peoples who have been colonized by European imperial powers. It situates these literatures within the philosophical frameworks that informed European imperial hegemonies as well as the colonized people's responses to them. While we will draw theoretical examples from every part of the world, our literary readings in this class will concentrate mainly on the literatures of Africa and Asia and their diasporas, especially in the Caribbean.

ENGL-484. Contemporary U.S. Literature Since The Cold War. 3 Hours.

A study of the Cold War critical construction of "American" literature and important literary developments from the 1950s to the present, including the rise of postmodernism, the Beat Generation, and a variety of ethnic literary developments, as well as other important literary phenomena of the period.

ENGL-485. Contemporary European Literature. 3 Hours.

The aim of this course is to examine some important works of European literature from the 20th century till date. The course explores major issues such as the place of ethics in literature, holocaust, the World War I & II, European identity etc.

ENGL-487. Material Culture. 3 Hours.

In this seminar, students will concentrate on the material contexts (legal, economic, social, technological) that inform cultural production. While the cultural forms and historical periods focused upon may vary by instructor, in every case the course will introduce students to the history of critical work in this area and involve projects in which students trace the marks of material forces in cultural forms.

Requirement: two additional courses at the 400 level

Prerequisite: ENGL-410 with a minimum grade of C.

ENGL-488. Africana Literature: Slavery And The Literary Imagination. 3 Hours.

Through the lens of former slaves and contemporary novelists and scholars, this course explores the ways in which the slavery narrative and the neo-slave narrative attend to the larger existential question of what it means to be free. The corollary notions of race, gender, citizenship, and labor, among others, will also be considered. In addition, this class will investigate the ways in which the re-inscription of slavery, in contemporary literature, has impacted the development of the Africana literary tradition in terms of content, genre, and form.

ENGL-491. Sonnet: Not Just A Love Song. 3 Hours.

This class will explore the sonnet's many voices and subjects-from plaintive to menacing, from romance to racial injustice. We will read across the centuries, from Shakespeare to Keats to Edna St. Vincent Millay. We will read sonnet-variations, and sonnet-spoofs by contemporary American poets and we will experiment with sonnets of our own. Our time will be spent on close readings, discussions, writing, and informal presentations.

ENGL-495. Re-Thinking Race & Gender. 3 Hours.

The course starts with historical narrative, re-thinking how we learn to practice race and gender from within larger systems of white supremacy and patriarchy. Students will explore models for disrupting systemic patterns and turning rethinking into everyday action. The aim throughout is to interrogate structures and relations of race and gender, and how they get naturalized. Cross-listed for advanced undergraduates, graduates, and teachers. When taught as a Summer Institute, the course runs for eight days over three weeks.

Prerequisite: ENGL-101 with a minimum grade of C.

ENGL-4991. Independent Study In English. 1 Hour.

This is a 1-credit course focused on a carefully planned subject area and work plan approved by the professor of record.

Prerequisite: (ENGL-400 - 499 or ENGL-400A - 499Z).

ENGL-4993. Independent Study. 3 Hours.

This course is designed for students pursuing independent studies of topics not covered in our catalog of courses at the graduate level in English.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-235 with a minimum grade of C.

ENGL-5901. Thesis Hours. 1 Hour.

Graduate students complete an extensive, lengthy research or creative project under the guidance of a supervising committee. The thesis is optional for English graduate students and accounts for 6 of the 33 credit hours required for the M.A.

ENGL-5902. Thesis Hours. 2 Hours.

See course description for ENGL-5901.

ENGL-5903. Thesis Hours. 3 Hours.

See course description for ENGL-5901.

Major in English

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in English for the Bachelor of Arts Degree

Prerequisites: ENGL-101 AND ENGL-102 or equivalent. Note: No more than 15 hours may be transferred into the major in English.

Core Courses

Major in English/Secondary Education

Students seeking to teach English at the secondary level should complete the English Major (B.A.) (<https://catalog.neiu.edu/arts-sciences/english/english/>), and then apply to the Teacher Certification/M.A.T. cohort program in the College of Education during their last term as undergraduates. For requirements and information, refer to the Secondary Education Graduate Program (<https://www.neiu.edu/academics/daniel-l-goodwin-college-of-education/departments/educational-inquiry-curriculum-studies/secondary-education-graduate-programs/>).

Master of Arts in English

Master of Arts in English

The graduate program in English develops skills in critical thinking, writing, and research, encourages intellectual curiosity, and provides training for careers and professional advancement in related fields such as teaching, editorial work, journalism, publishing, writing, and research.

Students pursuing the MA in English choose between two degree concentrations, Literature or Composition. The two-track curriculum provides two separate fields of study within English, offering multiple career opportunities as well as preparing students for doctoral work.

Requirements for Admission to the Program:

Note: Applications for this program are accepted three times a year.

- Fall admission – July 1
- Summer admission – April 1
- Fall admission – November 1

Students must fulfill the general requirements for admission to the College of Graduate Studies and Research. In addition:

1. Applications must indicate a degree concentration: Literature or Composition.
2. In their personal Statement of Goals and Objectives, applicants to the Program in English should specify their reasons for pursuing graduate-level studies in Literature or Composition, and they should identify the background, strengths, and academic skills that they feel will ensure their success as an MA student.
3. All applicants must submit a representative sample of academic or professional writing that demonstrates their critical thinking and/or research strengths and indicates their ability to do well in advanced study in English Literature or Composition. The writing sample should not exceed 15 pages in length, and should preferably be work completed for an upper-division undergraduate course in English or for a graduate-level English course. (Those who cannot meet this requirement may petition the Graduate Coordinator for admission in a written statement.)
4. GRE scores are not required for admission, but they may be submitted to supplement an application.

Literature Concentration:

As the Master's degree is understood to build upon an already solid foundation of literary study, applicants seeking admission to the MA program in English, Literature concentration, must have a BA in English (or a minimum of 30 credit hours of undergraduate work in literature and composition), including reasonable coverage of British and American literature and at least one course in Literary Criticism. Students who do not meet these requirements may be offered a provisional admission and allowed to complete their undergraduate training at NEIU prior to taking courses toward the MA degree.

Composition Concentration:

As the Master's degree is understood to build upon an already solid foundation of study, applicants seeking admission to the MA program in English, Composition concentration, must have a BA in English, English Education, or a related field subject to the approval of the Graduate Committee in Composition. Students who do not meet these requirements may be offered a provisional admission and allowed to complete their undergraduate training at NEIU prior to taking courses toward the MA degree.

NOTE: All petitions to transfer between degree concentrations are subject to the admissions requirements of the track into which a student is transferring.

Requirements for the Degree:

All graduate credits must be at the 400 level, except for a maximum of two 300-level courses specifically approved for graduate degree credits in English (see list below). Be sure to consult with your program advisor before registering for any 300-level course.

Code	Title	Hours
ENGL-300	Russian Literature: From Gogol To Chekhov	3
ENGL-307	Medieval Studies- The Development Of The Arthurian Legend	3
ENGL-308	English Literature From Beowulf To Malory	3
ENGL-314	Chaucer And His Age	3
ENGL-316	Forms Of Poetry	3
ENGL-368	American Realism	3

ENGL-376	Advanced Composition	3
ENGL-377	Argumentative Prose	3
ENGL-381	African-American Literature	3

The graduate program requires 33 credit hours of coursework in the literature (principally British and American), or 33 hours with a concentration in composition. (The specifics of each program are defined below.) Both programs offer a culminating project which can be a thesis, or a public presentation of a major paper. Students in the Comp track can also opt for a final written examination instead of a public presentation.

Literature Concentration:

A student's coursework should be planned with a view to achieving adequate and substantial preparation in British and American literature, with some work in world literature. In addition to coursework, students must maintain good academic standing in the program and complete either a Thesis and Thesis defense or a major project and presentation of research.

The program includes the following coursework:

Code	Title	Hours
Required Courses		
ENGL-410	Literary Methods And Practice	3
Eight 400-level electives selected through consultation with the graduate advisor		24
Thesis Hours (6 total credits) - or two additional 400-level courses		6
Total Hours		33

Composition Concentration:

Students must complete the 6 hours of Core Requirements, 18 hours of Core Electives and 9 hours of Free Electives. In addition, students must maintain good academic standing in the program and must either pass a comprehensive exam, offer a public presentation, or write a Thesis.

Code	Title	Hours
Core Requirements		
ENGL-433	Seminar In Composition Theory	3
ENGL-435	Writing Assessment: Theory And Practice	3
Core Electives ¹		18
ENGL-376	Advanced Composition *	
ENGL-377	Argumentative Prose *	
ENGL-397	Summer Creative Writing Institute	
ENGL-409A	Writing In Public: Community Literacies, Public Intellectuals, And Rhetorics Of Change	
ENGL-413A	Crafting The MA List: Composing Literary, Cultural, And Compositional Fields	
ENGL-427A	Pedagogies Of College Level Writing	
ENGL-432	Alternative Literacies	
ENGL-434	Seminar In Basic Writing Theory	
ENGL-437	English Studies And Technology *	
ENGL-438	Research In Composition	
ENGL-439	Stylistics	
FREE Electives		9
Thesis Option (6 credits) plus one course from the categories below, or 9 credits of Coursework from the Categories Below		
English Department: Any 400-level or graduate-approved 300-level writing, literature, or theory course. Up to six credits from graduate-approved 300-level courses in English can be applied toward the degree.		
Linguistics Department: Any 400-level course relevant to the student's career and academic goals and approved by the graduate advisor.		
TESOL Department: Any 400-level course relevant to student's career and academic goals and approved by the graduate advisor.		
Literacy Education Department: Any 400-level or 500-level course relevant to the student's career and academic goals and approved by the graduate advisor.		
Communications, Media, and Theater Department: Any 400-level course relevant to the student's career and academic goals and approved by the graduate advisor.		
Total Hours		33

Good Standing in the Program

1. All students must maintain a minimum 3.0-grade point average in the program.
2. Regardless of overall grade point average, grades of C or below at the master's level indicate a need for the increased academic application. If more than one grade of C is received, a student must petition the departmental Graduate Committee in writing for permission to continue.

Thesis Option

An optional scholarly thesis is open to degree candidates enrolled in either degree track and may be written in place of two 400-level electives. This option is subject to departmental approval. The student, in consultation with a thesis advisor and the Graduate Coordinator, will submit a thesis proposal that must be approved before they can register for the Thesis Hours. Students completing the thesis option will give an oral defense of their thesis before a departmental committee prior to filing the project with the Graduate College.

Major Project

Students who do not opt to write and defend a thesis in the M.A. Literature track must, in consultation with a faculty advisor, develop and deliver a public presentation on one of their major research projects. This option will be available to students in the Comp track as well.

Minor in Creative Writing

Minor in Creative Writing

The English Department's Creative Writing minor provides undergraduate students of any major with opportunities to develop as writers within a variety of creative contexts. The courses in the program enable students to develop both writing craft and technical proficiency. In addition to taking foundations courses that introduce students to the discipline, students are encouraged to take a core sequence, which will enable them to move from writing individual pieces to developing longer book-length compositions. By the program's end, students will have developed a strong representative body of work.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Creative Writing

To complete the minor in creative writing, students must take 18 hours of coursework.

Code	Title	Hours
Foundations		6
ENGL-235	Introduction To Creative Writing I ¹	
ENGL-340A	Elements Of Style For Creative Writers ²	
Core Sequence (6 credits) - *Choose two courses within the same genre		6
One course at Intermediate Level		
ENGL-384	Creative Writing: Poetry I	
ENGL-386	Creative Writing: Fiction I	
And		
*Choose one course at the advanced level		
ENGL-385	Creative Writing: Poetry II	
ENGL-387	Creative Writing: Fiction II	
ENGL-374A	Hybrid-form Writing	
Electives (6 credits)		6
ENGL-316	Forms Of Poetry	
ENGL-359	Independent Study In English	
ENGL-374A	Hybrid-form Writing	
ENGL-394	Writing The Personal Essay	
ENGL-395	The Craft Of The Short Story	
ENGL-396	Screenwriting: The Short Script	
ENGL-397	Summer Creative Writing Institute	
ENGL 3941-6 Creative Writing Internship (1 through 6 credit hours)		
Total Hours		18

¹ 235 is the prerequisite for all creative writing courses

² 340A can be taken concurrently with courses at higher levels.

* Note that this course was formerly 240A but has been reclassified to reflect its evolving pedagogy.

** Students who have already taken 240A will not need to retake the course for the satisfaction of the requirement.

* All advanced level courses require successful completion of the intermediate course in the same genre with a grade of "C" or higher. Admission without the prerequisite is at the instructor's discretion.

Minor in English (18 credit hours)

Code	Title	Hours
Select three of the following:		9
ENGL-218	American Literature:Beginnings To 1865	
ENGL-219	American Literature:1865 To The Present	
ENGL-221	English Literature:The Beginnings To C. 1750	
ENGL-222	English Literature: C. 1750 To The Present	
Electives (nine credit hours in English at the 300-level)		9
Total Hours		18

NOTE: No more than nine transfer credit hours may be counted toward the minor in English.

Students in the Elementary Education and Early Childhood Education programs who have selected this minor must complete a minimum of 9 hours at the 300-level to meet graduation and licensure requirements.

English Language Program

The English Language Program is comprised of the Minor in Interdisciplinary English Studies, as well as an array of courses in English as a second language, developmental writing, and developmental reading. These courses are intended to help students acquire the level of oral and written English language skills expected of university students. Courses are offered for both native English speakers and English language learners. Students place into the following courses based on their results on the writing and reading portions of the University placement exam.

Code	Title	Hours
ELP-095	Developmental Writing Workshop I	3
ELP-096	Developmental Writing Workshop II	3
ELP-097	Developmental Writing Workshop III	3
ESL-108	Listening And Speaking	3
ELP-112	ESL Writing Workshop I	3
ELP-114	ESL Writing Workshop II	3
ELP-120	ESL Writing Workshop III	3
READ-096	Developmental Reading Workshop I	3
READ-097	Developmental Reading Workshop II	3
READ-115	ESL Reading Workshop I	3
READ-116	ESL Reading Workshop II	3

Course work indicated by these placement results is required. All other courses are selected by the student in consultation with advisors and instructors. Authorization to enter all courses is required for registration and can be obtained in the English Language Program office (LWH 2046).

- Minor in Interdisciplinary Studies (<http://catalog.neiu.edu/arts-sciences/english-language-program/minor-interdisciplinary-english-studies/>)

Lesa C. Davis, Ph.D., Professor of Anthropology, Chair

Tina Villa, Ph.D., Coordinator of English Language Program

ELP-095. Developmental Writing Workshop I. 3 Hours.

(Does not count toward graduation or GPA calculation.) This course presents basic principles of personal essay writing in English, with emphasis on developing sentence level skills. Registration is by placement exam.

Prerequisite: Accuplacer WritePlacer with a score of 2.

ELP-096. Developmental Writing Workshop II. 3 Hours.

(Does not count toward graduation or GPA calculation.) This course is an introduction to the basic principles used in writing expository essays based on personal experience, and intensive work to improve sentence level skills. Registration is by placement exam or permit.

Prerequisite: ELP-095 with a minimum grade of RC or ELP-112 with a minimum grade of C or Accuplacer WritePlacer with a score of 3.

ELP-097. Developmental Writing Workshop III. 3 Hours.

(Does not count toward graduation or GPA calculation.) This course offers practice and instruction in writing expository essays, with emphasis on paragraph development, increased fluency in written English, and proofreading skills. Registration is by placement exam or permit.

Prerequisite: Accuplacer WritePlacer with a score of 4 or ELP-096 with a minimum grade of RC or ELP-114 with a minimum grade of C.

ELP-098. Supportive Instruction Writing Skills Workshop. 3 Hours.

(This course does not count toward graduation or GPA calculation.) ELP-098 must be taken concurrently with ENGL-101: Writing I. This course provides supportive instruction to reinforce or enhance content from the students' college-level writing course. The instructor works to meet the individual needs of the students emphasizing the skills one needs to develop a framework for writing including paragraph development, increased fluency in written English, and proofreading skills. Registration is by placement exam or permit.

Prerequisite: (Accuplacer WritePlacer 4 (and Accuplacer Writing 240 - 249) or ELP-096 or ELP-114).

Corequisite: ENGL-101.

ELP-112. ESL Writing Workshop I. 3 Hours.

Open only to English Language Learners (ELLs). This course provides basic instruction aimed at guiding the ELLs' transition from their existing native language writing skills to academic English with an emphasis on sentence-level skills needed for writing personal narrative essays. Registration is by permit only.

ELP-114. ESL Writing Workshop II. 3 Hours.

Open only to English Language Learners (ELLs). This course provides instruction aimed at continuing the ELLs' transition from their existing native language writing skills to academic English. Work centers on the writing of basic expository essays and intensive work on sentence level skills. Registration is by permit only.

ELP-120. ESL Writing Workshop III. 3 Hours.

Open only to English Language Learners (ELLs). This course provides additional practice and instruction aimed at helping ELLs complete their transition from writing in their native language to writing in college-level academic English. Writing expository essays across various genre, with emphases on paragraph development, increased fluency and editing and proofreading skills form the core content of this course. Registration is by permit only.

ELP-121. English Grammar Skills. 3 Hours.

Analysis of and practice in selected English grammatical patterns, with special emphasis on their academic application.

Minor in Interdisciplinary English Studies

Minor in Interdisciplinary English Studies (21 credit hours)

Language study improves the ability to communicate and enhances understanding and appreciation of others and their cultures. English is widely recognized as a global language, serving as the language of higher education, technology, and media among others. The acquisition of an advanced language proficiency provides access to opportunities for those whose primary language is not English.

Through an integrated-skills approach, the minor in Interdisciplinary English Studies fosters a communicative competence wherein learners gain knowledge about the language, its appropriate use in various contexts, and compensatory strategies for communication breakdowns. Advanced coursework within the minor provides focused study in structure, reading, writing, and/or listening and speaking.

Requirements for Admission to the Minor

Eligibility for this minor is based on identification of students as English language learners. Thus, students must place into the ELP sequence based on a combination of the following:

1. Analysis of student writing on the English Placement Test;
2. Student demographic information provided during the admission process and/or at the time of placement testing;
3. History of primary and/or secondary school attendance in a foreign country, and/or participation in a bilingual education or English as a second language program in the United States.
4. Completion of ELP-112 and/or ELP-114, or direct placement into ELP-120 based on performance on the English Placement Test.
5. Completion of READ-115 or direct placement into READ-116 based on performance on the English Placement Test.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Geography and Environmental Studies

DEGREE PROGRAMS

The Department of Geography and Environmental Studies offers degree programs leading to a B.A. in Geography, a B.A. in Environmental Studies, and an M.A. in Geography & Environmental Studies.

Geography majors recognize the essential nature of location and place in understanding how the world works. This is true from local to global scales and necessarily draws on essential aspects of disciplines in both natural and social sciences. The result is both excellent theoretical understanding and very practical skills.

Environmental Studies majors work at the intersection of the human and natural environments, in particular through environmental policy, planning, management, education and interpretation.

At the Master's level students combine these two disciplines as they engage with the current literature and become scholars and professionals themselves.

CERTIFICATE PROGRAMS

The Department offers two certificate programs in Geographic Information Science (GIS), an exciting and expanding field with a broad range of applications. GIS combines data management, spatial analysis, and cartography and is widely recognized as a powerful planning tool in resource and environmental management, business and marketing, urban and regional planning, terrain and environment modeling, and more. The certificate programs give students across a broad spectrum of disciplines technical skills which they can immediately apply in the workplace.

Erick Howenstine, Ph.D., Professor, Chair

Dennis Grammenos, Ph.D., Associate Professor

Ting Liu, Ph.D., Associate Professor, GIS Coordinator

Alex Peimer, Ph.D., Assistant Professor

Melinda Storie, Ph.D., Associate Professor, Graduate Coordinator

GES-104. World Geography. 3 Hours.

Students will study the major world regions using a geographic perspective which includes both the physical environment (e.g., climate, soils, natural resources, topography) and the human environment (e.g., population, economic, political, urban, trade, culture, language). The course includes map interpretation and a brief introduction to modern geospatial technologies.

GES-109A. First Year Experience: Global Chicago. 3 Hours.

This First Year course provides a broad overview of the Chicago metropolitan area in the global context and within the framework of urban geography. Students will explore Chicago as a hub in the global economy and the many ways in which global forces have impacted the region.

GES-109B. First Year Experience: Humans And The Chicago Environment. 3 Hours.

Students will explore the relationships between human settlement and the natural environment in the Chicago metropolitan area including local environmental problems, their causes, and their possible solutions. Issues such as waste disposal, recycling, brownfields, suburban sprawl, air and water pollution, water supply, flooding and drainage, invasive species, and urban parks are investigated with classroom discussion. Some field trips are possible.

GES-150. Introduction To Environmental Studies. 3 Hours.

This is an introduction to the study of human-environment relations with a focus on sustainable solutions to environmental problems. Students will learn about fundamentals of environmental systems, human impacts on the environment, and sustainable solutions to environmental issues from local to global scales.

GES-199. Topics In Environmental Studies For Middle School Teaching. 4 Hours.**GES-205. Physical Geography. 3 Hours.**

This course introduces students to the geographic distribution and interrelations of Earth's physical environment from a systems perspective. It emphasizes Earth-Sun relations, climate systems, soil, vegetation, and landform types and processes.

GES-218. Conservation Of Natural Resources. 3 Hours.

This course introduces students to contemporary approaches to natural resource management emphasizing efforts toward conservation and preservation. Students will learn how to manage a range of resources such as air, water, soil, forests, grasslands, energy and minerals, and wildlife. They will study the processes, problems, and management methods for different resource types.

GES-250. Writing Intensive Program: Writing in GES. 3 Hours.

In this writing intensive course students develop written communication skills relevant to Geography and Environmental Studies. Topics include note taking, outlines, drafts, writing styles, bibliography and references, essays, reviews, policy statements and reports of varying lengths. Library and online writing resources will be explored. Students will incorporate maps, graphs, and other visual aids.

Prerequisite: ENGL-101 with a minimum grade of C.

GES-301. Great Lakes Environmental Management. 3 Hours.

This course will survey human/environmental issues in the Great Lakes basin with an emphasis on environmental policy, planning, governance, and management. Topics include water resource use and management, wildlife management, industrial, urban and agricultural pollution and abatement, inter-state and inter-national transportation, and resource conflicts and solutions. Some field trips are possible.

GES-302C. Regional Geography: Africa. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302D. Regional Geography: World Oceans. 3 Hours.

Students will study the geography and distribution of the oceans: physical geography of the ocean floor, coastal landforms, earthquakes and volcanoes, oceans and climate, life in the oceans, ocean resources, and human impacts. Contemporary problems and future opportunities include laws of the sea; transportation, and the importance of the oceans to environmental quality of Earth.

GES-302F. Regional Geography: Australia And The Pacific Islands. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302G. Regional Geography: Caribbean. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302H. Regional Geography: Eastern Europe. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302K. Regional Geography: East Asia. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302L. Regional Geography: Southeast Asia. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302M. Regional Geography: Russia And Central Asia. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302N. Regional Geography: South Asia. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302O. Regional Geography: Middle East. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302Q. Regional Geography: Western Europe. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302S. Regional Geography: Developing World. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302V. Regional Geography: U.S. And Canada. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-302X. Regional Geography: Latin America. 3 Hours.

This is a descriptive and explanatory study of a major region. Emphasis is placed on the region's defining human/social and physical factors, on its distinct problems and opportunities, and its role in a wider spatial context.

GES-303A. Topics In Geography: Social Geography. 3 Hours.

A current topic in geography will be explored in depth. See Schedule of Classes, course notes, and consult the department for more information.

GES-303B. Topics In Geography: American Cities: Past, Present And Future. 3 Hours.

This is an overview of geographic and historical development of American cities and an evaluation of contemporary urban issues. It emphasizes spatial processes within cities and within the larger urban system. Using fundamental aspects of urban theory students will discuss how cities developed and how processes such as suburbanization affect the social, economic and environmental aspects of city life.

GES-305. Geography And Map Skills For Teachers. 3 Hours.

Students will review the structure and content of both physical and human geography as well as the themes and standards of geography education. Basic educational concepts will be covered, as will instructional strategies for integrating geographic, geospatial, and GIS concepts into curriculum. This course is intended for those who plan to become formal or informal educators in Grades K-12.

GES-307. Environmental Education. 3 Hours.

This course offers an exploration and analysis of educational theory, various instructional methods, and the design of environmental education and outreach programs. Students will gain practical knowledge in lesson plan design and implementation, current research trends in environmental education, and various conservation-based field techniques related to environmental programming. Curricular development skills will be applied in the context of contemporary environmental issues.

GES-308. Conservation Psychology. 3 Hours.

Students will explore the emerging field of conservation psychology with an emphasis on the psychological characteristics of the relationship between humans and nature, such as environmental values, attitudes, behavior, and decision-making practices. Course topics, including environmental perception, identity, personal morals, ecopsychology, wilderness psychology, domestic nature, managed nature, community dimensions, and environmental education, will be investigated in the context of promoting environmental responsibility.

GES-309. Principles And Methods Of Environmental Interpretation. 3 Hours.

Students will explore the art of interpreting the natural environment of various settings (e.g., parks, camps, historical markers, places of cultural significance) for visitors. Students will practice a variety of interpretive activities and techniques including storytelling, interpretive talks, role-playing, interpretive signage, and guided programs. Projects include the creation of unique interpretive programming under instructor guidance and possibly with external clients. Some field trips are possible.

GES-311. Social Dimensions Of Water Resources Management. 3 Hours.

This course examines the social dimensions of water resources management and development by examining the relationship between humans and the hydrological cycle in the U.S. and world regions. Students will draw from key social theoretical frameworks to better understand and explain the development, use, management, and governance of water resources by humans at various scales and in different settings. Human impacts on natural water systems, the influence of natural water systems on humans, and water conflicts and resolutions will be highlighted. Field trips are possible.

GES-314. Political Geography. 3 Hours.

Students will study the relationship between geographical factors of the physical and human environments and political organization. Topics include territorial claims and conflicts, defining borders and districts, spatial patterns of legislation, development and evolution of nations, and changing patterns in the world political map.

GES-315. Economic Geography. 3 Hours.

Students will explore how economic activities are organized in space at the local, regional and global levels. Geographic frameworks, concepts, explanations and analytical tools will be used to show how space and location are critical elements affecting economic systems and why different places achieve different levels of well-being.

GES-316. Location Analysis. 3 Hours.

This course focuses on the use of location theory and economic modeling to understand spatial patterns of land use and to determine optimal spatial arrangements relating to location of business, services, resources and trade. Environmental influences and impacts are discussed.

GES-319. Environmental And Natural Resources Policy. 3 Hours.

This course analyzes environmental and natural resource policy development, implementation, and revision. It emphasizes contemporary political, environmental, economic, and legal aspects of US federal and state environmental policies in a global.

GES-321. Environmental Impact Assessment. 3 Hours.

Students will analyze the National Environmental Policy Act (NEPA) and its requirement of environmental impact assessment. Topics include NEPA requirements, categories and methods of environmental assessment; agency direction for implementing NEPA; impact assessment in planning and decision making; and public participation and conflict management.

GES-322. Aerial Photo Interpretation. 3 Hours.

This course introduces the use of aerial photographs for evaluating natural and built environments. Students will gather and study information in order to identify various cultural and natural features from aerial photographs.

GES-323. Green Infrastructure Planning And Management. 3 Hours.

This course focuses on the challenges and benefits of incorporating open space, native landscaping, street trees, etc. into urban planning to ameliorate problems such as erosion, storm water management, climate change, habitat loss, and pollution. Plans at differing scales will be compared; case studies of green infrastructure implementation will be examined; and management and maintenance of green infrastructure practices will be discussed. This is a GES-approved field class. Most classes will be held in the field.

GES-327. Forest Resource Management. 3 Hours.

Students will study forest values, management, policies and practices for public and private lands, including national wilderness areas, parks and forests, and the role of trees and forests in urban areas. Some field trips are possible.

GES-328. Wildlife Resource Management. 3 Hours.

This is a general wildlife management course designed for resource planners, environmental managers, interpretive naturalists, and educators. Fish and wildlife values, conservation principles and practices, and current policy issues will be covered.

GES-329. Sustainable Energy Policy. 3 Hours.

Students will study renewable energy resources such as solar, wind, hydro, and biomass sources as alternatives to nuclear energy and traditional fossil fuels. They will examine sustainable energy policy and other ways energy resources can be managed towards a sustainable future.

GES-336. Solid Waste Issues. 3 Hours.

This course examines trends in municipal solid waste generation, collection, disposal and management. Students will explore and discuss the roles of federal, state, county, and municipal governments and policies. International waste issues and management strategies will also be covered.

GES-337. Cultural Geography. 3 Hours.

This course will focus on the cultural landscape including patterns of language, religion, ethnicity, gender, and livelihoods as they vary from region to region around the world.

GES-338. Sustainable Development. 3 Hours.

Sustainable development is an alternative to traditional industrial-economic models of growth which often marginalize people and damage ecosystems. The course will cover specific strategies, policies, and implications of the sustainable development approach globally. Environmental, social, and economic aspects of development will be examined at various scales.

GES-339. Geography Of Energy. 3 Hours.

This course examines the changing spatial patterns of the distribution, consumption, and transportation of energy resources in the US and world regions. Students will investigate new technologies and management strategies for production and delivery of energy resources. Some field trips are possible.

GES-344. Chicago River Issues. 3 Hours.

This field class explores the geographic, environmental, historic, economic, engineering, recreation and other aspects of the Chicago River. Students will study water quality, land use and ownership issues, habitat restoration, and the importance of rivers in metropolitan areas. As a GES- approved field class, most classes are held in the field and will include light hiking and paddling.

Prerequisite: (100 - 399 or 100A - 399Z).

GES-345. Medical Geography. 3 Hours.

The course will cover health-related topics including infectious and non-infectious diseases, from a spatial perspective. Ecological, social, and spatial factors affecting health and disease will be studied, as will the tools and methods of intervention. Special attention is given to the effects of globalization and urbanization on health and disease.

GES-346. Geography Of Metropolitan Chicago. 3 Hours.

This is a detailed study of communities within Chicago and its surrounding area with an emphasis on the formation and spatial distribution of distinct regions. Some field trips are possible.

GES-347. Gentrification And Urban Redevelopment. 3 Hours.

Students will examine the processes and effects of gentrification, revitalization, restoration and urban redevelopment both in metropolitan Chicago and globally. Some field trips are possible.

GES-348. Latino Metropolis. 3 Hours.

This course explores the processes and sociospatial context of Latino urbanization in the U.S, with an emphasis on metropolitan Chicago. Some field trips are possible. The course is approved for graduate credit.

GES-349. Environment And Urbanization. 3 Hours.

The course focuses on urban development emphasizing the role of the natural environment in cities around the world. The rapid growth of urban areas both within and beyond core regions will be studied, with special attention paid to the environmental factors affecting urbanization and the impacts of urbanization on the natural environment.

GES-350. Climate Change: International Policy And Politics. 3 Hours.

This course covers international climate change policy and politics in the context of global capitalism, with a focus on efforts to limit the causes (mitigation) and impacts (adaptation) since the signing of the UN Framework Convention on Climate Change in 1994. The course emphasizes the disproportionate impacts of climate change on the global South and marginalized communities in the global North. Students will assess mitigation and adaptation strategies in countries and regions from a people-centered, place-based approach that respects local socio-ecological contexts and environmental justice perspectives.

GES-351. Spatial Statistics. 3 Hours.

This course introduces students to the fundamentals of spatial statistics. Students will explore statistical problems, principles, and techniques for the study of geographic and environmental phenomena with spatially referenced data.

GES-352. Independent Study In Geography And Environmental Studies. 3 Hours.

Students will study a topic of special interest under the supervision of a faculty member. See the Department policy on independent studies.

GES-353. Independent Study In Geography And Environmental Studies. 2 Hours.

(See GES-352 for description.).

GES-354. Independent Study In Geography And Environmental Studies. 1 Hour.

(See GES-352 for description.).

GES-355. Metropolitan Transportation: Problems And Planning. 3 Hours.

This course presents a study of the location, impact, causes, and mitigation of natural hazards globally. Example topics include earthquake, volcano, flooding, landslide, subsidence, extreme weather, wildfire, and tsunamis. Hazard mitigation will also be covered. Some field trips are possible.

GES-357. Geography Of Natural Hazards. 3 Hours.

This course presents a study of the location, impact, causes, and mitigation of natural hazards globally. Example topics include earthquake, volcano, flooding, landslide, subsidence, extreme weather, wildfire, and tsunamis. Hazard mitigation will also be covered. Some field trips are possible.

GES-358. Museum Studies. 3 Hours.

This course takes a multi-disciplinary approach to the study of museums, cultural heritage institutions, and natural history organizations and the contemporary issues and challenges facing them. Students will examine the theory and organization of museums as well as their historical and contemporary role in education, cultural preservation, research, and interpretation. This course will also take a critical look at the role of museums in colonialist endeavors, and at how they address social hierarchies, race, and ethnicity. Students will enrich their classroom learning with working visits to a diversity of institutions in the Chicago area. Course is open to all majors.

GES-359. Environmental Planning. 3 Hours.

In this course students will learn how to incorporate environmental factors into land use and resource planning. They will explore interrelations between physical systems and land use; they will identify tools and resources for ecologically sound analysis and planning; and will develop an environmental plan of their own.

GES-360. Environmental Justice And Activism. 3 Hours.

Students will investigate the history and process of environmental equity, grassroots activism, legislation and lobbying, and community organization. Some field trips are possible.

GES-361. Urban Planning. 3 Hours.

Students will study the historical development of urban planning in the United States, the components of a comprehensive plan, and the theory and practice of urban planning.

GES-362. Population Geography. 3 Hours.

Population structure, growth/decline, distribution, and migration from local to global scales will be covered. The impact of population structure on economic growth, and problems including environmental degradation and human suffering will be discussed. The course will also cover population policies and initiatives.

GES-3631. Field Experience:Problems In Geography. 3 Hours.

GES-365. Urban Geography. 3 Hours.

This survey course in urban geography focuses on processes and outcomes of urbanization. It will address the changes unfolding in the metropolitan landscape and will encourage students to develop a deeper and more nuanced understanding of cities and urban socio-spatial processes.

GES-367. Geography Of Tourism. 3 Hours.

Students will examine tourism from a geographic and environmental perspective. Topics include political and economic impact on communities, ecotourism, and the cultural consequences of tourism in different world regions. Students will investigate a local tourist site. Some field trips are possible.

GES-368. Climate Change: Changing Climate, Changing Chicago. 3 Hours.

This course focuses on climate change mitigation and adaptation efforts in the Chicago metropolitan region. Students will learn how physical geographers evaluate historical climate conditions as well as project future climates, and how to apply this information to planning problems. A majority of the class will emphasize the ongoing creation and use of local, county, state, and regional climate change mitigation and adaptation plans.

GES-370. Interdisciplinary Seminar On Climate Change. 2 Hours.

This university-wide seminar provides important views on the critical issue of climate change, drawing from many perspectives and disciplines. Faculty from different NEIU departments and other institutions will present an overview of socio-economic, political, cultural, racial, gender, ethical, and scientific perspectives on the issue of climate change. The main objective of the seminar is to gain an understanding of the dynamic linkages and feedbacks between the climate system and society and to critically evaluate climate change solutions in the context of sustainability and social & environmental justice.

GES-371. Advanced Physical Geography. 3 Hours.

This course will cover advanced topics in physical geography, focusing primarily on geomorphic systems (e.g., rivers, glaciers, deserts, coastal zones, karst) and biomes. It will cover contemporary approaches to physical geography as a discipline.

Prerequisite: GES-205 with a minimum grade of C.

GES-372. GIS Across Disciplines. 3 Hours.

This course introduces students to the fundamental concepts of Geographic Information Systems (GIS) and its application in a variety of disciplines including both social and natural sciences. Students will also gain hands-on experiences of collecting and manipulating spatial data and creating effective maps.

GES-374. Research Methods. 3 Hours.

This course explores the foundations and tools of research including quantitative, qualitative, and mixed-methods approaches used in Geography and Environmental Studies. Students will conduct original research from topic selection and development of a research question to a finished paper and presentation. They will gain skills in data collection, analysis, and interpretation as well as in professional writing and presentation.

Prerequisite: GES-250 with a minimum grade of C and (GES-104 with a minimum grade of C or GES-150 with a minimum grade of C).

GES-376. Principles Of Cartography. 3 Hours.

This course covers principles of map making, the history of cartography, evolution of modern techniques, projections, symbolization, visual appeal, thematic mapping techniques, design, production and interpretation.

GES-377. Computer Cartography. 3 Hours.

Students will design, create, and publish a variety of thematic maps using digital graphics programs. The course will include cartographic conventions, aesthetic considerations, and effective symbology.

GES-380. Field Methods. 3 Hours.

Introduction to the instruments, measurements, mapping techniques, and sampling procedures used to acquire primary data from field observations. Development of a field research plan, culminating research projects tailored to each student's interest. Approved for graduate credit.

GES-383. Internship In Geography And Environmental Studies. 3 Hours.

This is a supervised field experience with an agency related to the student's career interest. Prior course work and other disciplinary experiences are evaluated before approval is granted to enroll in the internship. Students will work closely with their advisor in advance of enrollment and will have regular contact throughout the course. There is a formal process for reporting and assessment and 160 work hours are required. This is a GES-approved field class.

GES-387. Interactive Cartography. 3 Hours.

This course focuses on cartographic techniques for web delivery of interactive maps. Students learn basic coding and script modification for interactive map images, and preparation of base maps and data. Emphasis is placed on widely available open source tools. Students will design and complete a research project using new skills for interactive mapping. The course is approved for graduate credit.

GES-388. Field Camp. 3 Hours.

Students must consult the Schedule of Classes for specific destination and costs for this travel-based course. Departmental approval is required for enrollment. There will be classroom meetings prior to travel for discussion of the geographic and environmental issues of the destination. Student will perform a research project based on literature review and field work. This is a GES-approved field class.

GES-389. Urban Design Studio. 3 Hours.

This studio course presents perspectives, standards and techniques used in representing urban plans and projects. Cultural, economic, political and social dimensions of urban life are incorporated in the computer assisted design projects.

GES-390. Remote Sensing And Digital Image Processing. 3 Hours.

This course focuses on the analysis of remotely sensed data for geographic and environmental applications including the detection of a variety of resources in the natural and human environments, measurement of change, and human impact. The course is approved for graduate credit.

GES-391. Introduction To GIS. 3 Hours.

This course is an introduction to Geographic Information Systems (GIS) technology for research applications. Students will study the conceptual and technical process of GIS research including project design, data acquisition, data manipulation, analysis, interpretation and display. The course is approved for graduate credit.

GES-392. Geospatial Analysis. 3 Hours.

This course introduces advanced skills in Geographic Information Systems (GIS), including the concepts, methods and techniques of geospatial analysis and modeling. A variety of spatial data geoprocessing tools will be explored, using both raster and vector formats. Students will apply GIS tools and skills to a real world problem. The course is approved for graduate credit.

Prerequisite: GES-391 with a minimum grade of C.

GES-393. GIS Modeling And Programming. 3 Hours.

This course focuses on advanced analysis of Geographic Information Systems (GIS) data using scripts and programming. Topics will include database management, model building, scripting and programming, and open source GIS. Students will complete several projects related to the course topics. The course is approved for graduate credit.

Prerequisite: GES-391 with a minimum grade of C.

GES-395. GIS Internship. 3 Hours.

This course is a supervised field experience using Geographic Information Systems (GIS) and related geospatial technologies. A proposal and departmental approval is required in advance of registration. There is a formal process for reporting and assessment, and 160 work hours are required. Students should consult Department materials for specific guidelines and instructions. This is a GES- approved field class.

Prerequisite: GES-391 with a minimum grade of C.

GES-396. Food And The City. 3 Hours.

In the face of growing awareness of the environmental impacts of conventional agriculture, food insecurity, and climate change, many view urban agriculture as a promising solution to a variety of socio-economic and environmental concerns. This course will examine the historical development, current versions, and future potentials of urban food production in a geographic context. Some field trips are possible.

GES-401. Seminar In Cultural Geography. 3 Hours.

This course will explore dimensions of the cultural landscape emphasizing the influence of location and place in the creation, shaping, and maintenance of cultural regions. Cultural change and interactions will be studied at various scales of analysis.

GES-411. Scope And Philosophy Of Geography And Environmental Studies. 3 Hours.

This is a historical and theoretical review of geography as a spatial discipline, and of the philosophy of conservation and environmental studies. The relationship between these two fields will be examined. The course also provides an overview of the M.A. program and graduate level studies.

GES-413. Advanced Research Methods. 3 Hours.

This course develops concepts and skills for those preparing for graduate research (thesis or research paper) in the Department of Geography and Environmental Studies or related social science fields. Research design, data-gathering techniques, data analysis, research planning, and quantitative, qualitative, and mixed method approaches will be covered. Students will interpret published research and produce a research proposal.

Prerequisite: GES-411 with a minimum grade of C.

GES-415. Geospatial Data Analysis. 3 Hours.

This course covers the use of contemporary tools used in the design and preparation of thematic maps. It also provides an overview of spatial analyses now possible with geographic information systems (GIS). Topics include data collection, input, storage, retrieval, manipulation and output.

GES-416. GIS For Natural Systems Management. 3 Hours.

This course introduces students to the theory and concepts of data storage, retrieval, visualization, modelling, and output for natural resource applications and management. Mainly with the use of raster GIS students will design and complete their own research projects.

Prerequisite: GES-391 with a minimum grade of C.

GES-417. Urban Information Systems. 3 Hours.

Students will analyze the urban environment primarily with vector GIS tools and public data. Topics will include suburbanization, segregation, economic development, network-based transportation and site location. Students' exploration will culminate in independently designed research projects.

Prerequisite: GES-391 with a minimum grade of C.

GES-424. Human Dimensions Of Global Environmental Change. 3 Hours.

This course introduces students to the role of humans in driving environmental change at local to global scales. They will integrate knowledge of human and non-human systems to enhance their understanding of contemporary global environmental problems. By studying academic literature connecting social and ecological systems they will explore the causes and consequences of human activities in relation to anthropogenic issues such as climate change and biodiversity loss. They will also study ways to mitigate or adapt to these changes.

GES-430. Research Seminar. 3 Hours.

Students conduct a focused and comprehensive literature review, and write a research paper on an approved topic to fulfill requirements for the Master of Arts degree. Credit for both this course and the Thesis Seminar will not be permitted. A proposal must be approved by both committee members in advance of registration. See Departmental policies.

GES-435. Seminar In Physical Geography. 3 Hours.

Students will investigate geomorphic systems and the importance of physical geography for studying the Earth. This course will introduce contemporary principles, models, and theories of physical geography, with special attention paid to the application of physical geographic knowledge for G&ES scholars and professionals.

Prerequisite: GES-205 with a minimum grade of C.

GES-437. Seminar: Global Wildlife Issues. 3 Hours.

Wildlife ecology, management, and policy are studied from global to local scales. Topics will include evolution and distribution of wildlife, habitat and territory, biomes and ecosystems. Human impacts will also be studied. These include habitat loss/disruption, hunting, pollution, introduction of new species and conservation efforts, environmental ethics, and environmental policies.

GES-440. Qualitative Research Methods In Geography And Environmental Studies. 3 Hours.

Students will explore qualitative analytical tools and methods used in geography and environmental studies. They will develop the foundational philosophical knowledge of qualitative inquiry while practicing and applying various qualitative techniques related to the study of complex human-environment phenomena. Individual research projects will involve collecting, analyzing, and representing qualitative data.

Prerequisite: GES-411 with a minimum grade of C and GES-413 with a minimum grade of C.

GES-442. Geographic Problems In Quantitative Measurements. 3 Hours.

This course focuses on quantitative and statistical tools used in geography and environmental studies. It will cover common statistical measures and will emphasize geometrics and spatial analyses. Statistical projects are required.

GES-445. Seminar In Resource Management And Decision-Making. 3 Hours.

This research seminar incorporates principles of resource management and environmental governance through research projects conducted in the Chicago metropolitan area.

GES-449. Seminar In Land Use Controls. 3 Hours.

Students will explore the rationale and methods of private land regulation: land subdivision, zoning, regulations, and growth control. Research projects are required.

GES-450. Seminar In Urban Planning. 3 Hours.

This is a broad overview of urban planning as it is practiced in the United States and in the Chicago metropolitan area. It focuses on the fundamental theoretical perspective as well as on the common regulatory and procedural tools utilized by planning professionals. Students will examine the historical context and evolution of the planning profession, the complex issues associated with urbanization, and of the role of planning in contemporary society.

GES-453. Seminar In Sustainable Development. 3 Hours.

This is an advanced study of sustainable development in the context of science, economics, politics, culture, ecology, and ethics. Development and globalization are critiqued from a political economy perspective and both strengths and limitations of conventional systems are investigated. Institutions, policies, and strategies are analyzed, as are indicators of sustainability and development.

GES-454. Seminar: Population And Environment. 3 Hours.

Students will investigate population dynamics at various scales, including distribution and structure, theories, trends, projections, and policies. Environmental constraints and impacts of population on the natural environment will be explored.

GES-455. Seminar In Environmental Planning. 3 Hours.

Proactive land use strategies to minimize pollution, protect biodiversity and water and energy resources, and reduce vulnerability to natural hazards will be explored. Issues such as smart growth, sustainable transportation, sprawl, watershed management, preservation, natural hazard mitigation, and green design will be discussed with emphasis on those in the Chicago area. Tools will include GIS, economic analysis, and environmental impact assessment. Some field trips are possible.

GES-456. Seminar In U.S. Environmental Policy. 3 Hours.

This is a detailed exploration of environmental law and policy in the United States, including legal structures, processes, and constraints, notable successes and failures, the role and influence of advocacy and interest groups, and major controversies relating to decentralization, market-based mechanisms, risk-based analysis, environmental justice, and others. Differences in state laws and performance will also be explored.

GES-457. Seminar: International Environmental Policy. 3 Hours.

Students will study international efforts to address global environmental problems such as deforestation, climate change, ozone depletion, fisheries decline, and toxic chemicals. They will analyze the effectiveness of these measures. The class will explore various theories and philosophies, international regimes, international cooperation, and the promoters of and obstacles to progress. The impact of globalization, of regional disparities, and of international organizations will be examined.

GES-461. Independent Study In Geography And Environmental Studies. 3 Hours.

This independent research is on a topic chosen by the student in consultation with the instructor and approved in advance of registration.

GES-462. Seminar In Environmental Education. 3 Hours.

In this course students will explore, analyze, and critique advanced environmental education theories and practices. Students will gain an understanding of pedagogical tools and techniques related to a variety of ages, locations, and mechanisms of conservation education. Foundational knowledge will be combined with current research trends in the context of individualized projects.

GES-471. Seminar In Urban Geography. 3 Hours.

Students will research and discuss current topics and theories from the academic literature in urban geography.

GES-472. Seminar In Regional Geography: Third World Issues. 3 Hours.

Students will examine the less developed world regions based on current geographical perspectives of development processes. Topics will include social inequity, resource exploration, economic development, and demographic change. Students will develop their own research areas, incorporating the academic literature.

GES-483. Internship. 3 Hours.

This is a supervised field experience (160 work hours) with an agency related to the student's career interest. Prior course work and other experience is evaluated before approval is granted to enroll in the internship. See Department policies and internship procedures.

GES-5901. Thesis Hours. 1 Hour.

Under the supervision of three advisors students conduct independent research and write a thesis to fulfill requirements for the Master of Arts degree. Credit for this course and GES-430 will not be permitted. See Department policies.

GES-5902. Thesis Hours. 2 Hours.

Under the supervision of three advisors students conduct independent research and write a thesis to fulfill requirements for the Master of Arts degree. Credit for this course and GES-430 will not be permitted. See Department policies.

GES-5903. Thesis Hours. 3 Hours.

Under the supervision of three advisors students conduct independent research and write a thesis to fulfill requirements for the Master of Arts degree. Credit for this course and GES-430 will not be permitted. See Department policies.

Graduate Geographic Information Science Certificate

Graduate Geographic Information Science Certificate

Degree-seeking Graduate students and non-degree-seeking Graduate students may enroll in the Graduate Certificate Program.

Total of 18 credits hours which may be completed in one academic year (Fall-Summer):

Code	Title	Hours
Core Courses		12
GES-391	Introduction To GIS	
GES-392	Geospatial Analysis	
GES-393	GIS Modeling And Programming	
GES-442	Geographic Problems In Quantitative Measurements	
Electives		6
Select two of the following:		
GES-387	Interactive Cartography	
GES-390	Remote Sensing And Digital Image Processing	
GES-416	GIS For Natural Systems Management	
GES-417	Urban Information Systems	
Total Hours		18

Major in Environmental Studies

Major In Environmental Studies for the Bachelor of Arts Degree

Environmental Studies is an applied major designed to give students knowledge of and the ability to develop solutions to environmental problems. Students can focus on one of two areas:

1. environmental policy and planning, or
2. environmental interpretation / education.

Students in option 1 investigate the causes, results, and solutions to environmental problems from a policy perspective. They study regulations influencing environmental protection and degradation; they also gain practical skills useful in the field.

Students in option 2 specialize in community interaction and will qualify for careers as naturalists with parks and other outdoor agencies and as environmental educators in schools and non-profit organizations.

The program culminates with an internship experience in which the student applies knowledge, gains practical experience; it often constitutes a first job in an environmental career. To earn a Bachelor of Arts in Environmental Studies, students must complete 24 credit hours of core requirements and 18 credit hours of approved electives. Up to nine hours of credit from other relevant fields may be accepted toward the major, with advisor approval.

GES Environmental Studies B.A. Web Site (<https://www.neiu.edu/academics/college-of-arts-and-sciences/departments/geography-environmental-studies/environmental-studies-ba/>)

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Geography

Major in Geography for the Bachelor of Arts Degree

Geography is the study of space and location; it is a practical discipline which incorporates knowledge from the natural and social sciences to address problems of a spatial dimension. Geographers describe spatial patterns – where things are, where they are not, and why they are distributed that way. They determine optimal locations – for example, where a business should be or where to purchase a home. They also study interactions, such as travel patterns, trade, and migration.

Many geographers use Geographic Information Systems: computer software that merges maps, data, and analysis. The Department's GIS Certificate Program can be incorporated into their major as electives or may be taken for the Certificate alone, outside of the degree program. A minor in Geographic Information Science, which results in a Certificate as well, is also available.

In addition to the required courses in geography, students may choose to specialize in urban and social geography or geospatial techniques. The first option focuses on the study of metropolitan areas and the socio-spatial patterns that characterize them. Students are introduced to principles of urban planning and urban design and the dynamics of urbanization. The latter option includes instruction in field methods, computer-assisted mapping, statistics, geographic information science, and interpretation of aerial photos and satellite images.

Master of Arts in Geography and Environmental Studies

The Master of Arts degree program provides advanced analysis of spatial and environmental interrelationships. This 33 credit hour program prepares students for positions in environmental policy planning, and management in government, industry, and non-profit organizations; in environmental education and nature interpretation; and in other areas where geographers, planners, and environmental professionals are needed.

Requirements for Admission to the Program:

Students must fulfill the requirements for admission to the Graduate College. Applicants must have the equivalent of an undergraduate minor in Geography & Environmental Studies or will be required to take extra undergraduate coursework prior to full admission. Students must provide a two-page Statement of Goals and Objectives as part of their application. This statement should demonstrate the student's writing skills and should specify as clearly as possible academic/professional goals and the reasons for selecting the G&ES program of study.

G&ES M.A. Web Page (<https://www.neiu.edu/academics/college-of-arts-and-sciences/departments/geography-environmental-studies/geography-and-environmental-studies-ma/>)

Degree Requirements:

All graduate credits must be at the 400 level, except for a maximum of 10 credit hours from a limited list of university approved 300-level courses. Students should consult with the Department for the limited list; some courses on the list may require specific approval by the Department's Graduate Coordinator.

Students must write either a thesis (6 cr.) or major research paper (3 cr.) under the supervision of a Program Advisor and faculty committee. A formal approval of the proposal by the committee is required prior to registration. For students undertaking the thesis, an oral defense is also required. For students enrolled in the research paper option, a written comprehensive examination covering their chosen area of specialization as well as knowledge of geography, environmental studies, and disciplinary techniques must be completed.

Code	Title	Hours
Required Courses		
GES-411	Scope And Philosophy Of Geography And Environmental Studies	3
GES-413	Advanced Research Methods	3
Select two of the following:		6
GES-391	Introduction To GIS	
GES-442	Geographic Problems In Quantitative Measurements	
GES-440	Qualitative Research Methods In Geography And Environmental Studies	
One of the following:		3-6
GES-430	Research Seminar	
OR 6 cr. hrs. of Thesis Hours (GES 5901, 5902, 5903)		
Approved Electives		15-18
Total Hours		33

Students enrolled in the thesis option (6 credit hours) are required to take 15 credit hours of electives, while students enrolled in the non-thesis option (3 credit hours) are required to take 18 credit hours of electives. In that way, along with the other requirements of the program, ALL students finish with a total of 33 credit hours.

Pass Comprehensive Exam (research paper option)

Thesis Defense (thesis option)

Minor in Environmental Studies

Minor In Environmental Studies (18 credit hours)

The minor in environmental studies provides students a sound foundation in environmental issues at the local and global scales. Problems and solutions are explored in classes covering topics such as resource management, sustainability, environmental interpretation, and more.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).

Global Studies

Global Studies is an interdisciplinary undergraduate program that offers a major leading to the B.A. in Global Studies. The program provides students with the opportunity to investigate and analyze the globalized world and the transnational interconnections that are its hallmark. The innovative curriculum includes required core courses housed in Global Studies as well as elective courses drawn from across the university. Through critical analysis of the contemporary world, carried out in coursework and through hands-on research and internship opportunities, students in the program accrue knowledge, scholarly abilities, and practical skills that will prepare them as informed members of the global community and a valuable part of 21st century workforce. The program prepares students to pursue graduate education and careers in a wide range of fields, including international business and law, applied social sciences, community resources management, social services, international education, and international development.

For further information, please contact the program coordinator:

Dr. Tracy Luedke

Major in Global Studies (<http://catalog.neiu.edu/arts-sciences/global-studies/global-studies/>)

Minor in Global Studies (<http://catalog.neiu.edu/arts-sciences/global-studies/minor-global-studies/>)

Global Studies Faculty:

Tracy Luedke, Ph.D., Professor, Anthropology (Coordinator of Global Studies)
Denise Cloonan Cortez de Andersen, Ph.D., Professor, Spanish
Maria De La Torre, Ph.D., Associate Professor, Justice Studies
Chielozona Eze, Ph.D., Professor, English
Mateo Mohammad Farzaneh, Ph.D., Associate Professor, History
Scott W. Hegerty, Ph.D., Associate Professor, Economics
Seung-Hwan Mun, Ph.D., Associate Professor, Communication, Media & Theatre
Ryan Poll, Ph.D., Assistant Professor, English
Christopher Schroeder, Ph.D., Professor, English
Isidore Udoh, Ph.D., Associate Professor, Health Sciences and Physical Education

GS-201. Introduction To Global Studies I. 3 Hours.

This course introduces students to the multiple dimensions and impact of globalization as it is reflected across disciplines. Accordingly, we explore globalization through specific themes and approaches, including those of: 1) Culture, Society, and Identity; 2) Language, Knowledge, and Representation; 3) Power, Movements, and Political Economy; 4) Nature, Technology, and the Body; 5) Violence, Resistance, and Resolution. In this way, the course generates a comparative understanding of the significant implications arising in the wake of an increasingly globalized world.

GS-205. Writing Intensive Program: Interdisciplinary Research And Writing. 3 Hours.

Interdisciplinary Research and Writing provides students with practical training in conducting research and writing effectively in an interdisciplinary field. Students will learn about the advantages and challenges of interdisciplinary scholarship through a series of stepped research and writing assignments, including literature searches and reviews, hands-on experimentation with field methods, and multiple formal and informal writing activities that guide students in creating rough drafts, conducting revisions, and producing polished work. The course serves students in all interdisciplinary fields.

Prerequisite: ENGL-101 with a minimum grade of C.

GS-303. Writing Intensive Program: The Power Of Writing: Interdisciplinarity As Critical Practice. 3 Hours.

This course provides students with experience and training in interdisciplinary writing by focusing on three critical genres: writing for change through carefully crafted letters and social media posts, reflexive writing in the form of autobiographical essays, and academic writing based on empirical research. Students will learn about advantages and challenges of interdisciplinary writing through multiple formal and informal writing activities. The course encourages students to embrace writing critically and creatively in order to express themselves effectively in a broad range of contexts. The course, and the interdisciplinary writing skills on which it focuses, are relevant to students from many academic fields.

Prerequisite: ENGL-101 with a minimum grade of C.

GS-3901. Independent Study In Global Studies. 1 Hour.

The Independent Study in Global Studies provides an opportunity for a student to propose and conduct a scholarly project that is not otherwise possible within existing courses. A Global Studies major or minor interested in doing an independent study must contact a Global Studies faculty member to propose their project and to confirm the faculty member's ability to support the student as mentor and instructor for the duration of the course. The student and mentoring faculty member must submit the necessary proposal and paperwork the semester before the independent study is to take place. Contact the program coordinator for details.

GS-3902. Independent Study In Global Studies. 2 Hours.

The Independent Study in Global Studies provides an opportunity for a student to propose and conduct a scholarly project that is not otherwise possible within existing courses. A Global Studies major or minor interested in doing an independent study must contact a Global Studies faculty member to propose their project and to confirm the faculty member's ability to support the student as mentor and instructor for the duration of the course. The student and mentoring faculty member must submit the necessary proposal and paperwork the semester before the independent study is to take place. Contact the program coordinator for details.

GS-3903. Independent Study In Global Studies. 3 Hours.

The Independent Study in Global Studies provides an opportunity for a student to propose and conduct a scholarly project that is not otherwise possible within existing courses. A Global Studies major or minor interested in doing an independent study must contact a Global Studies faculty member to propose their project and to confirm the faculty member's ability to support the student as mentor and instructor for the duration of the course. The student and mentoring faculty member must submit the necessary proposal and paperwork the semester before the independent study is to take place. Contact the program coordinator for details.

GS-397. Capstone Portfolio Global Studies. 1 Hour.

In this one credit hour course, students will compile the written work they have accomplished across their Global Studies coursework and synthesize it through a carefully edited portfolio that includes an integrating essay. The course provides an opportunity for students to reflect on their work across the GS major and gather the strands together toward a comprehensive whole that highlights the synergies and dominant themes that have emerged from their body of work as Global Studies majors.

Prerequisite: GS-201 with a minimum grade of C and GS-303 with a minimum grade of C.

GS-399. Capstone Global Studies. 4 Hours.

In this course students will examine and conduct research on global phenomena. We will read and debate a range of approaches to the study of the global, addressing both methodological and theoretical issues. Students will conduct individual research projects, working through all the stages from proposal to completed paper. As the capstone course for the Global Studies Program, the primary course goal is to provide students with practical experience in linking reading and discussion of published sources in Global Studies to the tasks of researching, analyzing, and writing about their own areas of interest in the field.

Prerequisite: GS-201 with a minimum grade of C and GS-202 with a minimum grade of C.

Major in Global Studies

People, places, and things across the world are more interconnected than ever. To study global phenomena, we need an interdisciplinary approach that allows us to study these complex interconnections from multiple angles. Global Studies is an interdisciplinary undergraduate program that offers a major leading to the B.A. in Global Studies as well as a minor. Centered on the study of globalization in all its manifestations, the program encourages students to investigate and analyze life in a globalized world from multiple cultural, economic, political, and other perspectives and provides students with the critical analytical skills needed to assess the world around them and their place within it. The program's curriculum is organized around five thematic tracks, designed to build both breadth and depth into students' coursework. These tracks are: 1) Culture, Society, and Identity; 2) Language, Knowledge, and Representation; 3) Nature, Technology, and the Body; 4) Power, Movements, and Political Economy; and 5) Violence, Resistance, and Resolution. The tracks transcend traditional disciplinary, topical, and theoretical boundaries, providing opportunities for creative thinking, critical debate, and novel scholarship. The field of Global Studies is especially well suited to NEIU, providing our diverse student body with an opportunity to reflect on and respond to complex world issues that instantiate in their own lives.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

- * Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.
- ** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Global Studies

Code	Title	Hours
Major Required courses:		
GS-201	Introduction To Global Studies I	3
GS-303	Writing Intensive Program: The Power Of Writing: Interdisciplinarity As Critical Practice	3
6 or 7 Global Studies electives ¹		18-21
2 semester sequence in foreign language (any two-course sequence in a foreign language)		6
GS-399	Capstone Global Studies ²	4
or GS-397	Capstone Portfolio Global Studies	
Total Hours		34-37

¹ Minimum of 3 courses in one track and minimum of 1 course in each of two other tracks.

² GS 399 plus six GS electives OR GS 397 plus seven GS electives

The following courses may be counted toward a Global Studies major or minor. The number(s) after each course indicate track(s) to which the course corresponds. Additional courses may be considered for inclusion as electives in consultation with the coordinator.

Tracks:

1. *Culture, Society, and Identity*
2. *Language, Knowledge, and Representation*
3. *Nature, Technology, and the Body*
4. *Power, Movements, and Political Economy*
5. *Violence, Resistance, and Resolution*

Minor in Global Studies

People, places, and things across the world are more interconnected than ever. To study global phenomena, we need an interdisciplinary approach that allows us to study these complex interconnections from multiple angles. Global Studies is an interdisciplinary undergraduate program that offers a major leading to the B.A. in Global Studies as well as a minor. Centered on the study of globalization in all its manifestations, the program encourages students to investigate and analyze life in a globalized world from multiple cultural, economic, political, and other perspectives and provides students with the critical analytical skills needed to assess the world around them and their place within it. The program's curriculum is organized around five thematic tracks, designed to build both breadth and depth into students' coursework. These tracks are: 1) Culture, Society, and Identity; 2) Language, Knowledge, and Representation; 3) Nature, Technology, and the Body; 4) Power, Movements, and Political Economy; and 5) Violence, Resistance, and Resolution. The tracks transcend traditional disciplinary, topical, and theoretical boundaries, providing opportunities for creative thinking, critical debate, and novel scholarship. The field of Global Studies is especially well suited to NEIU, providing our diverse student body with an opportunity to reflect on and respond to complex world issues that instantiate in their own lives.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

- * Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.
- ** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

History

The Department of History trains students to question essential assumptions about human societies and cultures. Students develop a broad and deep body of historical knowledge that gives important context to human action and events. Our students learn to collect, organize, analyze and interpret complex sources. They use these sources to craft clear and well-supported historical arguments, and to present their findings to a variety of audiences.

We apply historical knowledge and historical thinking to contemporary issues, and learn to weigh diverse points of view. The ability of historians to engage both complexity and detail and to develop critical thinking, clear writing, and persuasive speaking skills prepare our students for successful careers in business, law, education, and government.

The Department of History offers courses leading to the degrees of Bachelor of Arts and Master of Arts. In addition, the Department offers a minor.

NOTE: Some history courses have been renumbered and others consolidated. Students who took a course under one number will not receive credit for taking the same course under its new number.

- Major in History (<http://catalog.neiu.edu/arts-sciences/history/history/>)
- Minor in History (<http://catalog.neiu.edu/arts-sciences/history/minor-history/>)
- Master of Arts in History (<http://catalog.neiu.edu/arts-sciences/history/master-arts-history/>)

Mateo Farzaneh, Ph.D., Associate Professor

Francesca Morgan, Ph.D., Associate Professor

Joshua Salzmänn, Ph.D., Associate Professor

Michael W. Tuck, Ph.D., Associate Professor

HIST-109. First Year Experience: History Of Chicago. 3 Hours.

Chicago is the most "American" of the major cities and has been at the forefront of change. In 50 years Chicago transformed from a fur-trading crossroads to a major industrial center, and that speed made it a city of stark contrasts. Enormous tensions emerged between the entrepreneurial forces that built the city and the countervailing social forces that strived to humanize it. A stream of immigrants played an integral role in shaping the city, contributing to economic and cultural development. Chicagoans faced huge challenges and as a result became pioneers of the economic, social, and political trends that shaped modern America.

HIST-111A. World History: The Origins Of The West, To 1500. 3 Hours.

Survey of the formation of Western Civilization from its ancient Mediterranean origins until the European Renaissance.

HIST-111B. World History: The West And The World, 1500-Present. 3 Hours.

Survey of Western Civilization from the Renaissance to the present age of expanded European influence.

HIST-111C. World History: East Asia. 3 Hours.

Survey of the history and culture of East Asia, with emphasis on China and Japan from antiquity to the present.

HIST-111D. World History: Latin America. 3 Hours.

Survey of the history and culture of Latin America, with emphasis on the last 500 years.

HIST-111E. World History: Africa. 3 Hours.

Survey of the history and culture of Africa with emphasis on the relations between Africa and the wider world.

HIST-111F. World History: Islam. 3 Hours.

Survey of the role of Muslims in World History, with emphasis on the diversity of their religious, social, cultural and economic lives and their change over time.

HIST-112. World History Since 1500. 3 Hours.

The course examines world history since roughly 1500. It focuses on how various peoples encountered each other, and how these interactions transformed their communities and cultures. Themes of conquest and imperialism, commerce, faith, and human relationships with the natural environment will be addressed.

HIST-214. United States History 1607-1877. 3 Hours.

Social, political, intellectual, diplomatic and economic development of the American colonies and the United States from the beginnings through 1877.

HIST-215. United States History 1877-Present. 3 Hours.

Social, political, intellectual, diplomatic and economic development of the United States from 1877 to present.

HIST-300A. Ancient Greece. 3 Hours.

Social, political and intellectual history of Greece, from the age of Homer through the Peloponnesian War. Readings include selections from poetry, drama, history and philosophy of the period. Required: Two courses in history or consent of instructor.

HIST-300B. Ancient Rome. 3 Hours.

The history of Rome from prehistoric cultures to the end of the Roman Empire. Required: Two courses in history or consent of instructor.

HIST-300W. Writing Intensive Program: The Historian's Craft. 3 Hours.

The purpose of this course is to introduce History majors to the methods and writing skills necessary to succeed in their chosen discipline. The writing assignments in the course are intended to help students develop skills in analyzing sources, evaluating books, and producing historiographical essays that will benefit students in the other courses they take for the major, and beyond. Instructors will choose content on a historical theme that highlights how historians interpret the past from diverse perspectives that change over time.

Prerequisites: (HIST-100 - 299 or HIST-100A - 299Z) and ENGL-101.

HIST-301. Medieval Europe. 3 Hours.

Major themes of the Middle Ages in Europe with emphasis on Western Europe. Required: Two courses in history or consent of instructor.

HIST-302A. Age Of Renaissance. 3 Hours.

The political and cultural history of Italy and Northern Europe from 1300-1600. Required: Two courses in history or consent of instructor.

HIST-302B. Age Of Reformation. 3 Hours.

The religious crisis within Roman Catholicism and the genesis and growth of the Protestant movement. Required: Two courses in history or consent of instructor.

HIST-303. Europe During The Ancien Regime 17th And 18th Centuries. 3 Hours.

The political, economic, social and intellectual development of Europe in the seventeenth and eighteenth centuries. Required: Two courses in history or consent of instructor.

HIST-304. Europe In The Age Of Revolution 1789-1871. 3 Hours.

The historical forces in European society from the French Revolution to the completion of the unification processes. Required: Two courses in history or consent of instructor.

HIST-305. Europe In The Age Of Imperialism 1871-1919. 3 Hours.

The historical forces in European society during the period of great territorial expansion and rivalry culminating in the First World War. Required: Two courses in history or consent of instructor.

HIST-306. Europe 1919-1948: Fascism, Socialism, And The Second World War. 3 Hours.

This course addresses European history from the Treaties that ended the First World War in 1919 to the Berlin Crisis and the start of the Cold War. Themes will include the Great Depression and crisis of liberal democracy, the challenges to it posed by Mussolini, Hitler, and Stalin, and the culmination of tensions among these in the Second World War. Particular attention will be paid to genocide and the Nazi attempt to destroy the European Jewish community.

HIST-307A. The Age Of The Baroque. 3 Hours.

An examination of the intellectual and cultural history of seventeenth-century Europe, with special emphasis on scientific, philosophical, political and religious thought. Required: Two courses in history or consent of instructor.

HIST-307B. The Age Of The Enlightenment. 3 Hours.

An examination of the intellectual and cultural history of eighteenth-century Europe, with special emphasis on religious, political and philosophical thought. Required: Two courses in history or consent of instructor.

HIST-308. Human Rights In History, Literature, And Law. 3 Hours.

This course examines the development of human rights from the eighteenth century to the Bosnian War of the 1990s. Using a variety of sources and disciplinary perspectives, students will study the origins of discussions of rights in the American and French Revolutions and debates over the nature of rights in the nineteenth century. The laws of war and crimes against humanity in the twentieth century will receive particular attention, along with the causes of the emergence of human rights as a goal of political actors across the globe in the late twentieth century.

Prerequisite: and.

HIST-309. The History Of Disability. 3 Hours.

This course examines the history of people with disabilities, a minority that makes up a substantial proportion of the U.S.'s and world's populations. The history of disability reveals how societies understand critical issues like civil rights, social identity, gender and sexuality, "normality," or a "healthy" body. Course topics will explore different facets of disability, including medicine, law, culture, and education.

Prerequisite: and.

HIST-311A. History Of England To 1688. 3 Hours.

Survey of English history to the revolution of 1688; emphasis on significant themes, such as the evolution of monarchy and parliament, medieval society, the Elizabethan world and constitutional crisis in Stuart England. Required: Two courses in history or consent of instructor.

HIST-311B. History Of England 1688-Present. 3 Hours.

The political, economic and cultural forces that shaped Great Britain. Emphasis on the class structure, the transition to an industrial society, Georgian and Victorian culture, contemporary Britain. Required: Two courses in history or consent of instructor.

HIST-312. Tudor England. 3 Hours.

Major political, social, intellectual and economic trends in sixteenth century England. Required: Two courses in history or consent of instructor.

HIST-313A. History Of Prussia-Germany 1640-1918. 3 Hours.

Study of the evolution of Prussia in the seventeenth and eighteenth centuries with emphasis upon her role in the political and social institutions of Germany, Europe and the world through 1918. Required: Two courses in history or consent of instructor.

HIST-313B. Twentieth Century Germany. 3 Hours.

Study of the problems faced by twentieth century Germany, including the demise of the Weimar Republic and the political and social origins of the Nazi Movement, and the situation of post-war Germany. Required: Two courses in history or consent of instructor.

HIST-314A. Russian History From The Varangians To 1855. 3 Hours.

The Russian people, state and culture from their origins to the death of Nicholas I. Required: Two courses in history or consent of instructor.

HIST-314B. Russian And Soviet History 1855 To Present. 3 Hours.

The political, diplomatic, intellectual and social development of the peoples of the Russian Empire and the Soviet Union from the accession of Alexander II to the present. Required: Two courses in history or consent of instructor.

HIST-315. Women In Medieval Society. 3 Hours.

Survey of the status of women in medieval Europe beginning with the settlement of the barbarians and ending with the high middle ages. Required: Two courses in history or consent of instructor.

Prerequisite: and.

HIST-317. French Revolution, World Revolutions 1789-Present. 3 Hours.

Survey of the French Revolution (1789-1795), with the special emphasis on the political and social principles of the Old Regime and the tension between established order and political discontent. Required: Two courses in history or consent of instructor.

HIST-320. Colonial History Of The United States 1607-1775. 3 Hours.

The nature of colonial government, town life, literature, as well as a comparison of the development of major colonies; key personalities of the period, such as Benjamin Franklin, Cotton Mather, Jonathan Edwards and Thomas Jefferson are studied in detail; designed for American history majors. Required: Two courses in history or consent of instructor.

HIST-321. The American Revolution 1763-1789. 3 Hours.

Intensive study of the events leading to American Independence; social and political changes accompanying independence; America under the Articles of Confederation; the writing and adoption of the Constitution. Required: Two courses in history or consent of instructor.

HIST-322. The National Period 1789-1824. 3 Hours.

Study of the formative years of the American Republic from the promulgation of the Constitution in 1789 to the end of the so-called "era of good feelings" in 1824. Required: Two courses in history or consent of instructor.

HIST-323. Jacksonian Era And Sectional Crisis 1824-1860. 3 Hours.

Various political, economic, social and intellectual developments involved in the rise of Jacksonian Democracy; the growth of democracy at the state and national levels, the new conception of the presidency, economic growth; nationalism, sectionalism and the socioeconomic factors leading to the breakdown of constitutional government and the beginning of the Civil War. Required: Two courses in history or consent of instructor.

HIST-324. The Civil War And Reconstruction 1860-1877. 3 Hours.

The inevitability of the U.S. Civil War (1861-1865); the inevitability of the war's outcome; and the terms on which the Confederacy's eleven states, and what was left of the United States, reunited, will all be explored. The end of slavery, and the Reconstruction-era beginnings of black civil rights, are additional important topics. Required: Two courses in history or consent of instructor.

Prerequisite: ENGL-101 with a minimum grade of C.

HIST-325. Industrial And Progressive America 1877-1929. 3 Hours.

Study of the formative years of modern America from the conclusion of reconstruction, through the Progressive Era and the administration of Herbert Hoover with emphasis on those ideas, institutions and factors which help explain the growth of present urban and industrial America. Required: Two courses in history or consent of instructor.

HIST-326. The Era Of Franklin D Roosevelt 1929-1945. 3 Hours.

In-depth study of the causes and consequences of the Great Depression, the New Deal response to the crisis, and the road to and involvement in World War II, with special emphasis on the leadership of Franklin D. Roosevelt. Required: Two courses in history or consent of instructor.

HIST-327. The United States In The Age Of Crisis 1945 - Present. 3 Hours.

General survey of the political, diplomatic, economic and social forces which have developed in the U.S. since 1945 with particular emphasis on the crisis in domestic America. Required: Two courses in history or consent of instructor.

HIST-328. Surveillance And Privacy In The United States, 1898-Present. 3 Hours.

This course examines the creation of a surveillance infrastructure in the United States and overseas from 1898 to the present, as well as the privacy and civil rights issues that have resulted from surveillance.

HIST-329A. African American History To 1865. 3 Hours.

Thematic survey of the history of Black Americans from the era of slavery to the conclusion of the Civil War with emphasis on racial ideologies, the experiences of both slaves and free people of color, and the abolitionist crusade. Required: Two courses in history or consent of instructor.

HIST-329B. African American History And Race Relations Since 1865. 3 Hours.

Thematic survey of the history of Black Americans from the end of the Civil War to the present day with an emphasis on such topics as Reconstruction, African American thought and experience during the era of segregation, the great Migration and Cultural Renaissance of the 20's and the modern Civil Rights Movement. Required: Two courses in history or consent of instructor.

HIST-330A. U.S. Social History 1607-1865. 3 Hours.

Introduction to the problems of social history, especially social structure, cohesion, conflict and attitudes applied to the development of American sectional societies from the founding of the colonies to the end of the Civil War with special attention to the variety of forms of social organization and the growth of diversity in American culture. Required: Two courses in history or consent of instructor.

HIST-330B. U.S. Social History 1865-Present. 3 Hours.

The social dimensions of nationalization and industrialization, with special emphasis on the decline of geographically defined communities, the rise of communities of interest, rationalization of social structures, and the process of alienation. Required: Two courses in history or consent of instructor.

HIST-331A. Cultural And Intellectual History Of The United States 1607-1865. 3 Hours.

Introduction to the major ideological systems in the colonial and national periods: political and religious philosophy, as well as key individual thinkers. Required: Two courses in history or consent of instructor.

HIST-331B. Cultural And Intellectual History Of The United States 1865 To Present. 3 Hours.

The modern period in intellectual history including social Darwinism, pragmatism and liberalism. Required: Two courses in history or consent of instructor.

HIST-332A. The U.S. In The World, 1776-1914. 3 Hours.

This class examines the close relationship between domestic and foreign policy in American statecraft from the American Revolution up to World War I, addressing many of the social, economic, and ideological impulses that shaped the U.S. as nation-state. The course offers a unique vantage point for tracing the evolution of American society from an agrarian society based on republican values and oriented toward territorial expansion, to an industrial capitalist economy competing with the imperialist Great Powers for global trade and investment outlets at the outset of the 20th century.

HIST-332B. United States Foreign Relations 1914 - Present. 3 Hours.

The United States as a world power, the aftermath of World War I, new relationships with Latin American, Asia and Europe; the United States and the Long Armistice; American involvement in World War II, and the Cold War. Required: Two courses in history or consent of instructor.

HIST-332C. America In The Vietnam Conflict. 3 Hours.

This class focuses on the American involvement in the Vietnam conflict from World War II to the Communist victory in 1975. It will provide a coherent narrative of the conflict from the 1940s when the U.S. began to take an active role in South East Asia. The class will examine the cultural, economic, ideological, political, strategic and military dimensions of the conflict. This broad perspective will explain why the United States eventually embarked on a large scale military campaign in Vietnam by the mid-1960s.

HIST-333. American Ethnic History. 3 Hours.

The role of ethnicity in the development of American history, with special emphasis on the era of industrialization and urbanization including all major ethnic and racial groups, Blacks, American Indians, Hispanics and western and eastern Europeans with attention to the social and cultural experience of slavery, immigration, alienation, social mobility, acculturation and assimilation, politics and discrimination. Required: Two courses in history or consent of instructor.

HIST-334. History Of American Sports. 3 Hours.

The rise of organized sports from its simple pre-modern origins to its present complex state; the evolution of major amateur and professional sports in relation to prevailing historical developments, emphasizing the impact of industrial capitalism and urbanization with attention to the role of ethnic and racial groups, social classes, gambling, gender, politics, international relations and social mobility. Required: Two courses in history or consent of instructor.

HIST-335. History Of Crime And Violence In America. 3 Hours.

Survey of the historic patterns of crime and violence and the evolution of the criminal justice system in the United States from the colonial era to the present day. Required: Two courses in history or consent of instructor.

HIST-336. Work, Money, And Shopping: The History Of Capitalism. 3 Hours.

This course examines the development of capitalism from the eighteenth century until the present. Using sources from history, economics, and political theory, students will explore how capitalist labor, money and finance, and distribution of goods shape our social and political life and intersect with race and gender.

HIST-337. History Of The South 1877 To The Present. 3 Hours.

Intensive study of the politics of the South after Reconstruction; the emergence of the industrial South; the Black's place in this new situation, and the rise of segregation at the turn of the century with particular attention to the problem of the Black American and the value system of the South in light of civil rights consideration. Required: Two courses in history or consent of instructor.

HIST-338. Women In American History. 3 Hours.

Survey, from colonial times to the present, of the role of woman in America including women's reform movements. Required: Two courses in history or consent of instructor.

HIST-339A. Sexuality And Intimacy In America. 3 Hours.

This course studies the political and social histories of sexuality and private life in American contexts, especially what these histories reveal of the workings of power. Topics will include the history of same-sex love, the sexual revolutions and counterrevolutions of the twentieth century, struggles over reproductive rights, changing perceptions of marriage, and the development of homosexual identity politics.

Prerequisite: and.

HIST-340. History Of U.S. Economic Institutions. 3 Hours.

Historical changes from regional markets to national and multinational markets and responses in business institutions, land policies and agriculture; organizations for trade and commerce and for workers; impact of pacesetting industries. Required: Two courses in history or consent of instructor.

HIST-341. Issues In 20th Century Business History. 3 Hours.

Topics in the history of organizational changes in the workplace and the corporation; the relationship between government and business; the non-profit sector and philanthropy; the business of mass media. Required: Two courses in history or consent of instructor.

HIST-342. The City In American History. 3 Hours.

General survey of urban America with emphasis on various topics such as the changing function and character of cities, immigration, reform, and urban planning. Required: Two courses in history or consent of instructor.

HIST-343. Science, Magic, And Religion In History. 3 Hours.

Where does knowledge come from? What authorities do we trust to provide accurate information about human nature, the natural world, or the mysteries of the universe? This course investigates three ways of knowing (or epistemologies) in European and U.S. history: science, magic, and religion. Science has become an important source of knowledge since the Renaissance, while magic and religion lost much authority they once held. However, the relationship between all three ways of knowing has been complex and interdependent into the present day. This course takes a historical approach combined with religious and gender studies, anthropology, and history of science.

Prerequisite: and.

HIST-344. The History Of Islamic Spain: 711-1492. 3 Hours.

The course addresses Muslim expansion and rule over Iberians, the development of a hybrid political system, cultural interactions, and causes of the demise of the Moors. This course will evaluate the legacy of Muslim rule in Spanish culture in Europe and in the new world.

Prerequisite: and.

HIST-345. Mexican American History. 3 Hours.

An introduction to major themes in the history of Mexicans in America from the colonial era to the present, including discussions of the social, political, and economic conditions Mexicans and Mexican Americans have confronted; examinations of how these conditions differ over time and between regions; and explorations of important issues in contemporary Mexican American history. Surveys a variety of primary and secondary sources from different mediums to offer a better understanding of Mexican-origin populations as immigrants to the United States, internal migrants within the U.S., and settled residents and citizens throughout the nation.

Prerequisite: HIST-111A with a minimum grade of D and HIST-111B with a minimum grade of D and HIST-214 with a minimum grade of D and HIST-215 with a minimum grade of D.

HIST-346. Environmental History. 3 Hours.

This course examines historical relationships between people—and their economic and political institutions—and non-human nature. Through lectures, discussions, and readings of secondary and primary source materials in history, economics, political science, and the natural sciences, students will examine how people of different races and genders have thought about, used, and been shaped by the natural environment over the last three centuries.

Prerequisite: and.

HIST-350. History Of Brazil. 3 Hours.

Survey of the history of Brazil; pre-Columbian roots in the Western Hemisphere, Western Europe's influence, and the present with emphasis on political and economic developments in the last two centuries. Required: Two courses in history or consent of instructor.

HIST-351. Central America And The Caribbean. 3 Hours.

History of Central America and of the major islands of the Caribbean, emphasizing the period since independence and the relation with the United States. Required: Two courses in history or consent of instructor.

HIST-353. History Of Mexico. 3 Hours.

Early Indian civilization; colonial and national periods with emphasis on race relations, the class structure, the church, latifundia, intellectual life, the revolution and the impact of industrialization in the twentieth century. Required: Two courses in history or consent of instructor.

HIST-354. Contemporary Latin America. 3 Hours.

A survey of twentieth century political events and socio-economic factors that have shaped Latin America, beginning with the U.S. intervention in the Spanish-American War to the Age of Privatization. Required: Two courses in history or consent of instructor.

HIST-355. History Of Food And Drink. 3 Hours.

This course explores scholarly approaches to food in a global context. It takes an interdisciplinary approach and draws from fields outside of history to examine the significance of food in a variety of cultural and temporal settings. The last segment of the course focuses on the problems associated with the contemporary industrialized food system.

Prerequisite: and.

HIST-356. History Of Revolutionary Movements In Modern Latin America. 3 Hours.

An examination of the origins and processes of revolutionary movements in Latin America since WWII, focusing on Guatemala, Cuba, El Salvador, Peru, Nicaragua, Chile, Colombia, and Mexico. The course looks at the domestic and international factors that have led to revolutionary crises in Latin America and addresses the role of U.S. intervention in the region.

Requirement: Undergraduate students- two courses in history or consent of instructor; Graduate students- Admission to graduate program and consent of instructor.

HIST-359. Museum Studies. 3 Hours.

This course takes a multi-disciplinary approach to the study of museums, cultural heritage institutions, and natural history organizations and the contemporary issues and challenges facing them. Students will examine the theory and organization of museums as well as their historical and contemporary role in education, cultural preservation, research, and interpretation. This course will also take a critical look at the role of museums in colonialist endeavors, and how they address social hierarchies, race, gender, and ethnicity. Students will enrich their classroom learning with working visits to a diversity of institutions in the Chicago area. Course is open to all majors.

HIST-360. History Of Pre-Modern China. 3 Hours.

Introduction to the civilizations of China; philosophy, political history, religion, literature, art and material culture with emphasis on both the specific data and broad interpretations of Chinese history. Required: Two courses in history or consent of instructor.

HIST-361. Modern Chinese History. 3 Hours.

Modern Chinese history; institutional and intellectual changes and developments brought about in China by modernization, rebellion, revolution and war. Required: Two courses in history or consent of instructor.

HIST-362. History Of Japan To 1850. 3 Hours.

The development of Japan from its prehistory until the mid-nineteenth century emphasizing the data of Japanese history and the major paradigmatic approaches to its study. Required: Two courses in history or consent of instructor.

HIST-363. History Of Japan Since 1850. 3 Hours.

History of Japan from the mid-nineteenth century, including Japan's opening to the West; the Meiji Restoration, industrialization, constitutional government, imperialism, World War II, the American Occupation and postwar economic, political and cultural developments. Required: Two courses in history or consent of instructor.

HIST-365. The History Of Women And Gender In Muslim Societies. 3 Hours.

The course addresses the situation of women in Islamic societies, and the challenges and obstacles to female inclusion in civil society. The economic and social impact of gendering will be considered, and how regional variations inform gender expression. The nature and influence of native and western-inspired feminist movements will be assessed.

HIST-366. War And Revolution In The Middle East Since 1900. 3 Hours.

The course will examine sources of instability and tension in the Middle East, and how they produced revolution and war. Starting with rebellions against the Ottoman Empire in the early twentieth century, the course will conclude with study of the Arab Spring in the early twenty-first century.

HIST-370. Precolonial Sub-Saharan Africa. 3 Hours.

Historical survey of Sub-Saharan Africa until the early nineteenth century with emphasis on such topics as state formation and traditional African politics, the historical significance of African culture, the influence of Christianity and Islam, the slave trade and other consequences of contact with Europe. Required: Two courses in history or consent of instructor.

HIST-371. Nineteenth And Twentieth Century Africa. 3 Hours.

Critical issues in the history of sub-Saharan Africa during the nineteenth and twentieth centuries such as the historical significance of African culture, the structure and function of traditional political institutions, European imperialism, the administration of colonial rule and consequent socioeconomic change, the impact of the world wars, the growth of African nationalist movements and the achievement of independence. Required: Two courses in history or consent of instructor.

HIST-372. History Of Southern Africa, 1800-Present. 3 Hours.

This course covers the major themes in the history of Southern Africa in the last 200 years. The primary focus is on the lives of Africans and how people shaped their world, especially under the strains of colonialism and apartheid, and in their struggle for independence. Although the country of South Africa will occupy a significant place in the course, important processes like industrialization affected the entire region, and surrounding colonies and countries also will be studied. Required: Two courses in history or consent of instructor.

HIST-373. Women & Gender In African History. 3 Hours.

This course examines the related issues of women and gender in Africa, primarily in the last 200 years. Among the major topics it covers are women's experience in agricultural societies and in urban areas, and their roles as traders, laborers, and political leaders. It will also explore differences among women in Africa, for example in social standing, religion, and ethnicity. Required: Two courses in history or consent of instructor.

HIST-380. History Of Christianity. 3 Hours.

Analytical survey of the institutional, social and cultural origins of Christianity and the development of that religion from the ancient world to the present with attention to the dynamics of the relationships between Christianity and the various cultures in which it has been housed. Required: Two courses in history or consent of instructor.

HIST-381. History Of The Second World War. 3 Hours.

Intensive study of the Second World War, in its global aspects and implication, including post-war developments and the cold war. Required: Two courses in history or consent of instructor.

HIST-382. The World In The Twentieth Century. 3 Hours.

Contemporary world developments, including the causes and consequences of the two world wars, their impact on the non-European world, the rise of World Communism, the break up of the colonial empires, etc. Required: Two courses in history or consent of instructor.

HIST-385. Presenting Public Controversies In History. 1 Hour.

The course explores a particular contemporary public controversy in history. Students identify multiple viewpoints on the controversy and compile materials that illuminate that controversy. Students work with the instructor to present this controversy to a broad public at the university and beyond. The course culminates in a public panel discussion on the controversy.

HIST-391. Contemporary Historical Problems. 3 Hours.

Exploration and analysis of important current political, economic, social and cultural issues. Consult the schedule of Classes for specific topics. Required: Two courses in history or consent of instructor.

HIST-392. Problems In History. 3 Hours.

Exploration and analysis of topics in history; relevant sources and scholarly research. Consult the Schedule of Classes for specific topics. Required: Two courses in history or consent of instructor.

HIST-393. Capstone Seminar In History. 3 Hours.

The objective of the capstone seminar is for History majors to use the skills they have acquired in History 275 and in their 300-level history courses to write a substantial research paper. Students in the capstone seminar will identify primary and secondary sources and use them to write a research paper that engages an important issue of historical interpretation. Course instructors will choose the course content on a specific historical theme.

HIST-394. Historical Tour. 6 Hours.

Study of the history of a given region or country in conjunction with an on-the-spot investigation of historical and cultural sites and landmarks. Required: Two courses in history or consent of instructor.

HIST-395A. Independent Study In History. 3 Hours.

Intensive study in selected subject and periods of history. Independent Studies require the approval of the instructor, department chair and the College Dean. Required: Two courses in history or consent of instructor.

HIST-395B. Independent Study In History. 2 Hours.

(See HIST-395A for description.) Independent Studies require the approval of the instructor, department chair and the College Dean. Required: Two courses in history or consent of instructor.

HIST-395C. Independent Study In History. 1 Hour.

(See HIST-395A for description.) Independent Studies require the approval of the instructor, department chair and the College Dean. Required: Two courses in history or consent of instructor.

HIST-396. Internship I. 3 Hours.

Situates student interns in workplace positions- museums, research organizations, publishers, advertising agencies, government offices, business corporations, etc. - where historical background, analysis and methodology may be put to practical use. Helps students to improve research skills as well as explore career possibilities. Class consists of at least 8 hours per week at the workplace, in addition to periodic meetings with faculty and other students. Independent Studies require the approval of the instructor, department chair and College Dean.

HIST-401. Historiography And Historical Method. 3 Hours.

Historical understanding; philosophies of history and methods of historical research.

HIST-410. Readings In Medieval History. 3 Hours.

Intensive reading and discussion on a selected topic in Medieval history, such as the Medieval family, church and state, economic organization, the growth of universities, peasant society or feudal society. Consult the Schedule of Classes for the specific topic.

HIST-411. Readings In Early Modern Europe. 3 Hours.

Intensive readings and discussions of aspects of European history during the early modern period.

HIST-412. Readings In English History To 1688. 3 Hours.

Topics in British history until the Glorious Revolution. Consult the Schedule of Classes for specific hours.

HIST-414. Readings In Modern English History. 3 Hours.

Intensive readings and discussion on aspects of the history of Modern England. Consult the Schedule of Classes for specific topics.

HIST-415. Readings In 19th Century Europe. 3 Hours.

Intensive readings and discussion on aspects on nineteenth century European history. Consult the Schedule of Classes for specific topics.

HIST-416. Readings In 20th Century Europe. 3 Hours.

Intensive readings and discussion on aspects of twentieth century European history. Consult the Schedule of Classes for specific topics.

HIST-417. Readings In The History Of Weimar And Nazi Germany. 3 Hours.

Intensive readings and discussion on aspects of Weimar and Nazi Germany.

HIST-420. Seminar In Early Modern Europe. 3 Hours.

Research on various topics in the history of early Modern Europe. A paper based on primary sources is required.

HIST-421. Seminar In English History. 3 Hours.

HIST-422. Seminar In 19th Century Europe. 3 Hours.

Research on various topics in English history. A paper based on primary sources is required.

HIST-423. Seminar In Modern European Society. 3 Hours.

Research on various topics in the modern history of Europe. A paper based on primary sources is required.

Prerequisite: HIST-401 with a minimum grade of C.

HIST-424. Seminar In Impact Of War/Revolution In Europe. 3 Hours.

Research on various topics related to war, revolution and their consequences for European history. A paper based on primary sources is required.

HIST-430. Readings In Colonial America. 3 Hours.

Intensive readings and discussion on aspects of Colonial American history.

HIST-431. Readings In The American Revolution. 3 Hours.

Intensive readings and discussion on aspects of the American Revolution.

HIST-432. Readings In Early National America. 3 Hours.

Intensive readings and discussion on aspects of the Early National Period.

HIST-433. Readings In 19th Century America. 3 Hours.

Intensive readings and discussion on aspects of nineteenth century American history.

HIST-434. Readings In 20th Century America. 3 Hours.

Intensive readings and discussion on aspects of twentieth century America. Consult the Schedule of Classes for specific topics.

HIST-435. Readings In Cultural And Intellectual U.S. History. 3 Hours.

Intensive readings and discussion on aspects of American cultural and intellectual history. Consult the Schedule of Classes for specific topics.

HIST-436. Readings In Women's History Of The United States. 3 Hours.

Intensive readings and discussions of American Women's history. Consult the Schedule of Classes for specific topics.

HIST-437. Readings In Afro-American History. 3 Hours.

Intensive readings and discussion on aspects of Afro-American history. Consult the Schedule of Classes for specific topics.

HIST-439. Readings In American Social History. 3 Hours.

Intensive readings and discussion on aspects of American social history. Consult the Schedule of Classes for specific topics.

HIST-440. Seminar In Colonial America. 3 Hours.

Research on various topics in Colonial American history. A paper based on primary sources is required.

HIST-441. Seminar In The American Revolution. 3 Hours.

Research on various topics in the American Revolution. A paper based on primary sources is required.

HIST-442. Seminar In Early National America. 3 Hours.

Research on various topics in the Early National Period. A paper based on primary sources is required.

Prerequisite: HIST-401 with a minimum grade of C.

HIST-443. Seminar In 19th Century America. 3 Hours.

Research on various topics in nineteenth century America. A paper based on primary sources is required.

HIST-444. Seminar In 20th Century America. 3 Hours.

Research on various topics in twentieth century America. A paper based on primary sources is required.

Prerequisite: HIST-401 with a minimum grade of C.

HIST-445. Seminar In Cultural And Intellectual U.S. History. 3 Hours.

Research on various topics in American cultural and intellectual history. A paper based on primary sources is required.

HIST-446. Seminar In Women's History Of The U.S.. 3 Hours.

Research on various topics in the history of American women. A paper based on primary sources is required.

HIST-447. Seminar In Afro-American History. 3 Hours.

Research on various in Afro-American history. A paper based on primary sources is required.

HIST-449. Seminar In American Social History. 3 Hours.

Research on various topics in American social history. A paper based on primary sources is required.

HIST-450. Readings In Colonial Latin America. 3 Hours.

Intensive readings and discussion on aspects of colonial Latin America to 1825.

HIST-451. Readings In Modern Latin American History. 3 Hours.

Intensive readings and discussion on aspects of Modern Latin America, since 1825.

HIST-452. Seminar In Latin American History. 3 Hours.

Research on various topics in the history of Latin America. A paper based on primary sources is required.

HIST-453. Seminar In The History Of Mexico. 3 Hours.

Research on various topics in the history of Mexico. A paper based on primary sources is required.

HIST-460. Readings In Modern Japanese History. 3 Hours.

Intensive readings and discussion on the development of the modern Japanese state and society since the nineteenth century.

HIST-461. Readings In Classical Chinese History. 3 Hours.

Intensive readings and discussion Chinese history from the Archaic Shang period (c. 1200 B.C.) through the seventeenth century.

HIST-463. Readings In Modern Chinese Social History. 3 Hours.

Intensive readings and discussion on various aspects of modern Chinese history from the nineteenth century to the present.

HIST-470. Graduate Readings In African History. 3 Hours.

This course is designed to provide the graduate students in history an introduction to the field of African history. Students will explore issues of sources and approaches which make African history distinct from other fields. Students will trace the development of African History in the last few decades, examine some of the major subjects and study the most recent works to see where the field is headed.

HIST-471. Seminar In African History. 3 Hours.

Prerequisite: HIST-401 with a minimum grade of C and HIST-470 with a minimum grade of C.

HIST-480. Readings In History. 3 Hours.

Exploration and analysis of topics in history. Consult the Schedule of Classes for specific topics.

HIST-480A. Readings In History: Race, Ethnicity & Nationalism. 3 Hours.

Exploration and analysis of topics in history. Consult the Schedule of Classes for specific topics.

HIST-490. Independent Graduate Study In History. 3 Hours.

Intensive and guided study in selected subjects and periods of history. Independent Studies require the approval of the instructor, department chair and the appropriate College Dean.

HIST-496. Internship. 3 Hours.

Situates student interns in workplace positions- museums, research organizations, publishers, advertising agencies, government offices, business corporations, etc. - where historical background, analysis, and methodology may be put to practical use. Helps students to improve research skills as well as explore career possibilities. Class consists of at least 15 hours per week at the workplace, in addition to periodic meetings with faculty and other students. Independent Studies require the approval of the instructor, department chair, and appropriate College Dean.

HIST-5901. Thesis Hours. 1 Hour.

Guidance of students conducting research and writing a thesis to fulfill requirements for the Master of arts degree in History. Independent Studies require the approval of the instructor, department chair and the appropriate College Dean.

HIST-5902. Thesis Hours. 2 Hours.

See course description for HIST-5901.

HIST-5903. Thesis Hours. 3 Hours.

See course description for HIST-5901.

Major in History

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in History for the Bachelor of Arts Degree

Code	Title	Hours
Required Courses		
HIST-111A	World History: The Origins Of The West, To 1500	3
HIST-111B	World History: The West And The World, 1500-Present	3
HIST-214	United States History 1607-1877	3
HIST-215	United States History 1877-Present	3
HIST-275	Writing Intensive Program: Writing And Methods For Majors ¹	3
or HIST-300W	Writing Intensive Program: The Historian's Craft	3
One course in non-European and non-United States History at the 100-level: 111C, 111D, 111E, or 111F.		3
Six courses chosen from 300-level electives in history with the approval of an advisor. One of these must be in non-European, non-United States History.		18
HIST-393	Capstone Seminar In History	3
or HIST-396	Internship I	3
Total Hours		39

¹ This course must be taken as soon as possible after the declaration of the History major.

Students should also be aware of the University requirements for the Bachelor's degree.

Students wishing to be licensed for teaching history in secondary schools should consult the Secondary Education section of this catalog and the Secondary Education advisor in the Goodwin College of Education. Students seeking licensure to teach United States history are required to complete 8 semester hours in U.S. history.

All history majors are required to establish an Assessment Portfolio with the Departmental secretary before graduation. The purpose of this portfolio is solely to assess the effectiveness of the history curriculum in meeting the goals of the major. The portfolio will consist of either one research paper of at least 10 pages in length, or three theme papers of 3-5 pages in length (book reviews are not acceptable). The paper(s) must have been written for course work in history at Northeastern. Although student papers will not be graded and will only be assessed for statistical purposes, students are nonetheless encouraged to submit their best work for evaluation. STUDENTS ARE THEREFORE ADVISED TO KEEP COPIES OF ALL APPROPRIATE HISTORY PAPERS (or they may deposit copies of their papers with the departmental secretary at the time such papers are handed back by their instructors).

*Please consult your History Department advisor or the Department Chair before registering for HIST 396.

This sample curricular map is provided to guide you in the planning of your progression for this major. This guide should not replace regular consultations with your program advisor. For specific recommendations of courses not identified, please consult your program advisor.

Master of Arts in History

Master of Arts in History

REQUIREMENTS FOR ADMISSION TO THE PROGRAM:

Applicants must fulfill the general requirements for admission to the Graduate College. In addition, they must have completed a minimum of 15 credit hours in undergraduate history, including 9 credits in upper-level history courses. (Those who do not meet this requirement may petition the Department's Graduate Advisor in writing for admission.) Applicants must also submit to the Graduate Advisor a graded paper written for an upper division, undergraduate course, preferably in history. (Those who cannot meet this requirement may also petition the Graduate Advisor in writing for admission.) The Department recommends prospective applicants meet with the Graduate Advisor for assistance in planning their graduate program.

Requirements for the Degree:

For students admitted to Master's Programs for the Fall 1997 semester and thereafter, all graduate credits must be at the 400 level, except for a limited number of 300 level courses specifically approved for graduate degree credits in a given Master's degree program. Departments may permit students to apply up to three of these 300 level courses, to a maximum of ten credit hours, to fulfill program requirements. This policy applies to all students entering graduate degree programs beginning with Fall 1997. **Consult with your program advisor or the Graduate College for details.**

Students have the choice between two options.

Thesis Option

Code	Title	Hours
Required Courses		
HIST-401	Historiography And Historical Method	3
Select six graduate-level history electives (2 may be in related fields) chosen in consultation with the Graduate Advisor		18
Select two graduate research seminars		6
Thesis Hours - a total of six hours from 5901, 5902, 5903		6
Total Hours		33

NOTE: Students must pass an oral examination on their thesis.

Non-Thesis Option

Code	Title	Hours
HIST-401	Historiography And Historical Method	3
Select six graduate-level history electives chosen in consultation with the graduate advisor		18
Select two electives in history or another relevant field chosen in consultation with the graduate advisor		6
Select two graduate research seminars		6
Total Hours		33

Minor in History

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in History (18 credit hours)

Six history courses (18 credit hours) of which a minimum of nine credit hours must be earned at the 300-level, chosen in consultation with a departmental advisor.

Students in the Elementary Education and Early Childhood Education programs who have selected this minor must complete a minimum of 9 hours at the 300-level to meet graduation and certification requirements.

Justice Studies

In Justice Studies, we seek to discover the social and historical roots of justice and injustice and examine how popular understandings of these shape public policies, including those of the criminal justice system. We study systematic explanations for the failure (or triumph) of justice in society and explore the potential for transformative justice. Through critical inquiry, social science investigation, and experiential learning, students develop an understanding of social and economic justice issues and critical criminology. We study the structural roots of crime and take up the legal and social concerns of socially disenfranchised communities whose members are often clients of the criminal justice system, including the poor, people of color, women, LGBTQ persons, prisoners, immigrants, and refugees.

The program makes a special effort to involve and serve community groups. Field experience, focusing on advocacy for community justice and the ethics that inform those practices, complements the academic program.

The Justice Studies major prepares students for human and social service work, research or advocacy positions, law school or graduate school. Criminal justice practitioners who wish to develop a comprehensive understanding of social justice and social policy will find the program well-suited to their needs.

- Major in Justice Studies (<http://catalog.neiu.edu/arts-sciences/justice-studies/justice-studies/>)
- Minor in Social Justice (<http://catalog.neiu.edu/arts-sciences/justice-studies/minor-social-justice/>)
- Minor in Criminology (<http://catalog.neiu.edu/arts-sciences/justice-studies/minor-criminology/>)
- Minor in Child Advocacy Studies (<http://catalog.neiu.edu/arts-sciences/child-advocacy-studies/>)

Maria E. De La Torre, Ph.D., Associate Professor, Chair

Rachel Birmingham, Ph.D., Associate Professor

J. Adrian Castrejon, Ph.D., Assistant Professor

Nancy Matthews, Ph.D., Professor

Adam Messinger, Ph.D., Associate Professor

JUST-101. Introduction To Social Justice. 3 Hours.

Examines the theme of justice as a foundational goal of all social institutions in a democracy. Introduces students to critically examining social injustices, especially in institutions and social structures. In order to arrive at a vision and practice of justice we will study those "acceptable" injustices through the lens of justice and equality for all.

JUST-109. First Year Experience: Justice In Chicago. 3 Hours.

Using Chicago as a lab, students will experience justice in many forms, from courthouse visits and artistic expressions, to discussions with attorneys, judges, and formerly incarcerated persons. In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the introductory concepts and terminology of the criminal and social justice systems to provide first-year students with an opportunity to critically examine social injustices in institutions and social structures through a critical lens.

JUST-201. Introduction To The Criminal Justice System. 3 Hours.

Overview of police, court and prison practice with attention to class, race and sex discrimination in the criminal justice system. Emphasis on the relationship between crime and key political and economic structures.

JUST-202. Writing Intensive Program: Justice And Inequality. 3 Hours.

This course focuses on the unfair and unequal treatment occurring in contemporary U.S. society based on people's race, gender, sexual orientation, and class. The course analyzes the ways in which race, class, gender, and sexual orientation work as interlocking systems of privilege and disadvantage affecting all of us. The course also focuses on biases and discrimination in the criminal justice system and in the delivery of justice. Discussions will also identify strategies for reducing injustice. This course fulfills the Writing Intensive Program (WIP) graduation requirement for Justice Studies majors.

Prerequisite: JUST-101 with a minimum grade of C and ENGL-101 with a minimum grade of C.

JUST-301. Theories Of Justice And Social Change. 3 Hours.

Explores general theories of social change, such as social evolutionism and historical materialism and the relationship between social change and the pursuit of justice. The starting point is unjust social structures and processes, leading into analysis of how social change occurs, especially through social movements.

Prerequisite: JUST-101 with a minimum grade of C and JUST-202 with a minimum grade of C.

JUST-305. The Carceral State: A Contemporary System Of Punishment And Control. 3 Hours.

This course extends students' understanding of mass incarceration and the current state of the criminal legal system by introducing a theoretical understanding of the Carceral State as a system of control and punishment. This course examines the Carceral State through an intersectional framework that considers the relationship between punishment and criminalized identities, such as race, ethnicity, nationality, gender, sexuality, class, and ability. The course focuses on prison abolition work as a response to dismantling the Carceral State.

Prerequisite: JUST-313 with a minimum grade of C.

JUST-307. Prisoner Reentry Systems. 3 Hours.

This course examines how the prison reentry system works, the causes of recidivism, and how recidivism rates could be lowered. Students will gain applied knowledge of how the criminal justice system works and of patterns of incarceration and release, as well as trends in prisoner reintegration.

Prerequisite: JUST-313 with a minimum grade of C.

JUST-309. Portrayal Of Crime In Media. 3 Hours.

Analysis of the media's presentation of crime with attention to the historical development of the portrayal of crime and its effect on current public attitudes regarding "crime" and the "criminal." Various forms of the media are individually considered, most notably television, film, and newspaper.

JUST-311. Women, Crime, And The Criminal Justice System. 3 Hours.

This course explores the position of women in society; theories of female criminality; crimes committed by and against women, such as prostitution, rape, physical and psychological abuse, and forced sterilization; the treatment of women by various social and criminal justice agencies.

JUST-312. Theories Of Criminal Behavior. 3 Hours.

Historic overview of theories of crime from the classical school to currently popular viewpoints including Marxist and radical theories with emphasis on the relationship between theory and criminal justice policy formulation.

Prerequisite: JUST-101 with a minimum grade of C or JUST-201 with a minimum grade of C.

JUST-313. Prisons And Jails. 3 Hours.

Study of the historic development of prisons focusing on current practice and emphasizing consequences of expanding the prison population and community based alternatives to incarceration.

JUST-314. Police In The Minority Community. 3 Hours.

Overview of the social, political and economic consequences resulting from historical and contemporary treatment of U.S. minorities by law enforcement personnel with emphasis on the development of policy focusing on police methodology in controlling and creating levels of crime within urban areas. Theoretical and practical issues involving bias, discretion and excessive force.

JUST-316. Crime, Violence And Culture. 3 Hours.

Exploration of interpersonal and structural violence and aspects of culture that promote it. The course considers: the criminalization of some and tolerance of other violence; competing theories of violence; and strategies for reducing and preventing violence.

JUST-317. White Collar Crime & Elite Deviance. 3 Hours.

This course examines the problems of defining crimes of the elite, theories related to white collar crime and elite deviance, and the impact of white collar crime and elite deviance on society and justice. We also examine the impact of social institutions upon white collar crime and elite deviance, reactions to these and the forms of punishment available.

JUST-318. Gangs In Chicago. 3 Hours.

This course provides an analysis of the history of, and theories about, gangs in Chicago. It examines how and why gangs develop, how they are structured, their gradual development, and how societal injustices impact the development of gangs generally, and in Chicago.

JUST-319. Latinos/as & The Criminal Justice System. 3 Hours.

Examines the relationship between Latinos/as and the criminal justice system. Issues addressed are what distinguishes Latinos/as from other racial and ethnic groups in the criminal justice system? What sociological and criminological theories can explain these differences. Key variables that are discussed are historical context, race and ethnic relations, current criminal justice policies.

JUST-321. Violence Against Women. 3 Hours.

Overview of the legal, sociological, psychological and medical aspects of rape, battering and related forms of gendered violence. Explores social and cultural context of violence against women, changing definitions of violence and the criminalization of sexual assault and family violence and response to violence, including the anti-rape and battered women's movements.

JUST-322. Women, Justice And The Law. 3 Hours.

A discussion of justice and its intersection with gender. The course focuses on federal statutes and their interpretation, on sexual harassment and employment and state statutes focusing on family law and criminal law.

JUST-323. Introduction To Child Advocacy Studies. 3 Hours.

This course provides a survey of the emerging field of Child Advocacy Studies, which researches and seeks remedies for the maltreatment of children and youth, including specific acts of violence and neglect, in the context of the pernicious effects of racism, poverty, sexism, and heterosexism, including the unique problems faced by immigrant and displaced children. The course examines the various economic, political, social and cultural circumstances that may contribute to the abuse and maltreatment of children and youth. It also teaches students about the strategies and tactics used by various local governmental and nongovernmental agencies, courts and medical establishments to address these problems.

JUST-324. Women As Political Prisoners. 3 Hours.

This course examines the three areas in which women can be defined as political prisoners: 1) women imprisoned for political acts; 2) women imprisoned for self-defense measures; 3) women imprisoned for petty 'economic' crimes such as prostitution.

JUST-325. Women And Revolution: Theories Of Justice. 3 Hours.

Theories of justice informing revolutionary practice with attention to the role played by women in revolution, especially in liberation struggles in Central America.

JUST-326. Juvenile Justice System. 3 Hours.

Socio-economic analysis of the history of the juvenile justice system in an effort to understand how the system functions and whom it serves.

JUST-328. Social Justice & LGBTQ Issues. 3 Hours.

This course explores lesbian, gay, bisexual, transgender and queer social justice issues. Students will study LGBTQ issues and theories in the context of both historic and contemporary social justice practices. This will include an examination of race, class, gender, and ethnicity in LGBTQ communities, along with a discussion of legal, social, and political steps taken and contemplated to end the oppression of LGBTQ people.

JUST-329. Politics Of Punishment. 3 Hours.

Exploration, from a global perspective, of the history, development and philosophies of punishment and of the debate within the United States and the countries of Western Europe over the purpose of correctional institutions.

JUST-330. Legal Research And Bibliography In Criminal Law. 3 Hours.

Study of basic reference and source materials. Visits to law libraries are required. Presentation of a written and oral argument.

Prerequisite: JUST-201 with a minimum grade of C and JUST-202 with a minimum grade of C and ENGL-101 with a minimum grade of C.

JUST-331. Law And Racism In America. 3 Hours.

The nature of racism, its essential features and their relationship to the legal, social and economic practices in the United States.

JUST-332. Race & Ethnic Relations. 3 Hours.

Course provides critical examination of the social construction of race focusing on how ethnicity, ancestry and phenotype are used historically to separate people. Students explore concepts, theoretical perspectives, and research patterns of cooperation and conflict between different racial and ethnic groups. Sources of prejudice, discrimination, power relations and stratification are discussed. Students examine contemporary problems and issues in the area of racial and ethnic relations and global justice.

Prerequisite: JUST-101 with a minimum grade of C and JUST-202 with a minimum grade of C.

JUST-333. Community Law. 3 Hours.

General introduction to the impact of law on the public: consumer law, family law and individual rights.

JUST-334. Criminal Law And Procedure. 3 Hours.

The basic principles of American criminal law, current issues and controversies surrounding the criminal justice process, and the constitutional rights of the accused.

JUST-335. Legal Process I. 3 Hours.

Analysis of common law and the role of precedent with emphasis on appellate courts, particularly the U.S. Supreme Court.

JUST-336. Postmodern Law & Criminology. 3 Hours.

This course will introduce the core concepts of postmodern analysis and their application to law, criminology and social justice. It will be a challenge to modernist thought that has dominated the social sciences whose basic assumptions evolved from the Renaissance period. Discourse analysis and chaos theory along with other emerging perspectives will be explicated. Causation, the subject, objectivity, order, linearity, neutrality of language, rationality, universals, among others, will be re-thought via postmodern analysis.

JUST-337. Workers' Rights Clinic. 3 Hours.

The Workers' Rights Clinic will critically examine theoretical, legal and practical aspects of workers' rights and acknowledges the dynamics of the employer-employee power relationship. Readings and classroom activity will ground students in doctrinal aspects of workers rights and the laws governing employment relationships. Students will attend and observe court and administrative and worker related legal cases such as employment termination, discrimination and wage litigation pending in state and federal courts and/or federal, state and municipal administrative agencies. Students will observe courtroom proceedings, examine court papers, and engage with lawyers, judges, court personnel, workers and clients.

JUST-338. Introduction To Human Rights. 3 Hours.

This course provides an introductory overview to human rights. Human rights are examined from several different points of view: as a legal and moral discourse in which justice claims are expressed; as an international regime consisting of many different treaties, legal bodies, United Nations agencies and non-profit organizations which seek to prevent, investigate, and punish human rights violations; as a global social movement that promotes minimum universal standards of human dignity and respect; as a contested philosophical concept that is compared and contrasted with other types of moral claims; and as an increasingly important strategy being used by various communities in the United States to overcome many different types of social injustice. The main human rights organizations and their methods of working will be explained. Each student will also get an opportunity to research one human rights issue in depth.

JUST-339. Tenant's Rights Clinic. 3 Hours.

Under the supervision of a licensed attorney, students study issues relating to landlord/tenant disputes and conflicts. Students are trained to define and negotiate such problems.

JUST-340. Sociology Of Law. 3 Hours.

This course concerns the development of law in society. We cover: historical development of law; functions of law; the connection between political economy and law; various perspectives in studying law; classical thinkers; current and emerging thought; the emergence of lawyers and their language and form of reasoning; the emergence of legal rights and the legal subject; substantive biases of law (gender, race, class, intersectional); how "realities" are constructed in the courtroom; and freedom and coercion in law.

JUST-343. Conflict Transformation. 3 Hours.

Conflict is part of human daily experience. When properly managed, it can lead to awareness, growth, and better human relationships. However, when misdiagnosed and mismanaged, it can sour things and destroy relationships. It also leads to intra and interpersonal, intra- and inter-group/organizational violence, as well as large scale intra-state and international violence. This course explores the connection between justice, peace, and conflict by seeking to understand social conflict and the mechanisms used in its transformation. We begin by examining the theories of conflict analysis and resolution and conclude by exploring methods and best practices.

JUST-345. Practicum In Justice Studies. 3 Hours.

Specific skills necessary for entry level agency/community work.

Prerequisite: JUST-202 with a minimum grade of C and JUST-101 with a minimum grade of C and JUST-241 with a minimum grade of C and JUST-301 with a minimum grade of C.

JUST-346. Introduction To Oral History For Communities. 3 Hours.

This course introduces students to oral history, a practice that has expanded to many disciplines for its ability to providing information on aspects of life missing from documentary sources and offering different perspectives on historical events and processes. Notably, oral history is used in recovering the experiences of ordinary people. Students will gain knowledge and skills for engaging people in communities in telling their own stories. Students will learn the principles of oral history methodology by analyzing theoretical, ethical, and practical challenges interviewers and researchers face. Students will also learn basic skills on interviewing, transcribing, and abstracting oral histories.

Prerequisite: JUST-241 with a minimum grade of C or LLAS-290 with a minimum grade of C.

JUST-347. Restorative Justice Theories And Practices. 3 Hours.

Restorative Justice (RJ) is one of several umbrella concepts gaining in prominence in the Justice Studies arena. It refers to philosophical strategies and diverse practices to resolve conflicts in a way that is less litigious than traditional, adversarial legal proceedings. This course will introduce students to the origins, theories, controversies and practices of restorative justice—both past and present—as an alternative response to harm. It will also interrogate such questions as: When is it appropriate to forgive rather than to punish? What is entailed in coming to forgiveness, both for the perpetrator and the victim? Students will come to understand the meaning of restorative processes by examining the ways in which they are practiced around the world.

JUST-348. Research Methods In Justice Studies. 3 Hours.

This course introduces majors to quantitative and qualitative research methods used in the social sciences with a focus on Justice Studies issues. Students develop analytical skills through learning how researchers construct and use data to answer questions about human behavior, beliefs, and institutions.

Prerequisite: (JUST-101 with a minimum grade of C or JUST-201 with a minimum grade of C) and MATH-090 with a minimum grade of C.

JUST-350. Field Work Seminar. 6 Hours.

Application of the specific skills learned in the practicum, as well as other classroom theories and concepts, in an agency/ community setting. 180 volunteer hours at work in the field and a 1 1/2 hour weekly seminar.

Prerequisite: JUST-345 with a minimum grade of D.

JUST-351. Advocating For Social Justice In Illinois. 3 Hours.

This course provides students with a practical introduction to advocating for social justice in Illinois. It is taught from the perspective of marginalized communities that historically have been significantly less able to influence elected officials by donating large sums of money. However, these communities have been able to impact public education, legislation and policy formation/implementation through strategic injections of expertise, organizing, smart coalition building, access to media, litigation, direct action and other techniques. The course will include analyses of such issues as: the legislative process at the local and state levels, an introduction to the players; how to follow the money; the types of power such communities are up against in Chicago and suburbia; strategies to access media and produce a coherent message; the necessity of and methods to reframe and label issues; and the use of organizing, coalition-building, direct action, the courts, initiatives and referendum.

Prerequisite: JUST-101 with a minimum grade of C and JUST-202 with a minimum grade of C.

JUST-352. Economic Justice. 3 Hours.

In this course students will analyze economic issues and related inequalities in the context of theories of social justice. Students will learn causes of such injustices and practical strategies to reduce them.

JUST-355. LGBTQ Communities & Crime. 3 Hours.

Research indicates that lesbian, gay, bisexual, trans, and queer (LGBTQ) identities are stigmatized and even criminalized in many nations, LGBTQ individuals are at a heightened risk of crime victimization and face barriers to receiving help, and heterosexism and transphobia play integral roles in the perpetration of crime by LGBTQ individuals as well as in how criminal justice systems respond to them. By applying social justice and criminological lenses, students in this course will explore the nature of and potential resolutions to crime related to LGBTQ people, both in the United States and globally.

JUST-357. Social Justice, Mental Health, And The Law. 3 Hours.

Though one of six Americans suffers from some form of mental illness, there has been little progress in the last fifty years in our protection and treatment of patients who suffer from mental illness. In this course, students will learn about the laws, rights, and treatment of mental illness. They will explore the definitions of mental illness and the stigma and discrimination which ensues for those who are labeled. Students will also examine the arbitrariness of labels and diagnosis in the mental health system, and the devastating impact that this labeling can have on patients and their families.

JUST-361. Five-Hundreds Years Of Resistance. 3 Hours.

This course is a basic study of the over 500-year history of colonization imposed by Europeans and Euro-Americans. It also examines indigenous resistance to colonization and globalization. In this course, critical thinking and reasoning are introduced through the evaluation of historical developments, key contributors, and principle issues of resistance and revolutionary theory.

Prerequisite: JUST-202 with a minimum grade of C.

JUST-362. Justice Issues In Africa. 3 Hours.

Having lived/living through probing explorers, colonists, imperialists, and natural resources hunters, Africa has also attracted good intentioned development and international collaboration. Even though independence gained from Western nations has improved self-determination in some of its 53 countries, the struggle for justice continues to dominate many political and social activities. This course examines factors that generate inequalities in South Africa; conflict, race, class, ethnic, gender violence, post-apartheid dynamics, neoliberal politics, access, housing, the environment, and exploitation issues in the light of global democracy and social justice.

Prerequisite: JUST-101 with a minimum grade of C.

JUST-363. Globalization And The Pursuit Of Justice. 3 Hours.

We live in a world interconnected through economics, politics, communications, entertainment and migration. This course explores the emergence of globalization in its contemporary form, and its implications for the lives of everyday people in the global north and south, east and west. Through case studies, we will examine how globalization affects movements for democracy and justice, and vice versa.

Prerequisite: JUST-101 with a minimum grade of C.

JUST-364. Terrorism In Media & Law. 3 Hours.

Whether used by governments, militaries, corporations, religious institutions, gangs or individuals, terror is an intense overpowering fear caused by the threat and use of violence. This course examines five categories of terrorism. One case study explores how the US responded to 9/11 by framing a long term "War of Terror." Students will learn how to analyze the constantly changing images, propaganda, and tropes manufactured by media to know how to distinguish between terrorists, and those who use violence to defend themselves from aggression and invasion. Also covered are how terrorism is addressed in law; how terrorism impacts institutions/practices; causes of terrorism; ways to prevent/stop terrorism.

Prerequisite: JUST-101 with a minimum grade of C and JUST-202 with a minimum grade of C.

JUST-370. Immigration In Global Perspective. 3 Hours.

This course looks at contemporary international population movements and state policies in highly developed countries through the prism of social justice. The course provides an overview of the major theories explaining the nature, causes and consequences of migration including key dimensions such as control policies, integration, security, and citizenship. The course also analyzes current public conversations debating unauthorized immigration, assimilation, and membership and belonging. Through readings, lectures, videos and newspaper articles the course offers students tools for a critical understanding of migration by addressing questions of justice such as the rights of people to mobility, to work, to equality and to inclusion.

JUST-371. U.S. Immigration Policy & Human Rights In The Americas. 3 Hours.

Historical overview of United States' relations with the Americas as these structure economic and security interests in the region and influence regime change, human rights violations, and immigrant and refugee flows. Analysis of contrasting U.S. immigration and refugee policies.

JUST-382. Social Justice & Literature. 3 Hours.

Writers and artists often reflect and inspire major social realignments and radical shifts in the social structure. They have a unique lens with which to focus on society and institutions of power. This course explores the work of several writers and filmmakers to understand how their works mirrored and ignited aspects of social justice. It analyzes how artistic works serve as social critique to enable or inspire social protest and change. The course traces the author's/filmmaker's point of view in each work studied, and examines how they developed their central themes through plot and character.

JUST-383. Social Justice And The Visual Arts. 3 Hours.

Visual artists are important critics of institutions of power and social inequality. Through an exploration of visual media, students will gain insights into issues of power and social inequality based on gender, class, race and sexual orientation. Students will analyze visual media and images utilizing social justice theories, and compare and contrast different visual media to consider their relevance to social change.

Prerequisite: JUST-101 with a minimum grade of C.

JUST-390. Social Justice And The Environment. 3 Hours.

This course is a comprehensive overview of the connections between environmental justice, social justice, and animal ethics. The topics will be viewed from the following perspectives: 1) Justice and Sustainability; 2) Poverty, Economic Development and Environmental Justice; 3) Eco-Feminist Perspectives on Environmental Justice; 4) Native American Perspectives 5) Animal Ethics and the Relationship to Environmental Justice; and 6) Environmental Law.

JUST-391. Independent Study In Social Justice. 1 Hour.

This course provides a student with the opportunity to undertake an individualized investigation into a topic of the student's choice, under the personalized supervision of a Justice Studies faculty member. The student must fill out the Justice Studies' department's Independent Study form and get the project approved two weeks before the semester begins. Justice Studies major with GPA of 3.0 or above. Approval of instructor, Chair and College Dean required.

Prerequisite: JUST-241 with a minimum grade of C.

JUST-392. Independent Study In Social Justice. 2 Hours.

This course provides a student with the opportunity to undertake an individualized investigation into a topic of the student's choice, under the personalized supervision of a Justice Studies faculty member. The topic cannot duplicate what is taught in a regularly offered course. The student must fill out the Justice Studies' department's Independent Study form and get the project approved two weeks before the semester begins. Justice Studies major with GPA of 3.0 or above. Approval of instructor, Chair and College Dean required.

Prerequisite: JUST-241 with a minimum grade of C.

JUST-393. Independent Study In Social Justice. 3 Hours.

This course provides a student with the opportunity to undertake an individualized investigation into a topic of the student's choice, under the personalized supervision of a Justice Studies faculty member. The topic cannot duplicate what is taught in a regularly offered course. The student must fill out the Justice Studies' department's Independent Study form and get the project approved two weeks before the semester begins. Justice Studies major with GPA of 3.0 or above. Approval of instructor, Chair and College Dean required.

Prerequisite: JUST-241 with a minimum grade of C.

JUST-395. Hunger & Homelessness. 3 Hours.

This class focuses on the lives of people who are underfed, homeless or in precarious housing. Examined are paths to poverty and how poverty is lived in America. Also explored are the structural barriers that prevent one from leaving poverty. These issues are looked at from a variety of perspectives that are introduced through readings, service learning, and guest speakers. One of the perspectives from which hunger and homeless is explored is from the point of view of advocacy: i.e., how can one advocate for homeless people? What assumptions underlie such advocacy?.

Major in Justice Studies

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Justice Studies for the Bachelor of Arts Degree

All Justice Studies majors take six required courses plus eighteen credit hours of electives. Please consult your advisor about the sequence of courses. All students must take a writing-in-the-discipline, "WIP" class. JUST-202 fulfills this requirement.

Code	Title	Hours
Required Courses		
JUST-101	Introduction To Social Justice	3
JUST-202	Writing Intensive Program:Justice And Inequality	3
JUST-301	Theories Of Justice And Social Change	3
JUST-348	Research Methods In Justice Studies	3
Electives (six additional courses in Justice Studies)		18
JUST-345	Practicum In Justice Studies	3
JUST-350	Field Work Seminar	6
Total Hours		39

NOTE: A maximum of nine (9) transfer credit hours in Justice Studies-, Criminal Justice-, or Criminology-oriented courses can be transferred in from other colleges and/or universities toward the major, subject to the approval of a faculty advisor. These courses will usually be counted as electives. All electives in Justice Studies should be selected in consultation with a faculty advisor and chosen in an area of concentration related to the student's academic and career interests.

JUST-339 Tenant's Rights Clinic, JUST-395 Hunger & Homelessness, and JUST-337 Workers' Rights & Human Rights, meet the University Core Curriculum requirements for Boundary Crossing Experiential Learning Experience (ELE-X) classes, and can be taken by all NEIU students, including Justice Studies majors. JUST-350 Field Work Seminar is an ELE class offered only to Justice Studies majors.

These are new courses that meet the requirement for the **Experiential Learning Experience Boundary Crossing** courses (ELE-X):

- JUST 321 Violence against Women
- JUST 347 Restorative Justice
- JUST 355 LGBTQ Communities & Crime

This sample curricular map is provided to guide you in the planning of your progression for this major. This guide should not replace regular consultations with your program advisor. For specific recommendations of courses not identified, please consult your program advisor.

Latina/o and Latin American Studies

The Latina/o and Latin American Studies (LLAS) Program of Northeastern Illinois University provides academic and experiential opportunities to foster a comprehensive understanding of Latino, Latin American and Caribbean peoples and their relationship to each other, the United States, and the world. The program builds on the University's commitment to diversity and community partnerships as it promotes pride in the values of diverse ethnic heritages. Through the coordination of diverse offerings of various departments, the program fosters an interdisciplinary approach to provide students with concepts and skills to interact effectively and constructively in a multicultural context.

Maria E. De La Torre, Ph.D., Associate Professor, Justice Studies

Emily Garcia, Ph.D., Associate Professor, English

Francisco X. Gaytan, Ph.D., Associate Professor, Literacy, Leadership and Development

Richard Grossman, Instructor, History

Jon B. Hageman, Ph.D., Professor, Anthropology

Timothy Libretti, Ph.D., Professor, English

Juan R. Martínez, Ph.D., Assistant Professor, Sociology

Ana Nieves, Ph.D., Associate Professor, Art

Victor Ortiz, Ph.D., Associate Professor, Latina/o and Latin American Studies

Isaura Pulido, Ph.D., Associate Professor, Educational Inquiry and Curriculum Studies

Patricio Rizzo-Vast, Instructor, World Languages and Cultures

Brett C. Stockdill, Ph.D., Professor, Sociology

Sarah M. West, Ph.D., Assistant Professor, World Languages and Cultures

LLAS-101. Introduction To Latino & Latin American Studies. 3 Hours.

This course is an introduction to Latino and Latin American Studies. It explores the diverse origins and conditions of the multiple groups encompassed by the terms "Latino" and/or "Hispanic." The course traces connections with ancestral Latin America in terms of its pre-Hispanic and colonial past, as well as its post-colonial present.

LLAS-109. FYE:Art, Thought, And Revolution In Chicago. 3 Hours.

An introduction to the cultural life of Chicago Latino youth with its regional differences with key themes/symbols and cultural norms created by the historical interaction between Latinos and American society as expressed in literature, art, music, and folklore. Attention will also be given to change and continuity in Latino cultural norms on the basis of historical events. This class explores the history of art and its role in the civilizations from Modernism, the Mural Renaissance and the Civil Rights Movement. Using the rich artistic legacy of this area, the class examines the way art functions across borders and how borders have been constructed, debated and lived through in the art of the past.

LLAS-201. Writing Intensive Program: Culture & History Of Latinos. 3 Hours.

Culture and History of Latinos is intended to insure that Latino and Latin American Studies students understand the religious, social, economic and political aspects of Latino groups. It explores their roles and conditions in the new demographic context of the United States as its largest ethnic minority group.

Prerequisite: ENGL-101 with a minimum grade of C.

LLAS-224. The Chicano Movement. 3 Hours.

This course is an analytical overview of stories and histories of and about people of Mexican ancestry or origin in the United States of America. The course examines involvements, events, and conditions directly affecting the fates and opportunities of this constituency through time. The course focuses on regional, class and gender particularities as well as symbolic and epistemological characteristics.

LLAS-225. Puerto Ricans & The Caribbean. 3 Hours.

This course is an overview of people in the Caribbean and/or in the U.S. with ancestral or migratory ties to the Caribbean.

LLAS-285. Mexican Chicago. 3 Hours.

This course aims to examine the meaning, conditions, and prospective future of the extensive and long-established Mexican presence in the Chicago region. Beginning with a comparison of Mexican populations in major US urban centers, the course proceeds to urban and suburban dimensions in the Midwest. It examines the complexity of the Mexican population in terms of regional, generational and phenotypical characteristics, as well as in relation to other minority populations in the region. The course highlights specific profiles of members of Mexican communities in the region and incorporates field experiences and online tours of cultural sites and manifestations.

LLAS-290. Research Methods In Latino And Latin American Studies. 3 Hours.

The course provides an introduction to the theories and processes of critical inquiry in the social sciences and humanities. Each student conducts a focused review of the literature in response to a specific, identified issue and is introduced to the elements of scholarly writing. The course creates a learning community of scholars working to explore meaningful solutions to identified research questions in Latino and Latin American Studies humanities and social sciences area.

Prerequisite: LLAS-101 with a minimum grade of D and LLAS-201 with a minimum grade of D.

LLAS-301. Field Seminar In Latino & Latin American Studies. 3 Hours.

The course aims towards the formulation of a sophisticated understanding of social and political life of Latinos in the current context. It combines theoretical insights and documentary information to examine the assets and current challenges of these communities. This course serves as the capstone course for LLAS minors.

Prerequisite: LLAS-101 with a minimum grade of C or MCS-101 with a minimum grade of C and LLAS-201 with a minimum grade of C or MCS-201 with a minimum grade of C.

LLAS-312. Introduction To The Barrio. 3 Hours.

Students do research on their residential neighborhoods using historical and demographic data, along with political and theoretical insights from the social sciences and the students' experiences.

LLAS-340. Latina/x Feminisms & Social Media. 3 Hours.

This course has two goals: first, students will become familiarized with a panorama of texts exemplifying the historical trajectory of Latina/x intersectional feminist thought in the United States. During the second half of the course, students will research social media activism and contextualize popular Latina/x social media activists and representation, with special emphasis on the disputes and ongoing developments in group identities and senses of self, as well as broad social and political questions relevant to Latina/o/xs, with an eye towards citizenship, consumerism, and immigration issues.

LLAS-345. Race, Class, Gender & Latinos. 3 Hours.

This course is an analytical overview of the complexity of Latino community/ies. The course aims towards the formulation of a sophisticated understanding of social and political life of Latinos in the current context. It combines theoretical insights and documentary information to examine the assets and current challenges of these communities.

LLAS-346. Introduction To Oral History For Communities. 3 Hours.

This course introduces students to oral history, a practice that has expanded to many disciplines for its ability to providing information on aspects of life missing from documentary sources and offering different perspectives on historical events and processes. Notably, oral history is used in recovering the experiences of ordinary people. Students will gain knowledge and skills for engaging people in communities in telling their own stories. Students will learn the principles of oral history methodology by analyzing theoretical, ethical, and practical challenges interviewers and researchers face. Students will also learn basic skills on interviewing, transcribing, and abstracting oral histories.

Prerequisite: LLAS-290 with a minimum grade of C or JUST-241 with a minimum grade of C.

LLAS-347. The U.S.-Mexican Border. 3 Hours.

This course examines the instrumental role that the international boundary plays in the regional and international contacts between Mexico and the United States. It examines origins and transformation of the current border demarcation and underscores the strategic role it plays in social and economic respects for both countries regarding trade, industrial production, and migration. Particular attention is placed on the contrasting impacts of this strategic role on the lives of the residents of this binational setting in terms of social, economic, environmental, and political characteristics. Symbolic aspects of the region in both countries will also be explored.

LLAS-348. Mestiza/o Ways Of Knowing. 3 Hours.

This course focuses on the hybrid character of Latino and Latin American identities. It focuses on the notion of Mestizaje, a central concept to refer to the blending of indigenous and other cultural roots in Latin America. It emphasizes the multi-racial and multi-cultural character of Latino and Latin American populations. Yet, the manifestation of these blendings varies--countries like Argentina and Chile, for example, manifest clearer European influences while Colombia, Dominican Republic, Haiti, and others, present more evident African influences. The course examines recent academic claims that hybridity influences the senses of the world.

LLAS-349. Gloria Anzaldúa: A Deep Dive. 3 Hours.

This course is a "deep dive" into the particular social, political and economic factors contributing to the work of a single author over the long arc of her career, along with her particular contributions to literary culture in her time. Extensive reading involving a representative array of the author's work and a wide variety of critical essays on that work will provide students excellent bases for their research, writing and class discussion, culminating in an essay or creative project suitable for public presentation or publication. This section of the course focuses on the work of Gloria Anzaldúa, as well as her collaborators and literary intellectual/artistic successors.

LLAS-350. Latinos In A Transnational Perspective. 3 Hours.

This course focuses on transnational contacts between Latinos and their communities of origin in Latin America. Latino immigrants, and often their U.S. born offspring, create and maintain support networks with family and other members left in their sending communities. Transnational networks involve individuals as well as groups. "Remittances," the money transferred through these networks from the U.S. to Latin American, have become the main source of foreign currency to Latin American Countries and are seen as a key promoter of development throughout Latin America. The course examines competing theoretical approaches to these networks and effects.

LLAS-351. Latinos And Immigration. 3 Hours.

The course examines social and cultural dimensions of the arrival and incorporation of Latin American immigrants to the United States. It reviews migratory flows across time and regions of the country. Through a discussion-based class, students explore immigration through diverse readings from a wide variety of fields (i.e. history, political science, sociology). The readings provide a comparative range of immigrant experiences from different Latin American countries and different time periods. This comparison will provide a broad exposure of the topic from which students will select a specific topic pertinent to personal and professional interest for their individual assignments.

LLAS-353. Latino Diversities. 3 Hours.

Latinos, the largest ethnic minority of the country, are far from comprising a homogeneous or cohesive group. This course examines various ways in which members of this umbrella group differ in their respective histories in this country, their integration processes, and potential outlooks. The examination goes beyond the distinction related to migratory or ancestral ties to Latin American countries to ascertain contrasts within and among groups. Thus, beyond contrast among Mexicans and Salvadorans, for example, students will explore differences within each of these two groups. Topics such as social mobility, educational attainments, labor force participation, and political involvement are some of many options students will be able to select for their research projects.

LLAS-361. Queer Latin American Narrative And Film. 3 Hours.

This course explores the representation of sexual diversity and gender nonconformity in Latin American cultural production (narrative and film) from a perspective informed by feminist theory, LGBT studies and queer theory. Students critically engage these theoretical paradigms while developing research skills and proficiency in oral and written expression through class assignments, including a final research paper.

Prerequisite: ENGL-101 with a minimum grade of C.

LLAS-381. Independent Study In Latina/o And Latin American Studies. 1 Hour.

An intensive investigation of an area of Latina/o and Latin American studies.

LLAS-382. Independent Study In Latina/o And Latin American Studies. 2 Hours.

An intensive investigation of an area of Latina/o and Latin American Studies.

LLAS-383. Independent Study In Latina/o And Latin American Studies. 3 Hours.

An intensive investigation of an area of Latina/o and Latin American Studies.

LLAS-383S. Special Topics In Latina/o And Latin American Literary And Cultural Studies. 3 Hours.

Varying topics in the field of Latinx and Latin American literary and cultural studies.

LLAS-391. Internship In Latina/o & Latin American Studies. 3 Hours.

This capstone course is an opportunity for students to culminate their Latino studies concentration with an internship tailored to enhance their understanding of social and political life of Latinos. The internship will be an intense course that will give students the opportunity to apply the knowledge and skills developed over the course of their undergraduate career to an actual work setting. Students should expect to work closely with site supervisor, others at internship site, seminar classmates, and Professor.

Prerequisite: LLAS-101 with a minimum grade of C and LLAS-201 with a minimum grade of C and LLAS-290 with a minimum grade of C.

LLAS-392. Internship In Latin American Studies. 3 Hours.

This capstone course is an opportunity for students to culminate their Latin American studies concentration with an internship tailored to enhance their understanding of social and political life of Latin Americans. The internship will be an intense course that will give students the opportunity to apply the knowledge and skills developed over the course of their undergraduate career to an actual work setting. Students should expect to work closely with site supervisor, others at internship site, seminar classmates, and Professor.

Prerequisite: LLAS-101 with a minimum grade of C and LLAS-201 with a minimum grade of C and LLAS-290 with a minimum grade of C.

LLAS-393. Independent Studies In Latino & Latin American Studies. 3 Hours.

Academic credit for special research project student conducts with individual guidance from a faculty member. Projects that could be completed in an established course are not appropriate for Independent Study. Student must submit project proposal to the faculty member in the semester prior to the one in which the project is to be conducted. Independent Study requires approval of instructor, coordinator of program, department chair and college dean.

Prerequisite: LLAS-101 with a minimum grade of C and LLAS-201 with a minimum grade of C and LLAS-290 with a minimum grade of C.

Major in Latina/o/x & Latin American Studies

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Linguistics

The Department of Linguistics is committed to providing students with a solid foundation in the study and understanding of human language as a convergence of genetic, psychological, and social systems and networks. Knowledge of how and why we communicate brings us closer to understanding who we are and how we can affect our worlds.

Exploring language from both theoretical and functional perspectives, our program trains students to critically examine and analyze the world within and around them. The Department offers a minor in Linguistics at the undergraduate level and an MA in Linguistics at the graduate level. Course work in linguistics is a recognized asset for careers in curriculum development, language teaching, publishing, product branding, speech pathology, natural language processing, translation, law, education, and other professions within social and behavioral sciences, especially those concerned with language policies and practices in multilingual settings.

Further information about our programs can be found on our website: <http://www.neiu.edu/academics/college-of-arts-and-sciences/departments/linguistics> (<http://www.neiu.edu/academics/college-of-arts-and-sciences/departments/linguistics/>).

- Minor in Linguistics (<http://catalog.neiu.edu/arts-sciences/linguistics/minor-linguistics/>)

The Department of Linguistics offers courses leading to a minor in linguistics for liberal arts majors and for prospective elementary school language arts teachers. In addition, the department offers courses that are required for students majoring in English education on the Secondary level, and Bilingual-Bicultural Education.

Elementary and Early Childhood Minors

Students in the Elementary Education and Early Childhood Education programs who have selected this minor must complete a minimum of 9 hours at the 300-level to meet graduation and licensure requirements.

- Master of Arts in Linguistics (<http://catalog.neiu.edu/arts-sciences/linguistics/master-arts-linguistics/>)

Master of Arts in Teaching in elementary education (formerly M.A.T.: Language arts)

MA Linguistics courses are open to students seeking an M.A. in Teaching in Elementary Education. Students may enroll in Linguistics courses as part of their 9 hours elective requirement. Please see the program coordinator or the graduate advisor to seek approval for entrance into these classes.

Master of Science in Instruction: Language Arts

MA Linguistics courses are open to students seeking an M.S. in Instruction: Language Arts. Students may enroll in Linguistics 401 to satisfy the Language Arts concentration in the Secondary Sequence. They may also enroll in other Linguistics courses as part of their 9 hour elective requirement. Please see the program coordinator or the graduate advisor to seek approval for entrance into these classes.

LINGUISTIC FACULTY

Richard W. Hallett, Ph.D., Professor, Program Coordinator
 Lewis Gebhardt, Ph.D., Associate Professor, Graduate Advisor
 Ariana Bancu, M.A., Assistant Professor

Affiliated Faculty

Denise Cloonan Cortez, Ph.D., Professor, Chair of World Languages & Culture Department
 Lisa Hollis-Sawyer, Ph.D., Associate Professor, Gerontology Program Coordinator of Psychology Department
 Francisco Iacobelli, Ph.D., Associate Professor, Computer Science Department
 Christopher L. Schroeder, Ph.D., Professor, English Department

LING-109. First Year Experience: Language And Diversity In Chicago. 3 Hours.

Hands-on research, using Chicago's rich diversity of languages in contact as a laboratory, will enable you to understand the mechanisms, dynamics and manipulations of language and language use. Students will explore the following questions: What is language? What makes it universal? What makes it unique? How can it be used as a tool? How does it unite or divide? What is language contact and how does it affect you? What is the relationship between language and identity? What is language diversity and what brings it about? How does an awareness of language make you a stronger, more confident communicator?.

LING-110. Lexicology: The Study Of Words. 3 Hours.

Introduction to the study of words, with particular attention to English from an historical, structural and sociolinguistic perspective. This course meets one of the Humanities requirements of the General Education Program.

LING-120. Language And Human Behavior. 3 Hours.

Introduction to basic principles of psycholinguistics and sociolinguistics. Subjects covered may include dialect variation, language and the brain, child language acquisition, language and gender, conversational analysis, non-verbal behavioral, pidgins and creoles, and sign language. The course is designed for students having no background in linguistics. This course meets one of the Humanities requirements of the General Education Program as well as the Improving Human Relations requirement.

LING-201. Introduction To General Linguistics. 3 Hours.

Nature and structure of languages and American English in particular. An overview of the description of language systems in terms of phonology (sound systems), morphology (word formation) and syntax (sentence organization). May also include an introduction to the areas of semantics (word meaning), pragmatics (the rules of the use of language in social contexts and conversation), and dialectology (cultural and geographical varieties of language use), and a look at the history of English and its relationship to other languages.

LING-300. English Grammar In The Classroom. 3 Hours.

This course introduces the basics of sentence structure in English with the purpose of enabling future teachers to teach English grammar successfully in a multicultural classroom. To this end, students will learn forms and functions of spoken and written English and learn grammatical terminology. They will also investigate issues related to standard and non-standard varieties of English and to the relationship between grammar and language instruction.

Prerequisite: LING-120 with a minimum grade of C or LING-201 with a minimum grade of C.

LING-301. History Of The English Language. 3 Hours.

Historical descriptive linguistic survey of English from its origins to modern English.

Prerequisite: LING-201 with a minimum grade of C.

LING-302. Theory Of Grammar. 3 Hours.**LING-303. Grammars Of English. 3 Hours.**

A descriptive and historical analysis of English grammar.

Prerequisite: LING-201 with a minimum grade of C.

LING-304. Introduction To Phonetics & Phonology. 3 Hours.

This class provides a foundation in the acoustic and articulatory properties of the sounds used in human languages and introduces theories about the systematic variation of sounds in ordinary speech. Through reading, problem solving and class discussion, students become familiar with basic phonetics, the analysis of sounds into features, both rule-based and constraint-based theories of sound variation, and the structure of sound at the segment, syllable and phrase levels. Prereq: or consent of instructor.

Prerequisite: LING-201 with a minimum grade of C.

LING-310. Historical/Comparative Linguistics. 3 Hours.

Prerequisite: LING-201 with a minimum grade of C.

LING-316. Languages And Cultures: Middle East. 3 Hours.

This courses introduces students to the languages, cultures, values, preconceptions and misconceptions associated with the region known as the Middle East. A variety of sources, including academic texts, articles, fiction, poetry, film and the visual arts are incorporated to better grasp and appreciate the complex of languages and cultures of the region. Check the current schedule for the focus country. By permission of instructor.

Prerequisite: LING-201 with a minimum grade of C or LING-322 with a minimum grade of C or ANTH-212 with a minimum grade of C or HIST-111F with a minimum grade of C or HIST-391 with a minimum grade of C.

LING-320G. Language And Culture: Aboriginal Australia. 3 Hours.

This course focuses on the languages and cultures of Aboriginal Australia. It will examine a number of different linguistic features (phonological, morphological, and syntactic) found in a variety of Australian languages. In Addition to structural features, the course will examine Aboriginal languages and their interaction within the social and cultural setting of traditional life as well as issues involving language and cultural contact with European powers.

Prerequisite: LING-201 with a minimum grade of C.

LING-320N. Language And Culture: Native American. 3 Hours.

This course focuses on the languages and cultures of Native America. It will examine a number of different linguistic features (phonological, morphological, and syntactic) found in a variety of North American languages. In addition to structural features, the course will examine languages and their interaction with social and cultural domains as well as issues of language contact.

Prerequisite: LING-201 with a minimum grade of C.

LING-322. Introduction To Sociolinguistics. 3 Hours.

A look at language variation based on social contexts. Includes ethnic, regional and social dialects, language and gender, and pidgin and creole language systems.

LING-323. First & Second Language Acquisition. 3 Hours.

Survey of recent theories and research on children's acquisition of phonological, morphological, syntactic, semantic, and pragmatic systems of their first language. Survey of recent theories and research on second language acquisition.

Prerequisite: LING-201 with a minimum grade of C.

LING-326. Narratives Of The Jewish Experience. 3 Hours.

This course focuses on stories told in contemporary Jewish communities as illustrative of the Jewish experience. Narrative is both representative and constructive of life experience, memory, and identity. We will listen to and analyze stories collected by others and available to wide audiences, and to stories we collect through interactions and interviews. Analyses will be conducted within a narratological framework that blends discursive and psycho-analytic theory and practice. Students will gather oral narratives from family members, community members, political and religious leaders, and educators with the goal of analyzing how stories both reveal and construct personal and social identities.

LING-330. Language, Gender, And Sexuality. 3 Hours.

This course introduces students to gender and sexual identity as they connect to language, meaning, and interaction. We first consider how language mediates, and is mediated by, social constructions of sex, gender, and sexuality. We then explore how language is used to perform gender and sexual identity, and how gender and sexual identity are perceived through linguistic expression. Students will gain an understanding of how language creates, maintains, challenges, and reconfigures social hierarchies and structures. Areas investigated include language variation and gender stereotypes; expression and perception of sexual identity through language; power and women's status; male vs. female communicative styles.

LING-335. Language And Discrimination. 3 Hours.

This course examines the ways our beliefs about language lead to social discrimination in various public and private contexts. Language use is a powerful tool of social identity construction, and often an unrecognized way in which speakers are categorized into social groupings. We will explore issues concerning language-based discrimination in public institutions and private contexts, how children are taught to discriminate, how language discrimination affects us as adults, regional and ethnically linked dialects, ideologies about language and language variation, hate speech and political correctness, linguistic diversity and language policy, and language endangerment.

LING-337. Ethnography Of Communication. 3 Hours.

This course adopts ethnographic methodology to explore the acquisition and performance of communicative competence in a variety of professional settings. The concept of communicative competence has its origins in the field of sociolinguistics - the branch of linguistics that studies the relationship between language and culture or, as sometimes defined, language in society. Key to one segment of sociolinguistic research and practice is the field of ethnography of communication, initiated by anthropological linguist Dell Hymes and John Gumperz. Ethnography of communication focuses on identifying and analyzing "the situations and uses, the patterns and functions of speaking as an activity in its own right" (Hymes 1974). In so doing, the theory and application of this field focuses on identifying the norms of appropriate language use in interaction in given social domains.

Prerequisite: LING-322 with a minimum grade of B.

LING-338. Introduction To Syntactic Theory. 3 Hours.

Following the ground work established over the past 15 years, this course will introduce students to modern syntactic theory as practiced within the Minimalist Program. An emphasis will be placed on the methodological and theoretical achievements of this area of research as developed in the past decade. Students will further examine the notions of functional and lexical projections, empty categories, feature checking operations, various kinds of movement and merge operations, and locality constraints.

Prerequisite: LING-201 with a minimum grade of B and LING-303 with a minimum grade of B.

LING-344. Linguistics And Reading. 3 Hours.

Relationship between language and structure and the reading process with emphasis on the practical problems such as the variety of dialectically different sound-symbol-correspondences in English, the perception of speech sounds, the reader's interpretation of syntactic and semantic structures, various alphabetic systems for teaching beginning reading, and an analysis of linguistic texts for teaching reading. Designed to be useful to the in-service classroom teacher as well as to undergraduates.

LING-347. The Origin Of Language. 3 Hours.

Organized as a seminar, this course discusses recent theories concerned with how, when and why language appeared in the human lineage. Students are introduced to scholarship from a range of fields including linguistics, cognitive science, philosophy, anthropology, primatology and evolutionary biology to address questions including: What is language? What cognitive and social preconditions underlie it? What are the similarities and differences between human language and other animals' communication systems? What language-specific biological wiring may exist at the core of the human language faculty? How was language adaptive for those humans? Did language emerge relatively recently and suddenly, or gradually over millions of years? Permission of instructor required.

Prerequisite: LING-201 with a minimum grade of C or BIO-201 with a minimum grade of C or ANTH-212 with a minimum grade of C or ANTH-215 with a minimum grade of C.

LING-361. Introduction To World Englishes. 3 Hours.

Examination of issues involved in the development, spread, and maintenance of varieties of English throughout the world, now commonly referred to as Global or World Englishes. This course emphasizes the historical, political, and ideological issues of globalization, nativization, post-colonialism, standardization, and pedagogy of native and non-native varieties of English.

Prerequisite: LING-201 with a minimum grade of C.

LING-362. Linguistics And Literature. 3 Hours.

This course presents an introduction to linguistic and discourse-analytic approaches to style in literary works. The study of literary language, most typically the domain of courses in literature, is also undertaken by linguists for the obvious reason that literature, as language, is composed of the structures and used for the functions that are the focus of formal and applied linguistic analysis. Linguistics and Literature focuses on the stylistic use of phonological, morphological, syntactic and semantic features; paralinguistic features of intonation, pitch, rhythm, stress, loudness, and speed; and speech acts and pragmatic conventions of indirectness; entailment, presupposition, implication, and persuasion. By permission of instructor.

Prerequisite: LING-201 with a minimum grade of C.

LING-363. Graphic Narratives: Linguistic And Visual Semiotic Approaches. 3 Hours.

This course situates the graphic narrative as a complex, cultural form that deserves academic attention. Together, we will analyze how images and words interact in graphic narratives to create new identity formations, new cultural meanings, new knowledge webs, new histories, and new narratives.

Prerequisite: LING-120 with a minimum grade of C or LING-201 with a minimum grade of C.

LING-380. Introduction To Corpus Linguistics. 3 Hours.

This course aims to introduce students to theories and methods of corpus-based linguistic research. We will work with available tools and machine-readable corpora (large collections of texts) as a basis for linguistic description and language learning. Topics covered include language description and comparison, language change and current trends, genre and discourse analysis, first and second language acquisition, corpora in classroom instruction, etc. Students will learn how to analyze, visualize, and present data extracted from a corpus, as well as formulate and test hypotheses against evidence provided by a corpus. A basic understanding of language and grammatical categories is required.

LING-391F. Advanced Grammatical Analysis: Mandan. 3 Hours.

This is a course in advanced linguistic analysis. It focuses on the extremely endangered Siouan language, Mandan. Students will learn how to do linguistic research through a critical analysis of existent Mandan texts and explore various aspects of Mandan grammar. Topics may include any aspect of morphology, syntax, or narrative discourse structure.

Prerequisite: LING-201 with a minimum grade of B and LING-303 with a minimum grade of B and LING-322 with a minimum grade of B.

LING-391N. Advanced Grammatical Analysis: Biloxi. 3 Hours.

This is a course in advanced linguistic analysis. It focuses on the extinct Siouan language, Biloxi. Students will learn how to do linguistic research through a critical analysis of existent Biloxi texts and explore various aspects of Biloxi grammar. Topics may include any aspect of morphology, syntax, or narrative discourse structure.

Prerequisite: LING-201 with a minimum grade of B and LING-303 with a minimum grade of B and LING-322 with a minimum grade of B.

LING-391O. Advanced Grammatical Analysis: Crow. 3 Hours.

This is a course in advanced linguistic analysis. It focuses on the endangered Siouan language, Crow. Students will learn how to do linguistic research through a critical analysis of existent Crow texts and explore various aspects of Crow grammar. Topics may include any aspect of morphology, syntax, or narrative discourse structure.

Prerequisite: LING-201 with a minimum grade of B and LING-303 with a minimum grade of B and LING-322 with a minimum grade of B.

LING-401. Fundamentals Of Modern Linguistics. 3 Hours.

Overview of language as a rule-governed system, with particular emphasis on the following subfields of linguistics: phonetics (the sounds of a language), phonology (the functioning and patterning of sounds), morphology (the analysis of word structure), syntax (the analysis of sentence structure), and semantics (the analysis of meaning). This course will also give a historical overview of the field of linguistics. Other topics may include historical linguistics, language typology, pragmatics, sociolinguistics, the brain and language, and computational linguistics. By permission of instructor.

LING-405. Typology. 3 Hours.

Typology studies the similarities and differences among human languages. We observe which categories (such as noun, verb, past) and which structures (such as questions, passive, causative) are universal, common or rare among the world's languages and how they are crosslinguistically similar and different. We then ask why languages seem to prefer some categories and constructions over others and what that might say about the human capacity for language. Through reading, problem solving and fieldwork, students learn about these language structures and discuss proposed explanations for why languages are the way they are.

LING-422. Phonetics & Phonology. 3 Hours.

This class provides a foundation in the acoustic and articulatory properties of the sounds used in human languages and introduces theories about the systematic variation of sounds in ordinary speech. Through reading, problem solving and class discussion, students become familiar with basic phonetics, the analysis of sounds into features, both rule-based and constraint-based theories of sound variation, and the structure of sound at the segment, syllable and phrase levels. By consent of instructor.

Prerequisite: LING-401 with a minimum grade of C.

LING-423. Advanced Phonetics And Phonology. 3 Hours.

A sequel to LING-422 Phonetics and Phonology, this course advances students' understanding of principles and their ability to critically analyze problems concerning the acoustic and articulatory nature of sounds in human language. Topics include articulatory and acoustic phonetics, rule-based and constraint-based theories, segments and phonological features, syllables and moras, stress, tone and intonation and prosody. This course requires research in sound documentation using current recording technology. Students must evaluate various phonological theories and present findings orally and in written formats, to present data clearly and develop linguistics-oriented argumentation style, readying them for academic participation in scholarly journals, at conferences.

Prerequisite: LING-422 with a minimum grade of B.

LING-427. Morphology. 3 Hours.

The goal of morphology is to understand word structure and speakers' implicit knowledge of the components of words and their properties. By looking at data from many languages, students will become familiar with morphological processes such as derivation, inflection, compounding, incorporation and cliticization and with various proposals to account for word structure in languages. By consent of instructor.

Prerequisite: LING-401 with a minimum grade of C.

LING-430C. Structure Of Language: Lakhota. 3 Hours.

Lakhota is a member of the Mississippi Valley branch of the Siouan Language family. The language is an agglutinating one with many synthetic characteristics. This course will examine the structure of the Lakhota language, focusing on the phonology, morphology, and syntax of the language. This will be accomplished by reading and comparing a number of grammars and sketches as well as examining original Lakhota texts.

Prerequisite: LING-401 with a minimum grade of C and LING-422 with a minimum grade of C and LING-437 with a minimum grade of C.

LING-433. Lexicography. 3 Hours.

Review of the problems and trends of word study in the past, especially the notions surrounding the concepts of authority and usage of language: scrutiny of the various types and sources of English vocabulary; recent linguistic insights considered in the light of their value for various kinds of handbooks.

Prerequisite: LING-401 with a minimum grade of C.

LING-435. Semantics. 3 Hours.

What is meaning? How does word meaning contribute to sentence meaning? How are sentences semantically related to each other? How do words and sentences connect to the world and our thoughts about it? This course introduces the basic principles of semantics and how they are applied to a scientific analysis of meaning in language. Topics covered include the components of word meaning, the composition of words into sentence meaning, logic and truth conditions, lexical semantics, formal semantics and the pragmatic effects of context on meaning.

Prerequisite: LING-401 with a minimum grade of C and LING-437 with a minimum grade of C.

LING-436. Advanced Semantics And Pragmatics. 3 Hours.

Building on the introductory LING-435 Semantics course, this course pursues more substantive analyses of fundamental issues in semantics and pragmatics. Through readings of primary sources and analysis of original data, students deepen their understanding of concepts and problems in the field. Among the semantics issues examined are lexical semantics, reference, definiteness and specificity, quantification, and various formal methods for relating expressions to meaning and relating semantics to syntax. The semantic-syntax-pragmatics interface is also explored, with a more detailed study of Gricean implicature as well as recent analyses in neo-Gricean theory and relevance theory.

Prerequisite: LING-435 with a minimum grade of B.

LING-437. Introduction To Generative Grammar. 3 Hours.

This course introduces the study of sentence structure in natural language, with a goal of characterizing the unconscious knowledge that speakers have for recognizing, producing and interpreting any sentence in their language. Working within a Chomskyan generative approach, students analyze data in English and other languages to become familiar with issues such as constituent structure, argument structure and theta roles, case, movement and empty categories. Emphasis is placed on theory building and generalizing particular solutions to what might be universals about sentence grammar.

Prerequisite: LING-401 with a minimum grade of C.

LING-438. Syntax. 3 Hours.

This advanced course builds on Ling 437, reviewing basic principles of syntax and investigating them in greater detail. Students are introduced to recent literature on syntax, mostly within a generative perspective, but the strategy of the class is also to have students explore issues, analyze data and come up with their own proposals to various problems under Minimalist assumptions. The class also emphasizes theory building and justifying many assumptions that underlie syntactic theory. Topics include clause structure, noun phrase structure and the interface between syntax and semantics.

Prerequisite: LING-401 with a minimum grade of C and LING-437 with a minimum grade of C.

LING-439. Research Methods And Statistics For Linguists. 3 Hours.

LING-439 introduces statistics and research design for linguists, focusing on statistical methods most often used in the fields of language variation and change, meaning and grammaticality judgments, language production and perception, acquisition, etc. Topics include probability, statistical inference, sampling, and common tests such as t-test, chi-square, sign, analysis of variance, linear correlation and regression, each directed toward linguistics research.

Prerequisite: LING-401 with a minimum grade of C and LING-446 with a minimum grade of C and (LING-405 with a minimum grade of C or LING-437 with a minimum grade of C) and (LING-435 with a minimum grade of C or LING-422 with a minimum grade of C).

LING-440. Linguistics And Literacy. 3 Hours.

Differences between spoken and written languages; the functions of writing in a literate society; writing systems with particular reference to English orthography; current psycholinguistic research on the acquisition of written language skill; pedagogical implications of linguistic views on literacy.

Prerequisite: LING-401 with a minimum grade of C.

LING-446. Sociolinguistics. 3 Hours.

Sociolinguistics examines ways in which language practices of individuals and communities vary in relation to social, cultural, and individual factors. This course explores topics such as language and identity, language contact, social and regional dialectology, interactional discourse, ethnography of communication, and language and gender.

LING-447. The Origin Of Language. 3 Hours.

The course introduces theorizing about how, when and why language appeared in humans, by considering evidence from linguistics, anthropology, cognitive science, philosophy, primatology and evolutionary biology. The course asks four broad questions: Did language appear gradually or suddenly? Did it appear recently or millions of years ago? How was language adaptive for the individuals who had it? What conditions were necessary for language to appear? Caution: this course is NOT about historical linguistics, the study of language change through time. This course looks at how language evolved in the species.

Prerequisite: LING-201 with a minimum grade of C or LING-401 with a minimum grade of C or BIO-201 with a minimum grade of C or ANTH-212 with a minimum grade of C or ANTH-215 with a minimum grade of C.

LING-448. Discourse Analysis. 3 Hours.

Discourse analysis examines the structuring and use of language to promote social action - i.e. language produced in recognition of and response to its role in society and effects on others. Theory and research focus on gathering and analyzing naturally-occurring texts to gain understanding of the patterns of social action they respond to and initiate. Research explores spoken, written, and visual texts and sociolinguistic aspects of the relationship between languages, cultures, and individuals. Students will come to understand that identity - personal, social, national - as well as ideology - are constructed by and, in turn, serve to construct interactional discourse.

Prerequisite: LING-401 with a minimum grade of C and LING-437 with a minimum grade of C and LING-446 with a minimum grade of C.

LING-449. Anthropological Linguistics. 3 Hours.

Combining the theory and methodology of the ethnographic analysis of culture with the theory and methodology of the sociolinguistic analysis of contextualized talk and text, this course examines the social practice of language in use within and across cultures. Through collection and analysis of naturally-occurring culturally-grounded data, students will identify and come to appreciate how language structures and reveals the systems that both influence and expose cultural knowledge. Students can apply their awareness to culturally-bounded events in settings such as education, corporations, families, and the world at large.

Prerequisite: LING-401 with a minimum grade of C and LING-437 with a minimum grade of C and LING-446 with a minimum grade of C.

LING-450. First Language Acquisition. 3 Hours.

In this course we examine the stages through which a child passes towards native language mastery of the phonological, morphological, syntactic, and semantic systems. Various theories which attempt to account for the child's ability to acquire language will be considered in light of the context of monolingual and bilingual language acquisition.

Prerequisite: LING-401 with a minimum grade of C.

LING-452. Psycholinguistics. 3 Hours.

Theoretical studies in the area of linguistics and psychology; possible implications of the form of grammar for the language learning process; survey of relevant research.

Prerequisite: LING-401 with a minimum grade of C.

LING-453. Language Contact And Multilingualism. 3 Hours.

This course examines language contact as a sociolinguistic phenomenon and articulates its impact on individuals and society. It focuses on issues such as language choice, language maintenance and language death in multilingual communities, national and individual identity, the structure, function and impact of codeswitching, and controversial issues such as bilingual language acquisition and the relationship between bilingualism and cognitive, linguistic and social development.

Prerequisite: LING-401 with a minimum grade of C and LING-437 with a minimum grade of C and LING-446 with a minimum grade of C.

LING-454. Language and Identity. 3 Hours.

This course explores the role of language in the construction of identities and the significance of identity construction as a negotiated social action within language variation. The concept and construction of identity is investigated at the individual, community, and global levels. The focus of the course is on how these multi-leveled identities are developed and realized through the use of language. The course explores a wide range of theoretical and methodological perspectives on identity in mono- as well as multi-lingual contexts.

Prerequisite: LING-401 with a minimum grade of C or LING-446 with a minimum grade of C.

LING-461. Issues In Multiple Language Acquisition. 3 Hours.

This course examines how speakers of one dialect/language learn other dialects/languages. Going beyond the traditional research on second language acquisition, this course emphasizes the theoretical issues of the acquisition of phonology, morphology, syntax, semantics, and pragmatics in a third language. Also emphasized are the differences and similarities in learning a second dialect, which may be more difficult than second language acquisition for learners.

Prerequisite: LING-401 with a minimum grade of C and LING-422 with a minimum grade of C and LING-437 with a minimum grade of C.

LING-462. Lexical Acquisition. 3 Hours.

This course examines how language learners acquire/learn vocabulary. Going beyond the traditional research on second language acquisition, this course focuses solely on the theoretical issues of lexical acquisition. Though the primary emphasis is on the acquisition of vocabulary in a second or third language, first language vocabulary acquisition will also be discussed.

Prerequisite: LING-401 with a minimum grade of C and (LING-427 with a minimum grade of C or LING-435 with a minimum grade of C).

LING-471. World Englishes. 3 Hours.

Examination of issues involved in the development and maintenance of varieties of English throughout the world, now commonly referred to as World Englishes. Specifically, this course emphasizes the historical, political, and ideological issues of post-colonialism, globalization, nativization, standardization, hegemony, canon, and pedagogy of native and non-native varieties of English.

Prerequisite: LING-401 with a minimum grade of C and LING-446 with a minimum grade of C.

LING-472. American English - History And Growth. 3 Hours.

Phonology, morphology, syntax, lexicon of English in the United States as well as its cultural history with reference to the mother country and the New World, both in colonial and post-revolutionary times.

Prerequisite: LING-401 with a minimum grade of C.

LING-473. The English Language - History And Development. 3 Hours.

Survey of English phonology, morphology, syntax, lexicon and cultural history through Old English, Middle English, early Modern English and recent Modern English, using literary documents for the older periods, and literary as well as spoken records for the most recent times.

Prerequisite: LING-401 with a minimum grade of C.

LING-475. Historical & Comparative Linguistics. 3 Hours.

This course introduces students to the systematic comparison of languages to understand how languages change through time, and how they are thought to be related to one another and to their common ancestors. Students bring together the standard aspects of linguistics – the lexicon, morphology, phonology, syntax, and semantics – and see how these components of grammar changes over time. The course covers the history of the comparative method from the birth of modern linguistics and integrates modern theories about dialectology and sociolinguistics, and how language variation is related to language change. By consent of instructor.

Prerequisite: LING-401 with a minimum grade of C and LING-405 with a minimum grade of C and (LING-422 with a minimum grade of C or LING-427 with a minimum grade of C or LING-437 with a minimum grade of C).

LING-480. Corpus Linguistics. 3 Hours.

This course aims to introduce students to theories and methods of corpus-based linguistic research. We will work with available tools and machine-readable corpora (large collections of texts) as a basis for linguistic description and language learning. Topics covered include language description and comparison, language change and current trends, genre and discourse analysis, first and second language acquisition, corpora in classroom instruction, etc. Students will learn how to analyze, visualize, and present data extracted from a corpus, as well as formulate and test hypotheses against evidence provided by a corpus. A basic understanding of language and grammatical categories is required.

LING-481. Language & Tourism. 3 Hours.

Advanced work and individual projects in language and tourism, a growing area of applied linguistics. Topics will include the sociolinguistics of tourism, social/identity construction of not only tourists but also of touristic locations, language use in tourism, discursive, visual semiotic, and ethnomethodological analyses of tourism materials.

Prerequisite: LING-446 with a minimum grade of C and LING-401 with a minimum grade of C.

LING-482. Stylistics. 3 Hours.

Adopting theory and techniques of linguistic and discourse analysis, this course in stylistics focuses on the linguistic analysis of literary texts. Both in terms of their structure and their communicative functions, literary texts participate in the construction and presentation of nations, regional and social communities, and individuals. The language of literature -- including word choice, sentence structure, and paralinguistic cues -- functions to position characters and places by forging their identities. At the same, literary texts can be understood, in a social constructionist framework, to construct the identities of those who partake in their consumption. By consent of instructor.

Prerequisite: LING-401 with a minimum grade of C and LING-448 with a minimum grade of C.

LING-483. Field Methods In Linguistics. 3 Hours.

This course will introduce students to the goals and methods of linguistics research, including both qualitative and quantitative methodologies. Topics include the scientific method, data collection and transcription, corpus research, psycholinguistic research, field methods, argumentation, structuring of abstracts and research papers, APA vs. MLA style, conferences, ethical issues, professionalization, and interpretation of research articles.

LING-484. Language Endangerment And Documentation. 3 Hours.

This course focuses on language endangerment and documentation. It will look at issues of language shift and discuss how languages become endangered and lost. It will also discuss how languages are best documented and discuss how the field's Best Practices Guide has evolved.

Prerequisite: LING-401 with a minimum grade of C and LING-405 with a minimum grade of C and LING-422 with a minimum grade of C and LING-437 with a minimum grade of C.

LING-488. Languages & Cultures Of Iran. 3 Hours.

The language and culture of modern Iran are explored through academic readings, essays, autobiographies, and films as we delve into the question, Who are the Iranians? The languages and identities of this multilingual nation are explored through language variation, gender, age, class, and other social variables. Special attention is given to social and linguistic contact phenomena as we trace the history and evolution of the languages spoken in Iran and the communities who speak them. The structure and use of modern Farsi, along with its historical and social development will also be investigated.

Prerequisite: LING-401 with a minimum grade of C and LING-405 with a minimum grade of C and LING-437 with a minimum grade of C and LING-446 with a minimum grade of C.

LING-489. Linguistics In The Professions. 3 Hours.

Linguistics, defined as the scientific study of language, has both formal aims in describing the structural components of language and functional aims in applying understanding of these formal systems to addressing matters pertinent to interactional discourse, the presentation of self, and the co-construction of social and personal identity. Linguistics offers its graduates many varied opportunities for careers across numerous disciplines. This course offers students new to the field an introduction to many of those disciplines; as they continue their studies in our program, they can do so with the necessary schema for how they can apply what they learn.

LING-491E. Translation And Linguistic Analysis: Aleut. 3 Hours.

This course focuses on the translation of texts for a linguistic analysis of various aspects of the structure of the language in question. Students learn how to do a linguistic analysis of the target language focusing on some aspect of linguistics. The end project is a 15-20 page paper that can be presented at a professional conference. Students can focus on any area of the field of linguistics (these areas can include phonology, morphology, syntax, or discourse analysis).

Prerequisite: LING-401 with a minimum grade of C and LING-405 with a minimum grade of C and LING-422 with a minimum grade of C and LING-437 with a minimum grade of C.

LING-491F. Translation: Mandan. 3 Hours.

This course is an exercise in linguistic analysis. The Mandan language is an extremely endangered language comprising its own branch of Siouan. Employing a critical linguistic analysis of the existent texts, students will analyze some aspect of Mandan grammar. Topics can include any aspect of phonology, morphology, syntax, or discourse structure.

Prerequisite: LING-401 with a minimum grade of C and LING-405 with a minimum grade of C and LING-422 with a minimum grade of C and LING-437 with a minimum grade of C.

LING-491N. Translation: Biloxi. 3 Hours.

This course is an exercise in linguistic analysis. The Biloxi language is an extinct member of the Ohio Valley branch of Siouan. Employing a critical linguistic analysis of the existent texts, students will analyze some aspect of Biloxi grammar. Topics can include any aspect of phonology, morphology, syntax, or discourse structure.

Prerequisite: LING-401 with a minimum grade of C and LING-405 with a minimum grade of C and LING-422 with a minimum grade of C and LING-437 with a minimum grade of C.

LING-5901. Thesis Hours. 1 Hour.

Guidance of students conducting research and writing a thesis to fulfill the requirements for the Master of Arts degree in Linguistics. This course requires approval of the instructor, Department Chair and the appropriate College Dean(s). Students will have completed the required courses with a B average or higher, and have obtained the approval of their graduate advisor before registering for the thesis hours.

LING-5902. Thesis Hours. 2 Hours.

See course description for LING-5901.

LING-5903. Thesis Hours. 3 Hours.

See course description for LING-5901.

Master of Arts in Linguistics

Master of Arts in Linguistics

The graduate program offers work leading to a Master of Arts degree in Linguistics. Our dynamic curriculum combines core studies in the structure of language [phonology, morphology, syntax, semantics] with current approaches in sociolinguistics, language acquisition, psycholinguistics, language contact and bilingualism, World Englishes, native and endangered languages, discourse analysis, and identity studies.

Requirements for Admission to the Program

Students must fulfill the requirements for admission to the College of Graduate Studies & Research of Northeastern Illinois University and apply to the Linguistics Department (GC11) for admission to the degree program. A student-at-large may transfer no more than 9 credit hours of graduate coursework into the graduate Linguistics program.

The applicant must possess:

- a bachelor's degree from an accredited college or university
- an undergraduate academic record with a grade point average of 2.75 or better (4-point scale). No GRE is required.
- nine hours or the equivalent of college-level foreign language study.

When students do not meet the language requirement, they may be given provisional admission and may complete their required foreign language course work while enrolled in the MA program. The language requirement must be fulfilled before applying for graduation. International students must achieve a minimum TOEFL score of 550 (79 on the Internet-based test or 213 on the computer-based exam); or a minimum score of 6.5 on the IELTS. In some instances, a Test of Written English (TWE) score may also be required. Admission to the M.A. program may be restricted if a student possesses a bachelor's degree from a non-accredited or foreign institution.

Requirements for the Degree

12 courses/36 hours of course work; Cumulative 3.0 GPA in Linguistics courses with no more than 2 grades of C; successful completion and oral defense of a Linguistics Capstone course or Thesis.

Completion of the M.A. in Linguistics

Students may choose to complete their MA degree through either a Capstone Experience or the Thesis Seminar. Both options engage students in an assessment component that authentically addresses and evaluates their knowledge and skills in linguistics and applied linguistics. Students will have completed the required courses with a B average or higher, and have obtained the approval of their graduate advisor before registering for a capstone course or thesis.

The Capstone

The Linguistics MA capstone has two components. The first is completion of a capstone course (see list of Capstone Courses). The second component is a 20-minute presentation based on the capstone paper at the NEIU Student Symposium or at a Linguistics Department Student Colloquium.

The capstone offers students a unique opportunity to integrate their MA linguistics education and demonstrate comprehensive knowledge of linguistics. Students complete their capstone research by demonstrating how their understanding of a number of the linguistic sub-areas covered in the required courses are relevant to the content of their capstone course and paper. The product of this capstone experience will be a research paper that is appropriate for conference presentation and/or publication.

Thesis Option

Students will work with a committee of three Linguistics faculty to conduct original research and to write a thesis. Students will have completed the required courses with a B average or higher, and have obtained the approval of their graduate advisor before registering for the thesis hours.

Minor in Linguistics

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Linguistics (18 credit hours)

Code	Title	Hours
Required Courses		
LING-201	Introduction To General Linguistics	3

LING-300	English Grammar In The Classroom	3
LING-322	Introduction To Sociolinguistics	3
Electives		9

Mathematics

The undergraduate program in Mathematics leads to a Bachelor of Arts degree in Mathematics and has been designed to provide the students with options suitable for various career plans. The choice of concentration determines the set of mathematics courses required, as well as those that can be taken as electives. Mathematics Majors at Northeastern Illinois University can choose any of the two concentrations: Concentration in Applied Mathematics and Concentration in Secondary Mathematics.

All students enrolled in Mathematics Major Program have to complete the entire set of required core courses, all of the courses required for a given concentration, as well as some elective courses, for the total of at least 46 credit hours. While each mathematics course has prerequisites, there are no prerequisites for entering the program.

Undergraduate Programs

- Major in Mathematics (<http://catalog.neiu.edu/arts-sciences/mathematics/mathematics/>) (Applied and Secondary Education-Mathematics Tracks. Note: The BA in Math (Secondary Education) is used to prepare students for getting a future degree in Secondary Education.)
- Elementary Education and Humanities Mathematics Minor (<http://catalog.neiu.edu/arts-sciences/mathematics/elementary-education-humanities-mathematics-minor/>)
- Minor in Applied Mathematics (<http://catalog.neiu.edu/arts-sciences/mathematics/minor-applied-mathematics/>)
- Minor in M ([http://catalog.neiu.edu/arts-sciences/mathematics/minor-applied-mathematics/athematical & Statistical Modeling of Complex Systems](http://catalog.neiu.edu/arts-sciences/mathematics/minor-applied-mathematics/athematical%20&%20Statistical%20Modeling%20of%20Complex%20Systems) (<http://catalog.neiu.edu/arts-sciences/mathematics/mathematical-statistical-modeling-minor/>))

Graduate Programs

- Master of Science in Mathematics (<http://catalog.neiu.edu/arts-sciences/mathematics/master-science-mathematics/>) (Applied and Secondary Education-Mathematics)
- Master of Arts in Pedagogical Content Knowledge for Teaching Elementary and Middle School Mathematics (<http://catalog.neiu.edu/arts-sciences/mathematics/master-arts-pedagogical-content-knowledge-teaching-elementary-middle-school-mathematics/>) --- (*currently not accepting applications*)

MATH-011A. Developmental Stretch I: Statistics In Daily Life. 2 Hours.

Math 011A must be taken concurrently with Math 111A. These two courses comprise the first semester in a two semester sequence. Students completing each of Math 011A, 011B, 111A, and 111B with a C or better will have satisfied the Math 112 requirement and earned a total of 4 college credits. These courses comprise an elementary introduction to statistics. Students will learn: to process and classify observational, experimental, and sampling data; to make decisions using descriptive statistics; to use inferential statistics to test hypotheses and draw conclusions about a population; and to use spreadsheets to perform these tasks.

Corequisite: MATH-111A.

MATH-011B. Developmental Stretch II: Statistics In Daily Life. 2 Hours.

Math 011B must be taken concurrently with Math 111B. These two courses comprise the second semester in a two semester sequence. Students completing each of Math 011A, 011B, 111A, and 111B with a C or better will have satisfied the Math 112 requirement and earned a total of 4 college credits. These courses comprise an elementary introduction to statistics. Students will learn: to process and classify observational, experimental, and sampling data; to make decisions using descriptive statistics; to use inferential statistics to test hypotheses and draw conclusions about a population; and to use spreadsheets to perform these tasks.

Prerequisite: MATH-011A with a minimum grade of C.

Corequisite: MATH-111B.

MATH-048A. Developmental Stretch I: Math For Elementary Teachers I. 3 Hours.

Math 048A must be taken concurrently with Math 148A. These two courses comprise the first semester in a two semester sequence. Students completing each of Math 048A, 048B, 148A, and 148B with a C or better will have satisfied the Math 149 requirement and earned a total of 4 college credits. These courses comprise a mathematical introduction for elementary and middle school teachers. Topics include place value, models for and the development of arithmetic, mental math, estimation, word problems, algorithms, factors, primes, proofs, prealgebra, fractions, ratios, rates, and percentages. The development of elementary mathematics from an advanced standpoint is emphasized.

Corequisite: MATH-148A.

MATH-048B. Developmental Stretch II: Math For Elementary Teachers I. 3 Hours.

Math 048B must be taken concurrently with Math 148B. These two courses comprise the second semester in a two semester sequence. Students completing each of Math 048A, 048B, 148A, and 148B with a C or better will have satisfied the Math 149 requirement and earned a total of 4 college credits. These courses comprise a mathematical introduction for elementary and middle school teachers. Topics include place value, models for and the development of arithmetic, mental math, estimation, word problems, algorithms, factors, primes, proofs, prealgebra, fractions, ratios, rates, and percentages. The development of elementary mathematics from an advanced standpoint is emphasized.

Prerequisite: MATH-048A with a minimum grade of C.

Corequisite: MATH-148B.

MATH-090. Elementary Algebra. 3 Hours.

This course develops the foundations of algebra, beginning with the real number system and its operations. Topics include: variable expressions, linear equations, exponents and polynomials, applications of proportion, percent, and the use of formulas to develop problem solving skills. Freshman students are initially placed into mathematics courses by their MATH ACT scores, their NEIU Mathematics Placement Test scores, or by an appropriate score on the Advanced Placement Test in Calculus. (This course does not count toward graduation or GPA.).

Prerequisite: NEIU Math Placement Result 00 - 40 (or ACT Math 01 - 36 or Accuplacer Elementary Algebra 020 - 040 or SAT Math 200 - 800 or Accuplacer QR, Algebra, & Stat 200 - 300).

MATH-0901. Math Enrichment Workshop For Math 090. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-090. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard Math 090 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-090.

MATH-091. Intermediate Algebra I. 3 Hours.

This course develops the foundations of algebra, beginning with the real number system and its operations. Topics include: variable expressions, linear equations and systems of equations, exponents, polynomials, factoring trinomials, and solving equations by factoring. Freshman students are initially placed into mathematics courses by their MATH ACT scores, their NEIU Mathematics Placement Test scores, or by an appropriate score on the Advanced Placement Test in Calculus. (This course does not count toward graduation or GPA.).

Prerequisite: (MATH-090 or NEIU Math Placement Result 01 - 45 or ACT Math 17 - 18 or Accuplacer Elementary Algebra 041 - 059 or Accuplacer QR, Algebra, & Stat 237 - 249 or SAT Math 460 - 490).

MATH-0911. Math Enrichment Workshop For Math 091. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-091. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard Math 091 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-091.

MATH-092. Intermediate Algebra II. 3 Hours.

This course further develops the concepts and structures of intermediate algebra. A review of linear equations, polynomials, and factoring, prepares students for the study of linear, quadratic, exponential, and logarithmic equations and functions. Additional topics to prepare students for college algebra include: rational expressions and equations, complex numbers, rational exponents, graphing and applications of quadratic functions, and properties of logarithms. Freshman students are initially placed into mathematics courses by MATH ACT scores, NEIU Mathematics Placement Test scores, or by an appropriate score on the Advanced Placement Test in Calculus. (This course does not count toward graduation or GPA.).

Prerequisite: (MATH-091 - 499 or MATH-091A - 499Z or NEIU Math Placement Result 02 - 45 or ACT Math 19 - 36 or Accuplacer Elementary Algebra 060 - 084 or Accuplacer College Level Math 020 - 120 or Accuplacer Adv. Algebra & Func 200 - 300 or SAT Math 500 - 800).

MATH-0921. Math Enrichment Workshop For Math 092. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-092. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard Math 092 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-092.

MATH-092C. College Algebra Express I. 3 Hours.

MATH-092C College Algebra Express I must be taken concurrently with Math 173C College Algebra Express II. Math 092C and Math 173C are collectively a 6-credit co-requisite course that provides students a path to finish developmental coursework and college algebra in ONE semester. Background topics which are necessary for a student to successfully complete Math 173C will be covered in Math 092C. Such topics include fractions, factoring polynomials, functions, exponents, and operating with radical and rational expressions. Students who complete MATH-173C with a minimum grade of C will have satisfied the college algebra requirement.

Prerequisite: Accuplacer Elementary Algebra with a score of 60 or ACT Math with a score of 19 or SAT Mathematics with a score of 500.

Corequisite: MATH-173C.

MATH-097. Mathematical Literacy. 4 Hours.

Mathematical Literacy for College Students is a one semester course for non-math and non-science majors integrating numeracy, proportional reasoning, algebraic reasoning, and functions. Students will develop conceptual and procedural tools that support the use of key mathematical concepts in a variety of contexts. Throughout the course, college success content will be integrated with mathematical topics. Upon passing this course, one can enroll in Math 112 (Statistics) or Math 113 (Mathematical Reasoning). (This course is in place of the Math 091/092 sequence and has no college credit. This course does not count toward graduation or GPA).

Prerequisite: (MATH-090 - 499 or MATH-090A - 499Z or Accuplacer Elementary Algebra 041 - 120 or ACT Math 17 - 36 or Accuplacer QR, Algebra, & Stat 237 - 300 or SAT Math 460 - 800).

MATH-101A. Basic Mathematical Reasoning 1. 2 Hours.

This first part of a two-semester stretch course (equivalent to Math 113) provides a foundation for students to become confident and critical users of quantitative information of all kinds: numerical, graphical and verbal. Students analyze data and ideas from a variety of fields, such as psychology, economics, finance, sociology and political science. The course is taught in a computer laboratory environment, where students are introduced to tools for data analysis and presentation. Active learning and reasoning are emphasized. By completing Math 101A and 101B, students needing one credit math course will have completed their math requirement.

Prerequisite: (Accuplacer Elementary Algebra 041 - 120 (or (ACT Math 17 - 36) or (Accuplacer QR, Algebra, & Stat 237 - 300 or (SAT Math 460 - 800).

MATH-101B. Basic Mathematical Reasoning 2. 2 Hours.

This second part of a two-semester stretch course (equivalent to Math 113) provides a foundation for students to become confident and critical users of quantitative information of all kinds: numerical, graphical and verbal. Students analyze data and ideas from a variety of fields, such as psychology, economics, finance, sociology and political science. The course is taught in a computer laboratory environment, where students are introduced to tools for data analysis and presentation. Active learning and reasoning are emphasized. By completing Math 101A and 101B, students needing one credit math course will have completed their math requirement.

Prerequisite: MATH-101A with a minimum grade of C.

MATH-111A. Stretch I: Statistics In Daily Life. 2 Hours.

Math 111A must be taken concurrently with Math 011A. These two courses comprise the first semester in a two semester sequence. Students completing each of Math 011A, 011B, 111A, and 111B with a C or better will have satisfied the Math 112 requirement and earned a total of 4 college credits. These courses comprise an elementary introduction to statistics. Students will learn: to process and classify observational, experimental, and sampling data; to make decisions using descriptive statistics; to use inferential statistics to test hypotheses and draw conclusions about a population; and to use spreadsheets to perform these tasks.

Prerequisite: Accuplacer Elementary Algebra 020 - 040 (or Accuplacer QR, Algebra, & Stat 200 - 236).

Corequisite: MATH-011A.

MATH-111B. Stretch II: Statistics In Daily Life. 2 Hours.

Math 111B must be taken concurrently with Math 011B. These two courses comprise the second semester in a two semester sequence. Students completing each of Math 011A, 011B, 111A, and 111B with a C or better will have satisfied the Math 112 requirement and earned a total of 4 college credits. These courses comprise an elementary introduction to statistics. Students will learn: to process and classify observational, experimental, and sampling data; to make decisions using descriptive statistics; to use inferential statistics to test hypotheses and draw conclusions about a population; and to use spreadsheets to perform these tasks.

Prerequisite: MATH-111A with a minimum grade of C.

Corequisite: MATH-011B.

MATH-112. Statistics In Daily Life. 3 Hours.

Process of classifying and drawing conclusions from data obtained from observations, experiment, or sampling. Decision making under uncertainty with emphasis on the behavioral fields. Study of frequency distributions and their use in the decision making process. Usage of computer and prepared software make plus a graphic calculator (TI-83 or equivalent) is required.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-113. Quantitative Reasoning. 3 Hours.

This course provides a foundation for students to become confident and critical users of quantitative information of all kinds: numerical, graphical and verbal. Students analyze data and ideas from a wide variety of fields, such as psychology, economics, finance, sociology and political science. The course is taught in a hands-on laboratory environment where students are introduced to computer tools for data analysis and presentation. active learning and reasoning are emphasized, and technology is an integral part of the course. Students write critiques of quantitative arguments, gather data and present arguments based on their analysis.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-141. College Mathematics I. 3 Hours.

The purpose of this course is to introduce the students to several of the mathematical tools that are used in all areas of mathematics including subjects that are strongly mathematics driven; these tool facilitate (1) problem-solving in mathematics and (2) mathematical communication and connection with other branches and other disciplines. Graphing calculator will be required and used to facilitate better understanding of some mathematical models, algorithms and applications. Other topics include expressions, mathematical functions, equations, inequalities and complex numbers.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-143. College Mathematics II. 3 Hours.

The purpose of this course is to introduce the new teachers to the structure of Mathematics which include: mathematical reasoning; mathematical communication and connection with other branches and other disciplines; and problem-solving. Topics: number theory, combinatorics, geometry, probability and statistics, mathematics of finance.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-145. Algebra Concepts For Educators. 4 Hours.

This course focuses on algebra concepts. Course design incorporates the Illinois Learning Standards for Mathematics K-12, the National Council of Teachers of Mathematics Teaching Principles, Standards, and Expectations, and a focus on preparing future educators in the implementation of interdisciplinary math and science curricula. Students will engage in learning algebraic processes (creating and solving equations and inequalities, graphing, and transformations) as well as developing algebraic habits of mind (seeing structure in expressions and equations, generalizing from repeated reasoning, and modeling with mathematics). Concepts covered include linear, quadratic, and exponential functions, systems of equations, absolute value and inequalities, and basic probability. Problem solving and generalizing patterns with and without technology will be emphasized. Written assignments and reflections on the learning process will be introduced as appropriate. This course is paired and integrated with Bios 110, and it is strongly suggested that they are taken together.

Prerequisite: MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C.

MATH-147. Statistical Concepts For Educators. 4 Hours.

This course has been designed keeping in mind the NCTM teacher standards, Common Core Mathematical Practices, Content and ELA Standards in Mathematics and the ISBE mathematics teacher standards and the content within the paired interdisciplinary science course. There will be three principle components of the course: 1) descriptive statistics, 2) basic probability theory and central limit theorem, 3) applied statistics in the form of confidence intervals and hypothesis testing. Contemporary critical technologies such as data warehousing and mining, and concept modeling may be considered. This course is linked with BIO-104 Environmental Biology, and BIO-105 Environmental Biology Lab.

Prerequisite: MATH-141 with a minimum grade of C or MATH-108 with a minimum grade of C or NEIU Math Placement Result with a score of 30 or ACT Math with a score of 22 or ACT Math with a score of 23 or ACT Math with a score of 24 or Accuplacer College Level Math with a score of 020 or Accuplacer College Level Math with a score of 021 or Accuplacer College Level Math with a score of 022 or Accuplacer College Level Math with a score of 023 or Accuplacer College Level Math with a score of 024 or Accuplacer College Level Math with a score of 025 or Accuplacer College Level Math with a score of 026 or Accuplacer College Level Math with a score of 027 or Accuplacer College Level Math with a score of 028 or Accuplacer College Level Math with a score of 029 or Accuplacer College Level Math with a score of 030.

Corequisites: BIO-104, BIO-105.

MATH-148A. Stretch I: Math For Elementary Teachers I. 2 Hours.

Math 148A must be taken concurrently with Math 048A. These two courses comprise the first semester in a two semester sequence. Students completing each of Math 048A, 048B, 148A, and 148B with a C or better will have satisfied the Math 149 requirement and earned a total of 4 college credits. These courses comprise a mathematical introduction for elementary and middle school teachers. Topics include place value, models for and the development of arithmetic, mental math, estimation, word problems, algorithms, factors, primes, proofs, prealgebra, fractions, ratios, rates, and percentages. The development of elementary mathematics from an advanced standpoint is emphasized.

Prerequisite: Accuplacer Elementary Algebra with a score of 20.

Corequisite: MATH-048A.

MATH-148B. Stretch II: Math For Elementary Teachers I. 2 Hours.

Math 148B must be taken concurrently with Math 048B. These two courses comprise the second semester in a two semester sequence. Students completing each of Math 048A, 048B, 148A, and 148B with a C or better will have satisfied the Math 149 requirement and earned a total of 4 college credits. These courses comprise a mathematical introduction for elementary and middle school teachers. Topics include place value, models for and the development of arithmetic, mental math, estimation, word problems, algorithms, factors, primes, proofs, prealgebra, fractions, ratios, rates, and percentages. The development of elementary mathematics from an advanced standpoint is emphasized.

Prerequisite: MATH-148A with a minimum grade of C.

Corequisite: MATH-048B.

MATH-149. Math For Elementary Teachers I. 4 Hours.

This is a foundational class in mathematics for those interested in becoming elementary or middle grades teachers. Topics include place value, models for and the development of arithmetic, mental math, estimation, word problems, algorithms, factors, primes, proofs, prealgebra, fractions, ratios, rates, and percentages. Emphasis on the development of elementary mathematics from an advanced standpoint.

Prerequisite: MATH-092 with a minimum grade of C.

MATH-150. Math For Elementary Teachers II With Problem Solving. 5 Hours.

This is a foundational class in mathematics for those interested in becoming elementary or middle grades teachers. Topics include measurement, geometric reasoning, similarity and congruence, applications of geometry, geometric proofs, area, volume, surface area, and probability and statistics. Problem solving and mathematical thinking activities covering both number and operations and geometry content will be integrated. Emphasis is on the development of elementary mathematics from an advanced standpoint.

Prerequisite: MATH-149 with a minimum grade of C.

MATH-151. Bridge Course In Mathematics For Elementary Teachers. 3 Hours.

MATH-151 is a course designed for students who have completed two college-level courses in math for elementary teaching at a community college. The transferred courses should focus on numbers and operations and geometry and measurement, respectively. NEIU's College of Education requires that Elementary Education majors complete at least 9 semester hours in mathematics for teachers that meet a set of common outcomes adopted by the college. This course focuses on concepts addressed by the outcomes that are not typically covered in depth by most 2-course sequences in mathematics for teaching: algebra, data analysis, statistics, probability, problem-solving and mathematical thinking. **Prerequisite:** MATH-151 is restricted to students majoring in Early Childhood Education, Elementary Education, Bilingual/Bicultural Education, and TCP. Enrollment by permit only.

MATH-163. Mathematical Modeling With Elementary Functions For Business. 3 Hours.

This course, at the College Algebra level, is designed to provide quantitative understanding and tools for business students. Students work extensively with the most important functions and equations used for applications in their fields: linear, polynomial, rational, exponential, and logarithmic.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-164. Modeling With Elementary Functions For Business Seminar. 1 Hour.

Enrichment Seminar accompanying MATH-163. Students engage in problem solving in collaborative learning groups on material derived from and complementing Mathematical Modeling with elementary functions in Business to gain a deeper understanding of concepts and application.

Corequisite: MATH-163.

MATH-165. Finite Mathematics For Business And The Social Sciences. 3 Hours.

Introduction to matrices, linear programming and probability with emphasis on mathematical models in the social, managerial and behavioral sciences and mathematics of finance.

Prerequisite: (MATH-163 - 499 or MATH-163A - 499Z or NEIU Math Placement Result 35 - 40 or ACT Math 25 - 36 or Accuplacer College Level Math 031 - 120 or SAT Math 580 - 800 or Accuplacer Adv. Algebra & Func 250 - 300).

MATH-167. Business Calculus I. 4 Hours.

Elements of analytic geometry, differential and integral calculus with application to business, economic and finance.

Prerequisite: (MATH-163 - 499 or MATH-163A - 499Z or NEIU Math Placement Result 35 - 40 or ACT Math 25 - 36 or Accuplacer College Level Math 031 - 120 or SAT Math 580 - 800 or Accuplacer Adv. Algebra & Func 250 - 300).

MATH-173. College Algebra. 4 Hours.

This course emphasizes the concept of a function as a unifying approach to the topics of college algebra. Families of functions studied in the course include: polynomial, rational, exponential and logarithmic functions. Other topics include conic sections, and sequences and series. Applications and problem solving skills are emphasized throughout the course.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-173C. College Algebra Express II. 4 Hours.

MATH-173C College Algebra Express II must be taken concurrently with Math 092C College Algebra Express I. Math 092C and Math 173C are collectively a 7-credit co-requisite course that provides students a path to finish developmental coursework and college algebra in one semester. This course emphasizes the study of functions and their graphs, inequalities, and linear, quadratic, piece-wise defined, rational, polynomial, exponential, and logarithmic functions. Student will learn how to apply various technologies to these topics. Students who complete the co-requisite courses Math 092C and Math 173C with a minimum grade of C will have satisfied the college algebra requirement.

Prerequisite: Accuplacer Elementary Algebra with a score of 60 or ACT Math with a score of 19 or SAT Mathematics with a score of 500.

Corequisite: MATH-092C.

MATH-173W. College Algebra & Math Enrichment Workshop. 4 Hours.

This course emphasizes the concept of a function as a unifying approach to the topics of college algebra. Topics include: polynomial, rational, exponential and logarithmic functions, conic sections, sequences, and series. Each week students will participate in an enrichment workshop where they will collaboratively solve college algebra problems within peer groups while receiving guidance from a Peer Leader. The workshop draws on the Peer Led Team Learning and Emerging Scholars Program models, which have been nationally identified for increasing students' probability of earning higher grades in their mathematics courses. Students will pay a \$25 fee to support the workshop.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-174. Math Enrichment Workshop For College Algebra. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-173. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard MATH-173 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-173.

MATH-175. Trigonometry. 3 Hours.

For students who intend to continue with Calculus I, this course uses the concept of a function as a unifying approach to the topics of trigonometry. The course studies trigonometric functions, trigonometric identities and equations, and inverse trigonometric functions. Other topics include: solving triangles, polar coordinates, complex numbers and DeMoivre's theorem; parametric equations, and vectors. Applications and problem solving skills are emphasized throughout the course.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-175W. Trigonometry & Math Enrichment Workshop. 3 Hours.

This course uses the concept of a function as a unifying approach to the topics of trigonometry. Topics include: trigonometric functions, identities, and equations, inverse trigonometric functions, solving triangles, and polar coordinates. Each week students will participate in an enrichment workshop where they will collaboratively solve trigonometry problems within peer groups while receiving guidance from a Peer Leader. The workshop draws on the Peer Led Team Learning and Emerging Scholars Program models, which have been nationally identified for increasing students' probability of earning higher grades in their mathematics courses. Students will pay a \$25 fee to support the workshop.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-176. Mathematics Enrichment Workshop For Trigonometry. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-175. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard MATH-175 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-175.

MATH-177. Elementary Functions In The Sciences/Math. 3 Hours.

This is an application inspired college algebra course which covers linear, quadratic, general polynomial, exponential and logarithmic functions using applications from science and mathematics. Arithmetic and geometric sequences are introduced as difference equations to motivate the study of quantities that change over time. Curve fitting is used to interpret data. A graphing calculator is required.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-178. Elementary Functions In The Sciences/Math Seminar. 1 Hour.

Enrichment Seminar accompanying MATH-177. Students do problem solving in collaborative learning groups on material derived from and complementing Mathematical Modeling with Elementary Functions in the Sciences and Mathematics to gain a deeper understanding of concepts and applications. The content of the seminar is closely aligned with the content of MATH-177.

Corequisite: MATH-177.

MATH-185. Precalculus. 4 Hours.

A functional approach to College Algebra and Trigonometry, for students who intend to continue with Calculus I.

Prerequisite: (MATH-173 - 499 or MATH-173A - 499Z or NEIU Math Placement Result 35 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 031 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 250 - 300).

MATH-185W. Precalculus & Math Enrichment Workshop. 4 Hours.

This course offers a functional approach to college algebra and trigonometry, for students who intend to continue with Calculus I. Each week students will participate in an enrichment workshop where they will collaboratively solve precalculus problems within peer groups while receiving guidance from a Peer Leader. The workshop draws on the Peer Led Team Learning and Emerging Scholars Program models, which have been nationally identified for increasing students' probability of earning higher grades in their mathematics courses. Students will pay a \$25 fee to support the workshop.

Prerequisite: (MATH-173 - 499 or MATH-173A - 499Z or NEIU Math Placement Result 35 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 031 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 250 - 300).

MATH-186. Mathematics Enrichment Workshop For Precalculus. 1 Hour.

Enrichment workshop accompanying MATH-185. Students do problem solving in collaborative learning groups on material derived from and supplementing Precalculus to gain a deeper understanding of concepts and applications. Prereq.: Restricted to students taking MATH-185 concurrently.

Corequisite: MATH-185.

MATH-187. Calculus I. 4 Hours.

Introduction to analytic geometry, limits and derivatives, applications, integration, fundamental theorem of calculus.

Prerequisites: (MATH-185 - 499 or MATH-185A - 499Z or NEIU Math Placement Result 40 - 45 or ACT Math 28 - 36 or Accuplacer College Level Math 061 - 120 or (MATH-173 and MATH-175) or SAT Math 640 - 800 or Accuplacer Adv. Algebra & Func 276 - 300).

MATH-187W. Calculus I & Math Enrichment Workshop. 4 Hours.

This course provides an introduction to analytic geometry, limits and derivatives, integration, and the fundamental theorem of calculus. Each week students will participate in an enrichment workshop where they will collaboratively solve calculus I problems within peer groups while receiving guidance from a Peer Leader. The workshop draws on the Peer Led Team Learning and Emerging Scholars Program models, which have been nationally identified for increasing students' probability of earning higher grades in their mathematics courses. Students will pay a \$25 fee to support the workshop.

Prerequisites: (MATH-185 - 499 or MATH-185A - 499Z or NEIU Math Placement Result 40 - 45 or ACT Math 28 - 36 or Accuplacer College Level Math 061 - 120 or (MATH-173 and MATH-175) or SAT Math 640 - 800 or Accuplacer Adv. Algebra & Func 276 - 300).

MATH-188. Mathematics Enrichment Workshop for Calculus I. 1 Hour.

Enrichment Seminar accompanying MATH-107. Students do problem solving in collaborative learning groups on material derived from and supplementing Calculus I to gain a deeper understanding of concept and applications.

Corequisite: MATH-187.

MATH-199S. Topics In Probability And Statistics For Middle School Teaching. 4 Hours.**MATH-202. Calculus II. 4 Hours.**

Integration techniques, applications, differential equations and series.

Prerequisite: (MATH-187 or MATH-107 or NEIU Math Placement Result 40 - 45 or Accuplacer College Level Math 061 - 120 or Accuplacer Adv. Algebra & Func 276 - 300).

MATH-202W. Calculus II & Math Enrichment Workshop. 4 Hours.

This course provides an introduction to analytic geometry, limits and derivatives, integration, and the fundamental theorem of calculus. Each week students will participate in an enrichment workshop where they will collaboratively solve calculus II problems within peer groups while receiving guidance from a Peer Leader. The workshop draws on the Peer Led Team Learning and Emerging Scholars Program models, which have been nationally identified for increasing students' probability of earning higher grades in their mathematics courses. Students will pay a \$25 fee to support the workshop.

Prerequisite: MATH-187 with a minimum grade of C or MATH-107 with a minimum grade of C.

MATH-203. Calculus III. 4 Hours.

3-D analytic geometry, partial derivatives, multiple integrals and vector fields.

Prerequisite: MATH-202 with a minimum grade of C.

MATH-203W. Calculus III & Math Enrichment Workshop. 4 Hours.

This course focuses on three-dimensional analytic geometry, partial derivatives and multiple integrals. Each week students will participate in an enrichment workshop where they will collaboratively solve calculus III problems within peer groups while receiving guidance from a Peer Leader. The workshop draws on the Peer Led Team Learning and Emerging Scholars Program models, which have been nationally identified for increasing students' probability of earning higher grades in their mathematics courses. Students will pay a \$25 fee to support the workshop.

Prerequisite: MATH-202 with a minimum grade of C.

MATH-204. Math Enrichment Workshop For Math 203. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-203. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard Math 203 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-203.

MATH-251W. Introduction To Advanced Mathematics & Math Enrichment Workshop. 5 Hours.

Math 251 is a bridge course between calculus and advanced mathematics. Students study the tools and proof techniques that serve as the basis for theoretical mathematics. Each week students will participate in an enrichment workshop where they will collaboratively solve Math 251 problems within peer groups while receiving guidance from a Peer Leader. The workshop draws on the Peer Led Team Learning and Emerging Scholars Program models, which have been nationally identified for increasing students' probability of earning higher grades in their mathematics courses. Students will pay a \$25 fee to support the workshop.

Prerequisite: MATH-187 with a minimum grade of C or (NEIU Math Placement Result with a score of 40 and ENGL-101 with a minimum grade of C).

MATH-252. Math Enrichment Workshop For Math 251. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-251. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard Math 251 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-251.

MATH-253. Linear Algebra I. 3 Hours.

This course covers matrix theory and linear algebra. Linear algebra is the branch of mathematics that studies systems of linear equations and the properties of matrices, which includes among other topics: vector spaces; linear transformations and the matrices that represent them; determinants and inner product spaces; and properties of vectors in n-dimensional space and their applications. Linear algebra has a broad range of applications and is critical to many disciplines such as physics, the social and natural sciences, engineering, and economics.

Prerequisite: (MATH-091 - 499 or MATH-091A - 499Z or NEIU Math Placement Result 02 - 45 or ACT Math 19 - 36 or Accuplacer Elementary Algebra 060 - 084 or Accuplacer College Level Math 020 - 120 or Accuplacer Adv. Algebra & Func 200 - 300 or SAT Math 500 - 800).

MATH-262. Mathematics Enrichment Workshop For Calculus II. 1 Hour.

Enrichment Seminar accompanying MATH-202. Students do problem solving in collaborative learning groups on material derived from and supplementing Calculus II to gain a deeper understanding of concepts and applications.

Corequisite: MATH-202.

MATH-273. Statistics With Applications. 4 Hours.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

MATH-275. Applied And Computational Statistics. 4 Hours.

This course introduces students to the basic concepts, logic, and issues involved in statistical reasoning with wide variety of applications. It is designed to familiarize students with statistical vocabulary and concepts. Major topics include exploratory data analysis, an introduction to research methods, probability, statistical inference, and regression-based analysis of well-defined examples from biology, ecology, environmental sciences, finance, medicine, public health, psychology, and sociology. Computing will be carried out using R or any appropriate statistical software in the course.

Prerequisite: MATH-173 with a minimum grade of C.

MATH-280. Geometry Concepts For Educators And Art. 4 Hours.

This course focuses on the concepts of plane and solid geometry and trigonometry. Course design incorporates the Illinois Learning Standards for Mathematics K-12, the National Council of Teachers of Mathematics Teaching Principles, Standards, and Expectations, and a focus on preparing future educators in the implementation of interdisciplinary math and science curricula. The topics include basic definitions and properties of plane and solid figures, congruence, similarity, constructions, measurements, transformations, Pythagorean theorem, right angle trigonometry, and the unit circle trigonometry. Problem solving using a calculator and computer programs is emphasized throughout. Writing assignments, coding in geometric constructions, and art are also part of the course. This course is paired and integrated with PHYS-108, and it is strongly suggested that they are taken together.

Prerequisite: MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C.

MATH-281. Number Concepts For Educators. 4 Hours.

This course contains a wide range of topics across number theory and measurement and is intended to give students a grasp of the depth and breadth of mathematics outside of the traditional course structure. Course design incorporates the Illinois Learning Standards for Mathematics K-12, the National Council of Teachers of Mathematics Teaching Principles, Standards, and Expectations, and a focus on preparing future educators in the implementation of interdisciplinary math and science curricula. Problem solving, estimation, measurements, and construction of simple theories of numbers will be treated with and without the use of technology. Writing assignments, as appropriate to the discipline, are part of the course. This course is paired and integrated with CHEM-108, and it is strongly suggested that they are taken together.

Prerequisite: MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C or MATH-141 with a minimum grade of C.

MATH-300. Interdisciplinary Seminar In STEM. 2 Hours.

This course uses a hands-on approach to modern inquiry-based research problems and techniques in the physical and computational sciences. The course is structured around a series of modular problem-based exercises, covering topics from the fields of Chemistry, Computer Science, Earth Science, Mathematics and Physics and is designed to provide the content and pedagogical background for students to be successful peer leaders. The cross-disciplinary modules will draw connections between scientific disciplines, and showcase common research tools and techniques used in the sciences. The workshop will also incorporate discussions on a range of topics, from scientific ethics, scientific methodology and error analysis.

Prerequisite: MATH-185 with a minimum grade of C.

MATH-301. Ordinary Differential Equations I. 4 Hours.

This course focuses on the techniques and applications of solving ordinary differential equations, with a focus on first and second order differential equations. Topics include: constant coefficients, nonlinear, numerical methods, Laplace transform, series solutions, and geometric techniques.

Prerequisite: MATH-203 with a minimum grade of C.

MATH-302. Ordinary Differential Equations II. 3 Hours.

Linear and nonlinear systems, matrix methods and applications to problems in the sciences. Existence and stability theory. Boundary value problems and Fourier series.

Prerequisite: MATH-301 with a minimum grade of C.

MATH-303. Partial Differential Equations. 3 Hours.

This course covers linear partial differential equations that model physical problems and arise in a variety of contexts. Topics include the study of explicit formulas for solutions (when feasible) and study of the behavior of solutions. Equations covered include: wave equations, diffusion equations, and Laplace's equation on different domains. Other topics discussed are Fourier series, separation of variables, harmonic functions, and Green's functions.

Prerequisite: MATH-301 with a minimum grade of C.

MATH-304. Introduction To Numerical Analysis. 3 Hours.

Solutions of equations of one variable, interpolation and polynomial approximation, numerical integration and methods of solutions of linear systems.

Prerequisite: MATH-203 with a minimum grade of C and MATH-253 with a minimum grade of C and MATH-340 with a minimum grade of C.

MATH-305. Probability And Statistics. 4 Hours.

This course is an introduction to the probability and statistics. Topics include fundamental rules of probability, discrete and continuous distributions of random variables, central limit theorem, descriptive statistics, confidence intervals and hypothesis tests. Students will build on their basic knowledge of probabilities and distributions; illustrate statistical inference by constructing confidence intervals and hypothesis tests; and calculate basic statistical analysis manually and by computer software. Applications of probability and connections between probability and statistics are emphasized.

Prerequisite: MATH-202 with a minimum grade of C.

MATH-306. Linear Programming And Extensions. 3 Hours.

Linear Programming is the methodology that can be applied to optimize a linear function of several variables subject to linear constraints. This course focuses on geometric and algebraic foundations of Linear Programming and studies the Simplex Method and its variations, duality, Dual Simplex Method, sensitivity analysis, and methods of Integer Programming.

Prerequisite: MATH-203 with a minimum grade of C and MATH-253 with a minimum grade of C.

MATH-307. Introduction To Stochastic Processes. 3 Hours.

This course focuses on basic mathematical aspects of stochastic models with the emphasis on problem solving. Topics include Markov processes, Markov chains, and Queuing Theory.

Prerequisite: MATH-305 with a minimum grade of C or MATH-334 with a minimum grade of C.

MATH-309. Numerical Analysis II. 3 Hours.

Iterative methods for linear and non-linear systems of equations, approximation of eigenvalues, initial value problems, ordinary and partial boundary value problems and approximation theory.

Prerequisite: MATH-304 with a minimum grade of C.

MATH-311. Writing Intensive Program: Introduction To Advanced Mathematics. 5 Hours.

A bridge course between calculus and advanced mathematics. Students study the tools and proof techniques that serve as the basis for theoretical mathematics. Mathematical structure and the development of proficiency in reading, analyzing and constructing mathematical proofs are emphasized. Topics include logic, set theory, methods of proof, combinatorics, relations, functions and cardinality.

Prerequisite: (MATH-187 with a minimum grade of C or MATH-107 with a minimum grade of C or NEIU Math Placement Result with a score of 40) and ENGL-101 with a minimum grade of C.

MATH-312. Foundations Of Geometry. 3 Hours.

This course is a rigorous study of Euclidean and non-Euclidean geometries. Topics include transformational and projective geometry, axiomatic systems, and models.

Prerequisite: MATH-253 with a minimum grade of C and (MATH-251 with a minimum grade of C or MATH-311 with a minimum grade of C).

MATH-315. Introduction To Applied And Computational Topology. 3 Hours.

This course is an introduction to the mathematical field of topology, with a focus on applications and computational techniques. Examples of topology topics covered may include but are not limited to manifolds, complexes, sequences, homology and persistent homology, homotopy, the Euler characteristic, Morse theory. Examples of applications topics covered may include but are not limited to robotics, phylogenetic trees, topological data analysis (TDA,) and graph theory. Students will complete a project exploring a specific application of topology to a problem of their choice.

Prerequisite: MATH-311 with a minimum grade of C or MATH-251 with a minimum grade of C.

MATH-321. History Of Mathematics. 3 Hours.

History of Mathematics is a chronological survey of the historical growth of mathematical ideas from its non-Western origins to the modern day. This includes famous mathematicians and their contributions to the development of modern mathematics. Specific themes may be chosen to align with faculty and/or student interest.

Prerequisite: MATH-187 with a minimum grade of C and (MATH-251 with a minimum grade of C or MATH-311 with a minimum grade of C).

MATH-322. Number Theory. 3 Hours.

This course focuses on integers and their fundamental properties, congruences, quadratic residues, Diophantine equations, primitive roots and discrete logarithms, and cryptography.

Prerequisite: MATH-251 with a minimum grade of C and MATH-253 with a minimum grade of C.

MATH-324. Independent Study In Mathematics. 3 Hours.

This course offers students an opportunity to conduct an individualized investigation into a mathematical topic with a mathematics department faculty. The mathematical topic is a topic that would not normally be discussed in the current courses being offered by the math department. The course requires the approval of the instructor, department chair, and the Dean.

MATH-326. Real Analysis. 3 Hours.

An introduction to the methods of classical analysis as applied to the formulation of the theory of Riemann integrable functions and to the theoretical examination of the behavior of sequences and series of functions of a real variable.

Prerequisite: MATH-338 with a minimum grade of C.

MATH-328. Complex Variables. 3 Hours.

This course is an introduction to the functions of a complex variable. Topics include elementary functions of a complex variable, Cauchy-Riemann Equations, Cauchy integral theorems, Taylor and Laurent series expansions, contour integrals, and residue calculus.

Prerequisite: MATH-203 with a minimum grade of B or MATH-338 with a minimum grade of C.

MATH-331. Abstract Algebra I. 3 Hours.

This course is an introduction to the mathematical theory of groups. Topics include: properties of groups, homomorphisms, isomorphisms, Lagrange's Theorem and factor groups. Students will build on their basic knowledge of number systems, linear algebra, set theory, functions and mathematical proofs in order to understand, construct and apply algebraic proofs; illustrate algebraic concepts or disprove false statements by providing examples; and calculate with algebraic objects. Applications of algebra and connections between algebra and other fields of mathematical study are emphasized.

Prerequisite: MATH-253 with a minimum grade of C and (MATH-251 with a minimum grade of C or MATH-311 with a minimum grade of C).

MATH-332. Abstract Algebra II. 3 Hours.

This course is a continuation of Math 331 with a focus on the mathematical theory of rings and fields. Topics include: ideals, factor rings, finite fields, field extensions, and selected applications. Students will build on their prior knowledge of algebraic systems and algebraic proofs in order to understand, construct, and apply proofs about rings and fields; illustrate ring- and field- theoretic concepts or disprove false statements by providing examples; and calculate with algebraic objects. Applications of algebra and connections between algebra and other fields of mathematical study are emphasized.

Prerequisite: MATH-331 with a minimum grade of C.

MATH-334. Mathematical Statistics I. 3 Hours.

This course is an introduction to probability and mathematical statistics. Topics include fundamental rules of probability, expectations, moment generating functions, common distributions and central limit theorem. The mathematical theories to develop probability and statistical methods are emphasized in this course.

Prerequisite: MATH-203 with a minimum grade of C.

MATH-336. Statistical Inference. 4 Hours.

Statistical inference is the process of drawing conclusions about populations or scientific truths from data. This course presents the fundamentals of inference in a practical approach for statistical analysis procedures, such as interval estimation, tests of hypothesis, general procedures for developing tests, analyzing different types of data, and linear regression. After taking this course, students will understand the broad directions of statistical inference and use this information for making informed choices in analyzing data using computer software.

Prerequisite: MATH-334 with a minimum grade of C or MATH-305 with a minimum grade of C.

MATH-337. Theory Of Equations. 3 Hours.

This course is an advanced study of algebraic equations. Topics include the existence and properties of solutions, and algebraic, numerical, and algorithmic methods of solving equations.

Prerequisite: MATH-253 with a minimum grade of C and (MATH-251 with a minimum grade of C or MATH-311 with a minimum grade of C).

MATH-338. Introduction To Real Analysis. 3 Hours.

This course is an introductory course in the theory of functions of a real variable. It develops the properties of the real numbers as a complete ordered field and introduces the topological concepts of neighborhoods, open sets, closed sets, and compact sets. Based on this, the course provides a rigorous treatment of: a) sequences of real numbers (convergence, boundedness, upper and lower limits); b) real functions of a single variable including continuity, uniform continuity (optional), differentiability, integrability, and related properties; c) series of real numbers (convergence and absolute convergence); d) introduction to function series (power series).

Prerequisite: MATH-203 with a minimum grade of C and MATH-251 with a minimum grade of C.

MATH-339. Vector Calculus. 4 Hours.

This course is a natural extension of differential and integral calculus, where the variables and values of functions are vectors instead of numbers. Such concepts as limits and continuity, derivatives and integrals, extrema and approximation are generalized for multi-dimensional Euclidean spaces. The course also introduces vector fields, line and surface integrals as well as fundamental theorems based on these concepts.

Prerequisite: MATH-203 with a minimum grade of C and MATH-253 with a minimum grade of C.

MATH-340. Computing For Mathematicians. 4 Hours.

Fundamentals of computer programming, experimentation, and simulation in mathematics with Maple and Fortran programming language. Introduction to documentation, electronic communication and problem solving in mathematical sciences. No prior computer skills required.

Prerequisite: MATH-202 with a minimum grade of C.

MATH-343. Linear Algebra II. 3 Hours.

Linear Algebra arose from studying systems of linear equations and their geometric applications. Linear Algebra is the study of vector spaces and the linear maps between them. This second course in Linear Algebra will emphasize theoretical implications and will focus on "why" and "how" questions, such as how can we use eigenvectors and eigenvalues of a linear operator to study the operator itself and the vector space that it acts on. Particular topics that will be covered are: abstract vector spaces; invariant subspaces; Spectral Theorem; LU, QR, and SVD factorizations; Jordan Form; and various computational methods.

Prerequisite: MATH-203 with a minimum grade of C and MATH-253 with a minimum grade of C.

MATH-347. Probability For Actuaries With Actuarial Exam Preparation. 4 Hours.

This course is a probability class tailored for students/professionals pursuing a career in the actuarial profession (such as, but not limited to, insurance, finance, banking, and industries) and/or are preparing for the actuarial exams. The course provides knowledge of the fundamental probability tools for quantitatively assessing risk and the application of these tools to problems encountered in actuarial science is emphasized. Topics include general probability theory, counting techniques, combinatorial probabilities, random variables with univariate and/or multivariate probability distributions, and The Central Limit Theorem.

Prerequisite: MATH-203 with a minimum grade of C.

MATH-357. Financial Mathematics For Actuaries With Actuarial Exam Preparation. 4 Hours.

This course is a financial mathematics class tailored for students/professionals pursuing a career in the actuarial profession (such as, but not limited to, insurance, finance, banking, and industries) and/or are preparing for the actuarial exams. The course provides an understanding of the fundamental concepts of financial mathematics, and how those concepts are applied in calculating present and accumulated values for various streams of cash flows such as, loans, annuities, rate of return of an investment, bonds, stocks, and financial derivatives.

Prerequisite: MATH-347 with a minimum grade of C or MATH-305 with a minimum grade of C or MATH-334 with a minimum grade of C.

MATH-361. Set Theory. 3 Hours.

Set theory is one language/structure that mathematics is constructed within. In this course a brief, but rigorous, history of set theory will be given that pays particular attention to the necessary modifications that have been made throughout the twentieth century. Particular attention will be paid to understanding the Axiom of Choice, Zorn's Lemma, and the Well Ordering Principle. Additional topics might include gentle introductions to Category Theory, Topos Theory, Axiomatic Set Theory, or Gödel's Incompleteness theorem.

Prerequisite: MATH-311 with a minimum grade of C.

MATH-362. Metric Spaces And Topology. 3 Hours.

This course is an introduction to topological spaces with an emphasis on metric spaces. The covered topics include open neighborhoods, limits, closure/interior/boundary of topological/metric spaces; functions, continuity, homeomorphism between topological/metric spaces; and product of topological/metric spaces. The concepts of connectedness, compactness, and completeness will be studied along with fundamental results and examples. This course forms a foundation for all advanced courses in analysis and geometry.

Prerequisite: MATH-311 with a minimum grade of C.

MATH-365. Statistical Computer And Data Analysis Packages. 3 Hours.

This course introduces statistical programming packages R and SPSS. Students will use the statistical software to: study basic functions and graphs; give descriptive analysis; implement testing; and study various modeling techniques.

Prerequisite: MATH-305 with a minimum grade of C or MATH-334 with a minimum grade of C.

MATH-370. Mathematical Modeling In The Natural Sciences. 4 Hours.

This course focuses on the formulation, analysis, and interpretation of mathematical models describing certain phenomena in the natural sciences. Topics include: difference equations, systems of difference equations, nonlinear difference equations, continuous models, phase planes – stability analysis, and limit cycles.

Prerequisite: MATH-202 with a minimum grade of C.

MATH-371. Mathematical Modeling For Cancer Risk Assessment. 4 Hours.

The Cancer Modeling Seminar is an essential educational component for students from the Complex Systems minor, Physics, Chemistry and Biomathematics. The seminar consists of lectures, research projects, interdisciplinary collaborations, presentations and/or posters and conference trips. Students will experience first-hand the research process, employ data analysis tools, contribute, discuss and present their projects under the guidance of the seminar instructor and experts in cancer research. Students will also learn advanced, high-quality typesetting systems designed for technical and scientific documentation and presentation.

Prerequisite: MATH-202 with a minimum grade of C.

MATH-374. Modeling And Simulations Of Complex Systems Networks. 4 Hours.

This course covers basic mathematical and statistical methods for analyzing computational spatial models in various applications, focusing on individual attributes (social influence or contagion) and network structure of groups. The course will incorporate simple graph theoretical approaches as well as construction and analysis of network-based models (NBM) and agent-based models (ABM) with complex systems applications from epidemiology, finance/business, medicine, psychology, and social sciences. The NBM involves the characterization of the structures of social networks or subsets of these networks to understand their influence on behaviors and outcomes. The ABM involves the use of stochastic analysis and simulations of individuals, in space, over time to understand how macro-level distribution patterns of outcomes may emerge from explicitly modeled, micro-level behaviors, social interactions, and movement of these individuals in their environments. Students will interpret published research and produce a research proposal by the end of the semester.

Prerequisite: (MATH-173 - 499 or MATH-173A - 499Z or NEIU Math Placement Result 35 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 031 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 250 - 300).

MATH-376. Introduction To Risk Analysis. 3 Hours.

The Introduction to Risk Analysis course is an applied method course focusing on the application of statistical analysis methods on economics using Risk Analysis approaches. Topics include but are not limited to basic concepts of risk analysis, probability theory, probabilistic modeling and application to research projects.

Prerequisite: MATH-187 with a minimum grade of C.

MATH-380. Calculus Concepts For Educators. 3 Hours.

This course provides a foundational experience in calculus through an emphasis on topics related to middle school teaching. Course design incorporates the Illinois Learning Standards for Mathematics K-12, the National Council of Teachers of Mathematics Teaching Principles, Standards, and Expectations, and a focus on preparing future educators in the implementation of interdisciplinary math and science curricula. Topics include: functions, deriving formulas for patterns, direct and recursive sequence formulas, arithmetic and geometric sequence formulas, limits of sequences, convergence/divergence of sequences, series, derivatives, integration, the fundamental theorem of calculus, and differential equations. Course integrates conceptual, content specific, and pedagogical knowledge. Course includes applications to ecology, finance, middle school teaching, and technology. This course is paired and integrated with BIOS-310, and it is strongly suggested that they are taken together.

Prerequisite: MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C.

MATH-381. Concepts In Discrete Mathematics For Educators. 3 Hours.

This course provides a foundational experience in discrete mathematics through an emphasis on topics in graph theory. Course design incorporates the Illinois Learning Standards for Mathematics K-12, the National Council of Teachers of Mathematics Teaching Principles, Standards, and Expectations, and a focus on preparing future educators in the implementation of interdisciplinary math and science curricula. Students will learn about mathematics as an active process of making conjectures, testing ideas, and proving conclusions. Special emphasis is given to mathematical communication, problem-solving, and applications to the sciences. Possible topics include: the Four Color Theorem, trees, digraphs, bipartite graphs, planar graphs, Platonic solids, Euler and Hamilton circuits, the P+NP Problem, algorithms and combinatorial explosion. Course integrates conceptual, content specific, and pedagogical knowledge.

Prerequisite: MATH-150 with a minimum grade of C or MATH-151 with a minimum grade of C.

MATH-406. Linear Programming: Theory And Practice. 3 Hours.

Optimization models; theoretical foundations of simplex algorithms and duality; revised and dual algorithms; sensitivity and analysis; additional topics from extended LP integer programming, networks, recent trends.

MATH-408. Mathematics Structures For Elementary School Teachers I. 3 Hours.

Mathematics topics and techniques that are relevant to advanced mathematics learning and the teaching of mathematics in the schools: Elementary logic, elementary sets, binary operations, introduction to algebraic structures, number systems, geometry and elements of graph theory.

MATH-409. Mathematical Functions For Elementary School Teachers I. 3 Hours.

For elementary school teachers. The function concept; polynomial functions; solution of linear and quadratic equations; simultaneous equations; the binomial theorem; circular functions; solution of triangles; trigonometric identities and equations; exponential and logarithmic functions; rectangular and polar coordinate systems; the conic sections. Graphics calculator required.

Prerequisite: MATH-408 with a minimum grade of C.

MATH-410. Modern Analysis For The Elementary School Teacher. 3 Hours.

Limits and continuity, derivatives, applications, integral calculus, applications.

Prerequisite: MATH-435 with a minimum grade of C.

MATH-421. Modern Geometry. 3 Hours.

Classification of geometrical systems; introduction to Euclidean and non-Euclidean geometries, projective geometry; finite geometries.

Prerequisite: MATH-312 with a minimum grade of C.

MATH-430. Discrete Mathematical Structures. 3 Hours.

Provides a working knowledge of mathematical logic, sets, relations, functions, graphs, and counting techniques.

MATH-432. Applied Combinatorics. 3 Hours.

The course offers broad exposure to combinatorial mathematics using applications to emphasize fundamental concepts and techniques, including graph theory, inclusion/exclusion principle, graph algorithms, and network flows.

Requirement: Admission to MS in Mathematics program or approval of the instructor or graduate advisor in the math department.

MATH-435. Mathematics Structure II. 3 Hours.

The real number system, mathematical systems, inductive and deductive methods, permutations and combinations.

Prerequisite: MATH-408 with a minimum grade of C.

MATH-436. Modern Algebra. 3 Hours.

Prerequisite: MATH-331 with a minimum grade of C.

MATH-439. Computers In Education. 3 Hours.

Investigation into the use of computers for CAI, statistical packages and solutions of mathematical problems. Students learn to write programs in Basic.

Prerequisite: MATH-438 with a minimum grade of C.

MATH-441. Multivariate Statistical Analysis. 3 Hours.

The essential methods of the multivariate statistical analysis; Hotelling's T, discriminant function, principal components, factor analysis, canonical correlations and cluster analysis with emphasis on application and real data analysis.

Prerequisite: MATH-336 with a minimum grade of C.

MATH-442. Applied Regression Analysis. 3 Hours.

Methodology of regression analysis with attention to model building, evaluating fit, and examining reliability of the model; regression and general least squares theory, estimation of regression coefficients, polynomial regression, step-wise regression, residual analysis, choice of transformation for variable and forecasting; with applications and real data analysis.

Prerequisite: MATH-336 with a minimum grade of C.

MATH-443. Experimental Design. 3 Hours.

One-way and two-way analysis of variance, fixed and random effects models, multiple comparisons, completely randomized and randomized block designs.

Prerequisite: MATH-336 with a minimum grade of C.

MATH-444. Problem Solving, Modeling, And Project In Mathematics With Technology. 4 Hours.

This course is problem solving and project oriented, and provides the students with the background in computers and technology needed to be effective teachers of mathematics in the secondary/high schools. The course deals with (1) hands-on applications of (a) a current geometric visualization software (e.g., Geometer's Sketchpad) as a problem solving tool in mathematics and geometry, (b) a statistical package (e.g., Minitab, R) as a problem solving tool in mathematics and statistics, and (c) other technologies (e.g., excel software) as a tool for modeling in mathematics and statistics; and (2) introduction to research methods in the mathematical sciences.

MATH-457. Recent Trends In Mathematics. 3 Hours.

Extended applications of mathematical thinking, operations research, mathematical models, information theory, theory of games, and linear programming.

Prerequisite: MATH-435 with a minimum grade of C.

MATH-465. Advanced Topics In Numerical Analysis. 3 Hours.

This course aims to teach participants advanced theories, algorithms and computational techniques of numerical analysis. Topics include numerical linear algebra, iteration methods and convex programming, numerical methods for ordinary and partial differential equations, functional approximation and data analysis, digital spectral analysis, design and analysis of mathematical software, and mathematical methods in computer graphics. Participants will become familiar with the process of solving scientific and engineering problems by applying/modifying numerical algorithms that are implemented in standard software packages, designing new algorithms, conducting analysis on accuracy, efficiency and stability, as well as interpreting computational results through graphics and simulations.

Prerequisite: MATH-304 with a minimum grade of C.

MATH-466. Galois Theory: Historical And Modern. 3 Hours.

Classical and modern Galois theory. Cardano's formulas, symmetric polynomials, permutation groups, field extensions, field automorphisms, the fundamental theorem of Galois theory.

Prerequisite: MATH-331 with a minimum grade of C.

MATH-471. Introduction To Stochastic Models. 3 Hours.

Markov Chains: the Poisson process; continuous time Markov processes; Renewal Theory; Queuing Theory.

Prerequisite: MATH-305 with a minimum grade of C.

MATH-472. Simulation Modeling And Analysis. 3 Hours.

Design and analysis of computer simulations of complex systems. Network, discrete event and continuous models are treated in a unifying setting. Computer model of a variety of systems are implemented and analyzed using a general purpose simulation language.

Prerequisite: MATH-334 with a minimum grade of C.

MATH-473D. Advanced Topics In Operations Research: Decision Theory. 3 Hours.**MATH-474. Mathematical Modeling. 3 Hours.**

Formulation, analysis and interpretation of mathematical models describing phenomena from the natural and social sciences. Topics may include: model construction, explicative versus predictive models, model fitting, optimization, empirical models, simulation models, dynamical models, dimensional analysis and other related topics. A term project (team or individual) will be required.

MATH-475. Advanced Topics In Operations Research: Mathematical Programming. 3 Hours.

This course offers an overview of deterministic optimization models and methods including linear programming methods, multi-objective optimization, methods of discrete optimization, and nonlinear programming methods.

Prerequisite: MATH-253 with a minimum grade of C and MATH-339 with a minimum grade of C.

MATH-477. Risk Analysis. 3 Hours.

This course introduces students to the application of statistical analysis in economics using risk analysis. Students will use probability theory, probabilistic modeling, and statistical tools to analyze case studies and current research in risk analysis.

MATH-491. Independent Study In Mathematics. 1 Hour.

Individual investigation into a topic of interest of the student's choice.

MATH-492. Independent Study In Mathematics. 2 Hours.

(See MATH-491 for descriptions.).

MATH-493. Independent Study In Mathematics. 3 Hours.

(See MATH-491 for descriptions.).

MATH-495. Project In Mathematics. 3 Hours.

Students prepare a project involving both the theory and computational tools learned in their concentration. Students present both written and oral reports to the department.

MATH-5901. Thesis Hours. 1 Hour.

Guidance of students conducting research and writing a thesis to fulfill requirements for the Master of Science degree in Mathematics is conducted in this course. Students may register for 1-4 credits per term with 6 credits required for the thesis option of the Master of Science in Mathematics. All MATH-590 credits must be earned within the equivalent of 2 academic years.

MATH-5902. Thesis Hours. 2 Hours.

See course description for MATH-5901.

MATH-5903. Thesis Hours. 3 Hours.

See course description for MATH-5901.

Elementary Education and Humanities Mathematics Minor

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Elementary Education and Humanities Mathematics Minor

Master of Arts in Pedagogical Content Knowledge for Teaching Elementary and Middle School Mathematics

THIS PROGRAM IS NOT CURRENTLY ACCEPTING APPLICATIONS. PLEASE CONTACT DEPARTMENT FOR MORE INFORMATION.

The Department of Mathematics offers a Master of Arts (MA) degree in Pedagogical Content Knowledge for Teaching Elementary and Middle School Mathematics. This program is designed for teachers who wish to improve their level of competence in mathematics or wish to serve as Elementary or Middle School Mathematics Specialists, Coordinators of Elementary or Middle School Mathematics Programs, or Teachers of Elementary or Middle School Mathematics.

The MA program is mathematics-content oriented with a focus on content-specific pedagogy, mathematics teaching in diverse settings, and current Illinois educator and student standards. Students study elementary and middle school mathematics content from an advanced perspective, exploring the underlying concepts with the goal of improving their teaching of elementary and middle school mathematics. Successful completion of the program leads to a middle school mathematics endorsement. To complete the degree, students must complete 30 hours of coursework at the 400-level, a portfolio and exit exam. Students may complete the program in two years by enrolling in two courses during each of the Fall and Spring semesters and two courses in the intervening Summer. Admission preference will be given to applicants with teaching experience. Students interested in 9-12 mathematics endorsement should contact the program advisor for more information.

Requirements for Admission to the MA Program are:

1. Students must fulfill the requirements for admission to the College of Graduate Studies & Research.
2. Students must hold a current Illinois teaching license for teaching elementary or middle school.
3. Students must have successfully completed 6 or more credit hours of college mathematics content courses.
4. Application must include an essay (not to exceed 1000 words) describing a successful or unsuccessful elementary or middle grades mathematics lesson taught by the applicant. Essays must address mathematics content, teaching and learning.

Exit Requirements:

1. One semester prior to their anticipated graduation date, candidates should make an exit evaluation meeting with their program advisor to discuss upcoming exit requirement deadlines.
2. Upon completing MTHE-496, candidates should submit their portfolios for evaluation.
3. One semester prior to their anticipated graduation date, candidates should submit a copy of their results on either the Praxis® Middle School Mathematics Exam (5169) or the Illinois Subject Matter Test in Mathematics.

THIS PROGRAM IS NOT CURRENTLY ACCEPTING APPLICATIONS. PLEASE CONTACT DEPARTMENT FOR MORE INFORMATION.

Requirements for the Degree:

All courses are required. Note: the MATH prefix has changed to **MTHE** to avoid confusion with courses in the MS in Mathematics program. Students must have completed at least 24 program hours by the time they complete MTHE-496. Course sequence must be chosen in consultation with the MA advisor. All courses are 3 credit hours.

Total Hours		30

Master of Science in Mathematics

The M.S. program in Mathematics is designed to provide the mathematical background needed to pursue careers in applied mathematics, statistics, industry, and teaching. Students in the program have the option to concentrate in Applied Mathematics or Secondary Education. Applicants for the program must choose their concentration area when they submit their application for admission to the College of Graduate Studies and Research.

Each concentration includes the completion of 30 credit hours of approved coursework for the degree program and passing the M.S. Qualifying Examination.

M.S. Mathematics: Secondary Education Concentration.

Overview

The Master of Science in Mathematics (Secondary Education Concentration) prepares students to successfully teach mathematics at High School level. It is designed for teachers who wish to improve their level of competence in mathematics or wish to serve as High School Mathematics Specialists, or wish to teach mathematics at the High School level.

The program is for people who (1) are currently teaching mathematics in the High schools, or (2) plan to teach mathematics in the High schools, or (3) wish to switch careers and would like to obtain the M.S Degree in mathematics and also earn credits toward fulfilling the requirements for a High School Teaching Licensure.

M.S. MATHEMATICS: APPLIED MATHEMATICS CONCENTRATION.

OVERVIEW

The Master of Science in Mathematics (Applied Mathematics Concentration) is designed for those with a strong undergraduate background in mathematics who wish to better prepare themselves for careers that include statistics, applied mathematics, or who intend to pursue a Ph.D. degree at another institute. The program is designed so that the student can concentrate in an area of Applied Mathematics, Statistics, or Operation Research.

ADMISSIONS REQUIREMENTS

Admission to the M.S in Mathematics (Secondary Education Concentration)

1. Applicants must fulfill the requirements for admission to the College of Graduate Studies and Research. (i.e., have a B.A. / B.S. degree).
2. Applicants must have successfully completed 18 or more credit hours of College level Mathematics content courses that include Multivariable Calculus, Linear Algebra, and Discrete mathematics. Equivalent courses completed in other subject areas such as physics, engineering, business, computer sciences etc. may apply.

GRE: Not required

Admission to the M.S in Mathematics (Applied Mathematics Concentration)

1. Applicants must fulfill the requirements for admission to the College of Graduate Studies and Research. (i.e., have a B.A. / B.S. degree).
2. Applicants must have successfully completed at least six courses (i.e., 18 or more credit hours of College level Mathematics content courses) above Multivariable Calculus preferably including two of the following or their equivalent: Ordinary Differential Equations, Introduction to Numerical Analysis, Probability and Statistics, and Advanced Calculus.
3. Applicants are expected to be familiar with at least one mathematical or statistical computer package such as R, Maple, Minitab, Matlab, Mathematica, SPSS, SAS, etc.

GRE: Not required

M.S. Mathematics: Secondary Education Concentration.

Program of Study

The program consists of 10 courses (30 credit hours) to be chosen in consultation with the advisor. At least seven of the courses must be at the 400 level. With the approval of the Department of Mathematics, the program accepts transfer credits in accordance with university-wide graduate policy. The National Council of Teachers of Mathematics (NCTM) and the Mathematical Association of America (MAA) recommend that teachers of secondary school mathematics be knowledgeable in the contents of Probability and Statistics, Geometry, History of Mathematics and Foundations of Algebra.

Graduate Program Policies

The policies for the College of Graduate Studies and Research are found here (<http://catalog.neiu.edu/graduate-studies-research/graduate-policies/>).

Culminating/Capstone Experience Assessment

Students fulfill their culminating experience requirement for the program through demonstration of their abilities in solving problems (i.e., passing the Qualifying examination) and completing a project.

Students must complete:

1. Qualifying Examination for the M.S in Mathematics

Pass a written comprehensive examination that covers topics in the areas of Linear Algebra, Probability and Statistics, Elementary Analysis, and Mathematics Structures.

2. Project for the M.S in Mathematics (Secondary Education Concentration)

Complete a written project under the supervision of a faculty member while enrolled in Mathematics 495 [Project in Mathematics], or complete a 400 level Mathematics course with a project component, approved by the advisor. The students who enroll in Mathematics 495 must present an oral report to a committee consisting of at least three faculty members.

M.S. Mathematics: Applied Mathematics Concentration.

Program of Study

The program consists of 10 courses (30 credit hours) to be chosen in consultation with the advisor. At least seven of the courses must be at the 400 level. With the approval of the Department of Mathematics, the program accepts transfer credits in accordance with university-wide graduate policy.

Culminating/Capstone Experience Assessment

Students fulfill their culminating experience requirement for the program through demonstration of their abilities in solving problems (i.e., passing the Qualifying examination) and completing a project or thesis.

1. Qualifying Examination for the M.S in Mathematics

All students must pass a written comprehensive examination that covers topics in the areas of Linear Algebra, Probability and Statistics, Elementary Analysis, and Mathematics Structures. If a student has passed the first three actuary exams for the SOA or CAS, then they must show proof to the advisor and will be exempted from the Qualifying examination.

2. Project/Thesis for the M.S in Mathematics (Applied Mathematics Concentration)

Complete a written project or thesis under the supervision of a faculty member while enrolled in Mathematics 495 [Project in Mathematics] or MATH 590 [Thesis]. The student must present an oral report to a committee consisting of at least three faculty members.

In order to register for the project course MATH 495 or the thesis course MATH 590, students must submit a signed topic approval form with an abstract of the proposed research project. Students may register for 1-4 credits per term with 6 credits required for the thesis and 3 credits required for the project. All MATH 590 credits must be earned within the equivalent of 2 academic years.

Minor in Applied Mathematics

MATH-338	Introduction To Real Analysis	3
MATH-339	Vector Calculus	4
MATH-340	Computing For Mathematicians	4
MATH-343	Linear Algebra II	3
MATH-365	Statistical Computer And Data Analysis Packages	3

At least three classes in the minor must be taken at NEIU. Handbooks on all math minor programs are available from the Department of Mathematics.

Mathematical & Statistical Modeling of Complex Systems Minor

Mathematical and Statistical Modeling of Complex Systems Minor

This minor focuses on training students in current quantitative modeling techniques for understanding complex systems. Complex Systems is a field at the intersection of social, behavioral, and biomedical sciences studying how different parts of a system and its environment interact and give rise to the collective dynamics of the system. This minor program is designed to prepare students for careers, which apply quantitative methodology to government organization, industries and research involving complex behavior and biomedical fields. The courses required in the minor are interdisciplinary crossing mathematics with public health, biology, chemistry, psychology and sociology.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

- * Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.
- ** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Mathematical and Statistical Modeling of Complex Systems Minor

The program requires students to take 6 courses totaling 22-24 credit hours.

Code	Title	Hours
Required core courses		
MATH-187	Calculus I	4
MATH-202	Calculus II	4
MATH-275 or MATH-334	Applied And Computational Statistics (minor advisor consultation required, MATH-334 is 3 crs.) Mathematical Statistics I	4
MATH-370	Mathematical Modeling In The Natural Sciences	4
MATH-374	Modeling And Simulations Of Complex Systems Networks (or other modeling course recommended by the advisor)	4

Code	Title	Hours
Electives: At least one course from the following list:		
MATH-302	Ordinary Differential Equations II	
MATH-303	Partial Differential Equations	
MATH-304	Introduction To Numerical Analysis	
MATH-307	Introduction To Stochastic Processes	
MATH-324	Independent Study In Mathematics (minor advisor consultation required)	
MATH-336	Statistical Inference (only if not taken under Group A)	
MATH-340	Computing For Mathematicians (or other 300-level course approved by the advisor)	
Total Hours:		22-24

Mathematics Development

Freshman students are initially placed into mathematics courses by their MATH ACT scores, or the results of the NEIU Mathematics Placement Test, or by an appropriate score on the Advanced Placement Test in Calculus. Course work indicated by these standards is required.

Transfer students with a grade of "C" or higher from another college or university in a developmental course in "Intermediate Algebra" should contact the Mathematics Department as to whether this course would be recognized as a prerequisite for a college mathematics course at Northeastern.

Matthew Graham, Ph.D., Coordinator

Lidia Filus, Ph.D., Professor, Chair

MATH-090. Elementary Algebra. 3 Hours.

This course develops the foundations of algebra, beginning with the real number system and its operations. Topics include: variable expressions, linear equations, exponents and polynomials, applications of proportion, percent, and the use of formulas to develop problem solving skills. Freshman students are initially placed into mathematics courses by their MATH ACT scores, their NEIU Mathematics Placement Test scores, or by an appropriate score on the Advanced Placement Test in Calculus. (This course does not count toward graduation or GPA.).

Prerequisite: NEIU Math Placement Result 00 - 40 (or ACT Math 01 - 36 or Accuplacer Elementary Algebra 020 - 040 or SAT Math 200 - 800 or Accuplacer QR, Algebra, & Stat 200 - 300).

MATH-0901. Math Enrichment Workshop For Math 090. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-090. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard Math 090 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-090.

MATH-091. Intermediate Algebra I. 3 Hours.

This course develops the foundations of algebra, beginning with the real number system and its operations. Topics include: variable expressions, linear equations and systems of equations, exponents, polynomials, factoring trinomials, and solving equations by factoring. Freshman students are initially placed into mathematics courses by their MATH ACT scores, their NEIU Mathematics Placement Test scores, or by an appropriate score on the Advanced Placement Test in Calculus. (This course does not count toward graduation or GPA.).

Prerequisite: (MATH-090 or NEIU Math Placement Result 01 - 45 or ACT Math 17 - 18 or Accuplacer Elementary Algebra 041 - 059 or Accuplacer QR, Algebra, & Stat 237 - 249 or SAT Math 460 - 490).

MATH-0911. Math Enrichment Workshop For Math 091. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-091. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard Math 091 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-091.

MATH-092. Intermediate Algebra II. 3 Hours.

This course further develops the concepts and structures of intermediate algebra. A review of linear equations, polynomials, and factoring, prepares students for the study of linear, quadratic, exponential, and logarithmic equations and functions. Additional topics to prepare students for college algebra include: rational expressions and equations, complex numbers, rational exponents, graphing and applications of quadratic functions, and properties of logarithms. Freshman students are initially placed into mathematics courses by MATH ACT scores, NEIU Mathematics Placement Test scores, or by an appropriate score on the Advanced Placement Test in Calculus. (This course does not count toward graduation or GPA.).

Prerequisite: (MATH-091 - 499 or MATH-091A - 499Z or NEIU Math Placement Result 02 - 45 or ACT Math 19 - 36 or Accuplacer Elementary Algebra 060 - 084 or Accuplacer College Level Math 020 - 120 or Accuplacer Adv. Algebra & Func 200 - 300 or SAT Math 500 - 800).

MATH-0921. Math Enrichment Workshop For Math 092. 1 Hour.

Mathematics enrichment workshop for students currently enrolled in MATH-092. The workshops draw on the Peer Led Team Learning (PLTL) and Emerging Scholars Program (ESP) models, which have been nationally identified for increasing students' probability of earning higher grades in their required mathematics courses. Workshop participants will attend a workshop during the same day and time each week; collaboratively solve problems related to their standard Math 092 course within small peer groups; receive guidance from math instructors who are specially trained to facilitate the workshops; and participate in social events with workshop peers during the semester.

Corequisite: MATH-092.

MATH-097. Mathematical Literacy. 4 Hours.

Mathematical Literacy for College Students is a one semester course for non-math and non-science majors integrating numeracy, proportional reasoning, algebraic reasoning, and functions. Students will develop conceptual and procedural tools that support the use of key mathematical concepts in a variety of contexts. Throughout the course, college success content will be integrated with mathematical topics. Upon passing this course, one can enroll in Math 112 (Statistics) or Math 113 (Mathematical Reasoning). (This course is in place of the Math 091/092 sequence and has no college credit. This course does not count toward graduation or GPA).

Prerequisite: (MATH-090 - 499 or MATH-090A - 499Z or Accuplacer Elementary Algebra 041 - 120 or ACT Math 17 - 36 or Accuplacer QR, Algebra, & Stat 237 - 300 or SAT Math 460 - 800).

Music

The Department of Music at Northeastern Illinois University is committed to providing students with a solid foundation in Music and Dance that fosters equity, diversity, inclusion, quality, creativity, and access to opportunity. Our guiding principles are to provide a variety of experiences and programs which promote professionalism, human enrichment, and diverse cultural perspectives.

The Department of Music offers courses leading to the degrees of Bachelor of Arts, Bachelor of Music, Master of Arts, and to Teacher Licensure.

Undergraduate programs are available in:

- Bachelor of Music in Performance
- Bachelor of Music in K-12 Music Education: Vocal or Instrumental
- Bachelor of Arts in Music

Graduate program:

- Master of Arts in Applied Music Pedagogy

Minors are available in:

- Individualized Music Minor
- Music Education for Elementary Education Majors
- Individualized Dance Minor

Teacher Licensure Program

(See College of Education)

Undergraduate Admission

The Music Major curriculum is designed to begin the first term of the freshman year. Students intending to major in Music should contact the department to arrange an interview/audition for admission to the program. Email music@neiu.edu for more information. Accepted students should declare their major in Music in the first term of enrollment at the University. Students applying to the major must have a background which includes music reading ability and performance ability at the college level. Those without such a background will need to complete additional preparation for acceptance as a major which will extend the time to graduation.

Transfer students

Transfer students intending to major in Music should contact the department to arrange an interview/audition for admission to the program. Email music@neiu.edu for more information. Transfer students should request a departmental evaluation of transferred credits for acceptance toward the major or minor requirements during their first term of enrollment.

Teacher Licensure Program (TLP) for Post-Baccalaureate Students

This program is designed for returning students **with a degree in Music** who wish to obtain K-12 Music teaching licensure. The program is administered through the College of Education (See Special Licensure Programs in the Teacher Education section of this catalog). Once accepted into the program, students meet with the appropriate music advisor to determine required Music coursework to obtain state licensure. Students must pass an audition to enroll. Email music@neiu.edu for more information.

Program Advisors

Each Music Major, Minor, and Teacher Licensure Program student is assigned a faculty advisor who guides the student in selecting courses and in fulfilling academic and departmental requirements for graduation. Majors should obtain their advisor's approval for each semester prior to registration. Students must also be aware of the General Education requirements for the Bachelor's degree. All students must complete a minimum of 40 semester hours at the 300 level to graduate. Students must also complete 3 ELE courses.

Departmental Requirements

In addition to completing course requirements, Music Majors and Minors must fulfill departmental requirements for graduation.

Ensemble Requirement: Music Majors, Teacher Licensure Program, and Graduate students are required to participate in a large ensemble. Music Minors are encouraged to participate in large ensembles. Large ensembles are as follows:

- Wind, brass, and percussion students enroll in Band;
- String students enroll in Orchestra;
- Piano students enroll in Accompanying;
- Guitar students enroll in Guitar Ensemble;
- Voice students enroll in University Chorus, Chamber Singers, Opera Workshop, or Musical Theater (see Vocal Performance and Music Education programs for specific requirements).

Graduate and Teacher Licensure Program students must complete three semesters of a large ensemble. Undergraduates must participate in a large ensemble every semester they are enrolled in courses at NEIU except while student teaching. All scholarship students must participate in a large ensemble.

Concert Attendance: Recorded attendance at Department of Music sponsored events is required of all majors and minors. Music Majors must attend a total of 80 concerts, seventy of which must be Music Department concerts. Ten concerts from off-campus venues will be accepted with advisor approval. Music Minors must attend 20 music department concerts. Five concerts from off-campus venues will be accepted with advisor approval. Transfer students must attend the equivalent of 10 music department concerts per semester they are enrolled. Five concerts from off-campus venues will be accepted with advisor approval. Please consult with your advisor to determine the correct number of recitals required. It is the student's responsibility to submit and keep a copy of attendance validation records. Concerts in which the student participates/performs may be counted towards the attendance total; it is expected that these students attend the entire concert.

Convocation: Music Majors are required to attend Department of Music Special Convocations, which are scheduled during activity hour (Tuesday / Thursday 3:05 - 4:05 p.m.). Convocations are usually held 4 times a year (twice a semester). Students receive 2 Concert Attendance credits for attending the Convocations.

Applied Music: Students taking Applied Lessons must be Music Majors or Minors. Non-Major students registered in an ensemble may be considered for applied lessons. Music Education and Performance Majors are expected to audition for 300-level Applied Music upon achieving junior standing (60-89 hrs.). Music Education or Performance Majors failing to reach 300-level after the second attempt may be dropped from the Music Major program. All students will participate in small ensembles as part of the required Applied Lesson studio class. Students in Applied Lessons are not permitted to study simultaneously with two teachers in the same field.

Students must earn a grade of "C" or higher in all courses counted toward major or minor requirements.

AWARDS

Scholarships are available to outstanding students in Music and Dance. Undergraduate Talent Scholarships (tuition waivers) in Music and in Dance are awarded through audition. Qualified students must not hold a bachelor's degree. Graduate Scholarships are also available through audition. Complete information is available from the Department.

CONCERT SERIES

Approximately 100 afternoon and evening concerts are offered on-campus each year including:

- student recitals
- departmental concerts
- the Jewel Box Series
- the Ruth Page Dance Series
- Chicago Clarinet Ensemble
- Chicago Brass Festival
- Chicago Chamber Music Festival
- American Spanish Dance Festival
- Faculty Artist Series

Complete information is published in the Department of Music Concert Calendar and on the Music website.

PERFORMING GROUPS

A variety of instrumental and vocal ensembles perform in concerts both on and off-campus and rehearse on a regular basis throughout the year. The ensembles are open to university and community members with appropriate choral/instrumental/vocal experience; placement is done through an audition and a commitment to artistic performance is expected. Students may enroll for credit in a maximum of three ensembles per term.

LARGE ENSEMBLES INCLUDE:

- Band
- University Chorus
- Chamber Singers

- Opera/Workshop
- Guitar Ensemble
- Orchestra
- Music Theater
- Piano Accompanying

SMALL ENSEMBLES INCLUDE:

- Jazz Band
- Brass Ensemble
- String Ensemble
- Guitar Ensemble
- Chamber Ensemble
- Jazz Combo
- Woodwind Ensemble
- Percussion Ensemble
- Piano Four Hands

DANCE ENSEMBLE:

- Repertory Ensemble

COMPUTER/ELECTRONIC MUSIC AND TECHNOLOGY

Qualified students may enroll in courses utilizing the Computer/Electronic Music Studio, a facility equipped with professional quality MIDI and Digital Audio Workstations.

MULTIMEDIA LEARNING RESOURCES CENTER

The Multimedia Learning Resources Center is a Music study facility with computer assisted study materials, fully equipped listening stations and thousands of recordings and scores. The Multimedia Learning Resource Center is located on the third floor of the Ronald Williams Library.

NAFME

The NEIU Collegiate Chapter of the Music Educators National Conference provides opportunities for professional orientation and development, and opportunities to attend Music Education festivals, conventions and meetings.

NEIU BRASS CLUB

The NEIU Brass Club is open to all instrumentalists and exists to promote communication among brass players and to improve the artistic level of performance, teaching, and literature associated with brass players. The Brass Club supports departmental programs and sponsors activities that renew the fervor and importance of music in our lives.

- Major in Music (<http://catalog.neiu.edu/arts-sciences/music/music/>) (Bachelor of Music in Education or Performance)
- Major in Music (<http://catalog.neiu.edu/arts-sciences/music/major-music/>) (Bachelor of Arts)
- Minor in Music (<http://catalog.neiu.edu/arts-sciences/music/minor-music/>)
- Minor in Dance (<http://catalog.neiu.edu/arts-sciences/music/minor-dance/>)
- Master of Arts in Music (<http://catalog.neiu.edu/arts-sciences/music/master-arts-music/>)

Dance

DANC-101. The Dance Experience: Introduction To The Art Of Dance. 3 Hours.

A non-technical introduction to the art of dance designed to enhance appreciation of styles, tradition, history, choreography, aesthetics and personalities. Lectures, films, discussion and participatory classes.

DANC-109. First Year Experience: Steppin' Out: Dance In Chicago. 3 Hours.

A course designed to increase the student's awareness, understanding and enjoyment of a variety of styles of aesthetic/theatrical dance. The course incorporates both movement and non-movement based approaches to learning about dance as an art form, and will focus on learning about ballet, modern, jazz and ethnic dance through lectures, discussions, films, the attendance of outside performances, and written assignments. In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the field specific concepts in dance.

DANC-131. Introduction To Spanish Dance. 3 Hours.

This course is an introduction to the three styles of Spanish dance: Classical, Regional and Flamenco with emphasis on basic technique, and on Spain's varied music from the 13th through 21st centuries.

DANC-161. Spanish Dance I. 2 Hours.

This course is open to beginning students as a continuation of DANC-131 with an emphasis on the mastery of four important repertory styles and their dances: Classical, Regional, Flamenco, and Escuela Bolera. The course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-131 with a minimum grade of C.

DANC-203U. Field Experiences:Dance In Chicago I. 3 Hours.

Field experience in studios or schools. Detailed information is available in the departmental office.

DANC-203V. Field Experiences:Dance In Chicago II. 3 Hours.

Advanced field experience in studios or schools. Detailed information is available in the departmental office.

DANC-203W. Field Experiences:Hispanic Dance I. 3 Hours.

Hispanic dance field experience in studios or schools. Detailed information is available in the departmental office.

DANC-204. Dance Performance Ensemble. 2 Hours.

This course is open to enrolled students with beginning to intermediate skills in dance technique (ballet, modern, jazz or combination). The course is repeatable up to 3 times for credit towards graduation.

DANC-251. Modern Dance I. 2 Hours.

This course is open to beginning students as an introduction to the fundamental theories and techniques of modern dance. It is an exploration of movement as an art form, emphasizing body alignment, strength, flexibility and musicality. The course is repeatable up to 3 times for credit towards graduation.

DANC-254. Modern Dance II. 2 Hours.

This course is open to intermediate students as a continuation of concepts explored in DANC-251. The course emphasizes coordination, balance, locomotor phrases, and improvisation. The course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-251 with a minimum grade of C.

DANC-255. Jazz Dance I. 2 Hours.

This course is open to beginning students as an introduction to fundamental techniques of jazz dance. The course emphasizes musicality, posture and coordination through theatrical and classical styles. The course is repeatable up to 3 times for credit towards graduation.

DANC-256. Ballet I. 2 Hours.

This course is open to beginning students as an introduction to fundamental ballet concepts, movement vocabulary and basic terminology. The course emphasizes body alignment, coordination, strength and flexibility. The course is repeatable up to 3 times for credit towards graduation.

DANC-261. Spanish Dance II. 2 Hours.

This course is open to intermediate students as a continuation of concepts explored in DANC-161. Students will further explore the Classical, Regional, Flamenco, and Escuela Bolera styles with an emphasis on mastery of technique, music, and theatrical history. The course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-161 with a minimum grade of C.

DANC-351. Modern Dance III. 3 Hours.

This course is open to advanced students as a continuation of concepts explored in DANC-254 utilizing elements of Graham, Limon and Cunningham Techniques. The course emphasizes movement quality, efficiency, power, and performance skills through varied styles of progressions and center work. The course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-254 with a minimum grade of C.

DANC-355. Jazz Dance II. 2 Hours.

This course is open to intermediate students as a continuation of jazz dance techniques explored in DANC-255. Students will gain a greater understanding and expression of more refined classical, theatrical, and street techniques with increasing agility, coordination, flexibility, and stylized combinations. The course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-255 with a minimum grade of C.

DANC-356. Ballet II. 2 Hours.

This course is open to intermediate students as a continuation of ballet techniques, movement vocabulary and terminology explored in DANC-256. The course emphasizes control, speed, coordination, balance, and ballet combinations through adagio, allegro, and center work. The course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-256 with a minimum grade of C.

DANC-357. Ballet III. 2 Hours.

This course is open to advanced students as a continuation of the ballet techniques, movement vocabulary and terminology explored in DANC-356. Students will learn greater development of speed, coordination, balance, movement quality and performance skills through adagio, allegro, and center work. The course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-356 with a minimum grade of C.

DANC-360. Dance Composition. 3 Hours.

This course addresses practical aspects of dance creation and design as well as theoretical aspects of dance as an art and form of communication. The creation of choreographic studies is required. The course is repeatable up to 2 times for credit towards graduation.

Prerequisite: DANC-204 with a minimum grade of C or DANC-261 with a minimum grade of C or DANC-390B with a minimum grade of C or DANC-390D with a minimum grade of C or DANC-390E with a minimum grade of C.

DANC-365. Dance Production. 3 Hours.

This course covers the practical aspects of production principles including budgets, timelines, marketing, costuming, make-up and lighting for dance.

DANC-370. Musical Resources For Dance. 3 Hours.

Music sources of particular interest to the dancer and choreographer from primitivism to trends in new music. Students develop research techniques and resource files in major areas: jazz, ballet, modern and world music forms, new music, etc.

DANC-371. Theory And Philosophy Of Dance And The Related Arts. 3 Hours.

The nature of dance and its historical interrelatedness with other art forms: poetry, drama (opera), painting and music; the role of the critic.

DANC-380. Contemporary Dance Education. 3 Hours.

This courses addresses the practical aspects of the theory and application of educational methods to the field of dance in various settings, such as conservatory, community and age-specific interest groups.

DANC-382. Dance Management And Grantsmanship. 3 Hours.**DANC-390B. Seminar In Dance Performance: Jazz Dance. 3 Hours.**

This course is open to advanced students as a continuation of jazz techniques and styles explored in DANC-355. This course provides students with practical experience in the area of Jazz dance technique, movement development and expressive movement performance while integrating and maintaining correction. The course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-355 with a minimum grade of C.

DANC-390D. Seminar In Dance Performance: Spanish Dance. 3 Hours.

This course is open to advanced students as a continuation of DANC-261. This course provides students with practical experience via the study and rehearsal of Spanish dance technique, styles, choreographic works and history. Students will focus on the professional expectations of the field through regular class instruction, performance, lectures and films. The course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-261 with a minimum grade of C.

DANC-390E. Seminar In Dance Performance: Styles. 3 Hours.

This course is designed to provide students with practical experience in the areas of dance technique, movement development, and expressive movement performance. The goal of the course is to provide students with the opportunity to improve their ability to integrate and maintain correction in the areas of technique and movement development. Course is repeatable up to 3 times for credit towards graduation.

Prerequisite: DANC-204 with a minimum grade of C or DANC-254 with a minimum grade of C or DANC-261 with a minimum grade of C or DANC-355 with a minimum grade of C or DANC-356 with a minimum grade of C or DANC-357 with a minimum grade of C.

DANC-391. Internship In Dance. 3 Hours.

Practicum in art agencies, dance companies, community organizations or arts-related industries designed by the student, a dance faculty advisor and generally an off-campus agent.

Music

MUS-101. The Musical Experience. 3 Hours.

A non-technical course designed to increase the listener's understanding and enjoyment of music. Not applicable towards music major or minor requirements.

MUS-103. Basic Materials In Sight Reading. 1 Hour.

This course is designed to develop the foundations of sight reading and increase the first year music student's awareness, understanding and enjoyment of sight reading through practical application exercises and lectures. Students will learn the basics of reading and writing music, sight reading and beginning music theory. Practice and application of sight reading techniques, ear training procedures and related aural and oral skills will be emphasized. This course is designed for students at the beginning level, as determined by a placement exam administered to all music major students at the beginning of the semester.

MUS-104. Music Concepts: An Introduction. 3 Hours.

Elements of music, forms and styles; lectures, discussions, readings, recordings and attendance at musical performances. Open to all students; recommended for prospective majors and required for Elementary Education majors.

MUS-105. Basic Materials In Music Theory. 3 Hours.

MUS-105 Basic Materials in Music Theory, 3 cr. Introduction to notation and perception of pitch and rhythm, including: intervals, triads, scales, meter, and key signatures, time signatures, and basic concepts of sight singing and ear training. Recommended as a remedial course for prospective majors whose music theory skills need enhancement in order to qualify for enrollment in MUS-121, Music Theory 1.

MUS-106. Orientation To Music Education. 1 Hour.

A broad view of Music Education in Public School K-12 is required of all Music Education majors. Included are visits to all levels of music instruction in local schools. This course is designed to help students decide whether Music Education K-12 is the appropriate career choice and what the total job entails.

MUS-109. First Year Experience:Chi-Tunes: Music In Chicago. 3 Hours.

In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the field specific concepts and terminology of music. This course is designed to increase the first year student's awareness, understanding and enjoyment of a variety of musical styles through attending live performances. Students will learn the basics of reading and writing music, music history, and music's place in society and culture through pre and post concert discussions.

MUS-110. Class Voice I. 2 Hours.

For beginning students in voice; fundamentals of vocal technique.

MUS-111. Class Voice II. 2 Hours.

Continuation of MUS-110.

Prerequisite: MUS-110 with a minimum grade of C.

MUS-112. Class Piano I. 1 Hour.

Open to all students. Class Piano I is an introduction to keyboard techniques and concepts essential to the development of proficiency at the piano and other keyboard instruments. Topics include: Keyboard topography, foundations of technique, playing "by ear," improvisation, major scales & arpeggios, note and rhythm reading notation on the grand staff, primary chords, harmonization, transposition, solo and ensemble playing, and practice strategies. Requires outside-of-class practice at a piano or electronic keyboard instrument.

MUS-113. Class Piano II. 1 Hour.

This course is a continuation of MUS-112. Students will learn expanded theoretical concepts and keyboard techniques. Topics will include minor scales and arpeggios, harmonization and transposition using secondary chords. This course requires outside-of-class practice at a piano or electronic keyboard instrument.

Requirement: or a passing the Level 1 piano proficiency assessment

Prerequisite: MUS-112 with a minimum grade of C.

MUS-114. Class Piano III. 1 Hour.

This course is a continuation of MUS-113. Topics will include choral and instrumental score reading, intermediate level solo and ensemble repertoire, harmonization, using seventh chords and secondary dominants and performing from lead sheets. This course requires outside-of-class practice at a piano or electronic keyboard instrument.

Requirement: or passing the Level 1 piano proficiency assessment

Prerequisite: MUS-113 with a minimum grade of C.

MUS-115. Instrumental Music Studies Brass Instruments. 1 Hour.

Introduction to the techniques and skills of playing brass instruments. Care and maintenance. Study and evaluation of the music literature available for the various brass instruments.

Prerequisite: MUS-121 with a minimum grade of C.

MUS-116. Instrumental Music Studies Percussion Instruments. 1 Hour.

Introduction to the techniques and skills of playing percussion instruments. The use of percussion instruments in various types of instrumental ensembles.

Prerequisite: MUS-121 with a minimum grade of C.

MUS-117. Instrumental Music Studies String Instruments. 1 Hour.

Introduction to the techniques and skills of playing string instruments. Care and maintenance. Study and evaluation of the music literature available for the various string instruments.

Prerequisite: MUS-121 with a minimum grade of C.

MUS-118. Instrumental Music Studies Woodwind Instruments I. 1 Hour.

Introduction to the techniques and skills of playing flute and clarinet. Care and maintenance of the instruments as well as study and evaluation of the music literature available for the instruments.

Prerequisite: MUS-121 with a minimum grade of C.

MUS-119. Instrumental Music Studies: Woodwind Instruments II. 1 Hour.

Introduction to the techniques and skills of playing oboe, bassoon, and saxophone. Care and maintenance of the instruments as well as study and evaluation of the music literature available for the instruments.

Prerequisite: MUS-121 with a minimum grade of C.

MUS-120. Class Guitar I. 2 Hours.

Basic skills in guitar; basic chords and chord progressions, strumming techniques, playing a simple melodic line, and reading guitar tablature as well as standard musical notation.

MUS-121. Music Theory I. 3 Hours.

Study of harmonic materials in tonal music and standard notational practice. Includes written and aural skills development. Structure, doubling, spacing, voice-leading, triads and inversions. Placement testing or consent of instructor.

MUS-122. Music Theory II. 3 Hours.

Continuation of MUS-121. Advancing written and aural skills. Phrase structure, cadences, harmonic progression, harmonization techniques, nonharmonic tones.

Prerequisite: MUS-121 with a minimum grade of C.

MUS-123. Class Guitar II. 2 Hours.

Continuation of MUS-120. More complex and varied chord formations and strumming techniques; note reading of more difficult melodic lines; basics of classical guitar technique.

Prerequisite: MUS-120 with a minimum grade of C.

MUS-124. Sight Singing And Ear Training I. 1 Hour.

Practice and application of sight-singing techniques, ear training procedures and related aural/oral skills.

Prerequisite: MUS-121 with a minimum grade of C and MUS-122 with a minimum grade of C.

MUS-125. Sight Singing And Ear Training II. 1 Hour.

Continuation of MUS-124.

Prerequisite: MUS-124 with a minimum grade of C.

MUS-150A. Applied Music: Flute. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-150B. Applied Music: Oboe. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-150C. Applied Music: Clarinet. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-150D. Applied Music: Saxophone. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-150E. Applied Music: Bassoon. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-150F. Applied Music: French Horn. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-150G. Applied Music: Trumpet. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-150H. Applied Music: Euphonium. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-152Z. Applied Music: Jazz Voice. 2 Hours.

One-hour weekly lesson for performance majors. Individual study in voice or any instrument for development of performing skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied music studio class. Students taking Applied Lessons must be music majors, minors or registered in an ensemble. Consent of instructor or department chairperson.

MUS-201. Music Theory III. 3 Hours.

Study of seventh chords, secondary dominants, altered nonharmonic tones, modulation, borrowed chords, augmented sixth chords. Advancing analytical and written skills.

Prerequisite: MUS-122 with a minimum grade of C.

MUS-202. Music Theory IV. 3 Hours.

Writing and analysis. Study of Neapolitan sixth; diminished sevenths; altered dominants; chromatic mediant; modulation to foreign keys; ninth, eleventh and thirteenth chords.

Prerequisite: MUS-201 with a minimum grade of C.

MUS-210. Diction For Singers I. 2 Hours.

Introduction to proper pronunciation of English and Italian texts in classical vocal music. Use of the International Phonetic Alphabet symbols applied to the singing of songs and arias.

Prerequisite: MUS-122 with a minimum grade of C.

MUS-211. Diction For Singers II. 2 Hours.

Introduction to proper pronunciation of German and French texts in classical vocal music. Use of the International Phonetic Alphabet symbols applied to the singing of songs and arias.

Prerequisite: MUS-122 with a minimum grade of C.

MUS-221. Concert Choir. 1 Hour.

Vocal ensemble open to enrolled students. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-221A. University Chorus. 1 Hour.

Vocal ensemble open to enrolled students. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-222A. Vocal Ensemble: Chamber Singers. 1 Hour.

Vocal ensemble open to enrolled students. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-222C. Vocal Ensemble: Opera Workshop. 1 Hour.

A practical workshop in learning and performing opera repertoire. Explore the art of singing and acting through research, preparation and performance of opera scenes or a complete opera production. Open to enrolled students. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-222D. Vocal Ensemble: Music Theater. 1 Hour.

A practical workshop in learning and performing musical theater repertoire. Explore the art of singing and acting through research, preparation and performance of a complete musical theater production. Open to enrolled students. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-222E. Vocal Ensemble: Music Production. 1 Hour.

A practical course in learning and executing the technical aspects of a full music theater/opera production. This course will encompass, but is not limited to: staging, costume design, set design and construction, lighting design and execution, props, wigs, make-up and stage crew.

MUS-226. Orchestra. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-231. Band. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-231A. Wind Band. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-234A. Instrumental Ensemble: Brass. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-234B. Instrumental Ensemble: Percussion. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-234C. Instrumental Ensemble: Strings. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-234D. Instrumental Ensemble: Woodwinds. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-234E. Instrumental Ensemble: Accompanying. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-234F. Instrumental Ensemble: Piano Music For Four Hands. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-234M. Instrumental Ensemble: Guitar. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-235A. Instrumental Ensemble: Jazz Band. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-235B. Instrumental Ensemble: Jazz Combo. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor required.

MUS-301. Counterpoint I. 3 Hours.

Writing in two parts in various styles and modes, study of species and modal procedures. .

Prerequisite: MUS-201 with a minimum grade of C.

MUS-302. Counterpoint II. 3 Hours.

Writing in two parts in various styles and modes, study of species and modal procedures.

Prerequisite: MUS-301 with a minimum grade of C.

MUS-305. Form And Analysis I. 3 Hours.

Structural and stylistic features in their musical context; motif, phrase and period; binary and ternary form, theme and variations, rondo, sonata form and unique forms.

Prerequisite: MUS-202 with a minimum grade of C.

MUS-306. Form And Analysis II. 3 Hours.

Structural and stylistic features in their musical context, early to contemporary polyphonic forms, multi-movement forms. electronic music, aleatoric music. Consideration of several approaches to structural analysis.

Prerequisite: MUS-305 with a minimum grade of C.

MUS-307. Class Composition. 3 Hours.

Composition and performance of students' original works.

MUS-308. Orchestration. 3 Hours.

Instrumental timbres and the capabilities of instruments; scoring for instruments in a variety of combinations, including the orchestra and instrumental vocal combinations.

Prerequisite: MUS-202 with a minimum grade of C.

MUS-312. Writing Intensive Program: Beethoven. 3 Hours.

This seminar explores major issues in Beethoven study through the most relevant literature concerning Beethoven's life, musical style, aesthetics, influence on the next generation of composers, and the socio-cultural forces responsible for shaping his ideas and music. Students will carry out individualized research projects culminating in a research paper, as well as completing reading reports, keeping a listening journal, and analyzing the music studied in class.

Prerequisite: MUS-122 with a minimum grade of C and ENGL-101 with a minimum grade of C and MUS-203 with a minimum grade of C and (MUS-204 with a minimum grade of C or MUS-205 with a minimum grade of C).

MUS-317. Music Of The Romantic Era. 3 Hours.

Consideration from a historical point of view of structural, stylistic and formal aspects of the musical art of the Romantic era.

Prerequisite: MUS-122 with a minimum grade of C and MUS-203 with a minimum grade of C and (MUS-204 with a minimum grade of C or MUS-205 with a minimum grade of C).

MUS-318. Music Of The Twentieth Century. 3 Hours.

Consideration from a historical point of view of structural, stylistic and formal aspects of the musical art of the twentieth century.

Prerequisite: MUS-122 with a minimum grade of C and MUS-203 with a minimum grade of C and MUS-204 with a minimum grade of C and MUS-205 with a minimum grade of C.

MUS-320. Independent Study In Music. 1 Hour.

Consent of instructor, department Chair and College Dean.

MUS-321D. Writing Intensive Program: Seminar In Music History: Stravinsky. 3 Hours.

This seminar explores major issues in Stravinsky study through the most relevant literature concerning Stravinsky's life, musical style, aesthetics, impact on the development of twentieth-century music, and the socio-cultural forces responsible for shaping his ideas and music. Students will carry out individualized research projects culminating in a research paper, as well as completing reading reports, keeping a listening journal, and analyzing the music studied in class.

Prerequisite: MUS-202 with a minimum grade of C and MUS-203 with a minimum grade of C and MUS-204 with a minimum grade of C and MUS-205 with a minimum grade of C and ENGL-101 with a minimum grade of C.

MUS-321F. Seminar In Music History: Jazz. 3 Hours.

This seminar explores major issues in the history of jazz through most the relevant literature concerning development, musical style and prominent musicians through reading, listening and analyzing music, discussions over the reading material, and through individualized research projects.

MUS-322. Independent Study In Music. 3 Hours.

Consent of instructor, department Chair and College Dean.

MUS-323. Music Of The Renaissance Era. 3 Hours.

Consideration from a historical point of view of structural, stylistic and formal aspects of the musical art of the Renaissance Era.

Prerequisite: MUS-122 with a minimum grade of C and MUS-203 with a minimum grade of C and MUS-204 with a minimum grade of C or MUS-205 with a minimum grade of C.

MUS-324. Independent Study In Music. 2 Hours.

Consent of instructor, department Chair and College Dean.

MUS-325A. Performance Seminar: Brass. 2 Hours.

Performance and critical analysis of performances based upon stylistic, structural, and technical factors. Enrollment in applied lessons and consent of instructor.

MUS-325B. Performance Seminar: Piano. 2 Hours.

Performance and critical analysis of performances based upon stylistic, structural, and technical factors. Enrollment in applied lessons and consent of instructor.

MUS-325C. Performance Seminar: Strings. 2 Hours.

Performance and critical analysis of performances based upon stylistic, structural, and technical factors. Enrollment in applied lessons and consent of instructor.

MUS-325D. Performance Seminar: Wind Instruments. 2 Hours.

Performance and critical analysis of performances based upon stylistic, structural, and technical factors. Enrollment in applied lessons and consent of instructor.

MUS-325E. Performance Seminar: Voice. 2 Hours.

Performance and critical analysis of performances based upon stylistic, structural, and technical factors. Enrollment in applied lessons and consent of instructor.

MUS-326. Songwriting. 3 Hours.

Techniques of songwriting; consideration and analysis of classical and folk song models; emphasis on writing lyrics, melody and accompaniment.

MUS-327A. Repertoire Seminar: Piano. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-327B. Repertoire Seminar: Strings. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-327C. Repertoire Seminar: Winds. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-327D. Repertoire Seminar: Voice. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-327E. Repertoire Seminar: Choral. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-327F. Repertoire Seminar: Brass. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-327G. Repertoire Seminar: Percussion. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-328A. Repertoire Seminar: Piano. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-328B. Repertoire Seminar: Strings. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-328C. Repertoire Seminar: Winds. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-328D. Repertoire Seminar Varies: Voice. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-328E. Repertoire Seminar: Choral. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-328F. Repertoire Seminar: Brass. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-328G. Repertoire Seminar: Percussion. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied. 300-level in applied lessons or consent of instructor required.

MUS-329. Advanced Conducting. 2 Hours.

Prerequisite: MUS-223 with a minimum grade of D or MUS-224 with a minimum grade of D.

MUS-330. Music Technology Seminar: Current Topics. 3 Hours.

A survey of the latest developments in music technology designed to keep today's musician up-to-date with current trends and applications, new gear and instruments, software upgrades and other current topics. Includes demonstrations and hands-on experience in the Computer/Electronic Music Lab.

MUS-331A. Applied Music Pedagogy I: Piano. 3 Hours.

Methods of teaching applied music for prospective and experienced teachers. 300 level in applied lessons and consent of instructor.

MUS-331B. Applied Music Pedagogy I: Strings. 3 Hours.

Methods of teaching applied music for prospective and experienced teachers. 300 level in applied lessons and consent of instructor.

MUS-331C. Applied Music Pedagogy I: Brass. 3 Hours.

Methods of teaching applied music for prospective and experienced teachers. 300 level in applied lessons and consent of instructor.

MUS-331D. Applied Music Pedagogy I: Woodwinds. 3 Hours.

Methods of teaching applied music for prospective and experienced teachers. 300 level in applied lessons and consent of instructor.

MUS-331E. Applied Music Pedagogy I: Voice. 3 Hours.

Methods of teaching applied music for prospective and experienced teachers. 300 level in applied lessons and consent of instructor.

MUS-331F. Applied Music Pedagogy I: Percussion. 3 Hours.

Methods of teaching applied music for prospective and experienced teachers. 300 level in applied lessons and consent of instructor.

MUS-332A. Applied Music Pedagogy II: Piano. 2 Hours.

A practicum for implementing the methods of teaching applied music learned in MUS-331.

Prerequisite: MUS-331 with a minimum grade of C.

MUS-332B. Applied Music Pedagogy II: Strings. 2 Hours.

A practicum for implementing the methods of teaching applied music learned in MUS-331.

Prerequisite: MUS-331 with a minimum grade of C.

MUS-332C. Applied Music Pedagogy II: Brass. 2 Hours.

A practicum for implementing the methods of teaching applied music learned in MUS-331.

Prerequisite: MUS-331 with a minimum grade of C.

MUS-332D. Applied Music Pedagogy II: Woodwinds. 2 Hours.

A practicum for implementing the methods of teaching applied music learned in MUS-331.

Prerequisite: MUS-331 with a minimum grade of C.

MUS-332E. Applied Music Pedagogy II: Voice. 2 Hours.

A practicum for implementing the methods of teaching applied music learned in MUS-331.

Prerequisite: MUS-331 with a minimum grade of C.

MUS-332F. Applied Music Pedagogy II: Percussion. 2 Hours.

A practicum for implementing the methods of teaching applied music learned in MUS-331.

Prerequisite: MUS-331 with a minimum grade of C.

MUS-333. Internship In Music. 3 Hours.

Field experience in schools, community organizations or industry. Detailed information is available in the departmental office. Departmental approval required.

MUS-334. Basic Conducting. 2 Hours.

Basic techniques of conducting: meter, dynamics, cuing, etc., applicable to both instrumental and choral conducting. Serves as prerequisite to specialized Instrumental and Choral Conducting courses.

Prerequisite: MUS-122 with a minimum grade of C.

MUS-335. Choral Conducting. 2 Hours.

Choral conducting techniques; ability to read and analyze choral scores; choral repertoire.

Prerequisite: MUS-122 with a minimum grade of D.

MUS-336. Instrumental Conducting. 2 Hours.

Techniques of conducting and score reading; rehearsal techniques and interpretation.

Prerequisite: MUS-122 with a minimum grade of D.

MUS-339. Senior Project. 1 Hour.

A culminating Project presented after the Bachelor of Arts in Music Major reaches their senior year. The Project topic must be approved by the Applied Instructor and Advisor as appropriate to the culminating genre of the student's focus. Format style may include, but is not limited to: Research Paper, Lecture Demonstration, Composition(s) (submitted and/or performed), or Recital. Students that choose to give a formal Recital performance must be at the 300-level in Applied Lessons. Students select a committee of three faculty members, in conjunction with, their applied instructor. The student must pass a hearing before a public presentation is given.

Requirement: a minimum of 4 semesters of Applied Lessons (MUS150 or MUS350).

MUS-340. Junior Recital. 1 Hour.

A formal 1/2 hour recital given after the music performance major reaches the 300 level in applied instruction and during their junior year. Students select a recital committee of three faculty members including, and in conjunction with, their applied instructor. The student must pass a hearing presented to the recital committee before the recital is given. Once the recital is presented, a grade of pass or fail will be determined by the recital committee.

MUS-341. Senior Recital. 1 Hour.

A formal recital of 50 minutes of music given after the music performance major reaches the-300 level in applied instruction and during their senior year. Students select a recital committee of three faculty members including, and in conjunction with, their applied instructor. The student must pass a hearing presented to the recital committee before the recital is given. Once the recital is presented, a grade of pass or fail will be determined by the recital committee.

MUS-342. World Music. 2 Hours.

A study of world music and various cultures for use by music education students in the classroom. Students experience world music through performance on ethnic instruments, listening to recordings of authentic music, as well as map study, and attendance at live performances. Students develop and implement lesson plans at various levels of music instruction.

Prerequisite: MUS-202 with a minimum grade of C.

MUS-343. Music Before 1600. 3 Hours.

Survey of musical styles, types and forms from Gregorian Chant through the Renaissance.

Prerequisite: MUS-121 with a minimum grade of C.

MUS-344. Music From 1600 Through Beethoven. 3 Hours.

Survey of musical styles, types and forms in representative composers of the Baroque and Classical Periods.

Prerequisite: MUS-121 with a minimum grade of C.

MUS-345. Music After Beethoven. 3 Hours.

Survey of musical styles, types and forms in representative composers of the Romantic Period, the Twentieth Century, and Global Music. By consent of instructor.

Prerequisite: MUS-121 with a minimum grade of C.

MUS-350A. Applied Music: Flute. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-350B. Applied Music: Oboe. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-350C. Applied Music: Clarinet. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-350D. Applied Music: Saxophone. 1 Hour.

Individual study in voice or instrument for the development of performing skills and musical understanding; knowledge of the repertoire at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied lesson studio class. Students taking applied lessons at this level must be music majors, minors, or registered in an ensemble. Consent of instructor and department chairperson.

MUS-352Y. Applied Music: Jazz Guitar. 2 Hours.

One-hour weekly lesson for performance majors. Individual study in voice or any instrument for development of performing skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied music studio class. Students taking Applied Lessons must be music majors, minors or registered in an ensemble. Consent of instructor or department chairperson required.

MUS-352Z. Applied Music: Vocal Coaching. 2 Hours.

One-hour weekly lesson for performance majors. Individual study in voice or any instrument for development of performing skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate level of performing ability. Students will participate in small ensembles as part of the applied music studio class. Students taking Applied Lessons must be music majors, minors or registered in an ensemble. Consent of instructor or department chairperson required.

MUS-391. Contemporary Music Education - Grades K-6. 3 Hours.

This course is designed for music education students and includes a study of philosophy, methods, materials, and assessment techniques suitable for developing music potential in elementary school-aged children. Special areas of focus include long and short term lesson planning, sequencing concepts and skill, ethnic music, music in Special Education, and assessment correlated with State and National Standards for Arts Education.

Prerequisite: MUS-202 with a minimum grade of C.

MUS-393L. Clinical Field Experience. 2 Hours.

A supervised clinical experience designed with less emphasis on observational experiences and more on direct involvement with the instructional process. Requires 100 hours experience with a broad range of students. Taken with TED SCED-303I and 303V. Completion of all education courses required.

Prerequisite: MUS-391 with a minimum grade of C.

MUS-396A. Practicum In Music: Chamber Music. 1 Hour.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-396B. Practicum In Music: Computer Music. 1 Hour.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-396D. Practicum In Music: Choral Music. 1 Hour.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-396K. Practicum In Music: Orchestra. 1 Hour.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-397A. Practicum In Music: Chamber Music. 2 Hours.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-397B. Practicum In Music: Computer Music. 2 Hours.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-397C. Practicum In Music: Computerized Notation. 2 Hours.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-397K. Practicum In Music: Orchestra. 2 Hours.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-398A. Practicum In Music: Chamber Music. 3 Hours.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-398B. Practicum In Music: Computer Music Studio. 3 Hours.

The course addresses a broad range of technical and aesthetic issues relevant to the creation of music and artistic manipulation of sound. The course combines theoretical, conceptual and practical information with hands-on experience with software and hardware. Students design and realize projects in consultation with the instructor for presentation in class or public forum. Projects may incorporate elements of audio recording, audio editing, MIDI, sound synthesis, sound design, combined media or other innovative concepts which develop as technology and the arts combine.

MUS-398K. Practicum In Music: Orchestra. 3 Hours.

The purpose of this course is to give the student an opportunity to explore and perform this selected topic in music. Consent of instructor required.

MUS-405. Form and Analysis. 3 Hours.

This course focuses upon advanced analysis of linear, vertical and structural dimensions of western music. Large and small scale works from various historical periods and for a variety of media will be considered. Procedures as appropriate to style and period will be applied with an emphasis upon development of analytical skill as an interpretive tool leading to more insightful performance.

MUS-411. Vocal Ensemble: Chorus. 1 Hour.

The University Chorus is a large choral ensemble which explores the great choral literature from the Middle-Ages and Renaissance periods to the present day in preparation for public and school performances. Emphasis is on choral rehearsal techniques, appropriate vocal technique, historical performance practice for the works being prepared and research on composers and compositions being studied.

MUS-412. Chamber Singers. 1 Hour.

Chamber singers explores the art of ensemble singing through the preparation and performance of choral literature composed for a smaller ensemble. Emphasis is on choral rehearsal techniques, appropriate vocal technique and performance practice for the works being prepared, as well as research about the composers and the compositions being prepared.

MUS-413. Opera Workshop. 1 Hour.

A practical workshop in learning and performing opera literature and exploring the art of singing opera through research, preparation and performance of scene excerpts and complete opera productions. Graduate students are expected to sing the leading roles and/or assist the director in staging, managing and research.

MUS-414. Musical Theater. 1 Hour.

A practical workshop in learning and performing musical theater repertoire and exploring the art of singing and acting through research, preparation and performance of a complete musical theater production. Graduate students are expected to sing the leading roles and/or assist the director in staging, managing and research.

MUS-415. Music Production. 1 Hour.

A practical course in learning and executing the technical aspects of a full music theater/opera production. This course will encompass, but is not limited to: staging, costume design, set design and construction, lighting design and execution, props, wigs, make-up and stage crew.

MUS-416. Seminar In Music History: Beethoven. 3 Hours.

This seminar explores major issues in Beethoven study through the most relevant literature concerning Beethoven's life, musical style, aesthetics, influence on the next generation of composers, and the socio-cultural forces responsible for shaping his ideas and music. Students will carry out individualized research projects culminating in a research paper, as well as completing reading reports, keeping a listening journal, and analyzing the music studied in class.

MUS-417. Seminar In Music History: Stravinsky. 3 Hours.

This seminar explores major issues in Stravinsky study through the most relevant literature concerning Stravinsky's life, musical style, aesthetics, influence on the next generation of composers, and the socio-cultural forces responsible for shaping his ideas and music. Students will carry out individualized research projects culminating in a research paper, as well as completing reading reports, keeping a listening journal, and analyzing the music studied in class.

MUS-420. Independent Study In Music. 1 Hour.

Individual investigation into a topic of the student's choice. Consent of instructor, department Chair and College Dean.

MUS-421. Independent Study In Music. 2 Hours.

(See MUS-420 for description.).

MUS-421A. Independent Study In Music. 2 Hours.

(See MUS-420 for description.).

MUS-421B. Independent Study In Music. 2 Hours.

(See MUS-420 for description.).

MUS-422. Independent Study In Music. 3 Hours.

(See MUS-420 for description.).

MUS-422A. Independent Study In Music. 3 Hours.

(See MUS-420 for description.).

MUS-423. Band. 1 Hour.

Band is a large performing ensemble exploring standard wind band repertoire. Performance of two public and school concerts each semester is required. Graduate students are expected to perform solos, be section leaders, and assist the director in conducting rehearsals.

MUS-424. Music Bibliography And Research. 3 Hours.

Study of basic reference and research materials in music and introduction to methods of research appropriate to music.

MUS-425A. Music Performance Seminar: Brass. 2 Hours.

This seminar is an extension and compliment to the applied lesson and focuses on the art of performance. Enrollment in applied lessons and consent of instructor.

MUS-425B. Music Performance Seminar: Piano. 2 Hours.

This seminar is an extension and compliment to the applied lesson and focuses on the art of performance. Enrollment in applied lessons and consent of instructor.

MUS-425C. Music Performance Seminar: Strings. 2 Hours.

This seminar is an extension and compliment to the applied lesson and focuses on the art of performance. Enrollment in applied lessons and consent of instructor.

MUS-425D. Music Performance Seminar: Woodwind. 2 Hours.

This seminar is an extension and compliment to the applied lesson and focuses on the art of performance. Enrollment in applied lessons and consent of instructor.

MUS-425E. Music Performance Seminar: Voice. 2 Hours.

This seminar is an extension and compliment to the applied lesson and focuses on the art of performance. Enrollment in applied lessons and consent of instructor.

MUS-425F. Music Performance Seminar: Percussion. 2 Hours.

This seminar is an extension and compliment to the applied lesson and focuses on the art of performance. Enrollment in applied lessons and consent of instructor.

MUS-426. Orchestra. 1 Hour.

Open to all students with instrumental experience by audition. Opportunities for school and public performance.

MUS-427. Repertoire Seminar. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-427A. Repertoire Seminar: Piano. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-427B. Repertoire Seminar: Strings. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-427C. Repertoire Seminar: Woodwinds. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-427D. Repertoire Seminar: Voice. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-427F. Repertoire Seminar: Brass. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-427G. Repertoire Seminar: Percussion. 3 Hours.

This is the first semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-428A. Music Repertoire Seminar: Piano. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-428B. Music Repertoire Seminar: Strings. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-428C. Music Repertoire Seminar: Woodwinds. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-428D. Music Repertoire Seminar: Voice. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-428F. Music Repertoire Seminar: Brass. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-428G. Music Repertoire Seminar: Percussion. 3 Hours.

This is the second semester of a two-semester sequence of courses that survey the standard repertoire for different performance areas. Content varies according to the performance area studied.

MUS-431A. Advanced Applied Music Pedagogy I: Piano. 3 Hours.

At an advanced level, this course explores various aspects of the field of teaching applied music. The course will explore available methods and materials and techniques of teaching students at various ages and levels of advancement. It will also focus on various approaches to teaching technique, placing them in a historical context and learning how to apply them to students at various levels of advancement.

MUS-431B. Advanced Applied Music Pedagogy I: Strings. 3 Hours.

At an advanced level, this course explores various aspects of the field of teaching applied music. The course will explore available methods and materials and techniques of teaching students at various ages and levels of advancement. It will also focus on various approaches to teaching technique, placing them in a historical context and learning how to apply them to students at various levels of advancement.

MUS-431C. Advanced Applied Music Pedagogy I: Brass. 3 Hours.

At an advanced level, this course explores various aspects of the field of teaching applied music. The course will explore available methods and materials and techniques of teaching students at various ages and levels of advancement. It will also focus on various approaches to teaching technique, placing them in a historical context and learning how to apply them to students at various levels of advancement.

MUS-431D. Advanced Applied Music Pedagogy I: Woodwinds. 3 Hours.

At an advanced level, this course explores various aspects of the field of teaching applied music. The course will explore available methods and materials and techniques of teaching students at various ages and levels of advancement. It will also focus on various approaches to teaching technique, placing them in a historical context and learning how to apply them to students at various levels of advancement.

MUS-431E. Advanced Applied Music Pedagogy: Voice. 3 Hours.

At an advanced level, this course explores various aspects of the field of teaching applied music. The course will explore available methods and materials and techniques of teaching students at various ages and levels of advancement. It will also focus on various approaches to teaching technique, placing them in a historical context and learning how to apply them to students at various levels of advancement.

MUS-431F. Advanced Applied Music Pedagogy I: Percussion. 3 Hours.

At an advanced level, this course explores various aspects of the field of teaching applied music. The course will explore available methods and materials and techniques of teaching students at various ages and levels of advancement. It will also focus on various approaches to teaching technique, placing them in a historical context and learning how to apply them to students at various levels of advancement.

MUS-432A. Advanced Applied Music Pedagogy II: Piano. 2 Hours.

This course builds upon the knowledge gained in Pedagogy I and continues its exploration of advanced topics in applied music pedagogy. These include music learning theories and their application to the teaching of applied music, analysis from a pedagogical point of view of teaching repertoire, and further exploration of technique in relation to teaching students of various levels of advancement. Special emphasis will be placed on the difficult problem of choosing appropriate repertoire for students which challenges the student in terms of his/her musical, technical, and psychological development.

Prerequisite: MUS-431A with a minimum grade of B.

MUS-432B. Advanced Applied Music Pedagogy II: Strings. 2 Hours.

This course builds upon the knowledge gained in Pedagogy I and continues its exploration of advanced topics in applied music pedagogy. These include music learning theories and their application to the teaching of applied music, analysis from a pedagogical point of view of teaching repertoire, and further exploration of technique in relation to teaching students of various levels of advancement. Special emphasis will be placed on the difficult problem of choosing appropriate repertoire for students which challenges the student in terms of his/her musical, technical, and psychological development.

Prerequisite: MUS-431B with a minimum grade of B.

MUS-432C. Advanced Applied Music Pedagogy II: Brass. 2 Hours.

This course builds upon the knowledge gained in Pedagogy I and continues its exploration of advanced topics in applied music pedagogy. These include music learning theories and their application to the teaching of applied music, analysis from a pedagogical point of view of teaching repertoire, and further exploration of technique in relation to teaching students of various levels of advancement. Special emphasis will be placed on the difficult problem of choosing appropriate repertoire for students which challenges the student in terms of his/her musical, technical, and psychological development.

Prerequisite: MUS-431C with a minimum grade of B.

MUS-432D. Advanced Applied Music Pedagogy II: Woodwind. 2 Hours.

This course builds upon the knowledge gained in Pedagogy I and continues its exploration of advanced topics in applied music pedagogy. These include music learning theories and their application to the teaching of applied music, analysis from a pedagogical point of view of teaching repertoire, and further exploration of technique in relation to teaching students of various levels of advancement. Special emphasis will be placed on the difficult problem of choosing appropriate repertoire for students which challenges the student in terms of his/her musical, technical, and psychological development.

Prerequisite: MUS-431D with a minimum grade of B.

MUS-432E. Advanced Applied Music Pedagogy II: Voice. 2 Hours.

This course builds upon the knowledge gained in Pedagogy I and continues its exploration of advanced topics in applied music pedagogy. These include music learning theories and their application to the teaching of applied music, analysis from a pedagogical point of view of teaching repertoire, and further exploration of technique in relation to teaching students of various levels of advancement. Special emphasis will be placed on the difficult problem of choosing appropriate repertoire for students which challenges the student in terms of his/her musical, technical, and psychological development.

Prerequisite: MUS-431E with a minimum grade of B.

MUS-432F. Advanced Applied Music Pedagogy II: Percussion. 2 Hours.

This course builds upon the knowledge gained in Pedagogy I and continues its exploration of advanced topics in applied music pedagogy. These include music learning theories and their application to the teaching of applied music, analysis from a pedagogical point of view of teaching repertoire, and further exploration of technique in relation to teaching students of various levels of advancement. Special emphasis will be placed on the difficult problem of choosing appropriate repertoire for students which challenges the student in terms of his/her musical, technical, and psychological development.

Prerequisite: MUS-431F with a minimum grade of B.

MUS-434A. Instrumental Ensemble: Brass. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor.

MUS-434B. Instrumental Ensemble: Percussion. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor.

MUS-434C. Instrumental Ensemble: Strings. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor.

MUS-434D. Instrumental Ensemble: Woodwinds. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor.

MUS-434E. Instrumental Ensemble: Accompanying. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor.

MUS-434F. Instrumental Ensemble: Piano Ensemble. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor.

MUS-434M. Instrumental Ensemble: Guitar. 1 Hour.

Open to enrolled students with instrumental experience. Opportunities for school and public performance. Audition and consent of instructor.

MUS-442. World Music. 3 Hours.

A study of world music, cultures and their values, as reflected in the arts; experiencing their music through performance on ethnic instruments, singing and dancing, listening to recordings, map study, with focus on methodology suitable for public school teaching.

MUS-450A. Applied Music: Flute. 0.5 Hours.

Individual study in voice or any instrument for continued development of performing skills and musical artistry: knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability.

MUS-450B. Applied Music: Oboe. 0.5 Hours.

See course description for MUS-450A.

MUS-450C. Applied Music: Clarinet. 0.5 Hours.

See course description for MUS-450A.

MUS-450D. Applied Music: Saxophone. 0.5 Hours.

See course description for MUS-450A.

MUS-450E. Applied Music: Bassoon. 0.5 Hours.

See course description for MUS-450A.

MUS-450F. Applied Music: French Horn. 0.5 Hours.

See course description for MUS-450A.

MUS-450G. Applied Music: Trumpet. 0.5 Hours.

See course description for MUS-450A.

MUS-450H. Applied Music: Euphonium. 0.5 Hours.

See course description for MUS-450A.

MUS-450J. Applied Music: Trombone. 0.5 Hours.

See course description for MUS-450A.

MUS-450K. Applied Music: Tuba. 0.5 Hours.

See course description for MUS-450A.

MUS-450M. Applied Music: Percussion. 0.5 Hours.

See course description for MUS-450A.

MUS-450O. Applied Music: Jazz Piano. 0.5 Hours.

See course description for MUS-450A.

MUS-450P. Applied Music: Violin. 0.5 Hours.

See course description for MUS-450A.

MUS-450Q. Applied Music: Viola. 0.5 Hours.

See course description for MUS-450A.

MUS-450R. Applied Music: Cello. 0.5 Hours.

See course description for MUS-450A.

MUS-450S. Applied Music: String Bass. 0.5 Hours.

See course description for MUS-450A.

MUS-450T. Applied Music: Guitar. 0.5 Hours.

See course description for MUS-450A.

MUS-450U. Applied Music: Harp. 0.5 Hours.

See course description for MUS-450A.

MUS-450V. Applied Music: Voice. 0.5 Hours.

See course description for MUS-450A.

MUS-450W. Applied Music: Piano. 0.5 Hours.

See course description for MUS-450A.

MUS-450X. Applied Music: Jazz String Bass. 0.5 Hours.

See course description for MUS-450A.

MUS-450Y. Applied Music: Jazz Guitar. 0.5 Hours.

See course description for MUS-450A.

MUS-450Z. Applied Music: Jazz Voice. 0.5 Hours.

See course description for MUS-450A.

MUS-451A. Applied Music: Flute. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451B. Applied Music: Oboe. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451C. Applied Music: Clarinet. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451D. Applied Music: Saxophone. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451E. Applied Music: Bassoon. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451F. Applied Music: French Horn. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451G. Applied Music: Trumpet. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451H. Applied Music: Euphonium. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451J. Applied Music: Trombone. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451K. Applied Music: Tuba. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451O. Applied Music: Jazz Piano. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451P. Applied Music: Violin. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451Q. Applied Music: Viola. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451R. Applied Music: Cello. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451S. Applied Music: String Bass. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451T. Applied Music: Guitar. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451U. Applied Music: Harp. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451V. Applied Music: Voice. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451W. Applied Music: Piano. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451X. Applied Music: Jazz String Bass. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-451Y. Applied Music: Electric Bass. 1 Hour.

Individual study in voice or any instrument for development of performance skills and musical understanding; knowledge of the repertoire for the voice or specific instrument at an appropriate college freshman/sophomore level of performing ability.

MUS-452A. Applied Music: Flute. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452B. Applied Music: Oboe. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452C. Applied Music: Clarinet. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452D. Applied Music: Saxophone. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452E. Applied Music: Bassoon. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452F. Applied Music: French Horn. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452G. Applied Music: Trumpet. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452H. Applied Music: Euphonium. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452J. Applied Music: Trombone. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452K. Applied Music: Tuba. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452M. Applied Music: Percussion. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452O. Applied Music: Jazz Piano. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452P. Applied Music: Violin. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452Q. Applied Music: Viola. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452R. Applied Music: Cello. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452S. Applied Music: String Bass. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452T. Applied Music: Guitar. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452U. Applied Music: Harp. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452V. Applied Music: Voice. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452W. Applied Music: Piano. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-452X. Applied Music: Jazz String Bass. 2 Hours.

One-hour weekly lesson. Individual study in voice or any instrument for continued development of performing skills and musical artistry; knowledge of the repertoire for the specific voice or instrument at an appropriate level of performing ability. Consent of instructor or department chairperson and graduate standing.

MUS-463. Women In Music. 3 Hours.

A study of some of the most notable women composers and musicians from the Middle Ages to the present. Designed both for musicians and non-musicians, the course will focus equally upon aspects of the music of the historical, social and cultural milieu.

MUS-471. Seminar In Music History:Baroque. 3 Hours.

In-depth study of selected topics in the music history and literature of the Baroque. Individual research topics.

MUS-472. Seminar In Music History:Classic Era. 3 Hours.

In-depth study of selected topics in the music history and literature of the Classic era. Individual research topics.

MUS-476A. Theory Seminar: 20th Century Analytical Procedure And Compositional Techniques. 3 Hours.

The purpose of this course is to give the student an opportunity to explore this selected topic in music. Consent of instructor.

MUS-5901. Thesis Hours. 1 Hour.

Guidance of students preparing a thesis, project or recital to fulfill requirements for the Master of Arts in Music.

MUS-5902. Thesis Hours. 2 Hours.

See course description for MUS-5901.

MUS-5903. Thesis Hours. 3 Hours.

See course description for MUS-5901.

Major in Music

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

SCED-305N	Secondary Student Teaching And Seminar In Music	9

Students should also consult the Secondary Education and General Education section of this catalog.

Piano Music Education Students:

Piano majors must be proficient in voice to complete the music education program. Students must take applied lessons in voice until they pass the proficiency exam in order to complete the music education degree. The student's program must be approved by the advisor and may extend the time to degree.

NOTE: K-12 Music Education: Majors must obtain departmental approval for admission to student teaching.

Music Education Majors are required to pass the Piano Proficiency Exam prior to enrolling in MUS-393L. The Proficiency Exam is given once each semester. See advisor for schedule.

Upon attaining Junior status Music Education majors must apply for a Music Education Junior Interview. This interview serves as a general review of skill and knowledge applicable to the field of Music Education. The student's progress will be assessed and suggestions for improvement will be made. Contact the Music Education faculty for specific requirements and scheduling.

Major in Music (BA degree)

The Bachelor of Arts offered through the Department of Music is designed for students who wish to study music in the context of a comprehensive liberal arts experience, immersing themselves in both the practice and theory. The B.A.'s flexibility allows for students to pursue specific music topics to augment their interests, as well as broaden their post-graduate career paths.

Students admitted to this program will be enrolled as Music Majors.

Admission Requirements:

- Participation in musical ensembles is a requirement of all music students, as well as attendance at live performances each semester. All students seeking admission to the music program must perform a live audition.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Additional requirements

- Music Majors must take the following courses concurrently: Theory I and II (MUS 121 and 122) are taken concurrently with Class Piano I and II (MUS 112 and 113). Students with piano skill may audition for advanced placement. Theory III and IV (MUS 201 and 202) are taken concurrently with Sight Singing and Ear Training I and II (MUS 124 and 125).
- Music majors must attend 80 concerts, 70 of which must be Department of Music concerts.
- Music majors are required to attend Department of Music Convocations. Watch departmental bulletin boards for Convocation announcements. A missed Convocation will result in the removal of 2 recital/concert attendance cards from the student file.
- Music majors must earn a C or higher in all music classes.
- Students must complete a minimum of 40 semester hours at the 300 level to graduate.

Master of Arts in Music

MASTER OF ARTS IN MUSIC

The Music Department at NEIU offers a Master of Arts in Music degree in Applied Pedagogy. Pedagogy is defined as the art of teaching. This degree prepares students who already have a Bachelor's degree in music for successful 1) college level teaching, 2) in-service elementary and secondary public or private school teaching, 3) or for continuing into doctoral degree work.

REQUIREMENTS OF THE PROGRAM

- Completion of a Bachelors Degree in Music with a minimum GPA of 2.75
- Audition and approval for 400-level in major applied instrument/voice
- Letters of Recommendation about your music background
- Completion of Entrance Placement Exams in music history and music theory, to be completed before the first semester of enrollment.

AUDITION

Approval for the program requires approval by the appropriate applied faculty through an audition in the student's applied area (instrument or voice). 400-level approval is required. If a student is not approved for graduate (400) level, he/she may be asked to enroll at the 300-level as a remedial option and apply for graduate (400) level at the next audition date. This should be done only if the applied faculty believes strongly that the student has potential to attain 400-level in a reasonable amount of time (one or two semesters).

GRADUATE PLACEMENT EXAMS

The Graduate Placement Exams in Music History and Music Theory are required of all music students entering the graduate program. They are given annually before each semester and must be taken by all incoming students. No student will be accepted into the program until these exams are taken. If deficiencies are noted, the deadline for completing remedial course work or removing deficiencies is one year or 18 credits.

STUDENT-AT-LARGE STATUS

A student may enroll as a "student-at-large" while awaiting completion of his/her application approval. Up to nine (9) credit hours may be taken and transferred into the program. Note: A student-at-large is not eligible for a Graduate Tuition Scholarship.

Requirements for the Degree

The following sequences require a total of 34 credit hours, all of which must be earned in 400-level courses or approved 300-level courses. Participation in large or small ensembles for a minimum of three terms is required.

GRADUATE VIRTUAL COMMUNITY

Graduate music students must participate in the Music Department Virtual Community, an online forum where students and faculty share experiences, ideas, and knowledge.

THESIS HOURS (MUS 5901, 5902, 5903 - CREDIT VALUE VARIES)

Thesis Hours is the culminating course for the M.A. degree. This course is generally taken in the third semester of study after MUS 424 Bibliography has been completed. The student's thesis advisor and faculty thesis committee acts as a mentor and guide as the student pursues his/her research. This work will result in a submission and approval of the Thesis Proposal, Thesis Paper, and Lecture Recital (an hour long recital format in which the student lectures, performs/demonstrates the thesis topic).

COMPREHENSIVE EXAM

A comprehensive examination must be taken at the first possible exam date after the thesis paper is submitted and/or the recital is performed. The dates of the exam are concurrent with the Graduate Placement Exams and are offered on the first Friday in the month in August, December, and April. The Comprehensive Exam is a written test that evaluates what the student has learned in his/her area of specialty during graduate study. The test consists of two pedagogical/historical essay questions of which you choose one, and three score identifications. Students are expected to write intelligently about the musical content providing a thorough stylistic analysis and name a composer, probable date of composition, and title of the work. The Comprehensive Exam will be graded on a Pass/Fail basis. (The completed test must reflect a working knowledge of pedagogical craft, historical and theoretical perspective, and a graduate level writing ability).

Applied Music Pedagogy

Code	Title	Hours
MUS-424	Music Bibliography And Research	3

MUS-434M	Instrumental Ensemble: Guitar	
Total Hours		34

¹ Ensemble Participation: Participation in a large ensemble for a minimum of three terms is required (wind and percussion students enroll in Band; guitar students enroll in Guitar Ensemble; string students [violin, viola, cello, and string bass] enroll in Orchestra; voice students enroll in University Chorus, Opera Workshop, Chamber Singers, or Musical Theater; piano students enroll in Piano Ensemble Four Hands, or Accompanying).

Minor in Dance

Minor in Dance (30 credit hours)

In consultation with the Dance Minor Advisor, the student designs an individualized and appropriately balanced program to meet personal interests and needs.

Resources in Dance

The department sponsors The Ruth Page Dance Series, a professional dance series which showcases diverse styles of dance. Students also have the opportunity to apprentice with professional dance companies. Ensemble Español offers qualified dance students opportunities to participate in intensive workshops throughout the year, and performs on campus regularly. The Department also offers the American Spanish Dance Festival each summer. Qualified dance students may enroll for credit.

Awards

Scholarships are available to outstanding students in Dance. Undergraduate Talent Scholarships (tuition waivers) in Dance are awarded through audition. Qualified students must not hold a bachelor's degree. Complete information is available in the Department.

Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

- * Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.
- ** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Dance (30 credit hours)

Students entering the program must demonstrate technical ability and must obtain the advisor's approval for the total program plan. Students must complete 6 hours of DANC-360 and 3 hours of DANC-390E Performance to satisfy dance minor requirements. Students in the Early Childhood Education programs who have selected this minor must complete a minimum of 9 hours at the 300-level to meet graduation and licensure requirements. Some dance classes may be taken more than once. Consult with the Coordinator of Dance for more information.

Dance Ensembles include:

- Repertory Ensemble
- Spanish Dance Ensemble

Minor in Music

University Core Curriculum Requirements

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Music (23 credit hours)

In consultation with the Music Minor Advisor, the student designs an individualized and appropriately balanced program to meet personal interests and needs. Courses are selected from the departmental curriculum and may not include MUS-101. Students must obtain the advisor's approval for the total program plan and declare the minor prior to coursework. The curriculum plan must include:

- Music Theory (6 credits),
- Music History (3 credits), and
- Music Technology (3 credits).

Individual applied instruction and ensemble credits may be combined for a maximum of 5 credits. Applied and ensemble credits must be approved by the minor advisor in advance. All music minors must attend a total of 20 concerts sponsored by the Department of Music. A total of five concerts occurring in off-campus venues may be applied to the required 20 if approved in advance by the student's Music Minor Advisor.

Students in the Elementary Education and Early Childhood Education programs who have selected this minor must complete a departmental course of study and a minimum of 9 hours at the 300-level to meet graduation and licensure requirements.

Please see department office to meet with a music minor advisor.

Philosophy

Philosophy, broadly defined, is the systematic inquiry into some of the fundamental questions of human existence. In this sense, the study of philosophy has always been an essential ingredient of a liberal education.

Philosophy is inherently interdisciplinary. Its focus on the development of the abilities to reflect, analyze, and think critically enables students to understand and correlate all the insights garnered from other disciplines.

Philosophy emphasizes questions of meaning, from linguistic expressions to life itself, and calls for justification of claims to knowledge from any source.

The primary goals of the program are to contribute significantly to the liberal arts education of university students, to prepare students for advanced study in their chosen field, and to help students in their future professional activities by acquainting them with applied philosophy.

- Major in Philosophy (<http://catalog.neiu.edu/arts-sciences/philosophy/philosophy/>)
- Minor in Philosophy (<http://catalog.neiu.edu/arts-sciences/philosophy/minor-philosophy/>)

Lesa Davis, Ph.D., Professor, Chair

Daniel Milsky, Ph.D., Associate Professor, Advisor

Stacey Goguen, Ph.D., Assistant Professor, Advisor

Affiliate Faculty:

Sophia Mihic, Ph.D., Professor

PHIL-101. Argument And Reasoning. 3 Hours.

This course teaches the skills necessary to make and evaluate arguments. We cover how arguments are structured and properly used in reasoning, persuasion, deliberation, and inquiry. Students will learn how to distinguish good arguments from bad, to identify common fallacies of argumentation, and to avoid cognitive biases in reasoning.

PHIL-102. Introduction To Philosophy. 3 Hours.

Introduction to the main problems of philosophy, i.e. knowledge, reality, morality, religion and art.

PHIL-201. Logic I. 3 Hours.

Introductory course in symbolic logic, dealing with propositional calculus, quantification theory and the logic of relations and classes.

PHIL-213. Ethics. 3 Hours.

Introduction to some of the main problems of ethics, including the nature of morality, the meaning of ethical terms, standards for evaluating choices and actions, and the major ideas of important moral philosophers.

PHIL-215. Business Ethics. 3 Hours.

Philosophical introduction to the ethical content of some of the current problems confronting the business community, such as the social responsibility of business, poverty and equal rights, the ethical implications of ecology, advertising and consumerism.

PHIL-218. Philosophy Of Sex. 3 Hours.

In this course we will look at a wide range of philosophical topics related to human sexuality-perversion, prostitution gender roles, and sex roles. Along the way will examine the role of power and coercion in sex and we will examine some of the psycho-social implications of sexual violence. The course will have a decidedly normative bent insofar as our analysis and discussion will be conducted through the lens of ethics.

PHIL-250. Ethics In Science And Research. 3 Hours.

In this course, students will investigate how ethical issues and values (such as safety, autonomy, well-being, and justice) play a role in contemporary and historical case studies in the sciences. They will develop a skill set for asking ethical questions in the sciences and evaluating different ethical theories and philosophical concepts, giving them a foundation for thinking about responsibility and objectivity in scientific research and public policy. Topics may include: safety concerns with new technology; privacy, rights, and autonomy in genetic engineering; public policy concerning under-studied health conditions; and which communities of inquiry should be recognized or categorized as science.

PHIL-251. Philosophy Of Art. 3 Hours.

An examination of art and aesthetic experience, including personal, social and political significance. Issues explored may include artistic concepts pertaining to form and content, representation and expression, meaning and truth critical interpretation and evaluation.

PHIL-300. History Of Ancient Philosophy. 3 Hours.

This course introduces some of the major thinkers and themes of Ancient Western Philosophy. It will focus in particular on the work of Plato, Aristotle, and the Hellenists.

PHIL-301. History Of Medieval Philosophy. 3 Hours.

Critical survey of the development of philosophy in the West from the rise of Christendom to the dawn of the Renaissance.

PHIL-302. History Of Modern Philosophy. 3 Hours.

A critical survey of the development of philosophy in the West in the seventeenth and eighteenth centuries.

PHIL-303. Logic II. 3 Hours.

Study of the theory and development of axiomatic systems, including the problems of definability, completeness and consistency.

Prerequisite: PHIL-201 with a minimum grade of D.

PHIL-305. Comparative Religion. 3 Hours.

A comparative study of the epistemological, metaphysical, and ethical beliefs and practices of a range of world religions including Hinduism, Buddhism, Confucianism, Taoism, Judaism, Christianity, and Islam.

PHIL-311. Writing Intensive Program: Reasoning In Writing. 3 Hours.

This is a workshop and discussion-based course that teaches students techniques for reading, writing, and researching philosophy, which form a foundation set of skills for other philosophy courses. Students will learn how to identify an author's philosophical project, how to motivate an introduction, how to assess their own arguments in writing, how to practice philosophical charity, how to further an academic conversation in the service of a real-world issue, and how to engage with multiple sources and authors.

Prerequisite: ENGL-101 with a minimum grade of C.

PHIL-313. Ethical Theory. 3 Hours.

Study of theories about the meaning and justification of moral judgements: good and bad, right and wrong, human rights, justice, punishment, freedom and responsibility, self-interest, the common good, pleasure and happiness, religion and morality, relativism, subjectivism and scepticism.

PHIL-315. Medical Ethics. 3 Hours.

This course will focus on the ethical dilemmas both doctors and patients confront as practitioners and patients in medicine. We will pay careful attention to the issues of paternalism, voluntary informed consent and personhood and apply these ideas to actual cases.

Prerequisite: PHIL-213 with a minimum grade of C.

PHIL-316. Ethics Bowl. 1 Hour.

Ethics Bowl provides students with a unique opportunity to apply moral argumentation to real world cases. The Intercollegiate Ethics Bowl combines the excitement a competitive tournament with a valuable educational experience. Students will examine a series of case studies from a number of practical contexts, including engineering, law, medicine, personal relationships, school, and politics, both nationally and internationally. During the semester students will research and prepare these cases for competition. All students in the course will practice and present on cases, but students may decide if they wish to compete in the actual Ethics Bowl competition in November.

PHIL-332. Contemporary Philosophy. 3 Hours.

Critical survey of the salient schools of contemporary philosophy, notably idealism, pragmatism, logical positivism, analytic philosophy, phenomenology and existentialism.

PHIL-333. American Philosophy. 3 Hours.

Intensive study of the trends prevalent in the modern American philosophical scene, notably pragmatism, idealism, naturalism, positivism, philosophical analysis and phenomenology.

PHIL-335. Analytic Philosophy. 3 Hours.

Critical survey of the development of analytic philosophy in the twentieth century.

PHIL-337. Existentialism. 3 Hours.

Intensive study of selected works of existentialist thinkers such as Kierkegaard, Nietzsche, Sartre and Camus.

PHIL-339. Post Modernism. 3 Hours.

This course will examine the rise of modernity as an "age of unrest", and therein delineating the confrontation between contemporary philosophy and the current epoch. To this end, we will assess the precise ways in which modernity has cast itself forward as a historical and epistemological rupture of devastating proportions, one that irrevocably alters our understanding of knowledge, society, power, technology, language, and the question of human experience.

PHIL-341. Metaphysics. 3 Hours.

Systematic analysis of some of the main problems of metaphysics, such as existence, substance and attribute, change and permanence, essence and accident, universals and particulars, mind and body, identity, individuation and causality.

PHIL-344. Buddhism. 3 Hours.

The course will begin with an analysis of Buddhism's origins within Hinduism and the early development of its religious beliefs and philosophical concepts in India. It will continue with an in depth look at its spread throughout Asia and the transformation of its core beliefs and concepts within the main traditions of Theravada, Mahayana, and the Vajrayana. The course will include a study of current global trends, such as the rise of political and social engagement and the impact of Buddhism on western philosophical traditions including existentialism and phenomenology.

PHIL-345. Social And Political Philosophy. 3 Hours.

Systematic investigation of some of the salient issues currently discussed by social and political philosophers, such as the nature and origin of the state, political obligation, justice, human rights, authority, liberty and evaluation of social and political institutions.

PHIL-346. 19th Century Continental Philosophy. 3 Hours.

This course focuses on the development of German Idealism and its relation to Continental Philosophy. Thematically the class will cover topics such as freedom, epistemology, aesthetics, philosophy of history, and politics in the work of Kant, Fichte, Schelling, Hegel, and Marx.

PHIL-347. Phenomenology And Hermeneutics. 3 Hours.

This class introduces students to the basic methods, themes, and critiques advanced in the philosophical movements known as phenomenology and hermeneutics. This class will survey three types of phenomenology: transcendental phenomenology, genetic phenomenology, and hermeneutical phenomenology. We will explore the intersections between these types of phenomenology and the analysis of time, embodiment, culture, art, and politics.

PHIL-348. Computer Ethics And Public Policy. 3 Hours.

This course discusses ethical and social issues related to the development and use of computer technology. The course provides students with historical and philosophical context to understand the evolution of ethics and its intersection with the use of technology as well as an examination of major ethical issues currently affecting the use of computer technology. Topics involve ethics, public policy, privacy, responsibility and the law.

PHIL-350. Philosophy Of Art. 3 Hours.

This course examines philosophical issues that arise concerning the creation, interpretation and viewing of art, primarily though not exclusively in the western art tradition. Topics to be discussed include: what is the "aesthetic," and who is the best judge of it? Is good art beautiful? Should art be viewed dis-interestedly? What is it to get at the meaning of a work of art? How does new technology affect the meaning and experience of art? We will also examine the role of aesthetics in other fields of philosophy, especially in environmental ethics.

PHIL-353. Feminism And The Philosophy Of Science. 3 Hours.

Analytic examination of the concept of femininity as found in the biological and social sciences in order to facilitate discussion of the nature of objectivity and scientific investigation.

PHIL-362. Philosophy Of Law. 3 Hours.

In this course, we will engage in an examination of law and legal systems, as well as of the ideas, ideologies, and principles that are at the core of the establishment and interpretation of law. The pervasive presence of law in our lives should encourage us not only to understand it, but to scrutinize its foundations and presuppositions. Toward this end, we will pay special attention to three aspects of philosophy of law: analytic jurisprudence, normative jurisprudence, and critical law theory.

PHIL-364. Critical Race Theory. 3 Hours.

This course begins with the recognition that racism is prevalent in the United States. Critical Race Theorists confront the historical centrality of white supremacy and the complicity of the law in upholding, indeed constructing, racism. Following the challenge to ahistoricism and acontextualism embedded in standard legal practice brought by Critical Legal Theorists, Critical Race Theorists address racism as embedded in U.S. legal structure. We will examine the law's role in the construction and maintenance of social domination and subordination in order to understand and articulate a critical race theoretical approach to the intersections of race, gender, class and the law.

PHIL-365. Environmental Ethics. 3 Hours.

How ought we behave towards nature and what are the implications of human interaction with ecosystems? We will pay special attention to the value of restored nature and whether it is a form of human domination or whether restoration is a legitimate endeavor to be pursued out of moral obligation. We will integrate actual cases into the class in order to flesh out the policy implications of our philosophical commitments.

PHIL-366. Feminist Ethics. 3 Hours.

What is feminism? What is Feminist Ethics? How do feminists differ in their ways of thinking about the good life and acting in the world than a non-feminist? Why do they differ in their understanding of these issues? How should we live our lives in a way that reflects feminist values? These are just some of the questions we will explore in this class. Specifically, we will explore the key concepts of different types of feminist ethics and the ways to apply it to our everyday lives.

PHIL-367. Postcolonialism. 3 Hours.

In this course we will move toward not a postcolonialism that transcends colonialism, but thinking with those who work toward a practice of decolonial thinking. While there have been many empires which have plundered pre-existing cultures and civilizations, modern colonialism did more than extract tribute, goods and wealth from conquered countries. It restructured economies, societies, languages, histories. Thus, while political colonialism is over in many locales, economic and cultural colonialism reverberate within both former colonies and colonizing countries. Postcolonial theorists write from the margins of and in resistance to reverberating colonial cultural productions.

PHIL-370. Re-Thinking Race And Gender. 3 Hours.

We start with historical narrative, re-thinking how we learn to practice race and gender from within the larger systems of white supremacy and patriarchy. The course explores models for disrupting systemic patterns, and ways to turn rethinking into everyday action. The aim throughout is to interrogate structures and relations of race and gender, and how they get naturalized. Designed and cross-listed for advanced undergraduates, graduates, and teachers. When taught as a Summer Institute, course runs for eight days over three weeks. Required: Junior/Senior or Graduate status, or instructor consent. Prereqs: ENGL-101 with a grade of "C" or above.

Prerequisite: ENGL-101 with a minimum grade of C.

PHIL-371. Theory Of Knowledge. 3 Hours.

Systematic inquiry into the nature of knowledge, with a consideration of such topics as ways of knowing, perception, memory, personal identity, and other minds.

PHIL-373. Feminist Philosophy. 3 Hours.

Analytic investigation of the latest feminist theory in order to study the development of feminism.

PHIL-374. Philosophy Of Sex. 3 Hours.

Students will examine philosophical topics related to human sexuality, such as the metaphysics of sex acts; political philosophy of sexual coercion and violence; ethical issues of sex work; and analysis of different types of sexual and romantic relationships, such as monogamy and polyamory.

Prerequisite: and.

PHIL-375. Philosophy Of Science. 3 Hours.

Examination of some of the main problems currently discussed by philosophers of science, such as the methodology and foundations of empirical science, the meaning and verification of scientific statements, theories, laws, hypotheses and explanations.

PHIL-381. Independent Study In Philosophy. 3 Hours.

Readings, discussions, and reports on a special topic with faculty supervision. Normally open to majors in their junior or senior year.

PHIL-384. Philosophy Of Religion. 3 Hours.

This course examines questions concerning the existence, nature and evidence for the primary and fundamental objects of religious belief. Topics may include the following: 1) Can we demonstrate God's existence? 2) Is faith irrational? 3) Can we know anything about God? 4) Is the existence of evil evidence against the existence of God? 5) Is religion necessary for morality?.

PHIL-385. Philosophy Of Mind. 3 Hours.

This course examines the central issues and debates in philosophy of mind from both historical and contemporary perspectives. Topics covered may include theories of the mind's relation to the body (dualism, monism, functionalism, behaviorism, identity theory, eliminative materialism), theories of mental content, free will, personal identity and first-person experience, among others.

PHIL-387. The Political Thought Of Hannah Arendt. 3 Hours.

This course investigates the work of Hannah Arendt on politics, society and political action. Our primary questions will be: what does political action require and what can it accomplish? Specific course topics may include civil disobedience, the relationship between history and political theory, the meanings of power and violence, colonialism, totalitarian rule during the Third Reich and the Soviet era, and racial prejudice as a political tool.

PHIL-388. Philosophy Of Language. 3 Hours.

This course focuses on language use and begins with theoretical challenges from both the analytic (Wittgenstein) and continental (Derrida) traditions in philosophy to idealized theories of language, particularly the reference theory of language <the idea that words are mere labels for things> as well as the idea that language is a pure and formal unity. We will explore strategies of using language to construct consensus through both syntax and semantics, generating commitment to particular and tacit understandings. We will also work on theories of metaphor and performatives to become skilled in articulating practical complexities of language use.

PHIL-389. Inter-Disciplined Foucault. 3 Hours.

This course explores Michel Foucault's theories of language, truth, knowledge, and power across academic disciplines. Topics covered will include his work in the philosophy of inquiry, and his studies of prisons, sexuality, the legal order, art, and literary representation.

PHIL-390. Classical Political Theory. 3 Hours.

This course studies the political thought of Socrates, Plato and Aristotle in the broad historical and cultural context of the classical era. Readings may include literary works and histories from Greek, Roman, Biblical and Chinese sources. We will attend carefully to the distinctiveness of ancient texts and historical experiences with the goal of considering how classical formulations of enduring concepts and themes inform and contrast with contemporary ethical and political practices.

PHIL-391. Modern Political Theory. 3 Hours.

This course studies the development of modern political philosophy and practice. We will address the emergence of modern humanism and republican self-rule, analyze obligation and the rule of law in the contract tradition, and examine ongoing conflicts between authority and freedom and power and equality in the 19th, 20th and 21st centuries. Readings may include works by Hegel, Hobbes, Machiavelli, Marx, J.S. Mill, Nietzsche, Rousseau, Wollstonecraft, and American literary perspectives on the problem of race and racism in democratic politics.

PHIL-393. Seminar In Ethics. 3 Hours.

This course involves an intensive study of a topic or philosopher important to the field of ethics. Students should be prepared to engage in critical analysis of current research in the field and be prepared to present a research paper at the end of the course.

PHIL-394. Seminar In Epistemology. 3 Hours.

This course involves an intensive study of a topic or philosopher central to the subfield of Epistemology. Students should be prepared to engage in critical analysis of current research in the field and be prepared to present a research paper at the end of the course.

PHIL-395. Seminar In Metaphysics. 3 Hours.

This course involves an intensive study of a topic or philosopher central to the subfield of Metaphysics. Students should be prepared to engage in critical analysis of current research in the field and be prepared to present a research paper at the end of the course.

PHIL-396. Seminar In The History Of Philosophy. 3 Hours.

This course involves an intensive study of a topic or philosopher central to the field of the History of Philosophy. Students should be prepared to engage in critical analysis of current research in the field and be prepared to present a research paper at the end of the course.

PHIL-397. Seminar In Social And Political Philosophy. 3 Hours.

This course is an intensive study of a topic or philosopher central to the field of social and political philosophy. Students should be prepared to engage in critical analysis of primary sources and current research in the field. Students should also be prepared to present a research paper at the end of the course.

Major in Philosophy

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Philosophy (18 credit hours)

Code	Title	Hours
Required Courses		
PHIL-213	Ethics	3
History of Philosophy (one course) ¹		3
Elective at the 300-level		3
Additional PHIL electives		9
Total Hours		18

¹ History of Philosophy courses include PHIL 300: History of Ancient Philosophy, PHIL 301: History of Medieval Philosophy, PHIL 302: History of Modern Philosophy, PHIL 390: Classical Political Theory, PHIL 391: Modern Political Theory."

Students in the Elementary Education and Early Childhood Education programs who have selected this minor must complete a minimum of 9 hours at the 300-level to meet graduation and certification requirements.

Physics

The Department of Physics offers a program leading to the Bachelor of Science degree. An undergraduate minor is also available.

The goals of the Physics program are to:

1. provide students with a solid foundation in classical and modern physics;
2. develop skills which enable students to enter careers in business, teaching, research, and technology;
3. prepare students for graduate study in physics.

Courses offered at the 100 level are for non-majors, and can be used to fulfill General Education program requirements, and require minimal math preparation.

Students should also be aware of the University requirements for the Bachelor's degree. All students must complete a minimum of 40 semester hours at the 300 level.

All 300-level courses in Physics are offered in the evening.

Facilities available to students include computer workstations, a BEOWULF supercomputer, a scanning tunneling microscope, a wide array of sophisticated electronic, nuclear, and optical instruments, a Mössbauer effect apparatus, a fully equipped cryogenics laboratory, a fully equipped optics laboratory including a Spiricon Laser Beam Analyzer, a vacuum laboratory, and a 14" reflecting telescope. Students are encouraged to undertake independent projects of their own choosing.

Qualified undergraduate majors and minors are eligible to apply for a limited number of tuition waivers, scholarships, and part-time jobs offered. Please contact the Physics advisor for information and application forms.

Newly admitted students-at-large, and all entering freshmen and transfer students who intend to major in physics must consult the Physics advisor or the Physics Department chair before their first registration.

- Major in Physics (<http://catalog.neiu.edu/arts-sciences/physics/physics/>)
- Minor in Physics (<http://catalog.neiu.edu/arts-sciences/physics/minor-physics/>)
- Major in Environmental Science (<http://catalog.neiu.edu/arts-sciences/physics/environmental-science/>)

Greg Anderson, Ph.D., Professor, Chair
 Paulo Acioli, Ph.D., Professor
 Orin M. Harris, Ph.D., Assistant Professor
 Paul J. Dolan, Ph.D., Professor
 Sudha Srinivas, Ph.D., Professor

PHYS-103. Introduction To Astronomy. 3 Hours.

An introduction to the field of Astronomy. Course topics include: the history of astronomy and the philosophy of science; methods of observational astronomy; an overview of the scientific method; gravitation and orbital dynamics; the origin, dynamics, and composition of our solar system; descriptions of asteroids, comets, and planets; the formation, evolution and death of stars; white dwarfs, neutron stars and black holes; novae and supernovae; star clusters, galaxies, and galactic clusters; the Big Bang theory, cosmology, dark energy and dark matter; the possibility of extraterrestrial life.

PHYS-104. Energy. 3 Hours.

A course for non-science majors requiring no previous college-level mathematics or science background. Physics and its application to the problems of energy consumption and production are discussed. Topics include the need for nuclear reactors and the implications thereof, the dumping of nuclear waste at sea and alternatives, better energy sources and energy depletion, the motion of pollutants through the environment, and other related topics.

PHYS-108. Physics Concepts For Educators. 4 Hours.

A laboratory-oriented course designed to support future educators in the implementation of interdisciplinary math and science curricula by integrating concepts from geometry, algebra, and trigonometry. Central concepts of physics (the laws of mechanics and electricity, the properties of light, atoms and nuclei) and how they are applied in the modern world (rockets, electric motors, automobiles, fuel cells, alternative fuels, stationary i.e. power plant and non-stationary i.e. aircraft, green technology etc.) are investigated. Issues of smart materials, nanotechnology, quantum computing and other contemporary technologies may be investigated. Discussions include topics and concepts related to robotics, kinematics and dynamics of particles and rigid bodies and electrostatics, electric fields, electric potentials, currents, magnetic fields, and wave motion. Basic concepts of geology, meteorology, oceanography, the solar system, or any other related discipline are threaded throughout. Course content is aligned to the National Science Teachers Association and the Next Generation of Science Standards. This course is paired and integrated with MATH-280 and it is strongly suggested that they are taken together.

Prerequisite: MATH-149 with a minimum grade of C.

PHYS-110. Physics In Everyday Life. 3 Hours.

A laboratory oriented course for the non-science major. Central concepts of physics (the laws of mechanics and electricity, the properties of light, atoms and nuclei) and how they are applied in the modern world (rockets, electric motors, optical instruments, automobiles, toys, etc.). Knowledge of basic algebra skills is assumed. Lecture 2 hours, lab 2 hours.

Prerequisite: (MATH-092 - 499 or MATH-092A - 499Z or NEIU Math Placement Result 30 - 40 or ACT Math 22 - 36 or Accuplacer College Level Math 020 - 120 or SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300).

PHYS-200. Introduction To College Physics. 3 Hours.

Prerequisite: MATH-106 (may be taken concurrently) with a minimum grade of D.

PHYS-201. College Physics I. 3 Hours.

This is the first course of a two-term algebra-based lecture sequence intended for non-physics majors: PHYS-201 and PHYS-202. The companion laboratory is PHYS-203. Kinematics and dynamics of a particle and systems of particles, momentum, energy, angular momentum, conservation laws, applications to problems involving collisions, oscillatory motion and motion in a gravitational field, rigid body motion, temperature, heat, the laws of thermodynamics, application to thermodynamic engines, and ideal gases are discussed. Lecture: 3hrs.

Prerequisite: MATH-185 with a minimum grade of C or MATH-106 with a minimum grade of C.

PHYS-201L. College Physics I With Lab. 5 Hours.

This is the first course of a two-term algebra based lecture and laboratory sequence intended for non-physics majors, PHYS-201L and PHYS-202L. Kinematics and dynamics of a particle and systems of particles, momentum, energy, angular momentum, conservation laws, applications to problems involving collisions, oscillatory motion and motion in a gravitational field, rigid body motion, temperature, heat, the laws of thermodynamics, application to thermodynamic engines, and ideal gases are discussed. Lecture: 4hrs. Lab: 2 hrs.

Prerequisites: (MATH-185 - 499 or MATH-185A - 499Z or (MATH-173 and MATH-175)).

PHYS-202. College Physics II. 3 Hours.

This is the second course of a two-term algebra-based lecture sequence intended for non-physics majors: PHYS-201 and PHYS-202. The companion laboratory is PHYS-204. Electrostatics, Coulomb's law, electric fields, electric potentials, currents, Ohm's law, magnetism, magnetic fields, the forces on or due to moving charges, induction, electromagnetic radiation, wave motion, physical and geometrical optics will be discussed. Time permitting concepts in modern physics such as special relativity, quantum physics and radioactivity will also be discussed. Lecture: 3 hrs.

Prerequisite: PHYS-201 with a minimum grade of C or PHYS-201L with a minimum grade of C.

PHYS-202L. College Physics II With Lab. 5 Hours.

This is the second course of a two-term algebra based lecture and laboratory sequence intended for non-physics majors, PHYS-201L and PHYS-202L. Electrostatics, Coulomb's law, electric fields, electric potentials, currents, Ohm's law, magnetism, magnetic fields, the forces on or due to moving charges, induction, electromagnetic radiation, wave motion, physical and geometrical optics will be discussed. Time permitting concepts in modern physics such as special relativity, quantum physics and radioactivity will also be discussed. Lecture: 4 hrs. Lab: 2 hrs.

Prerequisite: PHYS-201 with a minimum grade of C or PHYS-201L with a minimum grade of C or PHYS-206 with a minimum grade of C or PHYS-206L with a minimum grade of C.

PHYS-203. Physics I Laboratory. 1 Hour.

This is a laboratory course covering the subject matter of Physics I, and it is meant to be taken concurrently with either PHYS-201 or PHYS-206.

Prerequisite: PHYS-201 with a minimum grade of C or PHYS-206 with a minimum grade of C.

PHYS-204. Physics II Laboratory. 1 Hour.

This is a laboratory course covering the subject matter of Physics II, and it is meant to be taken concurrently.

Prerequisite: PHYS-202 with a minimum grade of C or PHYS-207 with a minimum grade of C.

PHYS-206. University Physics I. 3 Hours.

This is the first term of a two-term calculus-based lecture sequence intended for students majoring in physics, biology, chemistry, earth science or mathematics: PHYS-206 and PHYS-207. The companion laboratory is PHYS-203. Kinematics and dynamics of a particle and systems of particles, momentum, energy, angular momentum, conservation laws, applications to problems involving collisions, oscillatory motion and motion in a gravitational field, rigid body motion, temperature, heat, the laws of thermodynamics, application to thermodynamic engines, and ideal gases are discussed. Lecture: 3 hrs.

Prerequisite: MATH-187 with a minimum grade of C.

PHYS-206L. University Physics I With Lab. 5 Hours.

This is the first term of a two-term calculus-based lecture and laboratory sequence intended for students majoring in physics, biology, chemistry, earth science or mathematics: PHYS-206L and PHYS-207L. Kinematics and dynamics of a particle and systems of particles, momentum, energy, angular momentum, conservation laws, applications to problems involving collisions, oscillatory motion and motion in a gravitational field, rigid body motion, temperature, heat, the laws of thermodynamics, application to thermodynamic engines, and ideal gases are discussed. Lecture: 4 hrs. Lab: 2 hrs.

Prerequisite: MATH-187 (may be taken concurrently) with a minimum grade of C.

PHYS-207. University Physics II. 3 Hours.

This is the second course of a two-term calculus-based lecture sequence intended for students majoring in physics, biology, chemistry, earth science or mathematics. The companion laboratory is PHYS-204. Charges, Coulomb's and Gauss's laws, conductors and dielectrics, Ohm's law, magnetic fields, Ampere's law, motion of charges in a magnetic field, Faraday's law, inductance, simple L.R.C. circuits, magnetic properties of matter, electromagnetic waves, kinematics of wave motion, reflection, refraction, interference, and diffraction are discussed. Lecture: 3 hrs.

Prerequisite: (PHYS-206 with a minimum grade of C or PHYS-206L with a minimum grade of C or PHYS-201 with a minimum grade of C or PHYS-201L with a minimum grade of C) and MATH-187 with a minimum grade of C.

PHYS-207L. University Physics II With Lab. 5 Hours.

This is the second course of a two-term calculus based lecture and laboratory sequence intended for students majoring in physics, biology, chemistry, earth science or mathematics. Charges, Coulomb's and Gauss's laws, conductors and dielectrics, Ohm's law, magnetic fields, Ampere's law, motion of charges in a magnetic field, Faraday's law, inductance, simple L.R.C. circuits, magnetic properties of matter, electromagnetic waves, kinematics of wave motion, reflection, refraction, interference, and diffraction are discussed. Lecture: 4 hrs. Lab: 2 hrs.

Prerequisite: PHYS-201 with a minimum grade of C and MATH-187 with a minimum grade of C or (PHYS-206 with a minimum grade of C or PHYS-206L with a minimum grade of C).

PHYS-211. Physics I Seminar. 1 Hour.

Enrichment Seminar accompanying PHYS-201 or PHYS-206. Students do problem solving in collaborative groups on material derived from and supplementing University Physics I or College Physics I to gain a deeper understanding of concepts and applications.

PHYS-212. Physics II Seminar. 1 Hour.

Enrichment Seminar accompanying PHYS-202 or PHYS-207. Students do problem solving in collaborative groups on material derived from and supplementing University Physics II or College Physics II to gain a deeper understanding of concepts and applications.

PHYS-215. Physics III. 4 Hours.

Introduction to the physics of the twentieth century, including application to related fields such as biology, chemistry, earth science, and engineering. Fundamental concepts of special relativity, quantum mechanics, and statistical physics as applied to atomic, molecular, nuclear and solid state physics.

Prerequisite: PHYS-202 with a minimum grade of D or PHYS-207 with a minimum grade of D.

PHYS-300. Interdisciplinary Seminar In STEM. 2 Hours.

This course uses a hands-on approach to modern inquiry-based research problems and techniques in the physical and computational sciences. The course is structured around a series of modular problem-based exercises, covering topics from the fields of Chemistry, Computer Science, Earth Science, Mathematics and Physics, and is designed to provide the content and pedagogical background for students to be successful peer leaders. The cross-disciplinary modules will draw connections between scientific disciplines, and showcase common research tools and techniques used in the sciences. The workshop will also incorporate discussions on a range of topics, from scientific ethics, scientific methodology and error analysis.

Prerequisite: MATH-185 with a minimum grade of C.

PHYS-301. Independent Study In Physics. 1 Hour.

Research, laboratory work, study or tutorial in a specific area of physics under faculty supervision.

PHYS-302. Independent Study In Physics. 2 Hours.

(See PHYS-301 for description.).

PHYS-303. Independent Study In Physics. 3 Hours.

(See PHYS-301 for description.).

PHYS-304. Physics For Elementary School Teachers I. 3 Hours.**PHYS-305. Modern Physics I. 3 Hours.**

This course covers advances made in physics during the first half of the twentieth century. These advances lead to many of the technologies we have today and they continue to drive innovation. The course content includes an introduction to the theory of relativity, particle-wave duality, elementary quantum theory, and the application of quantum theory to atomic, molecular, and nuclear physics.

Prerequisite: (PHYS-207L with a minimum grade of C or PHYS-207 with a minimum grade of C or PHYS-202L with a minimum grade of C or PHYS-202 with a minimum grade of C) and MATH-202 with a minimum grade of C.

PHYS-306A. Modern Physics II. 3 Hours.

Modern Physics II is the second part of a two-course sequence covering advances made in physics during the twentieth century. This course introduces students to statistical physics and focuses on applications of statistical physics, relativity, and quantum mechanics. These applications include atomic and molecular physics, condensed matter physics, nuclear physics, particle physics, astrophysics, and cosmology.

Prerequisite: PHYS-305 with a minimum grade of C.

PHYS-307. Writing Intensive Program: Modern Physics Lab. 3 Hours.

An introduction to intermediate-level experimental methods, scientific writing, and investigations which provided the experimental foundation for the major revolutions in 20th century physics. Students will perform classic modern physics experiments which demonstrate quantization in nature, wave particle duality, and the properties and interactions of fundamental particles. Students will present written results of their investigations in a variety of formats common in the discipline.

Prerequisite: ENGL-101 with a minimum grade of C and PHYS-305 with a minimum grade of C.

PHYS-308. Introductory Mathematical Physics. 3 Hours.

This course is an introduction to mathematical methods in physics, which include partial differentiation, multiple integration, vector analysis, complex numbers, complex variables, linear algebra, Fourier series, ordinary differential equations, special functions, and tensor analysis.

Prerequisite: MATH-203 with a minimum grade of C and (PHYS-207 with a minimum grade of C or PHYS-207L with a minimum grade of C).

PHYS-309. Computing For Scientists. 3 Hours.

Introduction to the use of computers in modeling scientific problems; modern programming languages are introduced and used to model several phenomena in the natural sciences and engineering.

Prerequisite: MATH-187 with a minimum grade of C.

PHYS-311. Mechanics I. 3 Hours.

Statics of particles and rigid bodies, kinematics and dynamics of particles (including damped and forced harmonic oscillators), work and energy, linear and angular momentum, conservation laws, dynamics of rigid bodies, introduction to special relativity.

Prerequisite: (PHYS-201L with a minimum grade of C or PHYS-206L with a minimum grade of C) and MATH-202 with a minimum grade of C.

PHYS-321. Electricity And Magnetism I. 3 Hours.

Coulomb's law, electric fields and electrostatic potential, Gauss's law, Poisson's equation, capacitance, dielectric media, current density, simple circuits, magnetic fields, Lorentz force, magnetic media, induction, Ampere's law, inductance, Maxwell's equations.

Prerequisite: (PHYS-202L with a minimum grade of C or PHYS-207L with a minimum grade of C) and MATH-203 with a minimum grade of C.

PHYS-324. Advanced Classical Physics. 3 Hours.

This course is an introduction to advanced topics in classical physics. Topics include the Lagrangian formalism of classical mechanics and its application to the theories of planetary motion, small oscillations, rigid body mechanics; Maxwell's equations, radiation, and propagation of electromagnetic waves.

Prerequisite: PHYS-311 with a minimum grade of C and PHYS-321 with a minimum grade of C.

PHYS-330. Writing Intensive Program: Experimental Methods. 3 Hours.

This course is an introduction to scientific measurement procedures, with special attention paid to scientific writing, the examination of error and uncertainty, and to widely used experimental techniques and their applications. Experiments are chosen according to the student's needs and interests. Students will present written results of their investigations in a variety of formats common in the discipline.

Prerequisite: (PHYS-202L with a minimum grade of C or PHYS-207L with a minimum grade of C) and ENGL-101 with a minimum grade of C and MATH-187 with a minimum grade of C.

PHYS-331. Optics. 4 Hours.

This course covers the fundamental principles of geometrical and physical optics and their application to the design of modern instruments as well as atomic spectra, properties of photons, and lasers. Principles discussed in lecture will be explored in various lab exercises. Lecture 2 hours, Lab 4 hours.

Prerequisite: (PHYS-207L with a minimum grade of C or PHYS-207 with a minimum grade of C or PHYS-202L with a minimum grade of C or PHYS-202 with a minimum grade of C) and MATH-202 with a minimum grade of C.

PHYS-332. Electronics. 4 Hours.

This course covers, through both lecture and laboratory, the basic structure of various electronic components, and their use and behavior in circuits. The course begins with linear elements, such as resistors, inductors and capacitors and proceeds through various semiconductor devices, diodes, transistors and operational amplifiers and culminates with the structure and use of logic circuits. Major emphasis is placed on laboratory work where the properties and interactions of various circuits are investigated. Lecture 2 hours, lab 4 hours.

Prerequisite: (PHYS-207L with a minimum grade of C or PHYS-207 with a minimum grade of C or PHYS-202L with a minimum grade of C or PHYS-202 with a minimum grade of C) and MATH-202 with a minimum grade of C.

PHYS-333. Vibration And Sound. 3 Hours.

Prerequisite: (PHYS-201 with a minimum grade of D or PHYS-206 with a minimum grade of D) and PHYS-203 with a minimum grade of D.

PHYS-335. Thermal Physics. 3 Hours.

Thermal Physics provides an introduction to thermodynamics and statistical mechanics. Course content includes the relationship between volume, pressure, heat, work, energy, temperature, entropy, free energy, enthalpy, chemical potential, heat capacities, and other quantities. Topics presented in this course include the first, second, and third laws of thermodynamics; heat engines, refrigerators, and heat pumps; mechanical, thermal, and chemical equilibrium, phase diagrams, phase transitions, Boltzmann and Gibbs distributions, partition functions, the equipartition theorem, blackbody radiation, and degenerate fermi gasses.

Prerequisite: PHYS-305 with a minimum grade of C.

PHYS-336. Quantum Mechanics. 3 Hours.

This course provides an introduction to Quantum Mechanics and is intended for physics majors/minors, and math or chemistry majors. The knowledge base covered is an essential foundation for students seeking to understand physical phenomena at a microscopic level. The Schrodinger equation is introduced and applied to problems in quantum mechanics including square wells, potential barriers, the harmonic oscillator, angular momentum, and the hydrogen atom. Time permitting, spin and many-particle systems will be discussed.

Prerequisite: PHYS-305 with a minimum grade of C and MATH-203 with a minimum grade of C.

PHYS-338. Quantum Mechanics II. 3 Hours.

This second course in quantum mechanics is intended for Physics majors who seek to build a solid background in the applications of quantum mechanics. It builds on the foundations introduced in Quantum Mechanics and covers applications of exact and approximate methods in quantum mechanics to real physical systems.

Prerequisite: PHYS-336 with a minimum grade of C.

PHYS-340. The Science Of Sustainable Energy. 3 Hours.

Sustainable energy provides a quantitative understanding of energy use and energy resources on both global scales and local settings. This courses will identify and quantify current energy resources, provide an understanding of energy conservation, efficiency, and the conversion of energy from less useful to more useful forms. PHYS-340 investigates the environmental consequences of our energy use, and emphasizes an interdisciplinary approach required to solving real-world problems. This course focuses on the science which informs development, policy, and management decisions.

Prerequisite: (PHYS-207L with a minimum grade of C or PHYS-202L with a minimum grade of C) and MATH-187 with a minimum grade of C.

PHYS-344. Introduction To Solid State Physics. 3 Hours.

Crystal structure, crystal bonding, thermal properties of solids, dielectric properties, free electron model of metals, band theory of solids, magnetism, superconductivity, current applications.

Prerequisite: PHYS-305 with a minimum grade of C.

PHYS-350. Field Experiences In Physics. 3 Hours.

Practical experience in industrial or government physics laboratories under the joint supervision of the department and the laboratory. There are six hours of field experience required per week. This course may be taken up to three times.

PHYS-361. Materials I: Structural, Mechanical And Thermal Properties. 3 Hours.

An introductory course on the properties of materials for students in all areas of science and technology. Topics include structural, thermal and mechanical properties of metals, alloys, ceramics and plastics, and their explanation in terms of molecular and atomic properties. Lecture 2 hours, lab 2 hours.

Prerequisite: PHYS-305 with a minimum grade of C.

PHYS-362. Materials II: Electric And Optical Properties. 3 Hours.

Companion course to Material I with primary emphasis on the electronic properties of materials and their industrial use. Topics include conductors, semiconductors, superconductors, ferromagnetism and ferroelectricity, optical and infra-red properties. Lecture 2 hours, lab 2 hours.

Prerequisite: PHYS-305 with a minimum grade of C.

PHYS-366. Communication Electronics. 3 Hours.

The course covers tuned circuits, radio frequency amplifiers, intermediate frequency amplifiers, cavity resonators and U.H.F. amplifiers, modulation, detection, R.F. power amplifiers, transmitters, transmission lines, antennas, television and special topics in communication electronics, including digital methods and telemetry. Lecture 2 hours, lab 2 hours.

Prerequisite: PHYS-332 with a minimum grade of D.

PHYS-367. Transducer And Special Purpose Electronics. 4 Hours.

Lecture and laboratory on the characteristics of devices which convert physical quantities such as heat, light, motion and sound into electrical signal. This includes both the practical aspects of using such devices and the intrinsic physical properties which make their use possible. Sensors used include thermistors, thermopiles, microphones, solar cells, and piezoelectric/ pyroelectric films. The course culminates with each student doing a major project, which may include computer interfacing to the transducers. Lecture 2 hours, lab 4 hours.

PHYS-369. Instrumentation Electronics. 4 Hours.

Lecture and laboratory course on the properties and uses of electronic scientific instruments used in making physical measurements, including computer interfacing. The instruments are studied from input transducer to final output. A major emphasis is placed on laboratory work, where actual instrumentation circuits are built and tested. The course culminates with each student building an actual scientific instrument. Lecture 2 hours, Lab 4 hours.

PHYS-391. Astrophysics. 3 Hours.

Astrophysics applies the laws of physics to celestial objects and phenomena. Course content includes orbital mechanics, the formation and evolution of the solar system, and solar system objects like planets, asteroids, comets, and satellites. This course covers the physics of stars including the birth, evolution, and death of stars, nuclear fusion, stellar atmospheres, solar cycles, HR diagrams, supernovae, white dwarfs, neutron stars and black holes. On larger scales, this course discusses clusters of stars, galaxies, the interstellar medium, and galactic clusters.

Prerequisite: PHYS-305 with a minimum grade of C.

PHYS-392. Cosmology. 3 Hours.

Cosmology is the study of the history, structure, constituents, and dynamics of the universe. Course content includes primordial nucleosynthesis, cosmological and astronomical observations, the Friedmann equation, dark matter and dark energy, the cosmological constant, cosmic inflation, the accelerating and expanding universe, the cosmic microwave background, inflation, and baryogenesis.

Prerequisite: PHYS-305 with a minimum grade of C.

PHYS-400. Introduction To Quantum Mechanics. 3 Hours.

PHYS-401. Advanced Experimental Physics. 3 Hours.

PHYS-402. Atomic Physics. 3 Hours.

PHYS-403. Solid State Physics. 3 Hours.

PHYS-404. Advanced Electronics For Scientists. 3 Hours.

Prerequisite: PHYS-393 with a minimum grade of D.

PHYS-405. Elementary Particles. 3 Hours.

PHYS-406. Statistical Mechanics. 3 Hours.

PHYS-407. Relativity And Gravitation. 3 Hours.

PHYS-408. Independent Study In Physics. 3 Hours.

PHYS-409. Thesis Seminar-Physics. 6 Hours.

PHYS-410. Electrodynamics. 3 Hours.

Prerequisite: PHYS-323 with a minimum grade of D.

PHYS-411. Classical Dynamics. 3 Hours.

Prerequisite: PHYS-312 with a minimum grade of D.

Major in Physics

The Bachelor of Science in Physics prepares students to pursue careers in teaching, research and development, or to go on for further graduate study. The broadly applicable problem-solving and technical skills of Physics graduates are in high demand across diverse sectors, from healthcare to Silicon Valley. All instruction is provided by full-time faculty in small classes, affording many opportunities for close personal contact between students and instructors. All advanced undergraduate courses are given in the evening, allowing students to complete studies on either a full-time or part-time basis. Faculty members are actively engaged in research projects which offer exciting opportunities for student participation.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

MATH-340	Computing For Mathematicians

Total Hours 9-13

¹ These electives must be chosen from at least two different departments.

This sample curricular map is provided to guide you in the planning of your progression for this major. This guide should not replace regular consultations with your program advisor. For specific recommendations of courses not identified, please consult your program advisor.

First Year

Term 1		Hours
MATH-187	Calculus I	4
PHYS-206L	University Physics I With Lab	5
General Education-Humanities		3
General Education-Fine Arts		3
Term Hours		15

Term 2		Hours
MATH-202	Calculus II	4
PHYS-207L	University Physics II With Lab	5
CS-200	Programming Fundamentals	4
General Education-Social/Behavioral		3
Term Hours		16

Second Year

Term 1		Hours
MATH-203	Calculus III	4
PHYS-305	Modern Physics I	3
MATH-253	Linear Algebra I	3
General Education-Fine Arts		3
Term Hours		13

Term 2		Hours
PHYS-306A	Modern Physics II	3
PHYS-335	Thermal Physics	3
300-Level PHYS Elective		3
MATH-301	Ordinary Differential Equations I	4
General Education/Elective		3
Term Hours		16

Third Year

Term 1		Hours
PHYS-311	Mechanics I	3
PHYS-321	Electricity And Magnetism I	3
General Education-Social/Behavioral		3
300-Level PHYS Elective		3
Elective		3
Term Hours		15

Term 2		
PHYS-308	Introductory Mathematical Physics	3
PHYS-307	Writing Intensive Program: Modern Physics Lab	3
CHEM-211	General Chemistry I	5
General Education-Social/Behavioral		3
300-Level PHYS Elective		3
Term Hours		17
Fourth Year		
Term 1		
PHYS-336	Quantum Mechanics	3
PHYS-330	Writing Intensive Program: Experimental Methods	3
300-Level PHYS Elective		3
General Education-Humanities		3
Elective		3
Term Hours		15
Term 2		
300-Level PHYS Electives		3
PHYS-335 ^{if not completed in year 2}	Thermal Physics	3
General Education-Humanities		3
General Education-Social/Behavioral		3
Elective		3
Term Hours		15
Total Hours:		122

Minor in Physics

The physics minor can add value and breadth to any major. The additional coursework is minimal for STEM majors including biology, chemistry, computer science, earth science, environmental science and math.

University Core Curriculum Requirements

General Education Distribution Area Cr. Hrs.

Fine Arts (FA)*

6

2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).

Humanities (HU)*

9

3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)

Behavioral/Social Sciences (SB)*

9

3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work

Natural Sciences (NS and NSL)**

9

3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Physics

Code	Title	Hours
Required Courses		
PHYS-206L	University Physics I With Lab	5
PHYS-207L	University Physics II With Lab	5
PHYS-305	Modern Physics I	3
PHYS-306A	Modern Physics II	3
One 300-level physics courses in consultation with advisor		3
Total Hours		19

Environmental Science

Environmental science integrates a wide range of scientific disciplines necessary to understand the environment and the many interactions among its components. These interactions include the impact of human activities on the environment and the impact of the environment on humans.

University Core Curriculum Requirements

General Education Distribution Area Cr. Hrs.

Fine Arts (FA)*

6

2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).

Humanities (HU)*

9

3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)

Behavioral/Social Sciences (SB)*

9

3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work

Natural Sciences (NS and NSL)**

9

3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Environmental Science

The interdisciplinary Environmental Science major requires a total of 79-82 credits through the following coursework.

Code	Title	Hours
Required courses		
ENVI-101	Introduction To Environmental Science	3
ENVI-301	Methods In Environmental Science	3
ENVI-390	Environmental Science Research & Practice	4
STEM core		
Biology		
BIO-150	Essential Skills For Biologists	2
BIO-201	General Biology I	4
BIO-202	General Biology II	4
Chemistry		
CHEM-211	General Chemistry I	5
CHEM-212	General Chemistry II	4
Earth Science		
ESCI-211	Physical Geology	4
ESCI-307	Climate Change: Evidence, Causes, Effects	4
Physics		
PHYS-206L	University Physics I With Lab	5
PHYS-207L	University Physics II With Lab	5
Mathematics		
MATH-187	Calculus I	4
MATH-275	Applied And Computational Statistics	4
Electives (5 from BIO, CHEM, ESCI, PHYS) <small>in consultation with advisor</small>		17-20
Social Sciences/Policy/Humanities		
GES-319	Environmental And Natural Resources Policy	3
Electives (2 from Social Science/Humanities) <small>in consultation with advisor</small>		6
Total Hours		81-84

- Greg Anderson, Professor, Department of Physics, Chair
- Paulo Acioli, Professor, Department of Physics
- Pamela Geddes, Professor, Department of Biology
- Elisabet Head, Associate Professor, Department of Earth Science
- Nadja Insel, Associate Professor, Department of Earth Science
- John Kasmer, Associate Professor, Department of Biology and Coordinator of Environmental Science
- Kenneth Nicholson, Associate Professor, Department of Chemistry
- Beth Reinke, Assistant Professor, Department of Biology
- Kenneth Voglesonger, Associate Professor, Department of Earth Science

Students will need to take the following three ENVI designated courses in addition to 42 credit hours of STEM core courses, 17-20 credit hours of STEM elective courses, and 9 credit hours of Social Science/Humanities courses, for a program total of 79 to 82 credit hours for a major in Environmental Science.

ENVI-101. Introduction To Environmental Science. 3 Hours.

This course introduces environmental science as the interdisciplinary study of environmental issues related to human impact on the natural environment. The course addresses environmental science literacy and scientific methods through inquiry into and discussion of biogeochemical cycles, ecosystem dynamics, climate change, conventional and renewable energy, resources, and sustainability. Lecture (2 hrs) and laboratory (2 hrs).

Prerequisite: (MATH-091 - 499 or MATH-091A - 499Z or NEIU Math Placement Result 02 - 45 or ACT Math 19 - 36 or Accuplacer Elementary Algebra 060 - 084 or Accuplacer College Level Math 020 - 120 or Accuplacer Adv. Algebra & Func 200 - 300 or SAT Math 500 - 800).

ENVI-301. Methods In Environmental Science. 4 Hours.

This problem-based interdisciplinary course builds on the knowledge and skills acquired in introductory biology, chemistry, earth science, mathematics, and physics. Topics covered include experimental design, sampling, and analytical techniques that are standard to the different scientific disciplines. Students are introduced to interdisciplinary field, laboratory, and data science methods, and develop skills in group collaboration as well as written and oral presentation. Laboratory activities will include both laboratory and fieldwork.

Prerequisite: BIO-202 with a minimum grade of C and CHEM-212 with a minimum grade of C and ENVI-101 with a minimum grade of C and MATH-275 with a minimum grade of C and (ESCI-121 with a minimum grade of C or ESCI-211 with a minimum grade of C) and (PHYS-202L with a minimum grade of C or PHYS-207L with a minimum grade of C).

ENVI-302. Beyond The Textbook: Science In Popular Literature. 2 Hours.

In this course, students will read, discuss, and explore the foundations and implications of science literature written for a popular audience. The books chosen for this course vary from semester to semester and will be chosen to cover a broad, interdisciplinary range of perspectives in STEM. The books selected will provide insight into the pursuit of objective truth, while providing the lens that science is done and implemented by individuals and societies, and therefore has ethical, moral, and social implications. [This course can count toward meeting the ELE requirements if ENVI-303 is not used to fulfill the requirement.].

Prerequisite: (100 - 399 or 100A - 399Z or).

ENVI-303. Beyond Textbooks: Science In Popular Literature. 3 Hours.

In this course, students will read, discuss, and explore the foundations and implications of science literature written for a popular audience. The books chosen for this course vary from semester to semester and will be chosen to cover a broad, interdisciplinary range of perspectives in STEM. The books selected will provide insight into the pursuit of objective truth, while providing the lens that science is done and implemented by individuals and societies, and therefore has ethical, moral, and social implications. [This course can count toward meeting the ELE requirements if ENVI-302 is not used to fulfill the requirement.].

Prerequisite: (100 - 399 or 100A - 399Z or).

ENVI-390. Environmental Science Research & Practice. 4 Hours.

This course puts into practice the knowledge and skills acquired by students throughout the Environmental Science Program. Through case studies, literature review, group discussions, and a research project, students apply concepts from the various scientific disciplines. Working in small teams, students conduct practical scientific research on environmental issues relevant to the local, regional or global community.

Requirements: three electives in BIO, CHEM, ESCI, MATH, and/or PHYS; program approval

Prerequisite: ENVI-301 with a minimum grade of C.

Suggested Electives

- BIO-305 WIP: General Ecology, 4cr
- CHEM-310: Chemical Aspects of Environmental Chemistry, 3 cr.
- ESCI-303: Environmental Geology in the Field, 4cr
- PHYS-340: The Science of Sustainable Energy, 3 cr.

Political Science

Political Science is central to an understanding of all basic social issues; therefore, an understanding of political life is indispensable for any well-educated person. The department currently offers an undergraduate major, a minor in political science, a minor in public administration, and a graduate program leading to the Master of Arts degree.

Areas of political science in which courses are offered include American Politics and Public Affairs; International Relations and Comparative Politics; and Political Theory. Within each area, major themes are explored (e.g., public policy and administration, political values and change, elite-mass relationships, and political parties and groups.)

Students interested in majoring or minoring in political science are urged to register at the departmental office early, to meet with their advisors regularly, to check the current Schedule of Classes each term, and to become well acquainted with the requirements for political science majors or minors. A minor in public administration is also offered. Information is available in the departmental office.

Other students may also be interested in political science courses. The courses, PSCI 210--Introduction to Political Science and PSCI 216--American National Government, can satisfy the Improving Human Relations requirement. These two courses can also be used to fulfill part of the General Education requirement in Social and Behavioral Sciences. PSCI 216 also fulfills the teachers' certification requirement in American government. .

- Major in Political Science (<http://catalog.neiu.edu/arts-sciences/political-science/political-science/>)
- Minor in Political Science (<http://catalog.neiu.edu/arts-sciences/political-science/minor-political-science/>)
- Minor in Public Administration (<http://catalog.neiu.edu/arts-sciences/political-science/minor-public-administration/>)
- Minor in Jewish Studies (<http://catalog.neiu.edu/arts-sciences/political-science/minor-jewish-studies/>)

Master of Arts in Political Science (<http://catalog.neiu.edu/arts-sciences/political-science/master-political-science/>)

Martyn De Bruyn, Ph.D., Professor, Chair

William Adler, Ph.D., Associate Professor

Sangmin Bae, Ph.D., Professor

Russell Benjamin, Ph.D., Professor

Ellen Cannon, Ph.D., Professor

Sophia Mihic, Ph.D., Professor

Gregory Neddenriep, Ph.D., Associate Professor

Marshall Thompson, Ph.D., Associate Professor

PSCI-101. Introduction To Politics. 3 Hours.

PSCI-109. First Year Experience:Civic Engagement, Community And Social Change In Chicago. 3 Hours.

This colloquium is a three-credit course that combines the traditional classroom setting and community service to explore the meaning and interconnection of community, citizenship, politics, diversity, civic engagement and social change. Students enrolled in this course spend time developing their interpersonal and intrapersonal skill (such as, self-awareness, critical thinking and problem-solving skills, leadership skills); become skilled at civic engagement (action strategies and plan, project management, communication, negotiation and teamwork); as well as reading academic literature that examines concepts of democracy, power and justice.

PSCI-210. Introduction To Political Science. 3 Hours.

An introduction to the discipline through an examination of the concepts and skills utilized in the contemporary study of politics. The course provides an overview of political science, including its various sub-fields, and a framework for further study.

PSCI-216. American National Government. 3 Hours.

Description and analysis of national political institutions and processes. Current issues and problems of American government.

PSCI-251. Writing Intensive Program: Comparative Political Systems. 3 Hours.

This course is an introduction to comparative politics. In this course students will study different political systems (democracies, semi-democracies, and authoritarian regimes) by way of selective case studies. Major issues in comparative politics, such as democratization, political culture, political economy, constitutionalism, political leadership, and political parties and elections will be discussed in some detail. Even though this is not a course in American politics, comparisons with the United States will be drawn where appropriate.

Prerequisite: ENGL-101 with a minimum grade of C.

PSCI-275. Introduction To World Politics. 3 Hours.

General introduction to world politics with emphasis on current issues and events of importance at the international or global level. Basic concepts and methods of political analysis are introduced.

PSCI-291. Concepts Of Political Science. 3 Hours.

Analysis of a number of crucial political concepts, such as equality, justice, political obligation, representation, rights and law.

PSCI-301. Independent Study In Political Science. 3 Hours.

Intensive investigation of a special area of political science or a contemporary political issue.

PSCI-302. Independent Study In Political Science. 2 Hours.

(See PSCI-301 for description.).

PSCI-303. Independent Study In Political Science. 1 Hour.

(See PSCI-301 for description.).

PSCI-304. Field Experience. 3 Hours.

Placement in a government agency, political office or related institution for 8 hours per week. Opportunity for testing classroom concepts and theories, career exploration and the development of problem solving, research and social skill. Meeting arranged.

PSCI-305. Internship I. 6 Hours.

(See description for PSCI-304. Hours in placement increased to 16 hours per week.).

PSCI-306. Internship II. 6 Hours.

(See description for PSCI-304. Hours in placement increased to 16 hours per week.).

PSCI-307O. Topics: Democracy, Responsiveness & Accountability. 3 Hours.

To whom - what interest, whose demands - do elected politicians respond when making policy? In the last thirty years, the number of countries that select their rulers through competitive elections has increased sharply. This class explores the practical implications of ideals like responsiveness and accountability for elected officials, and how these operate in conjunction with the separation of powers, independent judiciaries, political party discipline, pressure from international actors, as well as more base incentives, such as personal ambition and corruption.

Prerequisite: PSCI-210 with a minimum grade of C and (PSCI-251 with a minimum grade of C or PSCI-275 with a minimum grade of C).

PSCI-308. Research Methods And Techniques In Political Science. 3 Hours.

Designed for upper division majors in political science or those intending to undertake graduate study in political science, the course provides an introduction to topics and skills given more intensive and specialized consideration on the graduate level. Topics include an introduction to the various research techniques in political science, with emphasis on developing skills necessary for graduate work in the discipline areas of concentration: development of research designs, identification of appropriate data sources, discussion of alternative methodologies, and data analysis techniques.

Prerequisite: PSCI-210 with a minimum grade of C or PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C.

PSCI-309A. Moot Court And Appellate Advocacy. 1 Hour.

This course involves a role-playing simulation where students discharge the responsibilities of attorneys arguing a case before an appellate-level court. Students will wrestle with a challenging hypothetical case that implicates a state or federal statute and/or some aspect of our state or federal constitution. Students will approach the case from the perspective of both the petitioner and respondent, and some students may have an opportunity to play the role of a justice. Although students may be exposed to background readings about courtroom process, procedure, and legal doctrine, the simulation itself will be based on a closed-universe of legal authorities such that no legal research is required. The course is designed to prepare students for a formal moot court competition, but participation in such a competition is voluntary.

Prerequisite: (100 - 399 or 100A - 399Z).

PSCI-309B. Model United Nations. 1 Hour.

This course is designed to provide an orientation to the activities of the United Nations, as well as to provide an understanding of the modalities of international diplomacy. This course will include current events, pressing international issues, the basics of international law and some of the protocol and procedures of diplomacy. This course will prepare students to participate as distinguished diplomats at the entirety of the American Model United Nations conference in Chicago.

Prerequisite: (100 - 399 or 100A - 399Z).

PSCI-310. Congress And The Legislative Branch. 3 Hours.

Introduction to the U.S. Congress as a political and legislative body; includes analysis of the committee system, rules and differences between House and Senate; examines problems of representation and executive-legislative relations.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-311. The American Judiciary And The Judicial Process In American Government. 3 Hours.

An analysis of the judicial policy - making process at all levels of the American judiciary with special emphasis on the Supreme Court's role in constitutional development, separation of powers, and the historical and political context of constitutional law doctrines. Critical cases are examined.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-312. American Presidency And The Executive Branch. 3 Hours.

The role of the President and the executive branch in the American governmental system. Contemporary problems of the Presidency and the bureaucracy.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-313. State Government And Politics. 3 Hours.

Examination of political institutions at the state level: governor, legislature, judiciary, constitution, parties, and administration. Analysis of state politics within and outside the institutional framework. Discussion of major problems and functions of state governments today. Emphasis on Illinois government and politics.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-315. Electoral Politics. 3 Hours.

A review of major developments in electoral politics (including political parties and electoral law) and voting behavior in recent years, and an analysis of current elections.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-316. Pressure Groups: Power, Participation And Public Policy. 3 Hours.

Examination of the role of interest groups in political systems, with emphasis on groups in American politics-their membership, organization, activities, goals, and impact on American public policy with special attention on the role of groups as representative agents and their functioning as facilitators or resistors with regard to social change.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-317. Public Opinion, Mass Media And American Politics. 3 Hours.

The role of public opinion in American politics, techniques of polling and survey research, the impact of mass media on opinion and on candidate preferences; introduces concepts of political culture and socialization.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-318. Pop Culture And Politics. 3 Hours.

This course explores the relationship between popular culture and politics, how celebrities affect political events, the impact of popular culture on politics, and political representations in pop culture especially as they intersect with issues of race, gender, and sexuality. The first half of the course examines the rise of a celebrity-infused political culture and analyzes the changing influence of Hollywood on political campaigns. The remainder of the course considers political representations in TV, film, theater, and music, both in the American context as well as in international relations.

PSCI-319. The Politics Of Law. 3 Hours.

Consideration of various definitions of law, the impact of law on the behavior of various actors; the political, social and economic forces which mold law; the influence of the legal system on the various actors within it; and theoretical efforts to explain the relationships of law and society, with emphasis on the trial courts, the organization of the bar, the origin of litigation and the political consequences of lower court involvement in social conflicts.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-320. Constitutional Law. 3 Hours.

The role of the Supreme Court and its impact on the constitutional development of the due process clause, civil liberties, First Amendment freedoms, and the equal protection of the law are traced with particular emphasis on the assessment of the role of the Supreme Court vis-a-vis the states and the national government in protecting and restricting civil liberties.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-321. American Jewish Politics. 3 Hours.

This course will cover: Conceptual frameworks of American Jewish political power, institutions and behavior; multiple theories of modern Jewish politics in America; internal and external advocacy institutions from 1820-present; American Jews and the legal process; American Jews and the Labor Movement; American Jews and Feminist politics; Anti-Semitism and the American Jewish response; American Jewish politics and Israel.

Prerequisite: PSCI-216 with a minimum grade of C.

PSCI-322. Women And Political Influence In The 21st Century. 3 Hours.

This course will examine the changing influence of women both in the American and global context. Some of the questions we will examine include: What does political influence mean in the 21st century and how does it motivate different women in different contexts and cultures to become politically involved? Do certain policy issues appear to increase women's influence more than others? To what extent has capitalism and global entrepreneurship impacted the influence of women? What structural, political, ideological, military, and educational limitations and barriers do women continue to face? How has the meaning of violence against women altered if at all in the 21st century? Do women with political power work to improve the lives of women or do women continue to see the impact of class, race, and gender irrespective of the increase of women's political influence?.

Prerequisite: PSCI-216 with a minimum grade of C.

PSCI-323. American Ideologies. 3 Hours.

Exploration of various ideologies that attempt to explain the nature of American society and politics; a discussion of belief systems and value orientations; consideration of diversity and change in a system of fundamental stability; analysis of variants of left and right ideologies.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-325. Public Policy. 3 Hours.

Introduction to the analysis of public policy, including the policy-making institutions and processes; normative and empirical models of policy-making, and case studies of specific public policies.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-326. Educational Policy In America. 3 Hours.

This course examines the politics and policies of education. Education policy encompasses the basic interests and values of society. But in a pluralistic society such as the United States, there is often deep disagreement over those values. Such is the case with education. This course will focus on this struggle with an aim to demonstrate that educational policy is never really about education per se but about politics and struggle over specific interests.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-327. Government And Economy. 3 Hours.

Exploration of the role and purpose of government and market in the American economy; discussion of contemporary issues (e.g., income distribution or government regulation); international comparisons.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-328. Politics Of Poverty. 3 Hours.

This course examines poverty within the context of the American political system. In particular, it examines public policymaking and public policies in regard to poverty, and the historical and political factors that have impacted upon poverty in this nation. This course also includes an examination of theories that have influenced government policies regarding the poor. Finally, it examines recent changes in poverty programs, a discussion of possible alternatives to these programs, and policies regarding payday loans and similar financial practices that impact the working poor.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-329. Minority Politics In The United States. 3 Hours.

This course provides an exploration of the politics of various minority groups in the United States. In a society that is becoming increasingly diverse, it is essential that students gain an appreciation of ethnic, racial, and gender groups in their society. While the course touches upon many groups, the primary focus is upon African Americans, Latinos, and women.

Prerequisite: PSCI-216 with a minimum grade of C.

PSCI-330. African American Politics and Social Change. 3 Hours.

This course will familiarize students with the political challenges of and strategies employed by African Americans in the United States. The course examines the impacts of these attempts at social and political change. A critical issue is the extent to which black Americans have gained democracy in American society. Additionally, internal black political issues are examined. Further, the American political system itself is examined as part of the global political community.

Prerequisite: PSCI-216 with a minimum grade of C.

PSCI-331. Latinos & Public Policy. 3 Hours.

This course explores the social, economic and political status of Latinos through a public policy lens. Its goal is to provide a basic understanding of public policies on key issues impacting Latino communities. The course provides a brief history of various Latino populations in the U.S. Most significantly, it provides basic foundations for understanding what public policy is, how it is made, how it affects Latino communities, and how it can be impacted to effect positive change for Latinos.

Prerequisite: PSCI-216 with a minimum grade of C.

PSCI-332. Latinos & The Law. 3 Hours.

This course critically examines legal topics related to Latinas/os in American society. Students will read and discuss landmark court decisions, law review articles, and chapters from interdisciplinary texts in order to analyze legal doctrines, litigation strategies and the socio-political context in which these legal matters occur. After an initial introductory unit that is heavily historical, we will place a strong emphasis on significant social, political and legal events from the 1940s to the present.

Prerequisite: PSCI-216 with a minimum grade of C.

PSCI-333. Immigration, Ethnicity, And Citizenship. 3 Hours.

This course is an introduction to the most important political and academic debates surrounding the topic of immigration: How are citizenship and nationhood defined? What is the relationship between ethnicity and citizenship? What comprises our national and ethnic identity? How do our perceptions of citizenship, nationhood, and ethnicity influence each other as well as our outlook on immigration? What are current immigration policies and immigration policy debates in the U.S. and elsewhere? In addressing these questions, this course will explore five major themes: immigration, identity, ethnicity, (trans)nationalism, and citizenship.

Prerequisite: PSCI-210 with a minimum grade of C or PSCI-216 with a minimum grade of C.

PSCI-334. Intergovernmental Relations. 3 Hours.

Impact of federalism on policy-making and administration in the American system; focuses on the interaction between federal government and states, metropolitan areas, and cities in the development and implementation of public policy.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-335. Urban Politics. 3 Hours.

Types of urban government and politics; ability of the governmental institutions to meet the demands and respond to the needs of urban areas; community power and control; citizen participation and decentralization of governmental services.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-336. Urban Government Administration. 3 Hours.

Introductory survey of local governmental administration; powers of municipal corporations, special districts and other jurisdictions; taxation, revenue and budgeting, common administrative structures, and institutionalized forms of urban leadership and control.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-338. Chicago Politics. 3 Hours.

The structure of the government of the City of Chicago and its associated politics; the development of the Daley machine and its aftermath with particular focus on the impact of race on contemporary political behavior; including analysis of voting patterns and blocs within the City Council.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-339. Laboratory In Urban Politics. 3 Hours.

First-hand observation of urban governmental organization, political parties, and politically active citizen groups; written and oral reports and class discussion of field observations.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-341. Public Administration. 3 Hours.

Introduction to the role of public bureaucracies in the political system. A general overview of major concepts, processes and problem areas in the field of public administration. Intended for undergraduate students; graduate students seeking a general overview of the field should take PSCI-441.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-344. Writing Intensive Program: Public Organization Theory. 3 Hours.

Review of theories concerning public bureaucracies, their internal functioning and societal roles; analysis of the organizational setting of work and its implications; organizational effectiveness, decision-making, leadership and policy formulation, and change in public organizations. Writing Intensive course.

Prerequisite: (PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C) and ENGL-101 with a minimum grade of C.

PSCI-345. Government Budgeting. 3 Hours.

Fiscal policy and budget process: historically changing functions of budgeting-from emphasis on control to managerial effectiveness; reassertion of Congressional authority in 1974 and the new budget cycle; zero-based budgeting; impoundment, transfer payments, and grant-in-aid.

Prerequisite: (PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C).

PSCI-346. Public Personnel Administration. 3 Hours.

Organization and administration of the personnel function in public bureaucracies; relations of personnel management to operating departments and agencies; the scope of public personnel services; appraisal of policies and practices in selected areas of personnel management, such as selection and training, human relations and motivation.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-347. Disaster Policy & Politics. 3 Hours.

This course focuses on the evolution of U.S. disaster policy and the practice of emergency management, with particular attention to the roles of local governments, public agencies, and nonprofit agencies in disaster management. The course examines the major policy issues, including the utility of the "all-hazards" model of emergency management; the role of all first responders in disaster operations (police, firefighters, physicians, and medical emergency personnel); military, state and local capacity building; and the design and implementation of hazard mitigation policies and programs. Particular attention will be given to nuclear waste leaks, chemical biological and nuclear attacks, and urban wildfires.

Prerequisite: PSCI-216 with a minimum grade of D.

PSCI-348B. Topics In Public Administration: The Federal Role In American Cities. 3 Hours.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-350. International Relations In Asia. 3 Hours.

The foreign policies of various Asian nations with special attention to the relations among these nations as well as their relations with other areas of the world.

Prerequisite: PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-351. Government And Politics Of Japan. 3 Hours.

The modern Japanese political system; the relationship between the Japanese people and their institutions, including the interrelationships between the traditional and the modern with emphasis on the structures and processes of Japanese government and politics since World War II.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-353. Government And Politics Of China. 3 Hours.

The structure and activities of the Chinese Communist party and state communist outlook; ideologies and significant internal and foreign problems.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-354. Islamic Civilization II: Government And Politics. 3 Hours.

Islam is not only one of the major religions of the world but also a political ideology claiming nearly one billion adherents~ about one-fourth of the entire world population. Its impact on the world within the last 1400 years is so powerful that one cannot study History, Religion, Culture, Politics, Economics and Civilizations without correctly understanding Islam not only as a Religion but also as a force affecting world events.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-355. The Politics Of Islam. 3 Hours.

Discussion of the religion of Islam and the Islamic political institutions; influence of Islamic political thought and religion on political systems currently operating in major Muslim countries.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-357. Politics Of The European Union. 3 Hours.

Politics of the European Union is an introduction to the history, the institutions, and the policies of the European Union. Students will discuss topics ranging from theories of integration to economic and social policy and issues of democracy in the EU. Students are required to participate in an EU simulation in which they take on an alter ego and learn first hand how to negotiate through the complex system of EU decision making.

Prerequisite: PSCI-210 with a minimum grade of C or PSCI-251 with a minimum grade of C or PSCI-275 with a minimum grade of C.

PSCI-358. Modern European Governments. 3 Hours.

Comparative study of the politics and governments of several major European nations.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-360. Politics Of Sub-Saharan Africa. 3 Hours.

Examination and comparison of the politics of selected African states; particular emphasis on traditional heritage, colonial background, ideological setting, political parties, role of the military, governmental structure, and problems of nation building.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-363. Politics Of The Middle East. 3 Hours.

The impact of the physical environment, the economic conditions, and the historical heritage on the political structures presently operating in the region; analysis of the region in its world context.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-364. Islamic Civilization I: Political Ideology And Theory. 3 Hours.

This course will provide an in-depth view of Islamic Civilization, its development, its rich heritage, and its effects on the social and political life of societies in several parts of the world.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-365. Politics And Government Of Mexico, Central America And The Caribbean. 3 Hours.

The political systems in Mexico, Central America, and the Caribbean; comparison of the social, economic and political conditions of each; the strategic importance of this region to the United States.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-366. Politics And Governments Of South America. 3 Hours.

Examination of the various political systems on the continent of South America with comparisons of social and political institutions of the various countries.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-367. Government And Politics Of South And North Korea. 3 Hours.

Based on a comparative perspective, this course will focus on the two Koreas' political, economic, military, social, educational and cultural developments since the end of the Second World War in 1945. The two Koreas have had different ideologies and different political systems and both of them, like China and Taiwan, have played and will play an extremely important role in the security of the Asian-Pacific Rim. In other words, whether or not the peace in Asia can be maintained depends on the political wisdom of the top leaders in North and South Korea and in the United States.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-368. The Politics Of The Soviet And Post-Soviet World. 3 Hours.

Political history of the Soviet period, including the structure and operation of the Soviet Communist Party. Dissolution of the Soviet system, analysis of present transition period and future economic and political prospects for Russia and bordering states.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-369. Russia In International Politics. 3 Hours.

Analysis of the new Russian state as a leader of the former Soviet states and its former Warsaw Pact allies, tensions and new developments; relations with the United States and with the European Community; Russia as a major actor in global politics.

Prerequisite: PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-371. Canadian Government & Politics. 3 Hours.

The Canadian political system with analysis of the constitutional development, the structure of government, political parties and pressure groups, problems of regionalism and nationality, questions of foreign policy and relationship with the United States.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-372. Democracy, Responsiveness, & Accountability. 3 Hours.

In recent decades the number of countries that select their rulers through competitive elections has increased sharply. The performance of many of these regimes, however, raises serious doubts about the extent to which elections guarantee a close correspondence between citizen preferences and policy outputs. This class explores the practical implications of ideals like responsiveness and accountability for elected and appointed officials, and how these operate in conjunction with separation of powers, judiciaries, party discipline, pressure from international actors as well as more base incentives, such as personal ambition and corruption.

Prerequisite: PSCI-210 with a minimum grade of C or PSCI-251 with a minimum grade of C or PSCI-275 with a minimum grade of C.

PSCI-373. Gender And Politics. 3 Hours.

A study of the relationship of gender and gender roles to political attitudes, beliefs and behavior. The nature of political socialization is considered as well as political and economic structures pertinent to gender distinctions. The approach is comparative.

Prerequisite: PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or WSP-101 with a minimum grade of C.

PSCI-375. Contemporary International Relations. 3 Hours.

Basic principles and problems; emphasis on contemporary issues in international political life.

Prerequisite: PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-376. Writing Intensive Program: Principles Of International Relations. 3 Hours.

Principles of International Relations is a course that critically evaluates theories and practices of international relations. This course provides undergraduate and graduate students with a thorough understanding of the key paradigms in international relations: Realism, Liberalism, Constructivism, Marxism, and Feminism. Students will not only learn about these paradigms, but also learn how to apply them to real world affairs. Topics discussed in this course include international law, human security, cybersecurity, climate change, nuclear non-proliferation, violence against women, and capital punishment.

Prerequisite: PSCI-275 with a minimum grade of C or PSCI-251 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-377. International Organization: Theory And Practice. 3 Hours.

Evolution of existing theories in the area of worldwide and region-wide cooperation among sovereign states. Survey of writings of recognized scholars, as well as commentaries.

Prerequisite: PSCI-275 with a minimum grade of C or IR-313 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-378. International Political Economy. 3 Hours.

This course provides a study of the structure and development of the global political economy. To this end, the course will cover topics including: the structure of the international system, historical and present globalization, international trade policies, exchange-rate policies, and domestic and international institutions. The course is designed to stress theory, in addition to key events and developments in the world economy. We will explore theoretical and substantive explanations found in the international system as well as those found within domestic political-economies.

Prerequisite: PSCI-210 with a minimum grade of C or PSCI-251 with a minimum grade of C or PSCI-275 with a minimum grade of C.

PSCI-379. War And Peace. 3 Hours.

This course is about the pursuit of peace and an understanding of the causes of war. To that end, the course begins with theoretical debates on the causes and consequences of war, violence, and oppression, and moves to address significant international initiatives that alleviate the causes of war. Topics to be covered include interstate war, intrastate conflict such as ethnic conflict and genocide, as well as the roles of conflict-resolution agents: governmental and nongovernmental organizations, norms and ethics, international law, the United Nations, and the International Criminal Court.

Prerequisite: PSCI-275 with a minimum grade of C or PSCI-210 with a minimum grade of C or PSCI-251 with a minimum grade of C.

PSCI-380. International Law. 3 Hours.

Evolution of international law from theological statements to modern jurisprudence; ramifications of the state as the single most important international person and its multifaceted activities; case briefing as a method of studying international law.

Prerequisite: PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-381. International Terrorism. 3 Hours.

Investigation of terrorism, beginning with the problem of definition. Origins and evolution of terrorism as well as motivation and inspirations of those who have embraced terrorism. A selection of terrorist organizations will be studied.

Prerequisite: PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-383. United States Foreign Policy Since Worldwar II. 3 Hours.

Description and analysis of the important changes in traditional American foreign policy that have occurred since World War II; the international responsibilities that the United State has shouldered as a world power; the political, economic, and social factors that are conditioning and limiting American foreign policy today.

Prerequisite: PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-384. United States And The World Economy. 3 Hours.

A study of the nature and structure of the world economy and the role played by the U.S. in the post-World War II economy. Topics such as the Bretton Woods System, the Gold Window and flexible exchange rates and their political, social, economic and strategic dimensions.

Prerequisite: PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-210 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C.

PSCI-386. Globalization & Politics. 3 Hours.

This course provides a conceptual foundation for understanding the intensifying global system and its impacts on politics, economics, cultures, and transnational relations. In particular, the course explores the effects of economic globalization - and political responses to economic globalization - in nations of Latin America, Africa, and Asia; examines the roles and possible reforms of major global financial institutions; extends analysis to the cultural and ideological aspects of globalization; and assesses prospects for transnational cooperation on human rights and for expanded global governance and citizenship.

Prerequisite: PSCI-210 with a minimum grade of C or PSCI-251 with a minimum grade of C or PSCI-275 with a minimum grade of C.

PSCI-388. International Relations In The Middle East. 3 Hours.

Struggles for power and peace in this strategic region of the world; nature and frequency of interactions between the nations of the region and between these nations and the great powers.

Prerequisite: PSCI-275 with a minimum grade of C or IR-201 with a minimum grade of C or PSCI-251 with a minimum grade of C or COMP-211 with a minimum grade of C or PSCI-210 with a minimum grade of C.

PSCI-390. Classical Political Theory. 3 Hours.

Analysis of the concept of a political community in terms of obligations, rights, the public interest, the just state, and the just individual. Selected writing of Plato, Aristotle, Sophocles, Aristophanes, Xenophon, and others.

PSCI-391. Modern Political Theory. 3 Hours.

Analysis of the tensions between the individual and society. Concepts of society, natural rights, political obligation, consent, the rule of law, social contract, and revolution examined through selected writings of Machiavelli, Hobbes, Locke, Rousseau, Burke, Mills, Marx and Pateman.

PSCI-392. Writing Intensive Program: Contemporary Political Philosophy. 3 Hours.

State and governance are among the most traditional, and one might think settled, themes in modern political thought. But recent 21st century events have given these themes a new significance. Were these events, and related problems, prefigured in earlier crises of political order? How does "globalism" affect theories of state and governance? Are the liberal democratic and republican traditions able to meet the dilemmas of security and freedom presented by an increasing inter-connectedness among nation-states? To investigate these questions, this course will explore classics on state and governance and also read selected contemporary theories, histories and literary perspectives on political order.

Prerequisite: ENGL-101 with a minimum grade of C.

PSCI-393. Contemporary Political Analysis. 3 Hours.

Analysis of behavioralism, decision-making theories, quantitative approaches to politics, structural-functionalism, systems theory, game theory, political development theory, and interest group theory.

Prerequisite: PSCI-291 with a minimum grade of C or THRY-213 with a minimum grade of C.

PSCI-394A. Selected Political Theorists: Plato. 3 Hours.**PSCI-394B. Selected Political Theorists: Machiavelli. 3 Hours.****PSCI-394C. Selected Political Theorists: Hobbes. 3 Hours.****PSCI-394D. Selected Political Theorists: Locke. 3 Hours.****PSCI-394E. Selected Political Theorists: Rousseau. 3 Hours.****PSCI-394F. Selected Political Theorists: Adam Smith. 3 Hours.****PSCI-394G. Selected Political Theorists: John Stuart Mill. 3 Hours.****PSCI-394H. Selected Political Theorists: Marx. 3 Hours.****PSCI-394I. Selected Political Theorists: John Rawls. 3 Hours.****PSCI-395. Early American Political Thought. 3 Hours.**

Topics including the American revolution, the writing of the constitution, and the crisis of the Republic will be examined through selected writings of the following theorists and activists: Winthrop, Adams, Paine, Jefferson, Hamilton, Madison, Calhoun, Stanton, Thoreau, Douglass, Grimke, and Lincoln.

PSCI-396. Jewish Political Thought. 3 Hours.

This course explores the Jewish political tradition, focusing particularly on the concepts of power, sovereignty, and community. Starting from the Biblical text, we will examine how both classical and modern thinkers within the Jewish tradition understood the ways in which power was created, the different meanings of leadership, the idea of national independence, and the ultimate question of belonging within a fragmented political community.

PSCI-397. African Political Thought. 3 Hours.

African political thought is examined through selected writings of important African leaders and writers dealing with political developments in the new states of Africa with particular focus on the problems of African identity (African values versus westernization), African socialism, Pan-Africanism, and the one party state.

PSCI-398. Law And Social Change. 3 Hours.

An assessment of the possibilities and limitations of law as an instrument of social change through an examination of the status of minorities and women, the social control of corporate behavior, and the politics of rights.

Prerequisite: PSCI-216 with a minimum grade of C or AMER-216 with a minimum grade of C.

PSCI-399H. Proseminar In Political Theory: Political Concepts Through Literature. 3 Hours.**PSCI-401. Classics Of Political Science. 3 Hours.**

An examination of selected classics of the discipline of political science, with a special emphasis on major contributions of the modern era. This course provides students with an opportunity for close analysis of complex works in political science.

PSCI-402. Research Methods In Political Science. 3 Hours.

Introduction to the various techniques in political science with emphasis on developing skills necessary for graduate work in the department. Areas of concentration: development of research designs, identification of appropriate data sources, discussion of alternative methodologies, data analysis techniques.

PSCI-405. Independent Study In Political Science. 3 Hours.

Research and investigation into selected topics and preparation for a research paper(s) under individual faculty guidance.

PSCI-405A. Independent Study In Political Science. 3 Hours.

Research and investigation into selected topics and preparation for a research paper(s) under individual faculty guidance.

PSCI-406. Independent Study In Political Science. 2 Hours.

(See PSCI-405 for description.).

PSCI-407. Independent Study In Political Science. 1 Hour.

(See PSCI-405 for description.).

PSCI-408. Graduate Internship. 3 Hours.

Placement in government agency, voluntary or third-sector organization, advocacy group, political office, or related institution. Opportunity for career-exploration, skill-development, or specialized training. (Hours in placement: 10 per week).

PSCI-412. American Political Elites. 3 Hours.

The nature and impact of elites in the American political system. Readings and discussion will include Plato, Marx, Michels and various contemporary treatments of the nature of American society. Special topics will be covered on the basis of students' particular interest.

PSCI-414. Political Parties And Elections In The U.S.. 3 Hours.

This graduate course examines both the historical development of political parties in the United States as well as contemporary issues in the study of parties and elections. Students will analyze how political parties are created and the functions they perform in our political system. Topics will include American political parties, presidential nominations, partisan polarization, and issues of race and gender in recent elections.

PSCI-417. Seminar In Political Behavior. 3 Hours.

Sociological and psychological perspectives in political science; how political attitudes and preferences are formed; comparative political cultures; social and psychological determinants of political cultures; social and psychological determinants of political participation and political decision-making; American voting behavior; discussion of current research in these areas; writing and presentation of seminar papers.

PSCI-420. Religion & Politics In America. 3 Hours.

This course investigates the religious factor in American political life by examining the historical and contemporary effect of religion on political culture, political coalitions, individual political behavior, and public policy. The perspectives of the American founders on the relationship between church and state and the religion clauses in Article IV and the First Amendment will be assessed. We will also look at the major Supreme Court decisions on the meaning of the establishment clause and free exercise clauses in the US Constitution. We will examine the role of the courts in refereeing conflicts over religion in America.

PSCI-421. Congress & The Bureaucracy. 3 Hours.

In this seminar, we will focus on subgovernments in the United States--that is, the administrative agencies, congressional committees, and interest groups associated with a particular policy area. In particular, we will examine the nature of the relationship between congress and regulatory agencies, what congress intended various agencies to do, and whether these agencies generally meet or fail to meet the expectations of congress. We will examine how a bill becomes a law, and then what happens to that law afterwards.

PSCI-424. Law And Equality. 3 Hours.

The course explores how the United States Supreme Court interprets and applies the Equal Protection Clause of the 14th Amendment in situations where a statute or policy contains a classification based race, gender, or sexual orientation. In conjunction with this emphasis on the Court's jurisprudence, other readings will focus on the philosophical underpinnings of the Court's decisions, disparities in power and privilege contained in the law, and personal accounts that detail how the human experience is affected by these disparities. The final segment of the course considers whether the law can be used as a vehicle for social change, and how courts have approached legislative remedies designed to redress past discrimination.

PSCI-425. Presidential Power & The Executive Branch. 3 Hours.

This graduate course explores the power and development of the American presidency and its relationship to other institutions of government. American presidents are at the center of politics, both at home and abroad. But too often our fixation on one individual obscures how other institutions interact with and constrain the presidency. Instead of considering each president as an isolated case, this course analyzes the presidency throughout history, identifying patterns of change as well as continuities in presidential power. We will consider the presidency's design in the Constitution and what has led to departures from that framework.

PSCI-427. Seminar In American Policy-Making Process. 3 Hours.

Analysis of legislative, executive, administrative and judicial policy-making processes at the national government level with emphasis on current research, case studies in policy-making and presentation of seminar papers.

PSCI-437. Seminar In Urban Politics. 3 Hours.

Analysis of the politics of metropolitan areas, with emphasis on the mobilization of resources for urban problem-solving, and the political forces that impede the solution of such problems. Students will write and present research papers on urban politics in the Chicago metropolitan area.

PSCI-439. Minority Economic Development. 3 Hours.

This course investigates political and social factors related to the economic development of minority groups in the United States. The demise of legalized segregation has meant racial and ethnic minorities no longer face official barriers to economic success. However, most minority groups (particularly black Americans and Latinos) continue to have lower levels of overall employment, income, and wealth than do whites. This course investigates political and social phenomena contributing to these patterns, as well as efforts by minority groups, supportive whites, and government actors in addressing minority economic issues. There is a particular interest in minority entrepreneurship and employment issues.

PSCI-440. Research Methods In Public Administration. 3 Hours.

Research techniques in the study of public administration. Methods taught will include techniques utilized by both political scientists and public administrators: case studies, decision-making analysis, cost-benefit analysis and others.

PSCI-441. History And Literature Of Public Administration. 3 Hours.

A review of major historical periods in public administration theory and practice and consideration of present tendencies and possible future developments. Consideration of standard summaries of the development of the discipline and primary, classical sources as well as key theorists and concepts of the discipline.

PSCI-442. Public Bureaucracies: Theory And Practice. 3 Hours.

Review of classic and contemporary literature on bureaucracy; analysis of the concept of bureaucracy; examination of selected public bureaucracies; strengths and limitations of the bureaucratic form of work organization; proposed alternative forms of work organization in the public sector; problems of accountability and public control.

PSCI-444. Comparative Public Administration. 3 Hours.

Study of the significance of public administration in a comparative setting with particular emphasis on the Third World; cultural impact on bureaucratic behavior; international and United States technical assistance in public administration; bureaucracy and development; comparative public policy; Third World perspectives and the recent critiques of administratively generated and First World inspired development.

PSCI-446. Homeland Security: Policies, Politics, And Administration. 3 Hours.

In the wake of the events of September 11, 2001, America has struggled to both re-write its understanding of "security" within its borders and to reorganize its resources committed to maintaining "security". This course is designed to explore the revamping of the bureaucracy responsible for "homeland security," and the impact on the population of the sense of uncertainty within borders. Students will examine the impact of these developments on state and local resources committed to "security" in communities, evaluating the strengths and weaknesses of the new "homeland security" efforts on the national, state, and city levels.

PSCI-447. Seminar In Public Policy Analysis. 3 Hours.

Study of governmental policy and program implementation from the perspective of policy choice, decision-making, and evaluation. Topics include criteria for evaluation of policy, techniques of analysis such as forecasting and scenario development, impact analysis, client satisfaction, and inequalities of result.

PSCI-460. Comparative Democratic Institutions. 3 Hours.

This course develops an understanding of the relationships between citizens' underlying interests and values and the policy output produced in democratic countries. We will explore the ramifications of different constitutional designs and electoral systems for the provision of representation. Furthermore, we will examine: the development of policy preferences, citizens' issuing of mandates, government responsiveness, and the ability of citizens to hold governments to account. The operation of bureaucracies as well as nominally independent arms of government, such as central banks, will also be considered.

PSCI-465. Seminar In African Politics. 3 Hours.

An examination of crucial problems in African politics with particular emphasis on modernization and creating political order. Research will focus on political participation, political institutions, national integration, ideology, the strains of modernization the role of the military.

PSCI-469. Democratization & Capitalism In The 21st Century. 3 Hours.

To understand the "third wave" democratization in the late 20th century, this course engages theories about the causes, meanings, and challenges of "democracy", including its complex relationships with capitalism. What were the roles of elites, classes, and social movements in recent democratic transitions, what types of systems emerged, what conditions can cause "de-democratization", and how does the post-Cold War hegemony of market capitalism affect the prospects for sustaining and deepening democracy in the early 21st century?.

PSCI-475. Seminar In The Behavioral Aspects Of International Relations. 3 Hours.

Research, seminar papers, and discussion on the socio-psychological approaches to the study of international relations; topics include the role of nationalism in international relations; topics include the role of nationalism in international conflict, decision-making in international relations, national and international image formation, and the socio-psychological determinants of foreign policies.

PSCI-476. Unified Germany In Changing Europe. 3 Hours.

The course will review the historical background of post-WW II Germany; the reunification process (its problems and potentials); and the role of the "new" Germany in the "new Europe." Still politically and economically dominant in Europe, the question to be explored is whether Germany's future complements or competes with the attempt to bring all of Europe together.

Prerequisite: PSCI-402 with a minimum grade of C or PSCI-421 with a minimum grade of C.

PSCI-477. Political Integration In Western Europe. 3 Hours.

Focus on post-World War II political integration in Europe; examination of various European international and supranational organizations, with emphasis on the dynamics of political integration in the European Community.

PSCI-478. EU - US Transatlantic Relations. 3 Hours.

Relations between the United States and Europe have been challenged frequently during the post-WWII era. These challenges have become more significant after September 11, 2001. The sympathy for the United States directly after the terrorists attacks quickly dissolved over Iraq. Europe itself was divided between supporters of the United States (UK, Spain, Italy, Poland) and opponents (Germany, France, Belgium). The severe strain in diplomatic relations did, however, little harm to the important trade relations. While differences in values between Americans and Europeans should not be marginalized, shared values significantly outnumber values that divide them. This course discusses the continued challenges in the transatlantic relationship.

PSCI-479. International Politics Of East Asia. 3 Hours.

This course is designed for graduate students interested in international relations in East Asia. It examines the political, economic, and social challenges facing East Asian countries from a comparative perspective. The emphasis will be on theories that inform our understanding of international affairs and foreign policy decision-making, as each is related to East Asia, the military security and economic issues in international relations, though we will also study the domestic conditions driving those relations. Major themes include defense and security, trade and development, and human rights. This course is not aimed to survey a general history of these countries but to discuss major issues and challenges associated with their political, economic and social change and development.

PSCI-481. International Human Rights. 3 Hours.

Human rights issues have been central to many of the top international news stories in recent years, including "ethnic cleansing" in Bosnia and Kosovo, genocide in Rwanda, self-determination in East Timor and Tibet, and humanitarian intervention in Somalia and Sudan (and in Afghanistan and Iraq, more controversially). The way in which the international community has responded to each of these examples demonstrates the complex relationship between state sovereignty and the promotion of universal human rights. Looking at human rights in both comparative and international perspectives, we will discuss the philosophical and political bases for the international human rights movement and probe the ongoing debate over universality and culture relativism.

PSCI-483. International Political Economy. 3 Hours.

This course will simultaneously provide students with a broad and deep overview of international economic relations. We will draw from the literature in international relations, comparative politics, and economics to develop an understanding of international political economy. We will examine the interaction between disparate national economies, national politics, and the international system writ large.

PSCI-491. Seminar On The Work Of Hannah Arendt. 3 Hours.

This course investigates the work of Hannah Arendt on politics, society and political action, and provides an introduction to public realm theory that will work toward mastery of Arendt's understanding of politics as, in Latin, the *res publica*, "the public thing." Our primary questions will be what does political action require and what can it accomplish? Our readings will include texts on civil disobedience, the relationship between history and political theory, the meanings of power and violence, colonialism, totalitarian rule during the Third Reich and the Soviet era, and on racial prejudice as political problem and as political tool.

PSCI-5901. Thesis Hours. 1 Hour.

This course is designed to provide structure, guidance, and support for graduate students in political science in the research and writing of a Master's thesis. The objective of the course is to deepen the understanding of theories and methods related to research on the specific subfield in political science and to apply them to a chosen topic. Specific focus includes: (a) identifying a significant research problem on an political science issue and specifying a research question to address it; (b) analyzing the scholarly literature in relation to your research; (c) describing research design and evidence; (d) shaping coherent arguments and assessments; (e) developing skills in formal academic writing and oral presentation.

Requirement: consent of the thesis advisor, graduate coordinator, department chair and the College Dean.

PSCI-5902. Thesis Hours. 2 Hours.

See course description for PSCI-5901.

PSCI-5903. Thesis Hours. 3 Hours.

See course description for PSCI-5901.

Master of Arts in Political Science

MASTER OF ARTS IN POLITICAL SCIENCE

Students have two options to choose from to fulfill the master's degree program requirements:

1. Thirty credit hours of course work, a thesis for six credit hours, and an oral examination, or
2. Thirty-six credit hours of course work, a written comprehensive examination, and an oral examination.

A student interested in the thirty credit thesis option must secure approval of the department. Only students who have demonstrated high proficiency in various aspects of graduate studies (writing, discussion, analysis, creativity, etc.) will be permitted to write a thesis.

REQUIREMENTS FOR ADMISSION TO THE PROGRAM:

Students must fulfill the requirements for admission to the College of Graduate Studies & Research. (These are set out in the academic catalog in the section "College of Graduate Studies & Research ." Applications may be secured from the office, located in LWH-0006).

REQUIREMENTS FOR THE DEGREE:

For students admitted to Master's Programs, all graduate credits must be at the 400 level, except for a limited number of 300 level courses specifically approved for graduate degree credits in a given Master's degree program. Departments may permit students to apply up to three of these 300 level courses, to a maximum of ten credit hours, to fulfill program requirements. This policy applies to all students. **Consult with your program advisor or the College of Graduate Studies & Research for details.**

Students must select one area of emphasis from the following:

- American Politics and Public Affairs
- International and Comparative Politics
- Political Theory

Students are required to take:

Code	Title	Hours
Required Courses		
PSCI-401	Classics Of Political Science	3
PSCI-402	Research Methods In Political Science ¹	3
Five course in the area of emphasis, including a 400-level seminar or a thesis seminar.		15
Three courses selected from a second area.		9
Two elective courses from any area of emphasis.		6
Total Hours		36

¹ If possible before graduate seminar courses.

Students should consult with the graduate advisor before taking their courses.

Major in Political Science

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Political Science for the Bachelor of Arts Degree

Students majoring in political science must take at least 36 credit hours in political science.

Code	Title	Hours
Required Courses		
PSCI-210	Introduction To Political Science ^{1,2}	3
PSCI-308	Research Methods And Techniques In Political Science	3
Along with PSCI 210, students must then select two of the following introductory courses (since all students must take an intensive writing course, we recommend they take PSCI 251. For those who cannot take PSCI 251, other WIP courses are available):		6
PSCI-216	American National Government	
PSCI-251	Writing Intensive Program: Comparative Political Systems	
PSCI-275	Introduction To World Politics	
PSCI-291	Concepts Of Political Science	
Select eight 300-level courses:		24
5 courses in one area of emphasis ³		
2 courses in a second area		
1 course in a third area		
Total Hours		36

- ¹ These introductory courses are not open to majors in their senior year.
- ² Must be among the first four political science courses taken.
- ³ The broad areas of emphasis recognized by the department are American Politics and Public Affairs; International and Comparative Politics; and Political Theory. These eight courses must be at the 300-level.

This sample curricular map is provided to guide you in the planning of your progression for this major. This guide should not replace regular consultations with your program advisor. For specific recommendations of courses not identified, please consult your program advisor.

Minor in Political Science

Minor in Political Science (18 credit hours)

A minor in political science may be structured to complement a student's major in another department or to develop an area of interest. An assigned advisor will counsel a student in choosing six appropriate courses. The University requires everyone to take a Writing Intensive Course (WIP) in their major. The Department regularly offers three WIP courses. These are PSCI-251, PSCI-344 and PSCI-392.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Political Science requirements (18 cr. hrs.)

The following two courses are required:

Code	Title	Hours
PSCI-210	Introduction To Political Science	3
Select one of the following:		
PSCI-275	Introduction To World Politics	
PSCI-291	Concepts Of Political Science	
PSCI-251	Writing Intensive Program: Comparative Political Systems	
PSCI-216	American National Government	

At least three courses should be taken at the 300-level.

Students in the Elementary Education and Early Childhood Education programs who have selected this minor must complete a minimum of 9 hours at the 300-level to meet graduation and certification requirements. Students in the program should note that if you use PSCI-216 to satisfy the Social and Behavioral Science General Education requirement, you must add a course to the Minor. In that case total credit hours will be 21. This applies only to students in the Elementary Education and Early Childhood Education Programs.

Minor in Public Administration

Minor in Public Administration (18 credit hours)

This minor will be of interest to students who would like to broaden the career opportunities available to them, students interested in public affairs and administration and students in non-traditional programs, such as the BA in Interdisciplinary Studies program, who wish to focus on governmental processes. Students who are also majoring in Political Science are discouraged from minoring in Public Administration. Instead, public administration courses can be incorporated into their major program.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Public Administration requirements

Code	Title	Hours
Required Courses		
PSCI-216	American National Government	3
PSCI-341	Public Administration	3
Select two of the following:		6
PSCI-325	Public Policy	
PSCI-344	Writing Intensive Program: Public Organization Theory	
PSCI-345	Government Budgeting	
PSCI-346	Public Personnel Administration	
Two 300-level courses relevant to Public Administration chosen with the aid of a departmental advisor, including, if desired, one or two additional courses from the list of four above		6
Total Hours		18

Minor in Jewish Studies

The minor in Jewish Studies offers an interdisciplinary perspective into the narratives, histories, cultures, literatures, and languages of the international Jewish community and explores the breadth and depth of the Jewish experience globally, historically, and culturally. The program involves faculty from a variety of disciplines to build relationships between the Jewish community and other communities in providing an academic overview of the Jewish experience. Students may choose to participate in engaged learning and take advantage of internship opportunities.

Admission Requirements

Admission is open to all NEIU undergraduates who have completed 21 General Education hours and English 101 and 102 or equivalent.

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

- * Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.
- ** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Minor in Jewish Studies

6 courses/18 hours distributed across both required (4) and elective (2) courses.

Code	Title	Hours
Required Courses		
LING-344	Linguistics And Reading	3
HIST-306	Europe 1919-1948: Fascism, Socialism, And The Second World War	3
or JS-306	Europe 1919-1948: Fascism, Socialism, And The Second World War	
PSCI-396	Jewish Political Thought	3
or JS-396	Jewish Political Thought	
ENGL-352	Jewish-American Literature: People Of The Books	3
or JS-352	Jewish-American Literature: People Of The Books	
Elective courses		
LING-316	Languages And Cultures: Middle East	3
HIST-314B	Russian And Soviet History 1855 To Present	3
or JS-314B	Russian And Soviet History 1855 To The Present	
Total Hours		18

JS-301. Jewish Studies Applied Learning Internship. 3 Hours.

Placement in an internship with a Jewish agency, either in social services, nonprofit, or other areas. Students will meet regularly with their instructor and complete assignments and readings relating to their internship work.

Prerequisite: (100 - 399 or 100A - 399Z).

JS-306. Europe 1919-1948: Fascism, Socialism, And The Second World War. 3 Hours.

This course addresses European history from the treaties that ended the First World War in 1919 to the Berlin Crisis and the start of the Cold War. Themes will include the Great Depression and crisis of liberal democracy, the challenges to it posed by Mussolini, Hitler, and Stalin, and the culmination of tensions among these in the Second World War. Particular attention will be paid to genocide and the Nazi attempt to destroy the European Jewish community.

Prerequisite: (100 - 399 or 100A - 399Z).

JS-314B. Russian And Soviet History 1855 To The Present. 3 Hours.

The political, diplomatic, intellectual and social development of the peoples of the Russian Empire and the Soviet Union from the accession of Alexander II to the present. The great diversity of the Russian Empire and Soviet Union's populations will be a particular focus, with emphasis on the Jewish and the Muslim communities.

Prerequisite: (100 - 399 or 100A - 399Z).

JS-316. Languages And Cultures: Middle East. 3 Hours.

This course introduces students to the languages, cultures, values, preconceptions and misconceptions associated with the region known as the Middle East. A variety of sources, including academic texts, articles, fiction, poetry, film and the visual arts are incorporated to better grasp and appreciate the complex of languages and cultures of the region. Check the current schedule for the focus country.

JS-321. American Jewish Politics. 3 Hours.

This course will cover: Conceptual frameworks of American Jewish political power, institutions and behavior; multiple theories of modern Jewish politics in America; internal and external advocacy institutions from 1820-present; American Jews and the legal process; American Jews and the Labor Movement; American Jews and Feminist politics; Anti-Semitism and the American Jewish response; American Jewish politics and Israel.

Prerequisite: (100 - 399 or 100A - 399Z).

JS-344. Narratives Of The Jewish Experience. 3 Hours.

This course focuses on stories told in contemporary Jewish communities as illustrative of the Jewish experience. Narrative is representative and constructive of life experience, memory, and identity. We will analyze stories collected by others and available to wide audiences, and to stories we collect through interaction and interviews with members of the Jewish community. Analyses will be conducted within a narratological framework that blends discursive theory and practice. Students will gather oral narratives from family members, community members, political and religious leaders, and educators with the goal of analyzing how stories both reveal and construct personal and social identities.

Prerequisite: (100 - 399 or 100A - 399Z).

JS-352. Jewish-American Literature: People Of The Books. 3 Hours.

This course studies how the United States shapes the meaning of Jewish identity and culture, and conversely, how Jewish literature helps shape the meaning of American identity and culture. Working in a range of cultural forms from comic books to genre fiction, Jewish writers throughout the modern era creatively and critically interrogate and re-imagine what it means to be Jewish-American, and more broadly, investigate and challenge what it means to be American.

Prerequisite: ENGL-101 with a minimum grade of C.

JS-396. Jewish Political Thought. 3 Hours.

This course explores the Jewish political tradition, focusing particularly on the concepts of power, sovereignty, and community. Starting from the Biblical text, we will examine how both classical and modern thinkers within the Jewish tradition understood the ways in which power was created, the different meanings of leadership, the idea of national independence, and the ultimate question of belonging within a fragmented political community.

Prerequisite: (100 - 399 or 100A - 399Z).

Psychology

Psychology is the science that deals with the brain and human behavior in all its forms:

- psychological,
- cognitive,
- emotional,
- individual,
- and group.

Its methods range from those similar to the ones used in the humanities to those used in the natural sciences. Psychology offers students a perspective which is not only a career in itself but also a useful adjunct to any discipline.

The Department of Psychology offers an undergraduate program that leads to a Bachelor of Arts degree in Psychology and a graduate program which leads to a Master of Arts in Gerontology, as well as a certificate option in Gerontology. In these programs, the department prepares students for careers in those areas that make particular use of a knowledge of human behavior and development. These include human resource and personnel positions in industry, direct service work in the social services, and research associate positions in academic and industrial settings. Students are also prepared for pursuing further education in any of the major areas of psychology.

The department faculty members represent a number of theoretical approaches as well as a wide range of content areas. This enhances the student's opportunity to become acquainted with the full scope of this broad and complex subject. Because of the need to create a combination of courses consistent with their career goals, students are urged to form a continuing relationship with a faculty advisor in the department early in their major.

The interdisciplinary nature of psychology requires familiarity with other fields. Students intending to pursue graduate studies should have a strong background in mathematics and the natural sciences. All psychology majors will benefit from course work in philosophy, physiology, literature, history, the social sciences, and computer science.

Students who graduate with a bachelor's degree in psychology from NEIU will develop strong universally applied skills in areas such as statistics, writing and an ability to conduct research. Courses such as PSYC 202 and PSYC 302 Statistics and Research Methods I and II both prepare students to develop skills in these areas through in class assignments as well as required out-of-class meetings with department peer leaders, where students work on projects related to class lectures.

Students have the option of participating in the field experience program. Academic credit may be earned through relevant work at field sites such as human service agencies, community organizations, schools, and business. The experience may include direct work with clients, case management, observation, outreach, tutoring, program evaluation and development, or research. The Field Experience program serves to integrate theoretical concepts with practical experience. Training is jointly supervised by a field supervisor on site and a faculty member on campus. Information about undergraduate field experience may be obtained from the program advisor in the psychology department.

Minors in psychology and in gerontology are also offered.

- Major in Psychology (<http://catalog.neiu.edu/arts-sciences/psychology/psychology/>)
- Minor in Psychology (<http://catalog.neiu.edu/arts-sciences/psychology/minor-psychology/>)
- Minor in Gerontology (<http://catalog.neiu.edu/arts-sciences/psychology/minor-gerontology/>)

The following rules apply to the major and minor in psychology and the minor in gerontology: Transfer courses must be approved by the department before being applied to the major or minors. For transfer students, at least one half of the courses applied to the major (22 semester hours) or minors (9 semester hours) must be taken at Northeastern. No more than two courses (6 semester hours) transferred in from junior/ community colleges may be applied to the major or minors. Junior/community college courses may not be used in place of 300-level Northeastern courses. Students who transfer in an approved 3 semester hour course equivalent to General Psychology may complete the major with 43 semester hours, or the psychology minor with 18 semester hours.

The same courses may not be used to fill requirements in two different programs within the department.

- Master of Arts in Gerontology (<http://catalog.neiu.edu/arts-sciences/psychology/master-arts-gerontology/>)
- Gerontology Senior Advocate Certificate (<http://catalog.neiu.edu/arts-sciences/psychology/1-year-gerontology-certificate/>)

Amanda Dykema-Engblade, Ph.D., Associate Professor, Chair

PSYC-100. Survey Of Psychology. 3 Hours.

An introduction of the study of psychology as a dynamic and changing system of interrelated and interacting areas.

PSYC-110. Life Span Development. 3 Hours.

An introductory class on human development across the life span, from conception to death. Explores the description, explanation, and function of different aspects of development: physical, psychological and social. Designed as a general education course for non-majors, the main purpose of the course is to present the general underlying structures and mechanisms of development. Some of the major theories and research findings will also be covered.

PSYC-200. General Psychology. 4 Hours.

General introduction to the study of psychology as a science. A personalized system of instruction permits flexible scheduling and different rates for fulfilling requirements. The text covers approximately 25-30 units of material. Tutoring and instructional aides are available.

Prerequisite: ENGL-101 with a minimum grade of C and ENGL-102 with a minimum grade of C.

PSYC-202. Writing Intensive Program: Statistics And Research Methods I. 3 Hours.

The first half of a sequence that is intended to prepare students to be consumers/ producers of research. In this course students will learn basic descriptive statistics, correlation and regression, basic elements of research design and APA style. Students will be required to design a project and write the introduction and method. This is a Writing Intensive course.

Prerequisites: ENGL-101 - 102 and PSYC-200 and (MATH-092 - 499 or MATH-092A - 499Z or MATH-0092 - 4999 or NEIU Math Placement Result 30 - 45 or Accuplacer College Level Math 020 - 120 or Accuplacer Adv. Algebra & Func 237 - 300).

PSYC-210. Parenting. 3 Hours.

Parenting integrates concepts, data and methods from child development, learning theory and applied behavior analysis and utilizes them in the context of a positive parenting philosophy to advance normal child skills development.

PSYC-215. Child Psychology. 3 Hours.

Basic theories, concepts, principles and research data concerning the physical, intellectual, emotional and social aspects of development in children.

PSYC-300J. Special Topics In Psychology: Human Neuropsychology. 3 Hours.

Prerequisite: PSYC-202 with a minimum grade of C.

PSYC-300N. Proseminar In Psychology: Psychopathology In Film And Literature. 3 Hours.

PSYC-302. Statistics And Research Methods II. 3 Hours.

This course is the second half of a sequence that is intended to prepare students to be consumers/producers of research. In this course students will learn parametric and nonparametric inferential statistics through three-way analysis of variance, elements of complex experimental and quasi-experimental design, and research elements of APA format. Students will be required to collect data, analyze and discuss results, and write a formal result and discussion section.

Prerequisite: ENGL-102 with a minimum grade of C and PSYC-200 with a minimum grade of C and PSYC-202 with a minimum grade of C.

PSYC-307. Psychological Tests And Measurements. 3 Hours.

Principles and methods of measurement and evaluation: elementary statistical concepts, reliability and validity, interpretation of test results, standards for psychological and educational tests, principles of test construction and use of psychological and educational tests.

Prerequisite: PSYC-202 with a minimum grade of C and PSYC-200 with a minimum grade of C.

PSYC-308. Laboratory, Research Methods In Psychology: Tests And Measurements. 5 Hours.

Development, construction, scoring, standardization, determination of reliability and validity of simple tests in psychology.

Prerequisite: PSYC-302 with a minimum grade of C and PSYC-200 with a minimum grade of C.

PSYC-310. Developmental Psychology. 3 Hours.

Longitudinal study of the development of behavior throughout the life span, including physiological factors and their bearing on the psychological adjustment of the individual in childhood, adolescence, adulthood, and later maturity.

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-311. Psychosexual Development. 3 Hours.

Study of the development of sex differences, from the acquisition of sex role identity in childhood through sex differences in adult personality, cognition and role behavior.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-312. Psychological Development In Women. 3 Hours.

Psychological development and identity formation in women with emphasis on personality, psychosexual and cognitive development.

Prerequisite: PSYC-200 with a minimum grade of C or PSYC-100 with a minimum grade of C or WSP-101 with a minimum grade of C.

PSYC-314. Psychology Of The African American Family. 3 Hours.

The purpose of this course is for students to gain an understanding of how African American families have evolved in America. The experiences of slavery and racism have influenced the development of African American families and the social policies and practices toward them. These have resulted in the proliferation of myths and perceptions of African American families that often emphasize the negative end results of years of discrimination. The goal of this course is to examine the history of African American families, research performed on African American families, issues facing African American families, and interventions offered to African American families.

Prerequisite: AFAM-200 with a minimum grade of C or PSYC-200 with a minimum grade of C.

PSYC-316. Laboratory, Research Methods In Psychology: Child Development. 5 Hours.

Examination and application of research techniques and methods used in child and developmental psychology. Students will collect, analyze, interpret and present research data.

Prerequisite: PSYC-302 with a minimum grade of C and PSYC-200 with a minimum grade of C and (PSYC-215 with a minimum grade of C or PSYC-310 with a minimum grade of C).

PSYC-317. Latino Psychology: Mental Health & The Latino Experience In The USA. 3 Hours.

This course is designed for students to explore and gain an understanding the multiplicity of factors (biological, psychological, environmental and cultural) that impact and shape the mental health of different Latino groups living in the USA. Immigration, stereotyping, discrimination and prejudice are key topics in determining how Latinos view themselves in American culture.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-318. Psychopathology Of Childhood. 3 Hours.

Study of the dynamics of pre-adolescent neurotic disturbances.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-320. Adolescent Psychology. 3 Hours.

Nature of adolescent development and adjustment: physical, intellectual, emotional, and social aspects.

Prerequisite: PSYC-200 with a minimum grade of C or PSYC-100 with a minimum grade of C or PSYC-110 with a minimum grade of C.

PSYC-322. Emotional Disturbances Of Adolescence. 3 Hours.

Study of the psychological dynamics and of the problems and conflicts which the adolescent may experience during this distinct phase of his/her life.

Prerequisite: PSYC-310 with a minimum grade of C or PSYC-200 with a minimum grade of C.

PSYC-324. Geropsychology. 3 Hours.

This course will introduce students to the study of aging and the progression of gerontology. The course focuses on the physical, psychological, social and cognitive aspects of aging from a number of disciplinary perspectives. Micro (individual's process of aging) as well as macro (societal) issues of an aging population will be examined. The course will also introduce students to a number of controversies and debates in gerontology, many of which have implications for social policy.

PSYC-325. Psychosocial Development And Aging. 3 Hours.

Exploration of behavioral development and of the influence of social and environmental factors on the psychosocial development throughout the life span.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-328. Seminar In Aging. 3 Hours.

Integrated and critical evaluation of problems and issues related to aging; assessment of research and of its application to the establishment of programs for the aged.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-330. Psychology Of Personality. 3 Hours.

Contemporary theories of personality development and personality dynamics and definitions of the healthy personality.

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-331. Laboratory, Research Methods In Psychology: Personality Development. 5 Hours.

Research methods used in the study of "personality." Collection, analysis and interpretation of research data, and reporting results.

Prerequisite: PSYC-302 with a minimum grade of C and PSYC-200 with a minimum grade of C and (PSYC-330 with a minimum grade of C or PSYC-340 with a minimum grade of C).

PSYC-340. Abnormal Psychology. 3 Hours.

Overview of psychopathology; similarities and differences between "normal" and "abnormal" groups.

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-341. Laboratory, Research Methods In Psychology: Clinical. 5 Hours.

Application of the techniques learned in the Statistics and Research Methods courses to actual research topics in the clinical field of psychology. The format is one hour of lecture and four hours of laboratory, in which student actually collect and analyze data. Fulfills department major lab requirement.

Prerequisite: PSYC-302 with a minimum grade of C and PSYC-200 with a minimum grade of C and (PSYC-330 with a minimum grade of C or PSYC-340 with a minimum grade of C).

PSYC-345. Theories And Methods Of Individual Therapy. 3 Hours.

Overview of various approaches to psychotherapy.

Prerequisite: (PSYC-330 with a minimum grade of C or PSYC-340 with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-346. Introduction To Group Psychotherapy. 3 Hours.

Study and application of the underlying principles of several approaches to group processes; e.g., T-groups, growth (Rogerian) groups, rational-emotive groups, Gestalt groups, T.A. groups.

Prerequisite: (PSYC-330 with a minimum grade of C or PSYC-340 with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-348. Community Psychology. 3 Hours.

Introduction to the field of community psychology, including its historical context, key theories, research methods, and practical applications. Community psychology extends beyond the traditional individual focus of psychology to examine social, cultural, and environmental influences on both individuals and the larger social systems in which they are embedded. Practical applications of community psychology include a range of prevention and intervention strategies to promote both individual and community-level well-being.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-350. Physiological Psychology. 3 Hours.

Lectures on physiological research techniques; ablation, lesioning, electro-physiology, and neurochemistry. The neuron, synaptic, electrical and chemical events, sensory physiology, psychopharmacology, memory mechanisms, emotions and vegetative functions are covered.

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-351. Laboratory, Research Methods In Psychology: Physiological Psychology. 5 Hours.

Techniques employed in the investigation of brain functions including surgical and testing procedures such as ablation, electrolytic lesions, implants of permanent electrodes, operant conditioning techniques, pharmacological experiments and demonstrations.

Prerequisite: PSYC-302 with a minimum grade of C and PSYC-200 with a minimum grade of C and (PSYC-350 with a minimum grade of C or PSYC-370 with a minimum grade of C or PSYC-373 with a minimum grade of C or PSYC-375 with a minimum grade of C).

PSYC-352. Introduction To Neuropsychopharmacology. 3 Hours.

Discussion of neuronal synapse and neurotransmitter action, and the physiology and basic chemistry of the better known putative neurotransmitters; overview of the major and minor tranquilizers, the antidepressants, and the hallucinogens; examination of the better known relationships between neurochemistry, psychopharmacology and behavior.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-353. Physiological Bases Of Mental Disorders. 3 Hours.

Physiological and genetic aspects of mental disorders; major theories and current research models with emphasis on current literature and primary sources.

Prerequisite: PSYC-202 with a minimum grade of C and PSYC-200 with a minimum grade of C and PSYC-350 with a minimum grade of C.

PSYC-354. Seminar In Drug Abuse. 3 Hours.

Lectures, discussions and selected readings concerning the psychological, sociological and physiological aspects of drug abuse.

Prerequisite: PSYC-200 with a minimum grade of C or BIO-100 with a minimum grade of C or BIOL-100 with a minimum grade of C.

PSYC-355. Experimental Psychology Of Zebrafish. 3 Hours.

The course will provide a survey of different experimental psychology methods that are used in animal models to understand the corresponding human behavior. Topics discussed in class will focus on the use of animals in research as model systems to understand the neural circuits that underlie normal and abnormal behavior. During the course students will replicate previous research studies to develop an understanding of some of the common methodological issues and to better understand and interpret data from different sources.

Prerequisite: (100 - 399 or 100A - 399Z).

PSYC-360. Social Psychology. 3 Hours.

Basic principles and research techniques in social perception, attitude formation, group dynamics, interpersonal attraction, and social influence.

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-361. Laboratory, Research Methods In Psychology: Social Psychology. 5 Hours.

Application of techniques learned in Statistics and Research Methods to actual research topics in social psychology. Through lecture and laboratory, in which students actually collect and analyze data.

Prerequisite: PSYC-302 with a minimum grade of C and PSYC-200 with a minimum grade of C and PSYC-360 with a minimum grade of C.

PSYC-364. Theories Of Intimate Relationships. 3 Hours.

The advanced study of the field of intimate relationships. Coursework covers social psychological theories and research on romantic relationships and addresses topics such as attraction, communication, attachment, love, infidelity, jealousy, conflict, and relationship dissolution.

Prerequisite: PSYC-360 with a minimum grade of C and PSYC-200 with a minimum grade of C.

PSYC-365. Industrial Psychology. 3 Hours.

An introductory survey of the diverse field of industrial psychology. Personnel selection, business organizations, marketing and advertising, human factors and human engineering, worker-supervisor relations and executive behavior.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-367. Psychology Of Food. 3 Hours.

Food and eating play an important role in how we define ourselves and how we relate to other people. This course will explore many aspects of food and food consumption, primarily through the lens of a social psychological perspective. Topics will include: emotions and food (i.e., food and mood); food and health (e.g., obesity and disordered eating); cross cultural perspectives on food; and contextual cues that influence our eating choices. In short, the course will explore the psychological aspects of why we eat, what we eat and how much (or little) we eat. Note: If course is taken as capstone, the prerequisites needed will include PSYC-302 and at least one course from two Psychology core areas with a minimum grade of C.

Prerequisite: PSYC-200 with a minimum grade of C and PSYC-202 with a minimum grade of C.

PSYC-368. Consumer Psychology. 3 Hours.

This course is designed to provide the student with an introduction to the field of consumer psychology. The course will emphasize a social psychological perspective. The class will focus on theoretical and applied applications of consumer behavior and advertising through the lens of the psychology field. Topics such as persuasion, the psychology of decision-making, motivation, and income/social class will be discussed as they relate to consumer behavior.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-369. Conservation Psychology. 3 Hours.

Students will explore the emerging field of conservation psychology with an emphasis on the psychological characteristics of the relationship between humans and nature, such as environmental values, attitudes, behavior, and decision-making practices. Course topics, including environmental perception, identity, personal morals, ecopsychology, wilderness psychology, domestic nature, managed nature, community dimensions, and environmental education, will be investigated in the context of promoting environmental responsibility.

Prerequisite: (100 - 399 or 100A - 399Z).

PSYC-370. Theories Of Learning. 3 Hours.

Psychological study of the processes of learning, problem-solving, and memory. Major historical theories of learning; demonstration of some basic research techniques.

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-371. Neuropsychology. 3 Hours.

Neuropsychology is an upper level course that will examine the neural basis of human behavior, and cognition. Students will examine the different methodologies that are used to characterize the underlying neurological function that drives human behavior and cognition under normal conditions. The course will also cover some clinical applications of neuropsychology to explore and understand causes of cognitive dysfunction and pathology. Topics that are discussed will incorporate research from studies using animal models, but always with emphasis on the connection to humans.

Prerequisite: PSYC-200 with a minimum grade of C and PSYC-202 with a minimum grade of C.

PSYC-373. Human Perception. 3 Hours.

Study of how our perceiving and performing systems convert information from the environment and the self to action in everyday life.

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-374. Laboratory, Research Methods In Psychology: Perception. 5 Hours.

Research techniques and experiments in perception, cognition and learning.

Prerequisite: PSYC-302 with a minimum grade of C and PSYC-200 with a minimum grade of C and (PSYC-373 with a minimum grade of C or PSYC-350 with a minimum grade of C or PSYC-370 with a minimum grade of C or PSYC-375 with a minimum grade of C).

PSYC-375. Cognitive Psychology. 3 Hours.

This course is an introduction to cognitive psychology, the study of human thought, information processing, and consciousness. It covers the following topics normally associated with the study of cognition: pattern recognition, learning and memory, language, reasoning, decision making, cognitive neuropsychology, and artificial intelligence.

Prerequisite: PSYC-200 with a minimum grade of C and PSYC-202 with a minimum grade of C.

PSYC-376. Social Neuroscience. 3 Hours.

The purpose of this course is to gain an understanding of how the nervous system affects social relationships, and how social relationships affect the nervous system. Although the main focus is on humans, many of the studies we cover will be on non-human animals. We will focus mainly on the macro-level (i.e. parts of the brain), but some information will also be presented at the micro-level (cellular and chemical).

Prerequisite: PSYC-202 with a minimum grade of C and PSYC-200 with a minimum grade of C.

PSYC-377. Visual Neuroscience. 3 Hours.

Visual Neuroscience is an upper level course that will examine how data based and knowledge based processing determines an individual's visual experience. To better understand the interaction between data and knowledge, students will learn about the different techniques and methodologies that are used to address research questions in visual perception. Students will explore how visual information is encoded at the early synapses in the retina and is processed as neural signals move into cortex. The effect of different conditions on human visual perception will be further examined to understand how data and knowledge interact to determine a single perceptual experience.

Prerequisite: PSYC-200 with a minimum grade of C and PSYC-202 with a minimum grade of C.

PSYC-378. Laboratory, Research Methods In Psychology: Cognitive. 5 Hours.

Examination and application of research techniques and methods used in cognitive psychology. Students will collect, analyze, interpret, and present research data.

Prerequisite: PSYC-302 with a minimum grade of C and (PSYC-350 with a minimum grade of C or PSYC-370 with a minimum grade of C or PSYC-371 with a minimum grade of C or PSYC-373 with a minimum grade of C or PSYC-375 with a minimum grade of C).

PSYC-381. Independent Study In Psychology. 1 Hour.

Special study projects in psychology specifically and individually contracted with the instructor. Arrangements should be made in the term prior to registration.

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C or PSYC-317 with a minimum grade of C or PSYC-317A with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-382. Independent Study In Psychology. 2 Hours.

(See PYSC-381 for description.).

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C or PSYC-317 with a minimum grade of C or PSYC-317A with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-383. Independent Study In Psychology. 3 Hours.

(See PYSC-381 for description.).

Prerequisite: (PSYC-202 with a minimum grade of C or PSYC-301 with a minimum grade of C or PSYC-317 with a minimum grade of C or PSYC-317A with a minimum grade of C) and PSYC-200 with a minimum grade of C.

PSYC-385. Capstone Seminar. 2 Hours.

The capstone seminar is to be taken in conjunction with the completion of the student's capstone project. The aim of the course is to provide capstone students with additional, structured contact hours with their advisor/instructor in order to facilitate efficient and superior work.

PSYC-391. Field Experiences In Psychology I. 3 Hours.

Experiential learnin in psychology-related settings (such as psychiatric hospitals and schools) integrating both academic work and on-the-job experience. Arrangements should be made in the term prior to registration.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-393. Seminar In The Teaching Of Psychology. 3 Hours.

Introduces students to the theories and methods of post-secondary teching as relevant to the field of psychology. Students participate with faculty in active teaching activities of an undergraduate psychology course.

Prerequisite: PSYC-200 with a minimum grade of C.

PSYC-395. History Of Psychology. 3 Hours.

Psychology as a science from Wundt to present day. The course examines systems and describes and evaluates theories.

Prerequisite: PSYC-302 with a minimum grade of C and PSYC-200 with a minimum grade of C.

PSYC-396. Senior Seminar In Psychology. 3 Hours.

Research and preparation of papers; provides for individual work by the student, and guidance through criticism by fellow students and faculty.

Prerequisite: PSYC-302 with a minimum grade of C and PSYC-200 with a minimum grade of C.

PSYC-397. Capstone: Applied Service Learning Lab. 5 Hours.

This capstone course meets the needs and interests of students wishing to seek careers in community settings. Students integrate psychology knowledge and apply it to real world situations and problems as they are immersed in hands-on, community-based learning experiences. Course activities include participation in an agency/institutional setting, reflections on these experiences, and interpretation via an academic/scholarly lens. Students work closely with both a peer-team and with members of a community organization. The capstone project requires on-site volunteer hours and the development and execution of a project specific to the site's needs and demands.

PSYC-401. Gerontology: An Overview. 3 Hours.

Presents an overview of the field of gerontology. It provides an introduction to the demographic, economic and social implications of the growth in the population of older individuals.

PSYC-402. Developmental Processes In Later Life. 3 Hours.

Examines research on how individuals age psychologically throughout adulthood and into advanced old age.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-403. Developmental Processes In Aging:Physiological Aspects. 3 Hours.

In order to understand the aging individual, it is important to understand the normal and pathological physical changes that occur as the person ages.

This course is intended to provide students of gerontology with this basic grounding in the physiology of aging and thus is aimed at graduate students with only minimal background in biology. Using a combination of text material and journal readings, it will cover the development changes in all the major biological systems.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-406. Aging And The Family. 3 Hours.

Acquaints students with the research on the inter-generational roles on the nuclear, extended and non-traditional forms of 20th century families in providing physical, emotional, and financial support to members over the life-span in a society that has increasing numbers of three, four, and five generation families.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-408. Research Methods. 3 Hours.

This course introduces research methods and methodological problems encountered in theoretical an applied studies in the field of gerontology and provides guidance in preparing research or program proposals.

Prerequisite: PSYC-402 with a minimum grade of C.

PSYC-412. Psychopathology And Aging. 3 Hours.

Enables students to differentiate between the psychological characteristics of normal aging in later life and those associated with psychopathology. Differences between chronic mental illness and late onset psychopathology are clarified. Questions of assessment and treatment for these populations are included.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-414. Psychotherapy Of The Elderly. 3 Hours.

This course assists students interested in direct service to develop an awareness of the range of psycho-therapeutic modalities that are effective with elderly clients.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-415. Practicum In Gerontology. 3 Hours.

A supervised practicum, typically 120 clock hours, is required of all students who lack formal experience in working directly with the elderly. It is also recommended for students who have previously worked with this population and whose career objectives make a different type of experience in another setting desirable.

Prerequisite: PSYC-402 with a minimum grade of C.

PSYC-416. Internship In Gerontology. 3 Hours.

This 120 clock hour supervised field work course is required of all students. Those with no prior experience in gerontology must complete PSYC-415 before registering for this course. The internship site varies according to the interests of the student. The faculty will determine the suitability of the site.

Prerequisite: PSYC-402 with a minimum grade of C.

PSYC-418. Public Policy And Aging. 3 Hours.

This course will examine major health care, social, and economic policies that affect the elderly. Students will learn to assess and understand the differential impact on life style and quality of life experienced in old age by individuals of various socioeconomic classes.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-420. Seminar In Proposal Writing. 3 Hours.

This seminar covers the whole process of proposal writing as it applies to either grant or thesis proposals. Students are expected to produce an acceptable proposal as part of the course.

Prerequisite: PSYC-408 with a minimum grade of C.

PSYC-424. Independent Study In Gerontology. 3 Hours.

This course provides an opportunity to specialize in an area of interest not sufficiently covered in either the required or elective courses offered. The plan for independent study (the specific topic, list of possible readings, and plan for a final paper) must be approved in writing by the sponsoring faculty member in the term prior to registration.

Prerequisite: PSYC-402 with a minimum grade of C.

PSYC-426. Values, Decision Making And The Elderly. 3 Hours.

This course sensitizes students to their own and other's social and personal values pertain to aging and the aged. It covers the ethical issues and dilemmas that arise for the elderly, their advocates, and caretakers when age is a primary factor in making difficult decisions.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-428. Aging And Cultural Diversity In The U.S.. 3 Hours.

This course familiarizes students with the literature and research-in-progress on variations in the process of aging, attitudes toward aging and the aged, and assistance provided to the aged among various major ethnic groups found in the United States.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-432. Meanings Of Old Age. 3 Hours.

This course explores the range of external perceptions and personal experiences of old age and old people by comparing what research scholars say about aging with the writings of older people themselves. Societal ageism and personal beliefs about aging, old age and old people are considered.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-434. Aging Services Network. 3 Hours.

This course examines the wide range of services and programs fostered by the Older American Act and referred to as the "aging network." Interviews with service providers and onsite observations give students an awareness of the issues involved in designing and implementing programs for older people.

Prerequisite: PSYC-401 with a minimum grade of C.

PSYC-5901. Thesis Hours. 1 Hour.

This course involves guidance of students writing a master's thesis as part of the requirements for the MA. in Gerontology.

Prerequisite: PSYC-420 with a minimum grade of C.

PSYC-5902. Thesis Hours. 2 Hours.

See course description for PSYC-5901.

Prerequisite: PSYC-420 with a minimum grade of C.

PSYC-5903. Thesis Hours. 3 Hours.

See course description for PSYC-5901.

Prerequisite: PSYC-420 with a minimum grade of C.

Gerontology Senior Advocate Certificate

Gerontology Senior Advocate Certificate

The 21-credit hour Gerontology Senior Advocate Certificate is designed to meet the educational needs of a variety of student groups: those already working with older adults, those contemplating a career change, and those working in other fields who wish to increase their knowledge of aging processes to help advocate for this growing segment of the national and internal population. To address these needs, students complete a set of required courses providing a solid background in the concepts of gerontology. To this aim, the two-year Gerontology Senior Advocate Certificate is for those professionals and/or life-long learners interested in short-term training in the field before potentially pursuing more extensive education in gerontology (e.g., M.A. in Gerontology).

Core or Required Courses (15 credit hours):

There are two elective "tracks" for certificate students.

"Track" #1: Individualized/Community Outreach (2 Courses - 6 credit hours)

"Track" #2: Public Policy/Administration (2 Courses - 6 credit hours)

Course Transfer Policy

Students may transfer the full credit hours of the certificate as per university course transfer policy into the M.A. in Gerontology program.

Gerontology Senior Advocate Certificate

Code	Title	Hours
Core Courses		
PSYC-401	Gerontology: An Overview	3
PSYC-403	Developmental Processes In Aging:Physiological Aspects	3
PSYC-415	Practicum In Gerontology	3
(if PSYC 415 is waived, an approved graduate-level elective course can be substituted)		
PSYC-418	Public Policy And Aging	3
PSYC-426	Values, Decision Making And The Elderly	3
Electives - Select one "Track"		6
Track 1 - Individualized/Community Outreach (Choose Two Courses)		
PSYC-406	Aging And The Family	
PSYC-412	Psychopathology And Aging	
PSYC-414	Psychotherapy Of The Elderly	
PSYC-434	Aging Services Network	
Track 2 - Public Policy/Administration (Choose Two Course)		
PSYC-428	Aging And Cultural Diversity In The U.S.	
PSYC-432	Meanings Of Old Age

Major in Psychology

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Psychology for the Bachelor of Arts Degree

Code	Title	Hours
Required Courses		
PSYC-200	General Psychology	4
PSYC-202	Writing Intensive Program: Statistics And Research Methods I	3
PSYC-302	Statistics And Research Methods II	3
Two Psychology elective Courses At lease one elective must be a 300-level course		6
Diverse Experience Course Select one course from the following options:		3
PSYC-311	Psychosexual Development	
PSYC-312	Psychological Development In Women	
PSYC-314	Psychology Of The African American Family	
PSYC-317	Latino Psychology: Mental Health & The Latino Experience In The USA	
PSYC-324	Geropsychology	
PSYC-328	Seminar In Aging	
Select one course from each of the following Five Core Areas:		
1. Cognitive Core:		3
PSYC-370	Theories Of Learning	
or PSYC-375	Cognitive Psychology	
2. Clinical Core:		3
PSYC-330	Psychology Of Personality	
or PSYC-340	Abnormal Psychology	
3. Developmental Core:		3
PSYC-310	Developmental Psychology	
4. Physiological Core:		3
PSYC-350	Physiological Psychology	
or PSYC-371	Neuropsychology	
or PSYC-373	Human Perception	
5. Social Core:		3
PSYC-360	Social Psychology	
Select one Lab course:		5

Master of Arts in Gerontology

Master of Arts in Gerontology

The master's degree program in gerontology is a multidisciplinary degree intended to provide both breadth and depth in the study of aging. The required portion of the 36 credit program consists of three parts: The classroom component consists of seven required courses (21 credits), the experiential component consists of an internship (3 credits) and the capstone component involves a thesis (3 credits). In addition to the internship, a practicum is required for those students who do not have prior experience in the field. The thesis may be in basic or applied research or may be a theoretical integration of a topic area.

The combination of required and elective courses prepares graduates to assume positions of responsibility in direct service, administration, social policy, and research with, or on behalf of, older people.

By design the program is part-time, with courses offered in the evening and Saturdays. A student may complete all but the thesis in three academic years by enrolling in one course in the first semester and two courses each semester thereafter. The thesis is the final course and is usually taken after all classroom work is completed.

Requirements for Admission to the Program:

Students must fulfill the general admission requirements of the Graduate College at Northeastern Illinois University.

Students seeking admission to the M.A. in Gerontology program must have completed 15 undergraduate credits in the social sciences (anthropology, psychology, political science, sociology, etc.) In addition, applicants must have completed one (3 credit) course in statistics. If applicants meet all other requirements, the statistics requirement may be fulfilled after conditional admission to the Program. In this case they will be expected to complete an undergraduate course in statistics before being allowed to enter PSYC-408 and before filing for degree candidacy. The undergraduate statistics course does not count toward the 36 hours for the M.A. degree.

Requirements for the Degree:

For students admitted to Master's programs prior to the Fall 1997 semester, the majority of courses applied to the Master's degree must be 400-level; a limited number of appropriate 300-level courses are applicable.

Code	Title	Hours
Required Courses		
PSYC-401	Gerontology: An Overview	3
PSYC-402	Developmental Processes In Later Life	3
PSYC-403	Developmental Processes In Aging:Physiological Aspects	3
PSYC-408	Research Methods	3

M.A. in Gerontology:

New non-Thesis Graduation Option

Beginning Spring 2010, the M.A. in Gerontology program will offer the choice of a two-part comprehensive exam (i.e., (1) written multiple-essay comprehensive exam and (2) fully-developed research proposal) in lieu of completing a full thesis. Students will be required to do an oral presentation (“defense”) of their research proposal. This non-Thesis option achieves the goals of the program and the gerontology field in training knowledgeable and competent researchers and practitioners.

Minor in Gerontology

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

Social Work

The Social Work Program offers a Bachelor of Social Work (BSW) accredited by the Council on Social Work Education. The curriculum is designed to prepare beginning level generalist social work practitioners who are committed to the values and ethics of the profession and the provision of quality services to diverse clients. Coursework and field experiences expose students to a variety of social work settings and clients who represent diverse socio-cultural backgrounds.

The Social Work Program also offers a Masters in Social Work degree (MSW). The Masters degree program in social work is designed to prepare advanced social work practitioners who can serve vulnerable populations and contribute to their functioning and well-being. There are two levels of curriculum: the foundation and the advanced. The foundation curriculum consists of 30 credit hours, preparers done for generalist practice with individuals, groups, communities and organizations and is similar to the curriculum for the bachelor's degree in social work. The advanced level curriculum is built upon the foundation curriculum and prepares students for direct and indirect practice categorized as concentrations. The concentration offered is Practice with Vulnerable Populations.

The Social Work Program faculty members represent a number of practice perspectives and theoretical approaches as well as work with a variety of populations in the area of child welfare, family, immigration, mental health, domestic violence, and social justice issues.

SWK-200. Introduction To Social Work. 3 Hours.

Overview of the social work field, its philosophical basis, historical development and future growth; introduction to the concept of generalist practice.

SWK-202. Community Analysis. 3 Hours.

Methods of conducting research on local communities and racial/ethnic backgrounds. Role of culture in human behavior and how one's culture interfaces with other cultures. This is a values and knowledge elective course.

Prerequisite: SWK-200 with a minimum grade of C.

SWK-203. Analysis Of Cross Culture Interaction. 3 Hours.

This is a pre-practice elective. Development of sensitivity when interacting with persons of diverse racial- ethnic backgrounds. Role of culture in human behavior and how one's culture interfaces with other cultures.

SWK-207. Social Welfare Policy I. 3 Hours.

Covers content on the history of social welfare, current social welfare programs and the societal values that underline these provisions.

Prerequisite: SWK-200 with a minimum grade of C.

SWK-250. Issues In Social Service Delivery. 3 Hours.

Covers major problems and issues in the field of social work. Topics vary. This is a values and knowledge elective course.

SWK-300. Human Sexuality And Social Work. 3 Hours.

Knowledge of sexuality as it is expressed in a variety of lifestyles and the application of social work values and ethics when working with sensitive issues in sexuality. This is a values and knowledge elective course.

SWK-301. Social Work And The Law. 3 Hours.

This course will introduce and provide a basic understanding to the social work student of the law, legal processes, and legal systems as they relate to social work fields' of practice. This course will challenge students to consider and begin to understand how the fields of social work and law intersect. They will develop an understanding of how the practice of social work is continually influenced and, often time regulated, by legislative and judicial decisions. The student will begin to explore how to advocate within the legal system on behalf of the populations that they serve. This is a values and knowledge elective course.

Prerequisite: SWK-200 with a minimum grade of C.

SWK-303. Writing Intensive Program: Human Behavior And The Social Environment I. 3 Hours.

A first course of a two-part sequence designed to develop understanding about human behavior and the social environment. Students will enhance their critical thinking skills by focusing on analyzing how people understand themselves, how people create meaning in their lives, how people change, and how your own perspective influences understanding client-systems. The generalist practice model is used to understand the central principles of empowerment: client capacity, resiliency, opportunities, context, constitution and construction. As a writing intensive course students develop the fundamentals of professional writing skills for the social work field.

Prerequisites: SOC-100 and PSYC-100 and PSYC-110 and ANTH-212 and BIO-100 and MATH-103 - 499 and SWK-200 and ENGL-101 - 102.

Corequisites: SWK-304, SWK-309.

SWK-304. Social Work Practice I. 3 Hours.

A first course in a two-part sequence designed to provide the student with a foundation in generalist social work practice i.e. knowledge, values and skills. The central premise is that generalist practice is about client empowerment through collaborative work with clients. This involves empowerment of clients through preparation for first contact, learning how to dialogue across client systems, learning how to define directions with the client and collaborating about the client needs and resources. Bridging knowledge from HUBSE I is done through practical application.

Prerequisites: SOC-100 and PSYC-100 and PSYC-110 and ANTH-212 and BIO-100 and MATH-103 - 499 and SWK-200 and ENGL-101 - 102.

Corequisites: SWK-303, SWK-309.

SWK-305. Social Work Practice II. 3 Hours.

The second course of a two-semester practice foundation. Course content will focus on the social work processes of goal setting, application of models for action, and integrating gains in the generalist method of practice. The social worker's role and activities will be examined in light of the values and ethics of the profession, which includes conducting oneself as an ethnically sensitive worker with diverse client systems in the urban environment.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C and SWK-309 with a minimum grade of C.

Corequisites: SWK-306, SWK-357.

SWK-306. Human Behavior In The Social Environment II. 3 Hours.

This is the second course in the Human Behavior and Social Environment foundation area. It is designed to examine the dynamic interplay between the individual's development and the functioning of groups, families, organizations and communities and builds on the objectives of SWK-300 HUBSE I. Each unit integrates the student's knowledge about the generalist model, the concepts & assumptions within, understanding of the concept of self, the value of honoring diversity and the commitment to social and economic justice.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C and SWK-309 with a minimum grade of C.

Corequisites: SWK-305, SWK-357.

SWK-307. Services To Children & Adolescents. 3 Hours.

This course focuses on culturally competent social work practice with children and adolescents living in diverse family arrangements. The continuum of services and resources available to children and adolescents and the roles and functions of the social worker in these settings are examined. Economic, social, and psychological concerns of vulnerable children are identified, and intervention strategies that will effectively meet these needs are addressed. Students are presented with specialized knowledge and skills essential for working with children and adolescents. Students will be exposed to fundamental training that prepares them for DCFS Licensure. This is a skills elective course.

SWK-308. Social Work Practice With Immigrants & Refugees I. 3 Hours.

Professional social work in the United States began in the late 19th century largely as a response to what was then the largest wave of immigration to this country. Jane Addams's Hull House settlement house served many of Chicago's newly arrived European migrants helping them adjust to life in their new home. Today, we are in the midst of another great wave of migrants; 12% of the U.S. population is foreign-born, representing over 35 million individuals. This group of immigrants are much more diverse racially, ethnically, and socio-economically than ever before. This diversity presents a unique set of challenges for policymakers and practitioners trying to facilitate their adaptation to the US. This course is thus designed to help students planning to work with foreign-born populations (and their offspring) gain the knowledge and skills necessary to address their needs. This is a values and knowledge elective course.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C.

SWK-309. Research And Quantitative Applications In Social Work. 3 Hours.

Content on basic and applied research concepts and methodology; assessment of empirical research published in professional social work literature; interpretation of statistical analyses.

Prerequisites: SOC-100 and PSYC-100 and PSYC-110 and ANTH-212 and BIO-100 and MATH-103 - 499 and SWK-200 and ENGL-101 - 102.

Corequisites: SWK-303, SWK-304.

SWK-310. Research Seminar I. 3 Hours.

This course is designed to prepare students to conduct qualitative research in their field practicum agency. At the completion of the course each student will begin a detailed proposal for research that will be completed in the subsequent term. The course will cover the various approaches to qualitative research e.g. ethnographic theory, narrative and the case study. Special attention will be given to problem formulation, literature review, and data collection techniques.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C and SWK-305 with a minimum grade of C and SWK-306 with a minimum grade of C and SWK-309 with a minimum grade of C and SWK-357 with a minimum grade of C.

Corequisites: SWK-353, SWK-355.

SWK-311. Research Seminar II. 3 Hours.

The focus of this course is the continuation of the research proposal begun in SWK-310- Research Seminar I, which includes procedures, research design, data analysis, interpreting and coding data and evaluation. Attention will be given to ethical considerations and considerations of race, gender, culture and sexual orientation.

Prerequisite: SWK-310 with a minimum grade of C.

Corequisites: SWK-354, SWK-356.

SWK-312. Women And Social Work. 3 Hours.

Women and Social Work is an elective course focusing on women's issues in social work, both for women as social work practitioners and for women as clients/ participants in social service delivery systems. The course will cover aspects of feminist thought, non-sexist therapy, feminist therapy, sexist biases in research, feminist research in social work and social welfare policies and practice which have an impact on women. This is a values and knowledge elective course.

SWK-313. Child Advocacy Studies: Assessment And Evaluation. 3 Hours.

This course provides a survey of the emerging field of Child Advocacy Studies, which researches and seeks remedies for the maltreatment of children and youth, including specific acts of violence and neglect, in the context of the pernicious effects of racism, poverty, sexism, and heterosexism, including the unique problems faced by immigrant and displaced children. The course examines the various economic, political, social and cultural circumstances that may contribute to the abuse and maltreatment of children and youth. It also teaches students about the strategies and tactics used by various local governmental and nongovernmental agencies, courts and medical establishments to address these problems. This is an elective class for Social Work majors and minors, and one of the required courses in the sequence for a Child Advocacy Studies minor.

SWK-314. Social Work Advocacy. 3 Hours.

This course is designed to enhance students' understanding of social work advocacy. It is an elective course and is geared to develop an awareness about social work advocacy and its role in: organizational change, political campaigns and lobbying. This is a values and knowledge elective course.

SWK-320. Domestic Violence Social Work: Theory And Practice. 3 Hours.

This course will explore the theory and research on the causes of abuse, including individual and family factors, intergenerational aspects, gender issues, community and societal influences, as well as cultural factors. Strategies and treatment for alleviating family violence will be explored, including systems which are currently in place and other societal systems of response to this social problem. This is a skills elective course.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C.

SWK-321. Social Work Practice In Schools. 3 Hours.

This elective course will present essential knowledge and skills for engaging in effective generalist social work practice with youth and families in public elementary, middle, and high schools. It will focus on four key domains of social work practice in school settings: 1) culturally competent practice, 2) social emotional learning, 3) positive youth development, and 4) community collaboration. Drawing upon a comprehensive community schools framework, students in this course will be exposed to the current research, critical issues, and essential practice skills relevant to generalist social work practice in schools.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C.

SWK-322. Writing Intensive Program: International Social Work. 3 Hours.

This course is intended to provide students with an understanding of social policy issues and programs in other countries. Examination of the political, economic, and social conditions that either enhance or impinge upon the wellbeing of people and policy development will be explored. Students will utilize critical thinking skills to deepen their understanding of international social work issues. Students will be able to understand how cultural values and beliefs are translated into policies and enacted through programs. This is a skills elective course.

Prerequisite: ENGL-101 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C.

SWK-323. Social Work Practice With Immigrants & Refugees II. 3 Hours.

This course is designed to help students planning to work with immigrant and refugee populations gain the knowledge and skills necessary to address their needs. This course connects the social work profession's values of diversity, social justice, and social change to social policy and direct practice with the foreign-born. This is a skills elective course.

Prerequisite: SWK-200 with a minimum grade of D and SWK-207 with a minimum grade of D.

SWK-324. Social Work With Latino Communities. 3 Hours.

This course is designed to help students gain the knowledge and skills necessary to address the needs of the Latino community. This course will use applied learning and participatory action research methods to connect the social work profession's values of diversity, social justice, and social change to positively affect the development of local Latino communities. This is a skills elective course.

Prerequisite: SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C.

SWK-326. Independent Study In Social Work. 3 Hours.**SWK-327. Social Work Practice With Families. 3 Hours.**

This is a post-practice elective course. Overview of the field of family therapy; various approaches, differences in their underlying theoretical assumptions and their application in social work, family assessments and interventions. This is a skills elective course.

SWK-328. Social Work With Groups. 3 Hours.

This is a post-practice elective course, majors only. The purpose of this course is to emphasize concepts, methods and issues in social group work practice beyond what has been learned in SWK Practice I & II. The focus will be on group work theory and practice as it applies to different practice settings and different populations. Emphasis will be placed on the social worker's developing self-awareness, ethical competence and practice skills in working with groups. This is a skills elective course.

Prerequisite: SWK-304 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-200 with a minimum grade of C.

SWK-329. Administration And Planning In Social Work. 3 Hours.

This is a post-practice elective course, majors only. It is designed to expose the beginning level practitioner to administrative and planning functions with emphasis on how these impact the direct service practitioner. This is a skills elective course.

SWK-330. Social Work Practice In Community Settings. 3 Hours.

This is a post-practice elective course. Structure and functions of communities and models of community organizing; development of community organizing skills. This is a skills elective course.

SWK-337. Child Welfare II. 3 Hours.

This is an elective course that focuses on culturally competent social work practice with children and adolescents living in diverse family arrangements. The continuum of services and resources available to children and adolescents and the roles and functions of the social worker in these settings are examined. Economic, social and psychological concerns of vulnerable children are identified. Intervention strategies that will effectively meet these needs are addressed. Students are presented with specialized knowledge and skills essential for working with children and adolescents. Students will be exposed to fundamental training that prepares them for DCFS Licensure. This is a skills elective.

Prerequisite: SWK-307 with a minimum grade of C.

SWK-353. Field Seminar I. 3 Hours.

Taken concurrently with SWK-355. Integration of knowledge, values and skills with experience in the field practicum.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C and SWK-305 with a minimum grade of C and SWK-306 with a minimum grade of C and SWK-309 with a minimum grade of C and SWK-357 with a minimum grade of C.

Corequisites: SWK-310, SWK-355.

SWK-354. Field Seminar II. 3 Hours.

Taken concurrently with SWK-356. Continuation of SWK-353.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C and SWK-305 with a minimum grade of C and SWK-306 with a minimum grade of C and SWK-309 with a minimum grade of C and SWK-357 with a minimum grade of C.

Corequisites: SWK-311, SWK-356.

SWK-355. Field Practicum I. 3 Hours.

Taken concurrently with SWK-353. Beginning field experience; students are placed in a social work agency providing the opportunity to develop, test and reinforce social work knowledge, values and skills.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C and SWK-305 with a minimum grade of C and SWK-306 with a minimum grade of C and SWK-309 with a minimum grade of C and SWK-357 with a minimum grade of C.

Corequisites: SWK-311, SWK-354.

SWK-356. Field Practicum II. 3 Hours.

Taken concurrently with SWK-354. Continuation of SWK-355.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C and SWK-305 with a minimum grade of C and SWK-306 with a minimum grade of C and SWK-309 with a minimum grade of C and SWK-357 with a minimum grade of C.

Corequisites: SWK-311, SWK-354.

SWK-357. Social Welfare Policy II. 3 Hours.

Critical analysis of social welfare policies and programs; focus on the impact of policy on direct practice.

Prerequisite: SWK-200 with a minimum grade of C and SWK-207 with a minimum grade of C and SWK-303 with a minimum grade of C and SWK-304 with a minimum grade of C and SWK-309 with a minimum grade of C.

Corequisites: SWK-305, SWK-306.

SWK-358. Social Work Advocacy. 3 Hours.**SWK-400. Overview Of The Social Work Profession. 3 Hours.**

Overview of the Social Work Profession is a 3 credit hour course for students who have a bachelor's degree in a major other than social work. This course is designed to provide students with an overview of the profession providing a context of the knowledge, values, and skills in the social work profession. The course covers the history of social work, the values and ethics of the profession, the perspectives of empowerment and social justice, the varied fields of social work practice, and how social workers help individuals, families, groups, and society.

SWK-401. Oppression, Decolonization And Equity In Social Work. 3 Hours.

The course provides an overview of the conceptual and theoretical knowledge related to difference, oppression, social justice, and empowerment. Students explore power issues in race, class, gender, sexual orientation and other societal forces that affect individuals. This course provides a forum for students to critically examine their assumptions, beliefs, and behaviors and reflect on how these personal ethics and values enhance or hinder their work with people of diverse backgrounds.

Prerequisite: SWK-400 with a minimum grade of B.

SWK-402. Human Behavior And The Social Environment I. 3 Hours.

This is the first half of a two-semester sequence designed to inform students about human development throughout the life course. Students will gain an understanding of the reciprocal interaction between individuals and the ecological context in which they live and grow. This first course focuses on theories and research findings related to: 1) the Eco-systemic approach to social work practice; 2) the functioning of individuals, families, and communities; and 3) the analysis of human development theories from birth through late-childhood and preadolescence. The semester will also include an overview of the mission of social work and the value base of the profession.

Corequisite: SWK-403.

SWK-403. Generalist Practice I. 3 Hours.

This course introduces students to generalist social work practice and addresses values, knowledge, skills, issues and processes relevant to social work practice regardless of client population, size of client system, or type of agency setting. The course focuses on basic social work practice principles, concepts, goals, and methods. Particular attention is paid to culturally diverse and oppressed populations. This course includes a practice skills laboratory in which students have the opportunity to practice their relationship building, interviewing, and assessment skills. The practice skills laboratory is also designed to give students the opportunity to integrate fieldwork experiences with classroom learning.

Corequisite: SWK-402.

SWK-404. Human Behavior And The Social Environment II. 3 Hours.

This is the second of a two-semester sequence that examines human development throughout the life cycle and the interaction of individuals with environmental conditions. This course covers the stages of human development from adolescence through old age and focuses on the effects of diversity and oppression on the development and functioning of individuals. The course also focuses on the relationship between individual development and broad, environmental factors that affect individual development. Particular attention is given to issues related to mental health and mental illness. In addition, the examination of the impact of immigration across the life course is examined.

Prerequisite: SWK-402 with a minimum grade of B.

Corequisite: SWK-405.

SWK-405. Generalist Practice II. 3 Hours.

Generalist Practice II is the second part of a two-semester sequence and addresses values, knowledge, skills, issues and processes which are relevant to clinical social work practice regardless of agency setting. This course uses an ecosystems assessment perspective and a problem solving process as the framework for intervention. Particular attention is paid to cultural diversity and the dynamics of oppression in clinical social work practice. This course also includes a concurrent practice skills laboratory in which students have the opportunity to practice their clinical social work practice skills.

Prerequisite: SWK-403 with a minimum grade of B.

Corequisite: SWK-404.

SWK-406. Social Welfare Policy. 3 Hours.

This course is designed to provide students with an overview of the major social welfare policies such as health care, children and families, poverty, mental health, and substance abuse, and provides a conceptual framework in which these policies are analyzed. Students learn the underlying values that are used to formulate such policies as well as debate the direction of policy changes. It examines the government's role in the development of social policies and the social work role in advocating for change. Special emphasis is placed on how these social welfare policies affect diverse population.

This course is for graduate social work students.

Requirements: Bachelor's Degree and admission to the graduate program in social work.

SWK-407. Social Work Research. 3 Hours.

This foundation research course is designed to provide the students with an overview of the scientific research process, to enable students to critique research, and prepares students to develop a research proposal. The course covers the research formulation process, research methodology, and research findings and their implications for further research. Emphasis is placed on critiques of actual research appearing in the social work literature and the development of a research proposal on a topic in social work. It is expected at the completion of this course students will be prepared to engage in a research project in the advanced curriculum.

SWK-415. Foundation Field Practicum I. 3 Hours.

This course is the first of a 2-semester sequence and provides students with a generalist practice experience with individuals, families, small groups, and communities. Students spend 240 clock hours in an agency for the 3 credit hours of course work. Students are integrating classroom learning such as communication skills, professional values and ethics, and practice models with multiple system levels. They also are learning to employ a bio-psycho-social assessment model and utilize a strengths perspective with client systems. In addition, students are learning how important it is to evaluate their practice.

Requirement: Admission to the graduate social work program and approval of the Field Placement Application.

SWK-416. Foundation Field Practicum II. 3 Hours.

This course is the second course in a 2-semester sequence and provides students with a generalist practice experience with individuals, families, groups, and communities. Students spend 240 clock hours in an agency for the 3 credit hours of course work. Students are integrating classroom learning such as communication skills, professional values and ethics, and practice models with multiple system levels. They also are learning to employ a bio-psycho-social assessment model and utilize a strengths perspective with client systems. In addition, students learn to evaluate their practice.

Prerequisite: SWK-415 with a minimum grade of B.

SWK-421. Critical Social Work In Schools: Policy, Practice & Leadership. 3 Hours.

This course presents knowledge and skills for critically engaging in social work policy, practice, and leadership when serving and advocating for children, youth and families in public elementary, middle and high schools. It focuses on four key domains for effective social work in schools: 1) positive youth development, 2) trust, collaboration and community partnerships, 3) culturally sustaining practice, and 4) school mental health. Drawing on a comprehensive community schools framework students in this course will learn the key roles and responsibilities of social workers in helping lead schools to be more equitable, inclusive and just places for learning and support.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program in social work. This course is required for all students in the School Social Work specialization.

SWK-422. Social Work Practice In Global Cross-Cultural Contexts. 3 Hours.

This elective course will present essential knowledge and skills for engaging in international and global social work practice with individuals, families and communities. Students will study theoretical models to consider processes of social development in a global, cross-cultural context. Dynamics of power in global social work will be a central focus as well as understanding diverse roles and activities in which social workers engage. Students will critically assess policies and programs designed to increase the responsiveness of social, economic, and political institutions to human needs. Issues of culture, vulnerable populations, and social and economic justice will be explored.

Requirement: Completion of the MSW Foundation Curriculum.

SWK-423. School Social Work With Exceptional Students. 3 Hours.

This advanced practice course prepares social work students to effectively advocate for and serve students with exceptional learning needs in public K-12 schools. Categories of exceptional children and youth are examined, as defined by federal and state legislation, including the Individuals with Disabilities Education Act (P.L. 94-142) and the Vocational Rehabilitation Act (Section 504). Particular emphasis is placed on how school social workers provide equitable, inclusive, and just school mental health services and supports to students and their families. Evidence-informed approaches for assessment, evaluation and advocacy for developing equitable and inclusive school policies and practices are all discussed.

Prerequisite: SWK-421 with a minimum grade of B.

SWK-425. Assessment And Diagnosis In Social Work With A Critical Lens. 3 Hours.

This elective course will present essential knowledge and skills for understanding clinical diagnosis using the Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM-V) and competency-based and strengths-based assessments applied in the social work field. It focuses on application of diagnostic criteria for mental disorders with careful consideration of the role of intersectionality, stigma and systems of oppression influencing assessment and treatment. This course reflects current issues in mental health access and culturally sensitive treatment from a social justice lens, reflecting the need for funding, equitable policies and research to support effective practice.

Requirement: Completion of the MSW Foundation Curriculum or admission to the MSW Advanced Standing Program.

SWK-426. Independent Study. 3 Hours.

Students wishing to develop their own course of study not covered in the standard curriculum may do so by registering for an Independent Study under the supervision of a full-time Social Work Department faculty member. An Independent Study requires the signature of the faculty member, department chairperson, college dean, and Academic Affairs on the Independent Study/Tutored Study request form. To initiate the planning of an independent study, students should consult with the faculty member with whom they intend to be supervisor for the independent study, as well as the Social Work Department Advisor.

Prerequisite: SWK-400 with a minimum grade of C and SWK-402 with a minimum grade of C and SWK-403 with a minimum grade of C and SWK-415 with a minimum grade of C and SWK-401 with a minimum grade of C and SWK-404 with a minimum grade of C and SWK-405 with a minimum grade of C and SWK-416 with a minimum grade of C and SWK-406 with a minimum grade of C and SWK-407 with a minimum grade of C.

SWK-429. Nonprofit Management & Leadership In Social Work. 3 Hours.

This elective course will present essential knowledge and skills for nonprofit managers, supervisors and administrators working in nonprofit or human service organizations. This course will examine the evolution of the nonprofit sector and explore some of the critical management, leadership, and policy issues that are key to running an effective nonprofit organization. It will also focus on the philosophies and theories of leadership and management; understanding management systems, internal and external ecology of organizations; strategic planning, managing technology and information; resource/financial development and philanthropy; human resources practices and development; board development; marketing strategies; and monitoring and evaluating organizational effectiveness.

Requirement: Completion of the MSW Foundation Curriculum or admission to the MSW Advanced Standing Program.

SWK-430. Transition To The Advanced Curriculum. 4 Hours.

This course is designed to enable those who have a Bachelor's in Social Work to transition to the advanced curriculum. This course provides an overview of the foundation curriculum and ensures the consistency in exposure to this foundation curriculum between those who are full-program students and those who are advanced standing degree program students. The students will then complete short papers that allows the demonstration of the primary concepts and principles in the foundation areas.

Requirements: Admission to the Advanced Standing Degree graduate program in social work; a bachelor's degree in social work within the past 10 years.

SWK-431. Social Work Practice With Families. 3 Hours.

Building on a bio-psycho-social spiritual framework, this advanced practice course utilizes a case analysis format to focus on clinical practice skills within the context of culture. Specific strategies and tools for evaluating clinical social work practice and ethical dilemmas that arise in clinical social work practice are addressed. The course emphasizes the ways in which socio-economic status, ethnicity, sexual orientation, race, gender, and physical and mental disability affect the processes of clinical assessment and intervention. In addition, this course addresses the role of the clinical social worker when advocating for social and economic justice on behalf of their clients.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program.

SWK-432. Family-centered Policy. 3 Hours.

The course enables students to learn about child and family-centered policy and to critically analyze these policies using a conceptual framework. This course examines the various effects policies and programs have on different types of families and different aspects of family functioning. The course focuses on the connections between public policies and the values that enter into policy debates and explores the reciprocal linkages between family functioning and public policies at the federal, state, and local levels.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program.

SWK-433. Social Work Practice With Children. 3 Hours.

This course is designed to enhance knowledge, values and skills for practice with children. The course prepares advanced practitioners to provide culturally competent services for a broad range of families and children. This course emphasizes the provision of services for children and their families that enhance and support family life as well as substitute a home life for those who need this. The course focuses on a full range of services available for children and families and emphasizes the impact of these various services. The course also covers various treatment approaches especially for children who are traumatized.

Requirement: Completion of the Foundation Curriculum or admission to the advanced standing graduate degree program.

SWK-434. Child Welfare Policy And Legislation. 3 Hours.

This course is designed to enable students to analyze policies affecting children and to prepare students to function in the legal system on behalf of children. This course provides students an overview of the federal and state policy in child welfare and the legal system which provides oversight of these policies. The course equips students with the knowledge and skills to advocate on their behalf children.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program.

SWK-441. Empowerment And Change. 3 Hours.

This course is designed to provide students with a social justice and empowerment framework for understanding the need to promote social change. The concept of social justice is analyzed emphasizing the moral and ethical imperative to seek the eradication of social injustice. The concept of empowerment is examined as a framework for understanding the process of advocacy and social change. The contexts of advocacy as well as the various models of advocacy are covered. Strategies and tactics of advocacy are presented with an emphasis on the challenges and dilemmas of implementation.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program in social work.

SWK-442. Political Advocacy. 3 Hours.

This course provides an overview of the role of social workers within the electoral and legislative arenas. The nature of the legislative policy making process and the role of partisan politics in the policy-making process is explored. The course focuses on selected strategies and tactics of advocacy aimed at changing legislation. Topics covered include lobbying, coalition-building, and legal and ethical dilemmas in building or strengthening the power base for advocacy.

Requirement: completion of the Foundation Curriculum or admission to the Advanced Standing program in social work.

SWK-443. Social Justice And Social Change. 3 Hours.

The purpose of this course is to provide students with a theoretical conceptualization of social justice and enable them to use this knowledge to bring about social change. Various aspects of social justice is explored and specific areas of social injustices is examined. Both economic and social justice for specific vulnerable populations are examined. At the completion of the course it is expected that students gain a firm grasp of the mission of social justice in the social work profession.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program.

SWK-444. Community Advocacy. 3 Hours.

This course is designed to prepare students to lead in the development of grassroots activities that will bring about change. Students learn to utilize their knowledge of the process of advocacy to accomplish the tasks that will bring about change. Students learn how to assess community readiness for change and design the elements for bringing about change. The topics covered in this course are capacity-building, collaboration, fundraising, marketing, and using the media and persuasion. Students also learn how to evaluate these efforts to strengthen future work on community change.

Requirement: completion of foundation curriculum or admission to the advanced standing program in social work.

SWK-450. African Studies Institute (AfSI). 3 Hours.

As the origin of humanity, Africa's history is steeped in culture, biodiversity, and indigenous knowledge. The African Studies Institute (AfSI) introduces students to Africa and heightens their curiosity to research and explore more about this fascinating continent. AfSI is a good fit for students in any field who are interested in learning about Africa and/or will be working with refugees and immigrants from Africa. Moreover, AfSI provides the necessary tools for teachers, social workers and other professionals who are interested in integrating African sociocultural, linguistic, historical, political, human rights, and economic contexts into their workplace.

SWK-470. Immigration Practices. 3 Hours.

This course is designed to help students work with foreign-born populations (and their offspring) develop advanced knowledge and practice skills necessary to address their needs. This course will cover issues related to the demographics of immigrant refugees, culturally competent practice at the micro- and mezzo- levels of practice, and an in-depth exploration of legal and policy issues that affect the foreign-born in the United States.

Requirement: completion of foundation curriculum or admission to the advanced standing program of social work; permission of the instructor.

SWK-471. Practice With Lesbian, Gay Bisexual, Transgender And Queer Population. 3 Hours.

This course is designed to enhance student understanding of issues related to LGBT populations in the U.S. Students will be exposed to empirical literature on LGBT issues that will inform an understanding of past, present and future challenges facing the LGBT communities. Raising students' awareness of personal, interpersonal and institutional values and biases is examined and a life cycle perspective is presented to highlight the unique issues of LGBT communities. Students are introduced to the history of the LGBT civil rights movements and the underlying theories of sexual orientation and sexual identity formation.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program.

SWK-472. Trauma Treatment With Children And Families. 3 Hours.

This course is designed to provide students with intermediate knowledge and skills to assess the impact of potentially traumatic events and to plan for evidence informed interventions across a variety of family system. The impact of trauma is considered within the context of biological, developmental, psychological, economic, educational, cultural, and social factors. The role of the therapist is covered and intervention techniques that empower families is presented. Consideration is given to those factors that enhance the protective capacity, strengths and resilience of children and their families who have been exposed to violence, abuse and trauma.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program in social work.

SWK-473. Topics In Advocacy. 3 Hours.

The purpose of this course is to enable students to design an advocacy project in a specified topic area. Students select a topic of their choice and complete the project in its entirety. The class focuses on the steps or process for launching an advocacy project from assessing the need, mobilizing resources, and engaging in activities. At the conclusion of the course students evaluate their efforts and identify the next steps.

Requirement: Completion of the foundation curriculum or the Bachelor's Degree in Social Work.

SWK-474. Social Work And The Law. 3 Hours.

This course examines the law, legal processes, and legal systems as they relate to social work fields' of practice. The course challenges students to consider how the fields of social work and law intersect. Throughout the course, students critically analyze how the practice of social work is continually influenced by judicial decisions. The students also attain skills in advocating within the legal system on behalf of the populations that they serve.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program.

SWK-475. Social Work Practice With Latino/a/x Communities In The United States. 3 Hours.

This course prepares social workers in training to provide culturally sensitive services to members of Latino/a/x communities in the United States. It examines aspects of service delivery and is designed to provide an applied approach to social work with Latino/a/x communities in the United States. Students will learn specific skills and competencies to work with Latinos from different backgrounds in diverse settings. Barriers and best practices to social services with Latino communities such as education, healthcare, and mental health care will be discussed throughout the course.

Requirement: Completion of the MSW Foundation Curriculum or admission to the MSW Advanced Standing Program.

SWK-491. Advanced Research I. 3 Hours.

This course is designed to enable students to develop a research proposal that will be carried out in the following semester. The course focuses on the elements of a research proposal and the steps in developing the proposal. The course helps students decide on the topic and move this to a research problem. The course also facilitates the literature review and helps in the design of the research methodology. In addition, students learn about the limitations of their research as well as the significance.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program in social work

Corequisite: SWK-495.

SWK-492. Advanced Research II. 3 Hours.

This course is designed to afford students the opportunity to implement the research project for which they developed a research proposal in SWK-491. This course is designed to assist students in the collection and analysis of their data as well as the identification of the contributions and limitations and the implications of this research.

Prerequisite: SWK-491 with a minimum grade of B.

Corequisite: SWK-496.

SWK-495. Advanced Field Practicum I. 3 Hours.

This is an advanced practicum designed to engage students in experiences and activities in their concentration. This is the first semester of a 2-semester sequence and is designed to expose students to the roles and tasks of a professional social worker in their desired concentration.

Requirement: Completion of the foundation curriculum or admission to the advanced standing graduate degree program in social work

Corequisite: SWK-491.

SWK-496. Advanced Field Practicum II. 3 Hours.

This is an advanced practicum designed to engage students in experiences and activities in their concentration. This is the second semester of a 2-semester sequence and is designed to further students learning and advance their understanding of the roles and tasks of a professional social worker in their desired concentration.

Prerequisite: SWK-495 with a minimum grade of B.

Corequisite: SWK-492.

Major in Social Work

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Social Work for the Bachelor of Social Work Degree

SWK-327	Social Work Practice With Families	
SWK-328	Social Work With Groups	
SWK-329	Administration And Planning In Social Work	
SWK-330	Social Work Practice In Community Settings	
Total Hours		60

Students must maintain a 2.5 cumulative GPA and no less than a C in all required courses for the social work major. Students planning to pursue the MSW need a 3.0 cumulative GPA and no less than a B in all social work courses.

Students interested in the major in social work must schedule an appointment with a social work advisor by calling the social work office: (773) 442-4760

Students should seek advisement from a program advisor right away to assure compliance with prerequisites and required sequencing of courses.

Students need to complete all General Education and Liberal Arts requirements in order to move beyond SWK-200 SWK-207.

Social Work students are suggested to take MATH-112 or MATH-113 to meet math requirement.

This sample curricular map is provided to guide you in the planning of your progression for this major. This guide should not replace regular consultations with your program advisor. For specific recommendations of courses not identified, please consult your program advisor.

Minor in Social Work

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)* 2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	6
Humanities (HU)* 3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	9
Behavioral/Social Sciences (SB)* 3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	9
Natural Sciences (NS and NSL)** 3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	9

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Master of Social Work

Master of Social Work

Northeastern Illinois University (NEIU) offers a Master of Social Work (MSW) degree designed to prepare students for leadership roles and professional practice with individuals, families, organizations and communities with a trauma-informed lens.

Students admitted with a Bachelor's degree in a major other than Social Work must complete the 60 credit-hour Full Program. The Full Program consists of the 30 credit-hour Foundation Curriculum and the 30 credit-hour Advanced Curriculum. Students completing the Full Program can do so in two years full-time or three to four years part-time.

Students admitted to the MSW Program who have earned a Bachelor of Social Work (BSW) degree in the past five years from a college or university accredited by Council on Social Work Education (CSWE) can immediately transition into the 33 credit-hour Advanced Curriculum. This curriculum can be completed in one year full-time, or two years part-time.

Concentrations & Specializations

There are two concentrations in the MSW program: 1) Social Work Practice with Children, Youth, and Families and 2) Leadership and Change. Students in the Children, Youth, and Families concentration acquire knowledge and skills that prepare them for interpersonal practice in a range of direct practice settings that support vulnerable populations. Students in the Leadership and Change concentration acquire knowledge and skills that prepare them for leadership, community organizing, advocacy, and administrative roles in the field. Students in either concentration can also choose the School Social Work specialization which prepares them with the knowledge and skills to be professional school social workers. Students in this specialization are eligible to earn a Professional Educator License (PEL--support personnel only) endorsed in School Social Worker (Pre K - Age 21) in the State of Illinois. This specialization is a State-approved program in Social Worker - Pre K - Age 21 by the Illinois State Board of Education (ISBE).

Students select a concentration (as well the option of the School Social Work specialization, if they choose) in consultation with their MSW Program Advisor prior to beginning the Advanced Curriculum. Together, these concentrations and specializations prepare students for professional practice with children, families, organizations, and communities, respectively.

Field Work & Practical Experience

Practical experience is built into the MSW curriculum, often referred to as "Field Work" and is the signature pedagogy of the curriculum. All fieldwork experiences are credit-bearing internship experiences. These experiences offer students an opportunity to integrate and apply their academic knowledge in a real-world setting and prepares them with the skills essential to take on the responsibilities of beginning professional practice.

In order to receive credit for fieldwork experiences, students must work with the MSW Director of Field Education to complete an internship placement and referral process. To start this process, a student must submit a formal application to apply for fieldwork with the Social Work Department. All applications have deadlines and require collaboration and communication between the student and the respective internship coordinator to secure a placement. It is the policy of the NEIU Social Work Department that all referrals of students to field placement sites be made by internship coordinators in the Field Office. Students may offer suggestions about field sites and can also begin the process of connecting the Social Work Program with new partnering Field Placement sites. After full review by the Field Director of the site and their capacity to host social work student interns, a determination is made if this partnership is approved before a student can be matched to a site for internship.

Fieldwork experiences are usually taken concurrently with academic classes. Students complete fieldwork experiences that typically span two semesters. MSW students completing the Foundation Curriculum must complete 480 hours in a field placement, while enrolled in 400-level foundation coursework. Advanced Curriculum students must complete 600 hours at a field placement, while enrolled in 400 level advanced courses. Students in the School Social Work specialization must complete 600 hours of internship experience in a school setting with at least 400 hours of field experience supervised by a field instructor holding a MSW degree or higher, and with at least two years of experience with a PEL with a school social worker endorsement.

Admission Requirements

- 1) Official transcripts from all colleges and universities attended.
- 2) A two-page professional statement addressing your goals and objectives specific to the MSW program.
- 3) Additional requirements for the Full and Advanced Standing Programs, and the School Social Work Specialization as follows:

Full Program (Foundation Curriculum & Advanced Curriculum)

An undergraduate GPA of 3.0 or a post-graduate GPA of 3.0 in at least 6 credit hours is required; liberal arts coursework that includes coursework in the social and behavioral sciences, the natural sciences, and the humanities. Three letters of recommendation. Professional statement. Additional requirements may include a background check (See Additional School Social Work Specialization Admission Requirements below).

Advanced Standing Program (Advanced Curriculum Only)

Undergraduate GPA of 3.25. Three letters of recommendation. One of the letters of recommendation should be from the BSW Program Director, Field Director, or faculty of the transfer school. Additional requirements may include a background check (See Additional School Social Work Specialization Admission Requirements).

Additional School Social Work specialization admission requirements (Leading to earn a PEL endorsed in School Social Work)

Students applying for admission to the Advanced Standing Program who intend to complete the School Social Work specialization, leading to earn a PEL endorsed in School Social Work must also:

1. Submit a completed NEIU School Social Work Specialization Admission Application Form. To obtain this form, please contact the NEIU Social Work Department Office Manager, Cody Budd at c-budd@neiu.edu.
2. Complete a Federal and State Fingerprint Background check with the Daniel Goodwin College of Education (DGCOE) by following the instructions on this page: <https://www.neiu.edu/academics/daniel-i-goodwin-college-of-education/admission-requirements/federal-and-state-fingerprint-background-check-instructions-0> (<https://www.neiu.edu/academics/daniel-i-goodwin-college-of-education/admission-requirements/federal-and-state-fingerprint-background-check-instructions-0/>)

Sociology

The Sociology Department offers a 39-credit **major** (21 credit hours of required courses and 18 credits of electives). We also offer an 18-credit **minor** (9 credits of required courses and 9 credit hours of electives).

Sociology is the systematic study of human social interactions and institutions, and the social causes and consequences of human behavior. NEIU's Sociology Department offers students a world of difference through dynamic faculty and engaging course offerings that help to develop students' critical understandings of social life through the shared power of knowledge and resourceful action. Our faculty is committed to working with students to understand how classism, racism, sexism, homophobia, and other forms of oppression intersect and operate, and how individuals, groups, and organizations challenge these inequalities. Our primary aim is thus to equip students with a lifelong love of learning; broad, diverse, and critical perspectives of the social world; and relevant and important life skills that are consistent with the goals of a liberal arts education. By deepening students' critical understandings of the structures and patterns upon which everyday life rests, the Department fosters the students' "sociological imaginations" through empowerment, social engagement, and commitment to social justice.

A major or minor in sociology can provide a useful orientation for students who plan to attend graduate school or seek careers in community-based organizations or in such fields as education, human resources, urban planning, law, community organizing, social welfare, research in government and private organizations, and much more.

Students interested in declaring a major or minor in sociology or that have any questions, should email soc@neiu.edu or the Department Chair, Dr. Olivia Perlow at o-perlow@neiu.edu. Students may also stop by the Department office (LWH 2090). Students will be assigned a faculty advisor upon declaring a major in sociology.

Students in other majors who are looking for First-Year Experience (FYE) courses, General Education courses, or Engaged Learning Experience Boundary-Crossing (ELE-X) courses may be interested in taking any of the following sociology courses:

Code	Title	Hours
First-Year Experience (FYE) Courses		
SOC-109A	First Year Experience: Investigating Chicago: Immigration & Migration	3

Andreas Y. Savas Kourvetaris, Ph.D., Associate Professor
 David Springer, Instructor
 Brett C. Stockdill, Ph.D., Professor
 Mark Wodziak, Instructor

SOC-100. Introduction To Sociology. 3 Hours.

Fundamental concepts involved in understanding human societies. Socialization, culture, social interaction, social institutions, social stratification, and social change are discussed.

SOC-104. Schools And Society. 3 Hours.

This course examines the different roles that educational institutions play in fostering, perpetuating, and challenging inequalities for different social groups in American society.

SOC-105. Social Inequalities And Social Change. 3 Hours.

Examines critical sociological explanations of the causes and consequences of classism, racism, sexism, homophobia and other social inequalities; explores how inequalities are institutionalized, legitimized, and experienced by different groups of people; examines collective efforts to promote social change, including collective action and social movements.

SOC-109A. First Year Experience: Investigating Chicago: Immigration & Migration. 3 Hours.

In this course, the five foundations of the First-Year Experience (Future Planning, Integral Preparation, Research, Self-discovery and Transitions) are interwoven with the field-specific concepts and terminology of sociology. Using the city as a lab, freshmen explore Chicago's immigrants and immigration patterns, actively discovering the complexity and diversity of Chicago as an immigrant destination through readings, films, speakers, and out-of-class experiences.

SOC-204. Sociology Of Small Groups. 3 Hours.

A study of the individual and group relationships in society in terms of the various types of social collectives; primary and secondary groups, crowds and publics, collective behavior and social movements with emphasis on the symbolic nature of social interaction.

Prerequisite: SOC-100 with a minimum grade of C.

SOC-205. Contemporary Social Issues. 3 Hours.

Analysis and interpretation of major contemporary social issues, such as war and peace, poverty, racism, sexism, power structures; critical evaluation of present and suggested programs to meet current problems.

SOC-206. Drugs And Society. 3 Hours.

Review of literature and current research on drug use. Examination of patterns of drug use, drug-related policies and their enforcement, and examination of responses to addiction.

SOC-214. Sociology Of Intimacy, Marriages And Families. 3 Hours.

Examination of dynamics and trends in relationships and families. Areas of study include history of families, changing demographic patterns, family structures, gender, sexuality, reproductive technology, power in relationships, and divorce.

SOC-250. Sociology Of Deviance. 3 Hours.

Employs sociological approach to deviance in society. Origins and functions of deviance; the ambiguous institutionally and socially constructed nature, definitions, and measurement of deviance; the impact of deviance on personal and social identity; deviant behavior; and deviance and social change. Major theoretical perspectives on deviance, current research, and portrayals of deviance in popular culture.

SOC-270. Sociology Of Latinas. 3 Hours.

This course examines the diversity of Latina experiences in the United States and other countries. Students will explore social, economic, cultural, and political issues that affect the lives of Latinas. The course will examine the historical and contemporary construction of Latina identities, communities, and political struggles. Of particular interest will be the impact of social inequalities on Latina lives as well as Latina responses to these inequalities.

SOC-300. Queering Sociology. 3 Hours.

This course introduces students to radical queer activism and scholarship aimed at creating a more just and inclusive world. Using a queer intersectional perspective, this course explores alternatives to traditional notions about sex, gender, sexuality, relationships, family, assimilation and democracy. Students learn to examine how interdependent oppressions (e.g., homophobia, transphobia, racism, classism, sexism) interact to shape the lives of queer and trans people—and straight and cisgender people too. Topics include incarceration, gender violence, homelessness, policing, education, marriage, sex, intimacy, (dis)ability, health and disease, immigration, gentrification and war.

Prerequisite: SOC-100 with a minimum grade of C and SOC-105 with a minimum grade of C or (WGS-101 with a minimum grade of C or WGS-210 with a minimum grade of C).

SOC-302. Sociology Of Aging. 3 Hours.

The aging process, examined from both an individual and societal perspective; problems, potentials, and realities of aging. Topics of study include the nature and quality of relations among members of different generations, age norms, age constraints, and adult socialization as well as historical and cross-cultural comparisons of aging.

Prerequisite: SOC-100 with a minimum grade of C.

SOC-306. Women, Gender And The "F Word". 3 Hours.

Analyzes changing representations of women in popular culture. Critically explores Western feminist struggles, commitments, and perspectives with special emphasis on the intersections of gender, race, ethnicity, social class, sexuality, and nation of origin in women's lives.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C or WSP-101 with a minimum grade of C.

SOC-307. Men & Masculinities. 3 Hours.

Addresses the central themes that have emerged in the feminist-inspired sociological research on men and masculinities. These themes include men's institutionalized power and privilege over women, inequalities among different groups of men (e.g., power disparities across race, ethnicity, class, sexuality, and nation of origin), and the costs men and women pay for men's conformity to rigid notions of masculinity. In our exploration of these themes, we will discuss masculinities at the individual, interpersonal, institutional, societal, and global levels.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-309. Sociology Of Racism. 3 Hours.

Survey of the sociological and historical development of the theories of race and racism and the impact these theories have had on the implementation of social policy. Black experience in America is highlighted and special attention is given to institutional expressions of racism in the Western World.

Prerequisite: SOC-100 with a minimum grade of C or AFAM-200 with a minimum grade of C.

SOC-310. Social Movements. 3 Hours.

A systematic analysis of selected social and political revolutions and/or revolutionary movements in the United States and globally.

Prerequisite: (LLAS-101 with a minimum grade of C or MCS-101 with a minimum grade of C) or SOC-100 with a minimum grade of C.

SOC-311. Sociology Of Sports. 3 Hours.

This course examines the ways in which sports are entangled in socio-political, cultural, and economic forces. To view sports sociologically means to investigate how people think about sports themselves, the individuals who participate in them, and the people who watch them. These elements cannot be separated from social norms, practices, and inequalities based on race, class, gender, sexuality, ability, age, etc. This course covers a wide range of topics as they relate to the consumption and performance of sports in American culture and beyond, from consequences, risks, and ethical issues, to community, socialization, and violence in sports.

SOC-312. Sociology Of Health And Illness. 3 Hours.

Examines the social, political, economic and cultural aspects of health and illness. Emphasis on the interaction between social inequalities and health/illness. Topics will include social factors and illness, the meaning and experience of illness, health care systems and providers, bioethics, environmental injustice, violence, and militarism. Also explores the links between patterns of health/illness in the United States and globally as well as activism around health/illness.

SOC-313. Social Demography. 3 Hours.

Population characteristics and population dynamics in a variety of cultural settings; political, economic and sociological implications of population trends, resources and approaches in demographic analysis.

Prerequisite: SOC-100 with a minimum grade of C.

SOC-314. Urban Sociology. 3 Hours.

This course examines population characteristics, social structure, social policy and social change associated with cities and urban communities. This course emphasizes class, race, gender and sexual inequalities and their relationship to gentrification, urban-suburban relations, and urban movements for social justice.

SOC-316. Race And Ethnic Relations. 3 Hours.

A cross-cultural study of the patterns of interaction between racial and ethnic groups, analysis of the sources of prejudice and discrimination; examination of the relationships between race and ethnic relations and patterns of stratification.

SOC-317. Sociology Of Religions And Spirituality. 3 Hours.

Study of the social aspects of religious beliefs, practices and participation. The Church as a social institution and its relationship to social class, social control. Religion as a form of expressive behavior. The function of religion for the individual and for different social groups.

Prerequisite: SOC-100 with a minimum grade of C.

SOC-318. Sociology Through Film. 3 Hours.

This course utilizes different types of films (i.e. narrative feature-length and documentary) to illuminate sociological phenomena. In addition, this course teaches students how to apply relevant sociological concepts and research to film and to the real world. Topics may vary widely, ranging from gentrification to globalization. This course also facilitates critical analysis of film, where students become active participants, identifying ways in which films can uncritically transmit stereotypes, misconceptions and ideologies regarding race/ethnicity, gender, class, social and political life, and more.

SOC-320. Sociological Analysis. 3 Hours.

An introduction to when and how to do sociological analysis of popular and scholarly opinion, with a focus on developing and/or improving communication and critical thinking skills. The course integrates sociological theory and methods and requires students to analyze and critique theories, opinions, and research found in a variety of popular and scholarly materials using a sociological perspective.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-321. Class, Labor Inequalities, And Work. 3 Hours.

Examines how social and economic relations produce and reproduce class and labor inequalities. Analyzes the intersections of class with multiple forms of oppression; the conditions faced by low-wage workers in industrial, agricultural and service jobs; the impact of globalization on labor markets, labor organizations and politics in the U.S. and globally; and how class and labor inequalities are resisted and changed.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-324. Power, Politics & Society. 3 Hours.

Centers on the intersection of politics and social change. Critically examines political relations with respect to, but not limited to, the social roles of power, conflict, cooperation, practices, influence, authority, identities, nationalism, and transnational processes. Explains how power and politics structure society to consistently advantage particular groups and disadvantage other groups.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-328. Extreme Right Groups. 3 Hours.**SOC-329. Sociology Of Violence. 3 Hours.**

This course covers cross-cultural examinations of violence. It explores the implications of and responses to violence.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-331. Militarization, Power, And Inequality. 3 Hours.

Examines the interplay between race, gender, class, sexualities, globalization, power and militarization through engagement with sociological scholarship. Additionally, analysis of the historical and sociopolitical conditions, complex processes, and multiple practices that enable the militarization of a society are examined. Resistance and alternatives to militarization are also examined.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-332. Schools, Domination & Liberation: Sociology Of Education. 3 Hours.

Introduces the major theoretical trajectories in the sociology of education. Examines the structure, practices and outcomes of schooling in light of their relationships to the wider society in which schools are situated. Studies the links between schools and social inequality, educational opportunity, educational stratification by race, class, gender, ability, immigration, and sexuality. Analyzes sociological perspectives on contemporary education reform.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-335. Sociological Theory. 3 Hours.

Explores how different sociological theorists make sense of society with particular emphasis on capitalism, white supremacy, patriarchy and homophobia. This course is an overview of social theory including both classic and modern theorists paying close attention to how historical power and inequality shaped "the canon" and the voices at the center and margins of social theory.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-336. Contemporary Sociological Theory. 3 Hours.

A survey of contemporary sociological theories and paradigms, with a focus on writings that have most influenced the development of contemporary sociological theory and the way sociologists currently approach and analyze their subject matter. The course will explore theories, perspectives, ideas and works from voices generally unheard in discussions of formal sociological theory - namely, the voices of people of color and women.

Prerequisite: SOC-100 with a minimum grade of C and (SOC-211 with a minimum grade of C or SOC-335 with a minimum grade of C).

SOC-337. Sociological Research Methods. 3 Hours.

Emphasis on increasing student's abilities to communicate their understanding of social science research. Focus on learning social science research vocabulary, developing an understanding of issues in the philosophy of the social sciences, learning steps and procedures in sociological research, and using writing skills relevant to social science research.

SOC-338. Environmental Sociology. 3 Hours.

This course examines the relationship between social change, social systems, and the environment. It explores multiple perspectives in the field of environmental sociology, including political economy, environmental inequalities, environmental discourse, and environmental justice, and the intersections of race, gender, class, nation, and environmental disruptions.

SOC-339. Introduction To Social Statistics. 4 Hours.

This course is an introduction to descriptive and inferential statistics which are the basic statistical methods used in sociology and other social and behavioral science disciplines. Students will also learn to use a statistical software package to analyze and interpret survey data.

Prerequisites: ((SOC-100 and SOC-105 and ((SOC-211 and SOC-211 or (SOC-337 and SOC-337) and ((MATH-092 - 499 or (MATH-101B - 147Z or (MATH-148B - 499Z and MATH-148B - 499Z or (ACT Math 22 - 36 and ACT Math 22 - 36 or (Accuplacer Adv. Algebra & Func 237 - 300 and Accuplacer College Level Math 020 - 120 or (SAT Math 530 - 800 and SAT Math 530 - 800 or Accuplacer Adv. Algebra & Func 237 - 300 or NEIU Math Placement Result 30 - 45.

SOC-340. Sociology Of Sexualities. 3 Hours.

Examines sexualities across dimensions of time, place, social institutions, race, class, sex and gender. Emphasizes the dual themes of social construction and social control. This course challenges the binary construction of sex, gender, and sexuality and encourages students to view sex as a positive life force rather than one based on shame, guilt, danger or morality. Explores individual and collective resistance to oppressive sexual norms and practices.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-341. Independent Study In Sociology. 3 Hours.

Research study in an area of special interest to the student involving research methodology and field studies. Independent Studies require the approval of the instructor, department chair and the College Dean.

Prerequisite: SOC-100 with a minimum grade of C.

SOC-341A. Independent Study In Sociology. 3 Hours.

This independent study covers a sociological research study in an area of special interest to the student. Independent Studies require the approval of the instructor, department chair and the College Dean.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-341B. Independent Study In Sociology. 2 Hours.

This independent study covers a sociological research study in an area of special interest to the student. Independent Studies require the approval of the instructor, department chair and the College Dean.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-341C. Independent Study In Sociology. 1 Hour.

This independent study covers a sociological research study in an area of special interest to the student. Independent Studies require the approval of the instructor, department chair and the College Dean.

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-342. Sociology Internship Seminar. 3 Hours.

Taken concurrently with SOC-345. The Sociology Internship Seminar investigates the application of sociological knowledge and skills to an actual organizational setting. Investigates interpersonal relationships, internal organizational relationships and dynamics, and the social context of organizations within the larger community and society at large. Critical examination of the relationships between organizations, social inequalities, and social justice. Exploration of career and graduate school resources and information.

Prerequisite: SOC-100 with a minimum grade of C and SOC-105 with a minimum grade of C and (SOC-211 with a minimum grade of C or SOC-337 with a minimum grade of C) and SOC-335 with a minimum grade of C.

Corequisite: SOC-345.

SOC-343. Sociological Practice And Social Action Seminar. 3 Hours.

This seminar provides students with an opportunity to do service and research in an applied organizational setting. It includes problem solving through involvement and social action research in one organizational setting. As an applied sociologist, the student will learn to produce information that is useful in resolving problems in community organizations, social service organizations and grass roots social change organizations.

Prerequisite: SOC-100 with a minimum grade of C.

SOC-344. African American Women:Feminism, Race, And Resistance. 3 Hours.

A systematic examination of the collective experiences of African American women, historical and contemporary; the myths versus the realities of their everyday lives, including the interrelatedness and simultaneous effect of race, class, gender, sexual orientation and age in their lived experiences.

Prerequisite: SOC-100 with a minimum grade of C or AFAM-200 with a minimum grade of C.

SOC-345. Sociology Internship Placement. 3 Hours.

Taken concurrently with SOC-342. Students will complete 144 hours at an internship placement in an organization chosen in collaboration with the professor. Performance of various tasks under the direction of a site supervisor to enhance the understanding and application of sociological theories and concepts and to gain experience relevant to career and/or graduate school interests. Prereq.: Senior status; SOC-100; SOC-211; SOC-335.

Prerequisite: SOC-100 with a minimum grade of C and SOC-211 with a minimum grade of C and SOC-335 with a minimum grade of C.

Corequisite: SOC-342.

SOC-346A. Writing Intensive Program: Critical Writing For Sociology. 3 Hours.

Teaches different types of critical sociological writing for different audiences through the examination of different sociological themes. Includes library and online research, ASA citation style, organizational structure, thesis statements, summary and analysis, and plagiarism. Fulfills the Writing Intensive Program requirement.

Prerequisite: SOC-100 with a minimum grade of C and SOC-105 with a minimum grade of C and ENGL-101 with a minimum grade of C.

SOC-347. Sociology Of Media. 3 Hours.

A systematic examination of mass media as a social construction of knowledge. Major focus is on the social and historical contexts within which the media are created, the powerful influence of the various media on the socialization process, and the intersections of race, class, gender, sexual orientation and age in the images and knowledge created by mass media.

SOC-349. Black Social Movements. 3 Hours.

Examination of the African American civil rights movement. Analysis of the origins and development of the modern civil rights movement, a movement that emerged in the South during the 1950s. Exploration of organized, collective forms of social change and theories of social movements and collective action. Emphasis on local, regional and national civil rights campaigns; the development, achievements, and disintegration of the national civil rights coalition; and the contributions of the male and female unsung heroes of the movement.

Prerequisite: SOC-100 with a minimum grade of C.

SOC-350. Sociology Of Black Communities. 3 Hours.

This course is designed to explore institutional variation and social change within African-American communities. We will examine African-American populations in different settings, both contemporary and historical, and attention will be given to major traditions of sociological theory and research related to these communities. We will additionally explore the origin, structure, reproduction, and outcomes of racism and white supremacy, and how this relates to labor market processes and outcomes, social mobility and living standards, and major social institutions such as healthcare, education, and criminal justice systems, as they relate to African Americans.

SOC-351. Senior Seminar In Sociology. 3 Hours.

Discussion, critical review and integration of student's work with current research. Preparation of a research paper with ongoing feedback from the instructor.

SOC-352. Sociology Of HIV/AIDS. 3 Hours.

Examination of the sociological aspects of the AIDS crisis. Socio-history of the HIV/AIDS crisis in the United States and globally. Emphasis on how racial, class, gender and sexual inequalities have shaped the epidemiology of HIV/AIDS. Responses of dominant social institutions to the AIDS crisis. Collective action by impacted communities around issues of education, prevention, research, health care and support services. Contemporary issues facing people living with HIV/AIDS including stigma, discrimination, mental health, access to treatment, legal issues, and empowerment.

Prerequisite: SOC-100 with a minimum grade of C.

SOC-358. Sociology Of Youth And Youth Culture. 3 Hours.

An analysis of youth and youth culture including the historical context of adolescence, sociopolitical issues confronting youth and youth culture as a form of social and political resistance. Each topic will be explored through detailed analyses of relevant literature, discussions with professionals who work with youth, and student research projects.

Prerequisite: SOC-100 with a minimum grade of C.

SOC-360. Sociology Of Occupations And Professions. 3 Hours.

Exploration of the historical, theoretical and empirical literature on occupations and professions. Issues to be explored include the relationship between occupations and the family, education, technology and the political environment.

Prerequisite: SOC-100 with a minimum grade of C and SOC-221 with a minimum grade of C.

SOC-362. Identity And Social Policy. 3 Hours.

Critically examines the relationship between social policy, culture, identity, and change. Explores different perspectives on American and international social policy development, identity, and advocacy.

Requirement: noted prerequisites or permission of instructor

Prerequisite: SOC-100 with a minimum grade of C or SOC-105 with a minimum grade of C.

SOC-365. Sociology Of Globalization. 3 Hours.

Globalization is the worldwide integration of government policies, cultures, social movements, and financial markets through trade and the exchange of ideas. This course analyzes the processes that produce globalization and the outcomes of globalization, with a special focus on Chicago. Using a sociological lens we examine the development of globalization and its effects upon nation-states, individuals, culture, politics, inequality, and other aspects of society. Students will critically evaluate the effects of globalization with the goal of becoming engaged and empowered members of the global community.

Prerequisite: SOC 100 with a minimum grade of C.

SOC-370. Sociology Of Food. 3 Hours.

This course examines the relationship between food, society, and the environment. It explores the ways in which social structures and relations affect what people eat, how politics and economics affect the kinds of food that is produced, and where, how, and by whom it is produced. It also examines the social and environmental problems associated with food and agriculture, with a special emphasis on how global capitalism and inequalities affect both.

SOC-371. Sociology Through Service Learning. 1 Hour.

This course offers students an opportunity to acquire sociological content knowledge and develop analytical skills while providing important service at self-selected sites within the Chicagoland area that specifically serve marginalized populations. Students learn by applying course material to their experiences, and reflecting on those experiences. Students are expected to develop a sociological understanding of issues impacting marginalized communities and a commitment to civic responsibility and social justice.

SOC-373. Community Action And Resistance. 3 Hours.

Chicago metropolitan field investigation of community conditions, local institutions and action programs. Field investigations may be broad or concentrate on a particular school or community.

Prerequisite: SOC-100 with a minimum grade of C and (SOC-211 with a minimum grade of C or SOC-337 with a minimum grade of C).

SOC-375. Government Intelligence Agencies. 3 Hours.

A study of the various government agencies which collect intelligence within the U.S. and in foreign countries with emphasis on the kinds of intelligence gathered and the political uses to which it is put. The work of the CIA and the FBI are critically examined.

Major in Sociology

University Core Curriculum Requirements

General Education Distribution Area	Cr. Hrs.
Fine Arts (FA)*	6
2 courses, from at least two of the following areas of study: Art, CMT (Mass Media or Theatre), Music (includes Dance).	
Humanities (HU)*	9
3 courses, from at least two of the following areas of study: CMT (Communication), English, Linguistics, Philosophy, Women's and Gender Studies, World Languages and Cultures, (Note: No more than two foreign language courses may be used to fulfill this requirement.)	
Behavioral/Social Sciences (SB)*	9
3 courses, from at least two of the following areas of study: African & African American Studies, Anthropology, Computer Science, Economics, Geography & Environmental Studies, History, Justice Studies, Latino & Latin American Studies, Political Science, Psychology, Sociology, Social Work	
Natural Sciences (NS and NSL)**	9
3 courses, from at least two of the following areas of study; one course must have a laboratory component (NSL): Biology, Chemistry, Earth Science, Environmental Science, Physics (Note: If an FYE ANTH that counts as Natural Science is taken, only one Biology course may be used for Natural Science).	

Engaged Learning Experiences

Students must complete, at Northeastern, three courses designated as Engaged Learning Experiences courses. One of the Engaged Learning Experiences courses must be at the 300-level, and one Engaged Learning Experiences course must be designated as "Boundary Crossing".

Discipline Specific (ELE-DS)

These courses have pre-requisites that are specific courses within a program of study. Discipline Specific courses give students a deeper understanding of how knowledge is created and applied in their field.

Boundary Crossing (ELE-X)

These are courses that cross disciplinary boundaries and/or cross boundaries through engagements outside the classroom or University allowing students to see how knowledge gained in one field might inform other fields or other aspects of society.

Math/Quantitative Reasoning (MA)

1 Math course, that has intermediate Algebra as prerequisite OR is a course listed on the General Education Distributive Learning List of Approved Courses. Any 3 hour college level math course, beyond Intermediate Algebra, meets this requirement.

* Majors in Fine Arts, Humanities or Social/Behavioral Sciences, may waive up to 6 credit hours of General Education requirements in the corresponding distribution area.

** Majors in Natural Sciences may waive up to 9 credit hours of General Education requirements in the Natural Sciences distribution area.

Students should also be aware of all other university requirements to obtain a degree - NEIU requirements (<http://catalog.neiu.edu/graduation-requirements/bachelors-degree/>)

Major in Sociology for the Bachelor of Arts Degree

Code	Title	Hours
Required Core Courses		
SOC-100	Introduction To Sociology	3
SOC-105	Social Inequalities And Social Change	3
SOC-335	Sociological Theory	3
SOC-337	Sociological Research Methods	3
SOC-339	Introduction To Social Statistics	4
SOC-342	Sociology Internship Seminar ¹	3
or SOC-351	Senior Seminar In Sociology	
SOC-346A	Writing Intensive Program: Critical Writing For Sociology	3
Electives in Sociology ²		18
Total Hours		40

¹ SOC-342 is Spring Semester and can be taken with SOC-345 for a total of 6 credits; SOC-351 is Fall Semester.

² Students should consult with their advisor to select electives that will best suit their academic and career goals. Students may substitute 1 cognate course outside of Sociology for an elective course with the approval of the Department Chair.

This sample curricular map is provided to guide full-time, first year students in planning for their major. This guide should not replace regular consultations with your academic advisor. Part-time and transfer students should consult with an academic advisor to develop curricular plans to accommodate their needs. For specific recommendations of courses not identified, please consult your academic advisor.

Students majoring in Elementary Education and Early Childhood Education who have selected Sociology as a minor must complete a minimum of 9 hours of the minor in courses at the 300-level to meet graduation and certification requirements.

Teaching English to Speakers of Other Languages (TESOL)

Teaching English to Speakers of Other Languages (TESOL) is the application of linguistics to the teaching of English to speakers of other languages. A degree in TESOL is in great demand, both in the U.S. and abroad. A career path in TESOL can result not only in the more obvious professions related to education (e.g., English language teacher, teacher trainer, program administrator, curriculum developer, materials developer) at the primary, secondary, and tertiary levels, but also in a variety of areas that require the skills set developed within a TESOL degree program (e.g., research, publishing, advocacy, government).

The NEIU TESOL Program (<https://www.neiu.edu/academics/college-of-arts-and-sciences/departments/teaching-english-speakers-of-other-languages-tesol/>) offers courses leading to a Master of Arts degree and a TESOL Graduate Certificate. The program also offers courses leading to an undergraduate minor in TESOL as well as an Illinois State Endorsement to teach ESL.

Further information about our programs can be found on our website: TESOL (<http://www.neiu.edu/academics/college-of-arts-and-sciences/departments/teaching-english-speakers-other-languages-tesol/>)

- Minor in TESL (<http://catalog.neiu.edu/arts-sciences/teaching-english-second-foreign-language/minor-tesl-tefl/>)

Undergraduate students may complete a minor in Teaching English to Speakers of Other Languages (TESOL). Minor Declaration Forms may be obtained from the department advisor, John Armour (j-armour@neiu.edu).

Undergraduate students working toward the completion of a degree in the College of Education that will culminate in their earning a valid Illinois teaching certificate (Type 03, 04, 09, or 10) may simultaneously complete the requirements recognized by Northeastern Illinois University's Goodwin College of Education and the Illinois State Board of Education (ISBE) for an endorsement in TESOL. The state requirements include successful completion of the coursework identified for the minor along with completion of 100 hours of TESOL clinical experience (TESL 399).

Further information about our programs can be found on our website: TESOL (<http://www.neiu.edu/academics/college-of-arts-and-sciences/departments/teaching-english-speakers-other-languages-tesol/>)

- Master of Arts in Teaching English to Speakers of Other Languages (<http://catalog.neiu.edu/arts-sciences/teaching-english-second-foreign-language/master-arts-tesl-tefl/>)
- TESOL Endorsement (<http://catalog.neiu.edu/arts-sciences/teaching-english-second-foreign-language/tesl-endorsement/>)
- TESOL Graduate Certificate Program (<http://catalog.neiu.edu/arts-sciences/teaching-english-second-foreign-language/certificate-tesol-graduate/>)

Further information about our programs can be found on our website: TESOL (<http://www.neiu.edu/academics/college-of-arts-and-sciences/departments/teaching-english-speakers-other-languages-tesol/>)

Lesa C. Davis, Ph.D., Professor, Chair

John Armour, M.A., Instructor and TESOL Graduate Certificate and Minor Advisor

Anne Gill-Bloyer, M.A., Instructor and SAELL Program Coordinator

Courtney Francis, M.A., Instructor and TESOL Clinicals Supervisor

Senyung Lee, Ph.D., Assistant Professor

Jeanine Ntahirageza, Ph.D., Professor and Program Coordinator

Ulugbek Nurmukhamedov, Ph.D., Associate Professor

William Stone, Ph.D., Associate Professor

Tina Villa, Ph.D., Instructor and Coordinator of the English Language Program

Gina Wells, Ph.D., Instructor and Graduate Student Advisor

TESL-109A. First Year Experience: Chicago Speaks: Helping Immigrants Communicate. 3 Hours.

In this course, the four foundations (Future Planning, Academics, Self-Discovery and Transitions) of the First-Year Experience are interwoven with the field specific concepts and terminology of teaching English as a second language (TESL). This course introduces the structure of the English language and methods of teaching it to speakers of other languages. This involves investigating the pronunciation and grammar of English as well as looking at ways to teach these subjects along with listening, speaking, reading and writing skills to English Language Learners (ELLs). The course will involve a service learning component in which students will tutor ELLs in various sites throughout Chicagoland. As students study the basics of teaching English as a second language, they will develop academic skills that will contribute to their success in college and beyond.

TESL-301. The English Language For Teachers. 3 Hours.

All language teachers must understand how the English language works and must be able to describe how it works. This course is designed for future teachers of the English language. It covers the structure of sounds, words, phrases, and sentences; language use; and the structure of meaning of the English language, with applications of each topic to the teaching of the English language and English language arts. The history of the English language will also be included, as background to English word and sentence structure.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-310. English Grammar: Description & Instruction. 3 Hours.

All teachers of English as a second or foreign language must have a good descriptive knowledge of English grammar as well as an arsenal of techniques for instructing their students. This course is intended to help future ESL/EFL teachers develop an understanding of the structure of English sentences and the problems that non-native students face when learning English grammar. This course will also investigate ways of teaching grammar to English language learners.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-320A. Language & Culture: General. 3 Hours.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-320D. Language & Culture: Japan. 3 Hours.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-320G. Language & Culture: Southeast Asia. 3 Hours.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-320H. Language & Culture: Thailand. 3 Hours.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-320K. Language & Culture: Latin America. 3 Hours.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-320N. Language & Culture: Native American. 3 Hours.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-320O. Language & Culture: Afro-American. 3 Hours.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-320P. Language & Culture: The Deaf. 3 Hours.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-320Q. Language & Culture: Maya. 3 Hours.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-321. 1st & 2nd Language Acquisition. 3 Hours.

Survey of recent theories and research on children's acquisition of phonological, morphological, syntactic, semantic and pragmatic systems of their first language. Survey of recent theories and research on second language acquisition.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-330. Language, Society, And Education. 3 Hours.

Researchers who study the relationship between language and society or culture are in a unique position to provide insight into language- and culture-related social problems. This course is based on the notion that many educational problems are related to differences between students' home language or dialect and the "official" school variety. It examines the relationship between language, society, and culture with particular attention to how factors such as class, gender, race, and ethnicity impact student performance in the classroom. Issues of identity, bilingualism, and language prejudice will also be addressed.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-340. Practices & Procedures. 3 Hours.

Practices and techniques related to the teaching of English as a second language, in ESL or bilingual education programs; meant for those students who are not yet teaching in the field.

Prerequisite: ENGL-101 with a minimum grade of C and (TESL-321 with a minimum grade of C or TESL-341 with a minimum grade of C).

TESL-341. Principles Of Language Teaching. 3 Hours.

Theories and principles underlying the teaching of English as a second language to limited-English speaking children and adults. Survey of various methodologies in second language teaching and bilingual education. Reviews relationships between language and culture and discusses the major problems in language education.

Prerequisite: ENGL-101 with a minimum grade of C.

TESL-343. Introduction To Language Assessment. 3 Hours.

This is an introductory language assessment course that offers an opportunity to gain knowledge in the basic concepts in language assessment. It covers basic principles and procedures of assessment, with an emphasis on the second language context. In addition to theoretical foundations, students will gain practical experience in how to construct test items with considerations of reliability and validity, use alternative assessment, analyze test results, and communicate test results with diverse audiences.

Prerequisite: TESL-340 with a minimum grade of C or TESL-341 with a minimum grade of C.

TESL-345. Linguistics & Reading. 3 Hours.

Relationship between language structure and the reading process with emphasis on the practical problems such as the variety of dialectally different sound-symbol-correspondences in English, the perception of speech sounds, the reader's interpretation of syntactic and semantic structures, various alphabetic systems for teaching reading. Designed to be useful to the in-service classroom teacher as well as to undergraduates.

Prerequisite: TESL-301 with a minimum grade of C.

TESL-399. Clinical Experience In TESL. 1 Hour.

This course is designed to provide on-site experience in teaching English to non-native speakers in grades K-12. Students will observe and work with a master teacher and be supervised by a TESL/TEFL professor. Student will engage in classroom discussion and various projects based on their classroom work.

Prerequisite: TESL-340 with a minimum grade of C.

TESL-402. Principles Of Linguistics For Teachers. 3 Hours.

This course examines the components of the science of language and how these relate to teaching English as a second/foreign language. Although the emphasis is on the linguistic components of English, a comparison with other languages and implications for teaching a second/foreign language will be integral to the course. Among other topics, it will cover English phonetics, phonology, morphology, syntax, and semantics and offer classroom-oriented applications of linguistic principles for effective instruction of English as a second or foreign language.

TESL-406. Adult Needs, Design And Assessment. 3 Hours.

Adult English language learners represent a wide variety of linguistic backgrounds, cultural experiences and personal needs. They may learn English for survival/life skills, job improvement or academic preparation. This course provides instructors with an appreciation for cross-cultural learners and their communication skills. In addition, this course looks at adult program options and their relationship to curriculum design. Principles of assessment, and varied assessment tools used in the adult education setting will also be addressed. Website tools aiding course management, assessment and self-study will be utilized.

Prerequisite: TESL-410 with a minimum grade of B.

TESL-409. Research Design & Methods. 3 Hours.

Survey course, reviewing the major trends and methodologies used in linguistics, language acquisition, and language teaching. Exploration of quantitative approaches used in language-specific inquiry through the examination of a variety of studies from the literature, their questions, their underlying assumptions, and their design. Prior knowledge of statistics is not required.

Prerequisite: TESL-402 with a minimum grade of C.

TESL-410. Techniques Of Teaching English As A Second Language. 3 Hours.

Survey of techniques specifically relevant to the teaching of English as a second language. Questions relating to the design and sequencing of ESL courses, to procedures for evaluation of ESL students and to criteria for choosing, adapting and creating teaching materials.

Prerequisite: TESL-414 with a minimum grade of C and TESL-402 with a minimum grade of C.

TESL-414. Theories Of Teaching English As A Second Language. 3 Hours.

Survey of theories of the teaching and learning of English as a second or foreign language. A look at the historical growth and development of second language methodologies from grammar-translation and the direct method, through the audio-lingual method and its offspring, and up to the current natural and eclectic period.

TESL-420. Structure Of Modern English. 3 Hours.

Description and analysis of the major grammatical structures of spoken and written English in light of traditional and descriptivist theories. This course covers practical issues and procedures involved in teaching grammar to ESL/EFL learners.

TESL-426. Advanced Linguistic Analysis. 3 Hours.

Advanced analysis of the structure of language, including phonology, morphology, syntax and semantics. Each topic will be explored through detailed analysis and comparison of data from a variety of languages in addition to English.

Prerequisite: TESL-402 with a minimum grade of C.

TESL-427. Teaching Pronunciation. 3 Hours.

This course covers practices and procedures involved in helping English Language Learners (ELLs) improve their intelligibility and increase their speech perception. Through an applied approach, students will develop a deeper understanding of English phonetics and phonology at both the segmental and prosodic levels. They will learn how to apply this knowledge to teaching pronunciation to English language learners (ELLs) of all ages. The course will also cover societal attitudes about accent through an investigation of current research.

Prerequisite: TESL-402 with a minimum grade of C and TESL-414 with a minimum grade of C and TESL-410 with a minimum grade of C.

TESL-430B. Structure Of Language: Latin. 3 Hours.

Prerequisite: TESL-402 with a minimum grade of C and TESL-420 with a minimum grade of C and TESL-426 with a minimum grade of C.

TESL-430C. Structure Of Language: Lakhota. 3 Hours.

Prerequisite: TESL-402 with a minimum grade of C and TESL-420 with a minimum grade of C and TESL-426 with a minimum grade of C.

TESL-430D. Structure Of Language: Rotuman. 3 Hours.

Prerequisite: TESL-402 with a minimum grade of C and TESL-420 with a minimum grade of C and TESL-426 with a minimum grade of C.

TESL-430E. Structure Of Language: Thai. 3 Hours.

Prerequisite: TESL-402 with a minimum grade of C and TESL-420 with a minimum grade of C and TESL-426 with a minimum grade of C.

TESL-430F. Structure Of Language: Tai, Kirundi, Tun, Arabic. 3 Hours.

Prerequisite: TESL-402 with a minimum grade of C and TESL-420 with a minimum grade of C and TESL-426 with a minimum grade of C.

TESL-433. Lexicography. 3 Hours.

Review of the problems and trends of word study in the past, especially the notions surrounding the concepts of authority and usage of language: scrutiny of the various types and sources of English vocabulary; recent linguistic insights considered in the light of their value for various kinds of handbooks.

TESL-440. Language & Literacy. 3 Hours.

Differences between spoken and written languages; the functions of writing in a literate society; writing systems with particular reference to English orthography; current psycholinguistic research on the acquisition of written language skill; pedagogical implications of linguistic views on literacy.

Prerequisite: TESL-402 with a minimum grade of C.

TESL-442. Using Technology With Second Language Learners. 3 Hours.

In this class, students will explore the interface between current approaches to second language pedagogy, theories of language learning, and technology. They will examine questions of the development and current status of computer applied language learning; the digital divide and language minority students; appropriate and inappropriate uses of technology for language learning; use of technology to support student instruction in listening, speaking, reading, writing, culture, pronunciation, vocabulary and grammar; technology and learner variation; and issues of technology and assessment.

Prerequisite: TESL-410 with a minimum grade of C.

TESL-445. Language Variation. 3 Hours.

All languages vary- across time, distance, social class, gender, situation, and ethnicity. This course examines the societal and cultural influences on both the forms and uses of different varieties of English as well as other languages, and demonstrates how one's language and language variety affect one's identity, school achievement, etc. Topics include language attitudes and stereotypes, ideology, intercultural and interethnic communication, and the spread of English. Special emphasis will be placed on how these notions of language varieties apply to the teaching and learning of second and foreign languages.

TESL-447. Pragmatics. 3 Hours.

Study of the interface between language and meaning at the level of discourse. Focuses on communication as dialogic interaction and the nexus of word meanings and speaker intentions in language use. Considers the multiple layers of context as factors that affect the interpretation of speaker role and appropriateness of use. Additionally, examines intercultural pragmatics as it pertains to the acquisition of second language culture and the communicative differences between cultures.

Prerequisite: TESL-445 with a minimum grade of C.

TESL-451. Lexically-Based Instruction. 3 Hours.

This course is built on the notion that the optimal second-foreign language syllabus is a lexically-based one. The course covers vocabulary knowledge and acquisition from the perspectives of both the second language learner and the teacher. Topics covered include what it means to "know a word", memory, dictionaries and other tools, learner strategies, vocabulary assessment, selection criteria, and teaching techniques.

Prerequisite: TESL-402 with a minimum grade of C and TESL-410 with a minimum grade of C.

TESL-452. Content-Based Instruction. 3 Hours.

Exploration of content-based instruction as an approach to teaching English language learners. Functioning as both a method in the English as a second or foreign language classroom and as a technique for meeting the needs of English language learners in the content area classroom, its theory and practice are examined through the various models and the standard-based curriculum. Additionally, practices and strategies related to planning, implementing, and managing ESL and content instruction, including classroom organization, teaching strategies for developing and integrating language skills, and choosing and adapting classroom resources are addressed.

Prerequisite: TESL-414 with a minimum grade of C.

TESL-460. Second Language Acquisition. 3 Hours.

Survey of recent theories and research on second language acquisition and bilingualism especially in relation to the process of second language learning; rationales of various language teaching methodologies and techniques as well as the concepts of transfer and interference, contrastive analysis and error analysis.

Prerequisite: TESL-410 with a minimum grade of C and TESL-420 with a minimum grade of C.

TESL-465. Experiential Preparation For Teaching English As A Second Language. 3 Hours.

Emphasis on the preparation of materials and the development of teaching strategies for specific ESL classroom uses. Students examine and evaluate commercially prepared and teacher made materials and lesson plans and devise a limited set of materials of their own. Students will either demonstrate these materials or observe their use in an actual classroom or tutoring situation.

Prerequisite: TESL-402 with a minimum grade of B and TESL-410 with a minimum grade of B and TESL-414 with a minimum grade of B.

TESL-468. Principles Of Language Assessment. 3 Hours.

The purpose of the course is to familiarize students with the fundamental concepts and principles of second language (L2) assessment. The students will gain hands-on experience in designing and administering language assessments in the areas of L2 reading, writing, listening, speaking, including vocabulary and grammar. In addition, this course is intended to train teachers how to evaluate popular standardized tests (e.g., iBT TOEFL, ACCESS for ELLs, IELTS) and help them interpret and write clearly about test results.

Prerequisite: TESL-410 with a minimum grade of C.

TESL-471. Evolution Of Laws & Policies In Language Instruction. 3 Hours.

Survey of the historical and current ideologies, the laws which they informed, and the policies and practices which resulted regarding language use in the educational system. Use will be explored in terms of language as a medium of communication, language as a medium of instruction, and language as a content area. Comparisons will be drawn between the US and international contexts. After extensive readings in the literature and in class preparation, students will be expected to design a grant proposal and make a presentation on a topic directly related to an area of their choice.

TESL-490A. Seminar In TESL: Materials Preparation. 3 Hours.

Prerequisite: TESL-426 with a minimum grade of B and TESL-445 with a minimum grade of B and TESL-460 with a minimum grade of B.

TESL-490C. Seminar In TESL: Special Education. 3 Hours.

Prerequisite: TESL-426 with a minimum grade of B and TESL-445 with a minimum grade of B and TESL-460 with a minimum grade of B.

TESL-490E. Seminar In TESL: Current Research. 3 Hours.

Prerequisite: TESL-426 with a minimum grade of B and TESL-445 with a minimum grade of B and TESL-460 with a minimum grade of B.

TESL-490F. Seminar In TESL: Language & Culture. 3 Hours.

Prerequisite: TESL-426 with a minimum grade of B and TESL-445 with a minimum grade of B and TESL-460 with a minimum grade of B.

TESL-490J. Seminar In TESL: Vocabulary. 3 Hours.

Prerequisite: TESL-426 with a minimum grade of B and TESL-445 with a minimum grade of B and TESL-460 with a minimum grade of B.

TESL-490K. Seminar In TESL: 1st & 2nd Language Acquisition. 3 Hours.

Prerequisite: TESL-426 with a minimum grade of B and TESL-445 with a minimum grade of B and TESL-460 with a minimum grade of B.

TESL-5901. Thesis Hours. 1 Hour.

Guidance of students conducting research and writing a thesis to fulfill the requirements for the Master of Arts degree in TESL/TEFL. This course requires approval of the instructor, Department Chair and the appropriate College Dean(s).

Prerequisite: TESL-402 with a minimum grade of C and TESL-420 with a minimum grade of C and TESL-426 with a minimum grade of C.

TESL-5902. Thesis Hours. 2 Hours.

See course description for TESL-5901.

Prerequisite: TESL-402 with a minimum grade of C and TESL-420 with a minimum grade of C and TESL-426 with a minimum grade of C.

TESL-5903. Thesis Hours. 3 Hours.

See course description for TESL-5901.

Prerequisite: TESL-402 with a minimum grade of C and TESL-420 with a minimum grade of C and TESL-426 with a minimum grade of C.

Master of Arts in Teaching English to Speakers of Other Languages

Master of Arts in Teaching English to Speakers of Other Languages

The M.A. in Teaching English to Speakers of Other Languages gives students an understanding of the nature of language, culture, instruction, assessment, and professionalism, and their interrelationships. The M.A. in TESOL prepares one to teach English in the US or overseas. In addition, students who have a valid teaching certificate can take courses leading to the Illinois State Endorsement to teach ESL. See more below under "TESOL Endorsement".

The program is designed for full- or part-time students, and all master's level courses in the fall and spring are offered in the evenings.

Requirements for Admission to the M.A. Program:

Students must fulfill the requirements for admission to the Graduate College of Northeastern Illinois University and apply to the TESOL Program for admission to the degree program. A student-at-large may transfer no more than 9 credit hours of graduate coursework into the graduate TESOL program.

Program Prerequisites:

Students entering the M.A. in TESOL program are not expected to have any prior preparation or knowledge of the field.

Language requirement:

- For students whose native language is English: 9 hours of college level work—or the equivalent—in one or more foreign languages, or a demonstrated proficiency in a foreign language at ACTFL level 2 or above.
- For students whose native language is not English: English proficiency demonstrated by a score of 95 on the internet based TOEFL (IBT), with a minimum of 20 on each of the four sections; or by a score of 7.0 on IELTS, with a minimum of 6.5 on each of the four sections; or by a score of 587 on the paper-based TOEFL.

For additional information visit the TESOL program website. (<https://www.neiu.edu/academics/college-of-arts-and-sciences/departments/teaching-english-speakers-of-other-languages-tesol/>)

Requirements for the Degree:

All graduate credits must be at the 400 level.

Students enrolled in the TESOL M.A. program must have a cumulative grade point average of at least 3.0 in all courses taken in fulfillment of the degree program.

All students pursuing a Master of Arts in TESOL will be required to submit a graduation project as one part of their graduation requirements. The project will consist of a capstone paper with 5 elements to be included as appendices. Students pursuing the M.A. in TESOL will be assigned an advisor early in their degree program for assistance in the preparation of the capstone paper. Please refer to the program website for specific information with regard to timing, formatting, etc.

Additionally, students can choose from two options: a thesis and a non-thesis option.

The thesis option requires 30 hours of completed coursework, including

1. all required courses with a cumulative grade point average of at least 3.0 and no more than two grades of C;
2. a master's thesis for an additional 6 hours credit.
